MOLESKIN SPANISH LEATHER

Shown on this page are many items upholstered in Moleskin Spanish Leather, a type of imitation leather which in appearance closely resembles the genuine. Only an expert can discern the difference. It is the highest grade imitation leather made and will outwear most grades of the genuine leather that have been used by furniture manufacturers during the past few years. Its lower cost and excellent wearing qualities are its greatest recommendations.

HOTEL PENNSYLVANIA

Opposite Pennsylvania Terminal - New York

The Public Ought to be Told

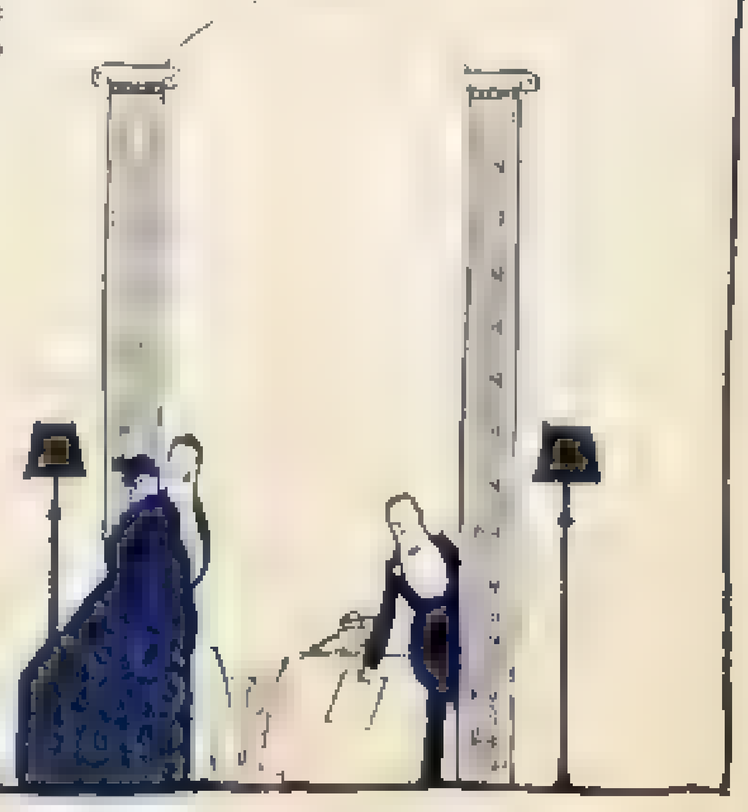
There are lots of things about hotel life that I've always thought the public ought to be told. Here, for instance, is a little hint which you may, sometime, be glad you saw and remembered:

If something unsatisfactory happens, back along the line of human connections through which service has to flow, the way to get it right is to *place your complaint high enough.* Don't complain to a waiter or bus-boy, but to a headwaiter; not to a bell-boy or page or porter, when you should put it to the assistant-manager.

In the Pennsylvania and the Statler Hotels you're promised satisfaction. The policies of the business, and the manager's intentions, are to give you full measure of what you're promised. It's a responsibility; and, naturally, the higher you go with your complaint, the more of that responsibility will you find working for you.

Why? Well, waiters and bell-boys change jobs oftener than executives, and are less interested in their jobs. Our "labor turnover" is pretty low, very low for a big hotel; and it is lowest among those employees who can understand and practice our policies—we're always weeding out the other kind. When you make your complaint to a department head, or to someone more responsible than the one who isn't giving you the required standard of service, you'll get action. It's a big part of my job to see that you do.

Speaking of the Pennsylvania, it may interest you mildly to know that in one month of thirty days, we served 262,019 meals—an average of 8,733 a day; and that the average number of registered guests was 2,874. That will help you to see that we have too much at stake to be indifferent about what kind of service you get—because we want to keep up this habit of breaking records.



Hotel Pennsylvania, with its 2200 rooms, 2200 baths, is the largest hotel in the world—built and operated for discriminating travelers who want the best there is. Associated with it are the four Hotels Statler in Buffalo, Cleveland, Detroit and St. Louis, and each of these five hotels makes reservations for all the others. All have private baths, circulating icewater and other unusual conveniences in every room. An entire block of ground in Buffalo has just been bought, for a new Hotel Statler.

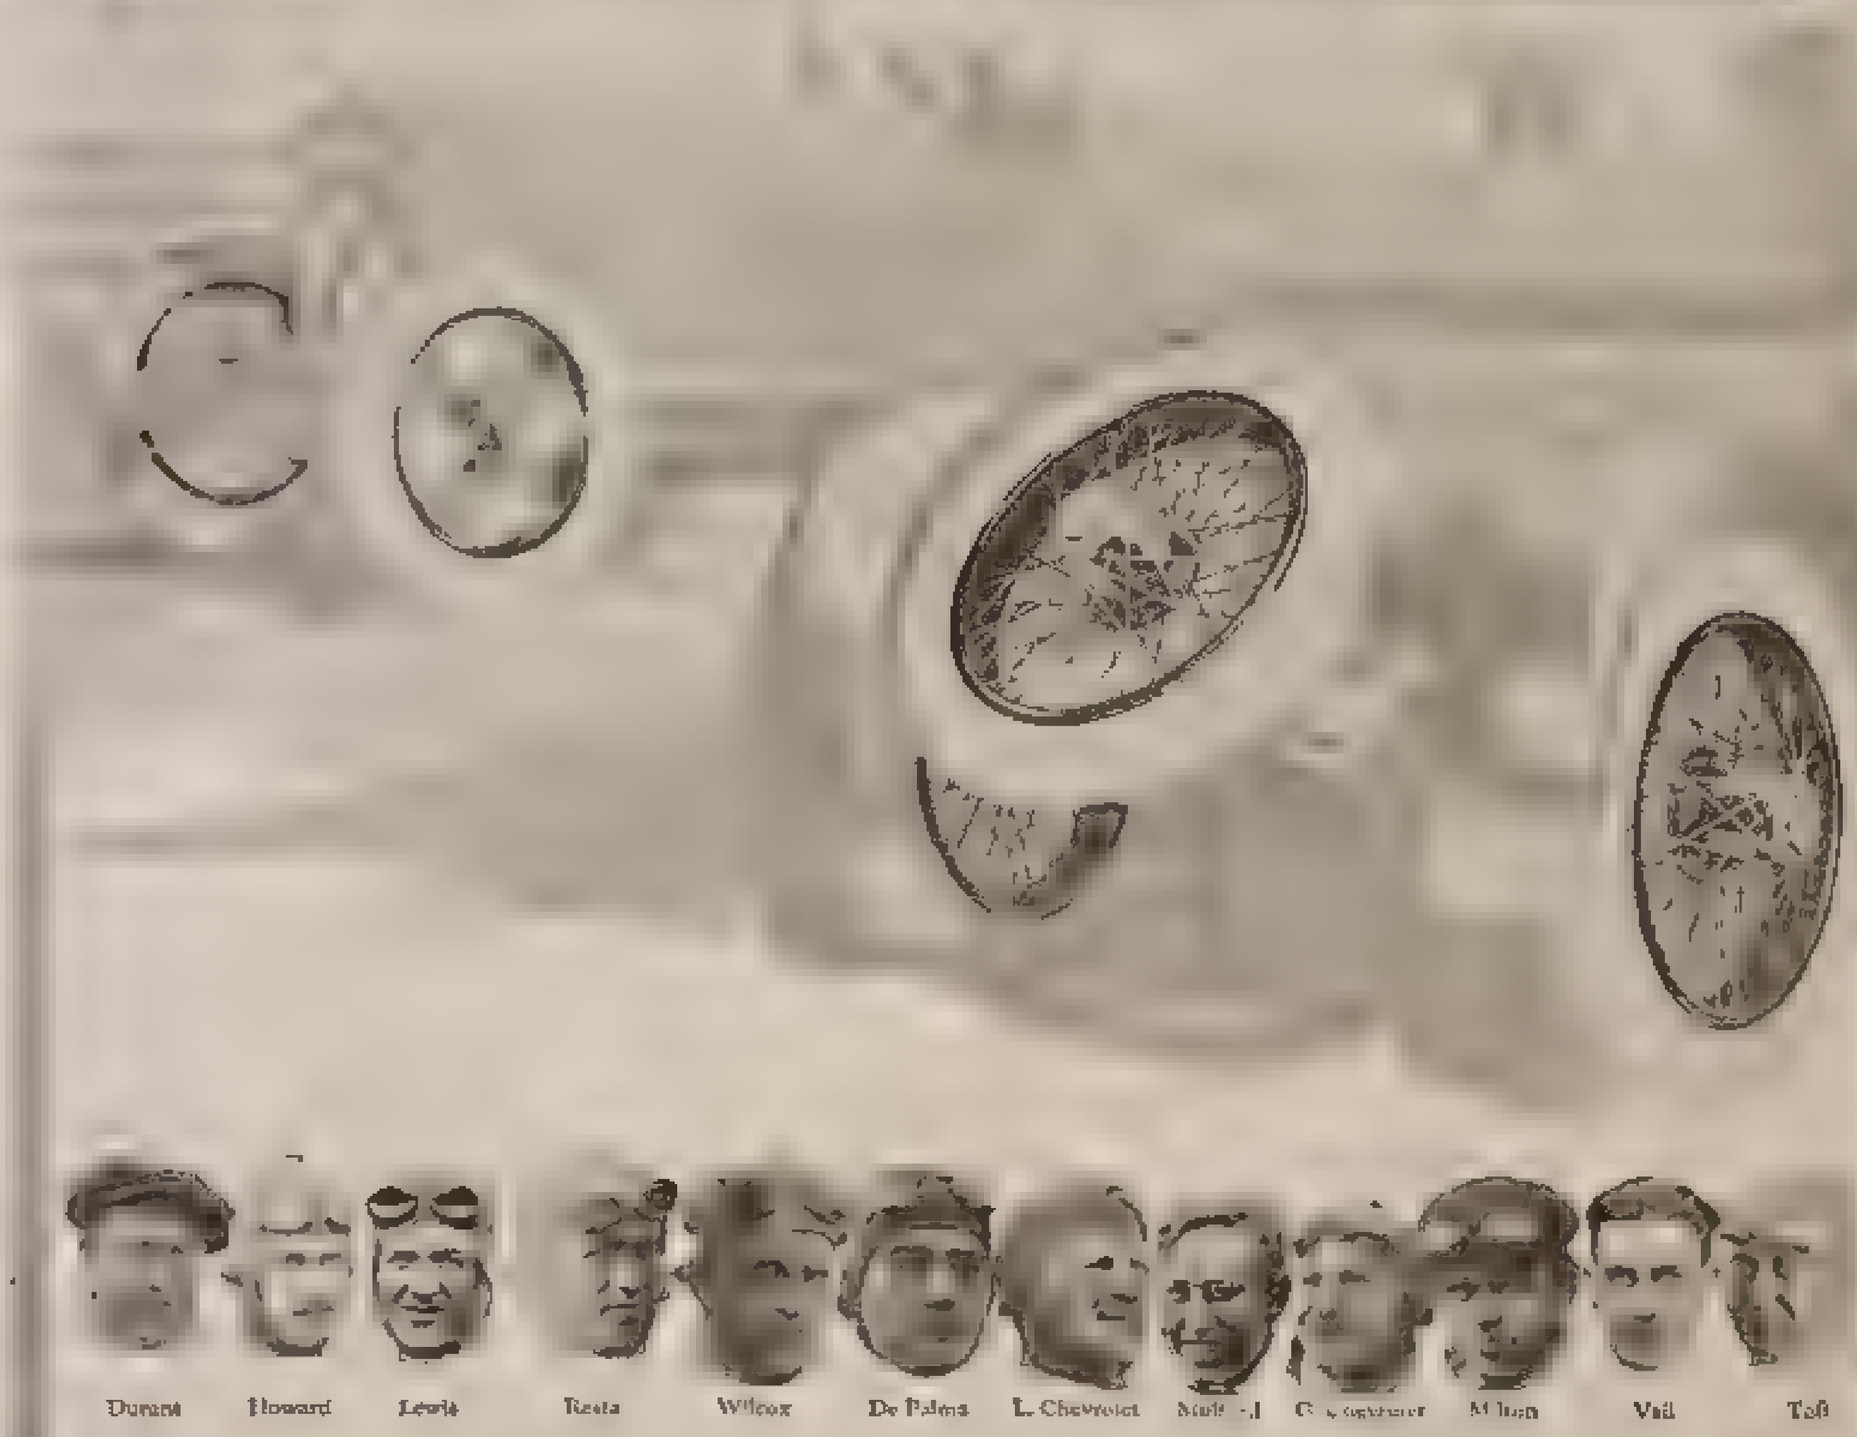
MARLIN-ROCKWELL INDUSTRIES



Durant Howard Lewis Resta Wilcox De Palma L. Chevrolet [illegible] [illegible] Milton Vail Taft

THESE famous drivers would not think of entering a race with any equipment other than

Rudge-Whitworth Wire Wheels

These highest grade of all wire wheels hold all records for speed at all distances and can be depended upon to "stand up" under the severest strains at racing speeds and to save all-important time by reason of their quick changeability made possible by their patented and unique locking ring.

The test to which wire wheels are put in a race of several hundred miles is not equalled by one hundred thousand miles of usual motoring service.

Note the added distinction given by Rudge-Whitworth Wire Wheels to the superior makes of cars that are equipped with them.

APPERSON

THE EIGHT WITH EIGHTY LESS PARTS

CREATIVE GENIUS

CREATIVE genius, whether it builds cathedrals or motor cars, is never satisfied, never at the end of its endeavor. Year by year the creative genius of Apperson Brothers has enriched the motor car industry; mechanically and artistically.

Creative genius made the first side door car; first double opposed motor; first float feed carburetor; first electric ignition. The Apperson motor of today, simplified with eighty less parts, is the culmination of Apperson creative genius.

As a result Apperson rushes from one mile an hour to 40 miles in high in 20 seconds; brakes to a dead stop from 40 miles in 4 seconds; turns on 130 inch wheel base in a 38¼ foot circle. Drive an Apperson first—then decide.

DEPENDABILITY

Atlas Cement

Stucco is the ideal building material with which to make the old home into a new one.

The need of new buildings to meet housing congestion conditions, the scarcity of skilled labor, and even financial reasons frequently make the remodeling of the old house desirable. If its structure is still sound your architect can easily make remodeling plans. And for comfort, economy and beauty ask him to specify stucco of ATLAS Portland Cement with a finish of ATLAS-WHITE.

With ATLAS-WHITE for the finish coat, with white sand or with color aggregates, you can obtain a pure, permanent white or any color scheme you may desire.

Illustrations shown are from actual photographs of the change made in one home by the use of an architect's attractive plan and ATLAS Cement Stucco.

How to Get the "Big Giant" Engine

Ask a friend or neighbor to give you his subscription for The Youth's Companion for one year. Send the address to us with the subscription money and 25 cents extra and we will present you with the "Big Giant" Steam Engine and one Wonder Certificate. The subscription must be one that has not been upon our books during the past year and it cannot be renewed.

SPECIAL OFFER

100 Miles per Gallon

Light weight, upkeep and broad utility made the bicycle universally popular but its riders' lack of inclination to pedal ultimately relegated it to the cellars and attics of countless homes

Numerous attempts to motorize the bicycle soon became general but frailty of wheel or frame construction and inadequate shock absorbing effects of vibration and road shock and the bicycle was temporarily discarded

Then came the motorcycle—high powered and heavily built—but it could not and did not replace the bicycle

Meanwhile Will of England designed an indirect power plant attachment in the form of a motor driven roller which has since proved to be the only practical means of power application to the standard bicycle

The Will principle, considerably improved, was then adopted and incorporated in the American made Smith Motor Wheel, but the demand for war materials soon interrupted its further development, and constructive effort toward its refinement was discontinued until it was acquired by the Briggs & Stratton Company

The Briggs & Stratton Motor Wheel is a remarkably enduring piece of mechanism. It represents skilled machine work and precision in assembly—standards which have always prevailed in the Briggs & Stratton Works. It can be easily and quickly attached to any bicycle. It restores all the pleasures and conveniences of bicycling—without effort, vibration or dirt. It costs very little to operate. It is, in fact, pronounced by those who know to be *"a real job"* of engineering.

The story of the Briggs & Stratton Motor Wheel will be told often in pages of *The Saturday Evening Post* and other large national publications. Meanwhile, your Sporting Goods, Bicycle, Hardware or Implement Dealer will be glad to demonstrate it to you

SPEEDSTER BUCKETS

Get Maximum Service Out of Your Crane or Derrick—Install a *Speedster*

The Blaw Speedster Bucket is the highest possible development of grab bucket for rehandling loose bulk materials—it is especially suitable for loading and unloading cars, and for the speedy transferring of coal, gravel, sand, ashes, cinders, granulated slag, etc., to and from stock piles. Also suitable for light excavating.

BLAW SPEEDSTER BUCKETS—Applicable to All Hoisting Equipment

Size No.	Weight Empty	Average Load Picked up When Working in Sand or Washed Gravel		Slack Coal		Lump Coal	
		Load Cu. Ft.	Total Weight Loaded Bucket	Load Cu. Ft.	Total Weight Loaded Bucket	Load Cu. Ft.	Total Weight Loaded Bucket
100	2675 Lbs.	28	5475 Lbs.	27	3925 Lbs.	22	3775 Lbs.
105	3100 Lbs.	36	6700 Lbs.	34	4800 Lbs.	28	4500 Lbs.
110	3350 Lbs.	40	7350 Lbs.	40	5350 Lbs.	33	5000 Lbs.
115	4300 Lbs.	54	9700 Lbs.	50	6800 Lbs.	45	6550 Lbs.
120	4650 Lbs	60	10650 Lbs.	57	7500 Lbs.	47	7000 Lbs.
125	5000 Lbs.	77	12700 Lbs.	73	8650 Lbs.	61	8040 Lbs.
130	5580 Lbs.	81	13680 Lbs.	77	9430 Lbs.	64	8780 Lbs.

The pick-up capacities as given in the table are computed from actual tests in loose materials. Tests made on full barge or stock pile coal was Youghiogheny River coal with lumps of moderate size. The weight of coal is figured from the volume picked up, assuming gravel (or sand) at 100 pounds per cubic foot, and coal at 50 pounds per cubic foot.

This standard line of varied dimensions and capacities is carried in stock in convenient shipping centers throughout the country. Prompt delivery of exactly the bucket you need is assured.

Blaw-Knox Company manufactures clamshell buckets for every digging, dredging or rehandling need—a type suited to your present hoisting equipment.

MURAD
THE TURKISH CIGARETTE
MURAD
THE TURKISH CIGARETTE
WHAT could you Enjoy more this Xmas than MURAD?

The benevolent plot of two kindly old gentlemen

A plot! And against the children of America! Yet judging from the merry faces of Uncle Sam and Santa Claus it bodes no ill

In fact, they've decided between 'em that American youngsters should have American playthings—and together—for this Christmas—they've made the most splendid things in the whole wide world

Parents also are conspiring with the two jolly old gentlemen. They know that if little Bobby is to become a *real* American man—and Jane is to become a *real* American woman, the toys they play with two-thirds of the day must be *Real* American Toys.

This Christmas buy American-Made Toys for your children.

DOLLY DINGLE'S LITTLE COUSIN LEONARD

Drawings by GRACE G. DRAYTON

Dolly Dingle's Little Friends, Gwennie and Denny Sweetie

GRACE G. DRAYTON

LAWK A MERCY ME!

THERE was an old woman who went to market to sell some eggs. She went to sleep on the King's Highway. A pedlar came along and cut her petticoats a[illegible] around about up to her knees. She woke up a[illegible] shivering and sneezing, and then she began to cry and to wonder. "Lawk-a-mercy me!" This is none of I! But if it is really me, I've got a doggie at home and he will surely know me, and he will wag his tail, and if it be not I he will bark like everything."

When she got home it was very dark, and the doggie began to bark like everything. The poor old woman began to cry, "Lawk-a-mercy me! This is none of I."

WHITE SHADOWS IN THE SOUTH SEAS

A Forthcoming Book
By FREDERICK O'BRIEN

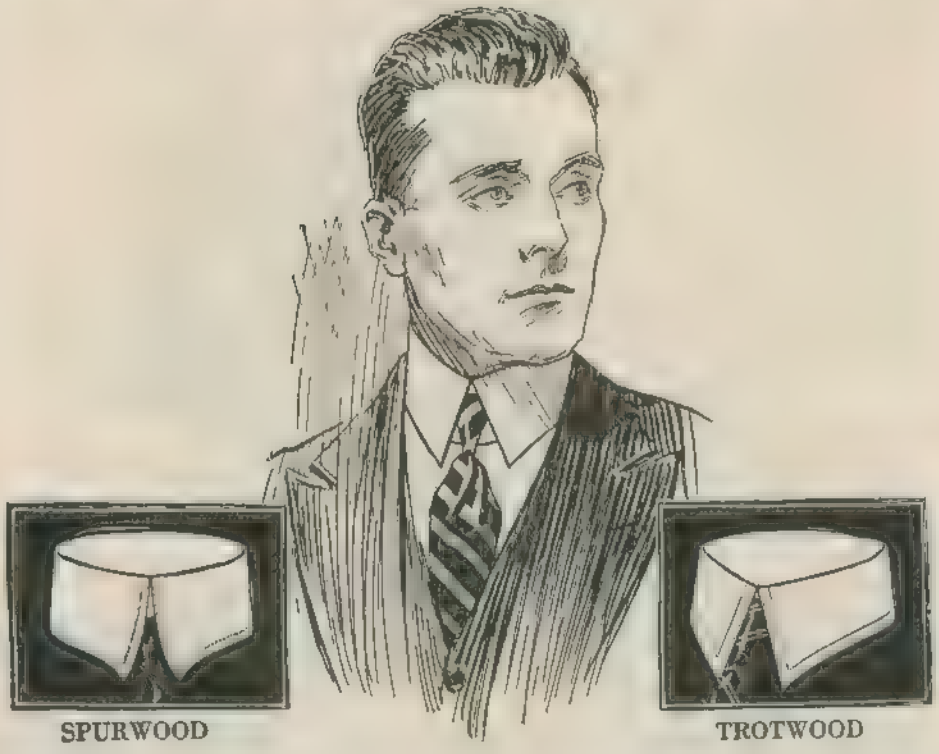
DRIFTING AMONG SOUTH SEA ISLES

CHAPTERS from the coming book will be printed in THE CENTURY each month until its publication next Fall. The first installment will appear in the May number of THE CENTURY, entitled

THE CALM ONE OF FATUHIVA

Mr. O'Brien's new book deals with his wanderings, adventures and life in Tahiti, the Marquesas Islands and the atoll group constituting the little-known Paumotan Islands. It incorporates intensely interesting stories of the natives, presented in Mr. O'Brien's whimsical and picturesque style—and picturesque is the proper word here, for his words do stimulate the reader's imagination to make alluring pictures. He has caught the very spirit of the South Seas, which he reproduces for his readers.

TROTWOOD



SPURWOOD

TROTWOOD

THERE are two ways to identify a quality starched collar at the popular price. When you see it in a store, you can look for the Earl & Wilson trademark. When you hear its name mentioned, you know it is an Earl & Wilson Collar if its name ends in "—wood" like Trotwood, Sparkwood or Cedarwood.

THE FIRST NATIONAL BANK OF BOSTON

Foreign Trade Encouragement

Through our Foreign and Commercial Service Departments, working in close coöperation with the other departments of the bank, we are prepared to aid manufacturers and merchants in the prosecution of foreign trade. We will supply desired commercial and credit information, and finance foreign trade transactions.

Deposits **$171,000,000**
Resources . . . . . **Over $280,000,000**

Branch at Buenos Aires, Argentina

Non-speculative Properties Protect Miller Investors

Miller First Mortgage Bonds are always secured by properties of a non-speculative character; that is, properties well located for their purpose, of established earning power,—properties fulfilling a genuine economic demand.

The class of properties securing Miller First Mortgage Bonds include apartments, apartment-hotels, stores, offices, warehouses, etc.

Miller First Mortgage Real Estate Bonds yielding 7% are available in denominations, $100, $500 and $1000, maturities 2 to 10 years.

Write for current offerings and booklet entitled "Creating Good Investments," which explains why and how Miller First Mortgage Bonds are sound investments.

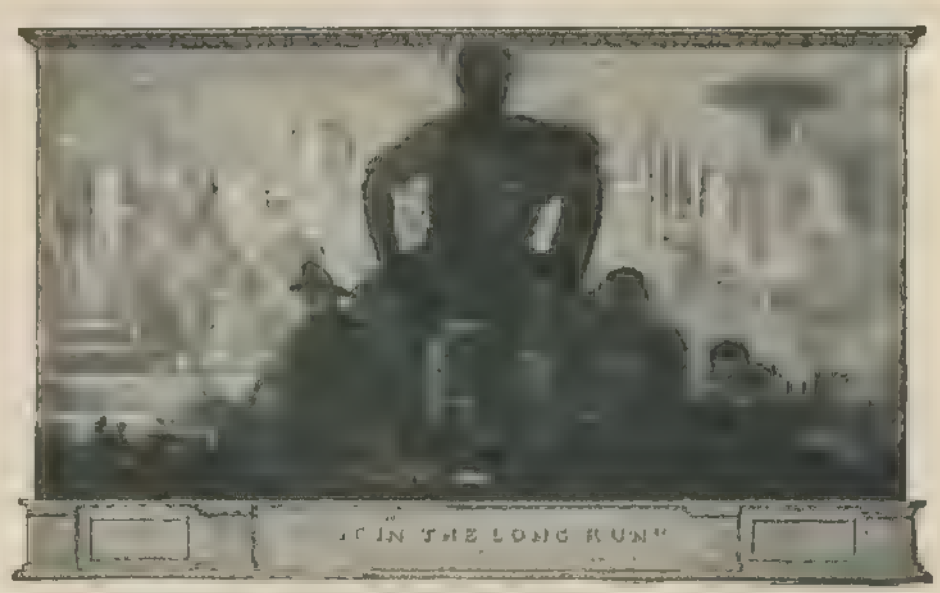
THE FRANKLIN SEDAN

THE proof that people interested in fine cars are also interested in low upkeep costs, slower depreciation and greater comfort, is found in the turn from heavy, rigid cars to the light weight and flexible Franklin Sedan.

It has the most rapidly increasing sale of any fine car, not only because of what it gives in extra performance, but also on account of what it eliminates in the way of routine care and trouble. Its owners average:

20 miles to the gallon of gasoline
12,500 miles to the set of tires
50% slower yearly depreciation.

FRANKLIN AUTOMOBILE COMPANY, SYRACUSE, N. Y.



The *Real* Meaning of *"Best in the Long Run"*

"Best in the Long Run" is a slogan that is almost as old as the history of tires. It grew out of the performance of Goodrich Tires on bicycles, and it grew into the *dependability* of Goodrich rubber products of all kinds.

It is not just a catch phrase. It is a plain statement of fact.

It is really a mirroring of the confidence placed in Goodrich products by their users.

In five words it crystallizes the ideals, the policies, the principles of Goodrich.

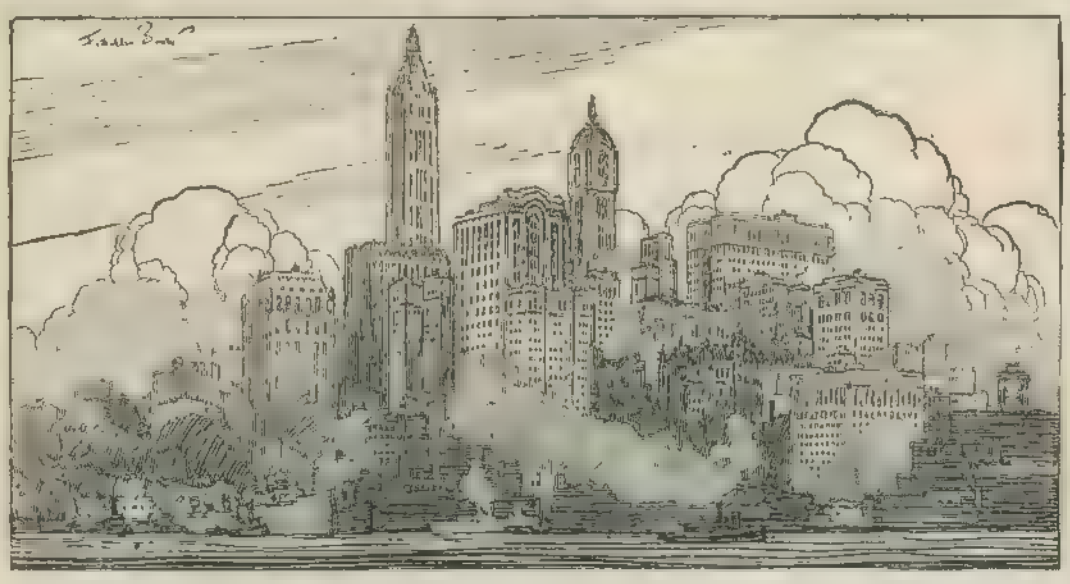
It means "the long run" of good faith and good will—the steady building up of a confidence in the minds of the users, *which is the greatest asset a manufacturer can have.*

That is how Goodrich translates this slogan into terms of longest average wear, utmost dependability and known quality in all kinds of rubber products.

THE B. F. GOODRICH RUBBER COMPANY, AKRON, OHIO

Goodrich Tires

"Best in the Long Run"



A New York Banking Connection

MANY manufacturers and merchants outside of New York City find it advantageous, when consistent with their local banking connections, to maintain an account with this Company.

New York is the financial center of America, if not of the world; it is the center of the country's foreign exchange business; it is the country's chief commercial market; it is the greatest port for foreign trade. A fully-equipped New York banking institution, working for your interests, can assist you materially in your domestic and foreign business.

An account with this Company enables you to make settlements *direct* with New York funds. It puts you in close and immediate contact with the foreign banking facilities of the financial centers of the world. It opens to you the facilities for information and business service afforded by the forty departments of this Company, covering every domestic and foreign banking, investment, and trust function.

If it would not conflict with your local banking arrangements, we should be glad to discuss with you personally or by correspondence the advantages of New York banking relations with us.

Booklets describing our various services will be sent on request.

Dropping elevators are killing folks every day

Machines of all sorts usually break down because they have been overloaded and overstrained.

THE RIDGWAY ELEVATOR DON'T GO WHEN OVER-LOADED

The moving load can never be more than the area of cylinder multiplied by the steam pressure

Consequently a Ridgway elevator is never overstrained for a catastrophe

You are absolutely safe when you "Hook'er to the Biler."

The Ridgway Elevator is Profanity Proof.
It makes a man "hot" when he wants to get stuff up or down stairs and the Elevator "lays down."
"What's the matter now?" the man yells.
"Elevator's on the bum," is the reply
"What's wrong?" is the next cry
"Lost the juice," are the fatal words.
And the air gets blue
Blankety, blank that blank Engineer that put these blank things in a busy place like this."

"WHY IN THE DICKENS DON'T THEY GET RIDGWAY ELEVATORS LIKE YALE & TOWNE HAVE?"

We are furnishing Ridgway Elevators to the finest concerns all over this land and other lands. Here's a sample of 3000

A Hercules Glazier Entering Top of Glaze Mill with Car of Green Grain

The Powder Maker

Considering how important his work is to the public, it is fitting that more should be known about the powder maker and his job.

The characteristics which fit him for his work are as largely mental as physical, and the work itself develops his acuteness of mind—his powers of observation, judgment, and decision.

The powder worker trained in the school of the Hercules plants learns to take in all his surroundings at a glance. If he enters one of the small buildings on a dynamite or black powder line nothing escapes him. He sees instantly many things which the casual observer might gaze at for minutes without noticing

A large part of the explosives used in the United States, and much that is used in foreign countries, is made by the men in twelve Hercules plants—four for dynamite and eight for black blasting powder.

Behind all our manufacturing industries and our railroads, behind all the useful and beautiful objects fashioned out of metals—from hob nails to scarf pins, and from steam shovels to limousines—stands the powder worker. Without the explosives he supplies—hundreds of millions of pounds annually—the miner's efforts to move the vast inert bodies of ore and coal would be as futile as the scratching of hands.

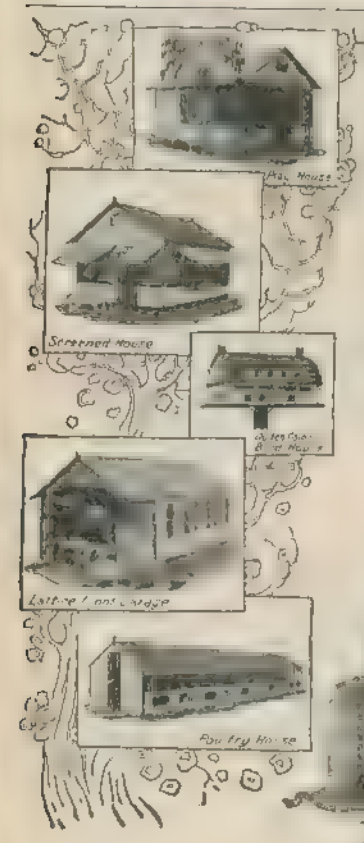
HODGSON *Portable* HOUSES



Received Ready-made

It is no longer necessary to follow the long tedious methods of building a house. Hodgson Portable Houses are delivered in painted sections ready to bolt together—even without the aid of a skilled workman. The illustrated catalog shows the kinds and varieties you can select.

There are houses and cottages from one to ten rooms: play-houses, bird houses, dog houses; churches, hospitals, schools, barracks, offices and garages.

Hodgson Houses are carefully designed and built to last. Seasoned Oregon pine and red cedar are the materials.

Their construction is correct—as a result, doors, windows, everything, fit perfectly in place. Attractive Hodgson lattice work and flowers and shrubbery make these ready-made houses most picturesque.

The order should be placed immediately for summer and fall delivery. Write today for catalog.

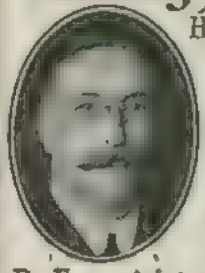
Training for Authorship

How to write, what to write, and where to sell.



Cultivate your mind. Develop your literary gifts. Master the art of self-expression. Make your spare time profitable. Turn your ideas into dollars.

Courses in Short-Story Writing, Versification, Journalism, Play Writing, Photoplay Writing, etc., taught personally by Dr. J. Berg Esenwein, for many years editor of Lippincott's Magazine, and a staff of literary experts. Constructive criticism. Frank, honest, helpful advice. *Real teaching.*

Dr. Esenwein

One pupil has received over $5,000 for stories and articles written mostly in spare time—"play work," he calls it. Another pupil received over $1,000 before completing her first course. Another, a busy wife and mother, is averaging over $75 a week from photoplay writing alone.

There is no other institution or agency doing so much for writers, young or old. The universities recognize this, for over one hundred members of the English faculties of higher institutions are studying in our Literary Department. The editors recognize it, for they are constantly recommending our courses.

We publish *The Writer's Library*, 12 volumes—descriptive booklet free. We also publish *The Writer's Monthly*, the leading magazine for literary workers, sample copy 20c, annual subscription $1.00. Besides our teaching service, we offer a manuscript criticism service.

150-page illustrated catalogue free.

WARD-BELMONT, Belmont Heights, Box C., Nashville, Tenn

THE paths are white with winter snows,
And nurse is pinching cheeks and toes,
And out in doors it's no use try,
For children not yet six years old.

But I don't care—I say outside
Cozy and warm and satisfied.
For after breakfast every day
I straddle my Kar and ride away

Out of the nursery down the hall,
And clear by maids through the wall
Out and above the trees I sail,
And at last up in the sky

Through the clouds I dash and soon
I'm racing with the Man in the Moon
Or, if he's busy, somewhat
I hurry home in time for dinner

Sometimes my Kiddie Kar's a ship
On which I take an ocean trip
Sometimes a pony on the plain;
Sometimes an airplane and a train

Countries do to distant spots
To see the Dutch and Hottentots
To Egypt, France and Wadsko,
Japan, Peru and Italy.

The child who has no Kiddie Kar
Can never, never go so far
And just every mind and every
O, don't you think that's awfully?

KIDDIE KAR is the ideal outdoor vehicle for boys and girls from one year up. Sturdy and rugged, it is almost impossible to upset and is simple enough for the child always to be in perfect control. Upholstered in genuine leatherette. Adjustable seat for one or more children. Has rubber tires, the finest and most durable on the market. Axles of tubular steel.

This is the ideal outdoor vehicle affording the ride and exercise all parents seek. Nothing to pinch fingers or toes. No pump to wear out. Almost indestructible.

Don't wait another day. Get one now. It will be a big help in keeping the children happy and healthy.

Name of nearest dealer appears on the next page.

You will find Real Kar wherever juvenile vehicles are sold.

REAL KIDDIE-KARS ARE MADE ONLY BY WHITE

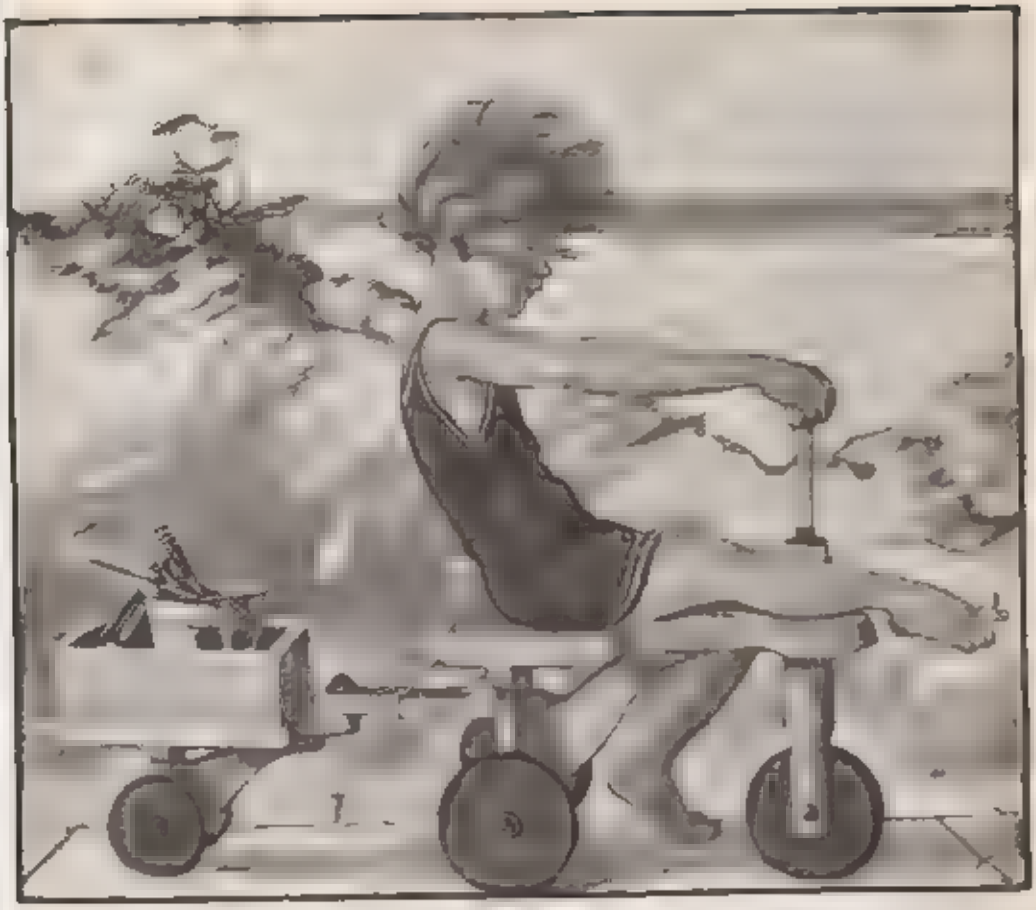
[illegible]

KIDDIE-KAR

MADE IN AMERICA FOR AMERICAN GIRLS AND BOYS

The name KIDDIE-KAR is registered in the U.S. Patent Office and in Canada. Registered in the United States Patent Office and in Canada. The KIDDIE-KAR is protected by patents.



WHEN it was time to come away
To spend our summer at the beach
And leave the sand with all to play,
I went and asked my father to teach

me my Jollies all except
The ones about the streetcar
I used them today as a new slope
And whispered Dad I'll summer in

I put away my rocking-horse
My toys and everything so good
that's grand, because of course
They'd bring my Kiddie Kar I thought

I went to get it at last rush
Myself all safely wrapped and then
My father said, "What is this junk?"
And laughed and took it out again.

He said there was the space to spare
But when I cried and ran to mother
He said "A boy as we can see here
I promise you shall have another"

So now along the tumbling seas
Far down the curving coast line blue
As ever and the breeze
Racing the south to and the blue

I've come home to keep
The Kiddie Kar we must be such.
Jr Kiddie-Kars are very cheap
I often sit and wonder which

Kiddie-Kar

THEY WERE Jollies Kiddie Kar
[illegible]
[illegible]
[illegible]

On Christmas Eve I went to bed
And hung my stocking by my head
Then went to sleep quick and tight
And dreamed soundly all the night

When I awoke and looked at once
What do you think I saw?
The stocking full of toys—and more,
A Kiddie-Kar upon the floor.

I had asked Santa Claus to bring
A dozen different kinds of things
But still it was the Kiddie Kar
I needed in particular

I rode upon it all the day
And had no time for other play
Until we had our Christmas tree
With many useful gifts for me

Soldiers and animals games and blocks,
A ball and bat and woolly socks,
A sled that goes a gun that shoots,
An engine and some rubber boots.

I played with each a little while
And then I put them in a pile
And took them to my room, and then
I rode my Kiddie-Kar again.

When I am big and rich and wise,
I mean to give a great surprise
To all the boys and girls where are
I'll send each one a Kiddie-Kar.

KIDDIE-KAR

Of all the Christmas gifts the one which will be most prized and will last longest is the Kiddie-Kar. It is for as practical reasons as it is for sheer joy. It is as all the year round

as it is solidly built that it is practically indestructible. The axles are of iron. The wheels are strong and stay tight. There is no paint to come off. The steering post will not break if the child wobbly

And it is perfectly safe for any child boy or girl even the child who does not yet learned to walk.

The demand for Kiddie-Kars is so great that you had better buy one as soon as they are all gone. You will like them wherever riddle vehicles are used

IVER JOHNSON SAFETY AUTOMATIC REVOLVER

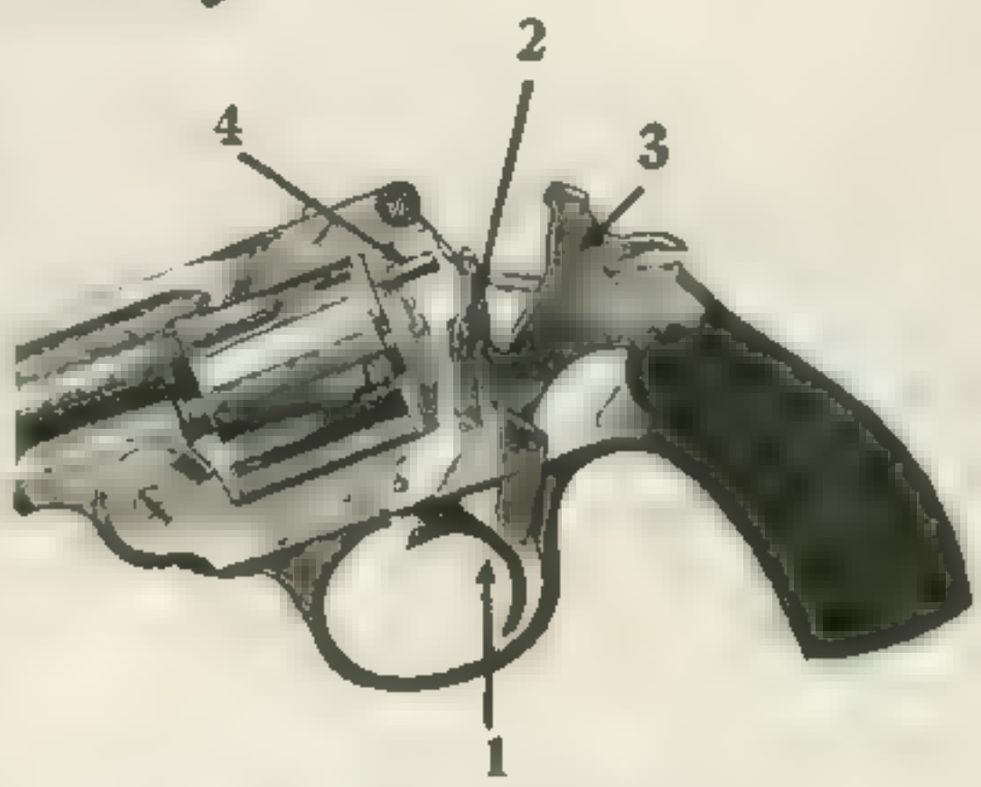
"See, it can't go off accidentally"

"The only way to discharge an Iver Johnson is to pull the trigger (1) all the way back. This action raises the lifter (2) which forces the hammer (3) to cocking position. When lifter is at its highest point, the hammer covers the firing pin (4) and at this position the hammer is released, striking the lifter, which in turn strikes the firing pin."

No impact can force the hammer against the firing pin. Thus the world-famous slogan, "Hammer the Hammer." And that is why women are not timid about having an Iver Johnson in the home.

Drawn tempered piano-wire springs keep the Iver Johnson permanently alive and alert. And the perfect rifled barrel speeds the bullet straight as a streak of light.

Choice of three grips: Regular, Perfect Rubber, Western Walnut.



If your dealer hasn't in stock the particular model you want, send us his name and address. We will supply you through him

A New Sport for Auto-Wheel Clubs

AUTO-WHEEL SAILING. What fun you'll have with this new amusement. Attach a sail to your **Auto-Wheel Coaster** or **Auto Wheel Convertible Roadster.** The roller bearings are the same as used on automobile wheels. That's why the name **"Auto-Wheel"** means so much.

The **Auto-Wheel** carries 1000 lbs. The roller-bearings will not crack or chip as old-fashioned ball-bearings do.

The November *"Auto-Wheel Spokesman"* tells how to make a sail for your **Auto-Wheel** wagon. Send for it.

Organize an *Auto-Wheel* Club

FREE caps to members. Special Captain's cap. FREE **Auto-Wheel** Dime Bank. Just send names of three coaster dealers in your town, telling which ones sell the coaster wagon with the name **"Auto-Wheel"** on the sides.

Auto-Wheel

$30 to $50 Clear Profit a Day

Go into the Floor Surfacing business; make big money without previous experience. Shortage of labor, high wages and demand for better floors is met with the American "Universal." It does more floors than six men can do by hand and does it better. Electrically operated; surfaces old or new floor flush to sidewalls. Can be used on any size floor from a cottage to largest auditorium.

Here's your chance to establish a big-paying business with a small investment. Every building a prospect. Contractors and architects prefer machine work. Machine will pay for itself first month and leave good profit beside.

Here's your opportunity; write TODAY for complete literature. It's Free.

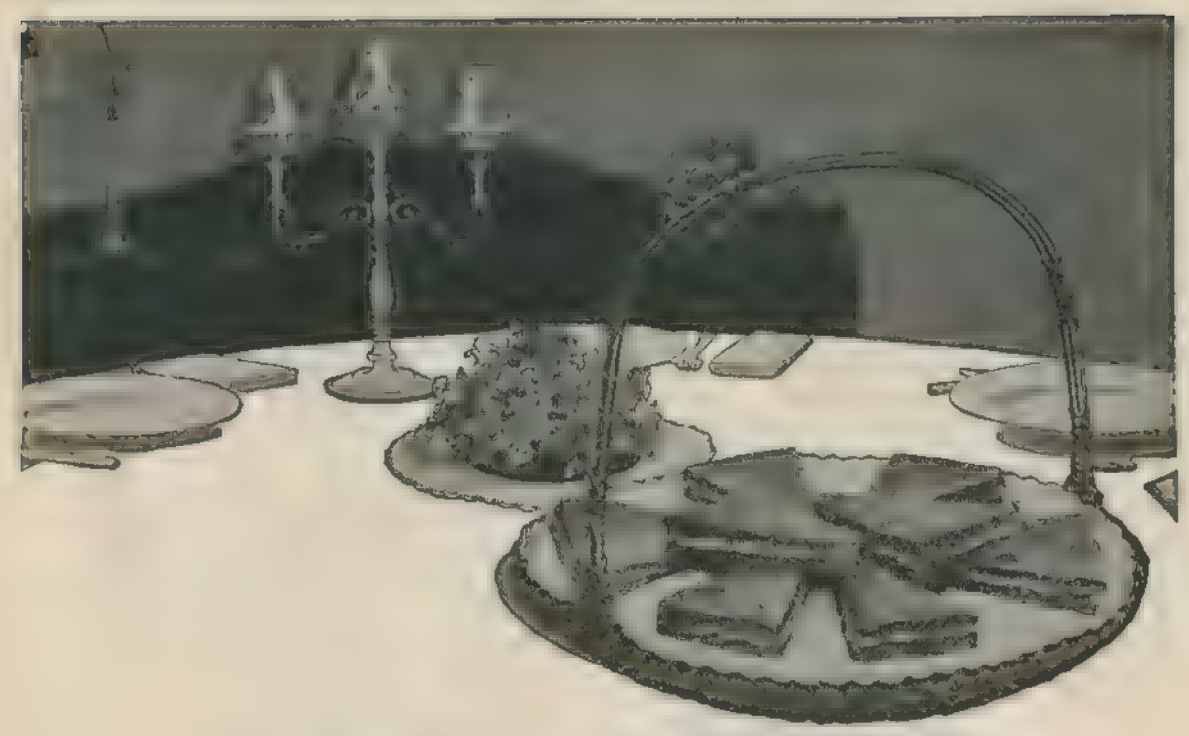
31 American Bldg., Toledo, Ohio



The "Saving" Grace

THERE'S a happy combination of simplicity and elegance in the "golden goodness" of Elkhorn Cheese which makes it grace any table, any time.

The flurry occasioned by unexpected guest subsides when you think of that row of Elkhorn tins on the shelf.

Delicious, just as it comes from the tin, in rarebit or sandwiches. It not only "saves the day" but saves in living cost.

Condensed food-value, also, is an economy. There are many more butter units in Elkhorn Cheese than in the ordinary, and its absolute uniformity takes out all guesswork.

Only Elkhorn is put up in tins because it is the ideal way to market this sensitive food, and the process is the exclusive patent of the J. L. Kraft & Bros. Co.

Send your dealer's name and 10c in stamps or coin for sample tin of Kraft plain or Pimento flavor, or 20c for both. Illustrated book of recipes free. Address 355-9 River St., Chicago, Illinois.

REAL KIDDIE KARS ARE MADE ONLY BY WHITE

KIDDIE-KAR

WHEN it was time to come away
To spend our summer at the beach
And leave the things with which I play
I went and said goodby to each

I left my dollies, all except
The oldest and the dearest one
I kissed them softly as they slept
And whispered "Rest till summer's done".

I put away my rocking-horse,
My toys and everything I've got
I didn't mind, because of course
They'd bring my Kiddie-Kar, I thought

I went and put it in the trunk
Myself, all safely wrapped, and then
My father said, "What is this junk?
And laughed and took it out again

He said there was no space to spare,
But when I cried and ran to mother,
He said, "As soon as we are there
I promise you shall have *another*"

So now along the tumbling seas
Far down the curving shore I ride,
As swift and merry as the breeze,
Racing the sea-birds and the tide

If we can thus afford to keep
Two Kiddie-Kars, we must be rich,
Or Kiddie-Kars are very cheap -
I often sit and wonder which!

KIDDIE-KAR

TO any active child the Kiddie-Kar becomes so much a part of daily life that to be deprived of it for even two weeks is almost a calamity

But Kiddie-Kars are so inexpensive that when you go away you can get your child a special one for vacation use. It will be worth many times its small cost in the pleasure it affords out-doors — and in-doors on those dreary rainy days

And at the end of the summer you can give it to some child who has none

Kiddie-Kar is perfectly safe, even for a baby — close to the ground, almost impossible to tip over, no sharp corners or splinters, no adjustments to pinch the fingers, tear clothes or get out of order

It not only affords healthful exercise out of doors, but it is the only practical in-door vehicle

You find Kiddie-Kars wherever juvenile vehicles are sold

REAL KIDDIE-KARS ARE MADE ONLY BY WHITE

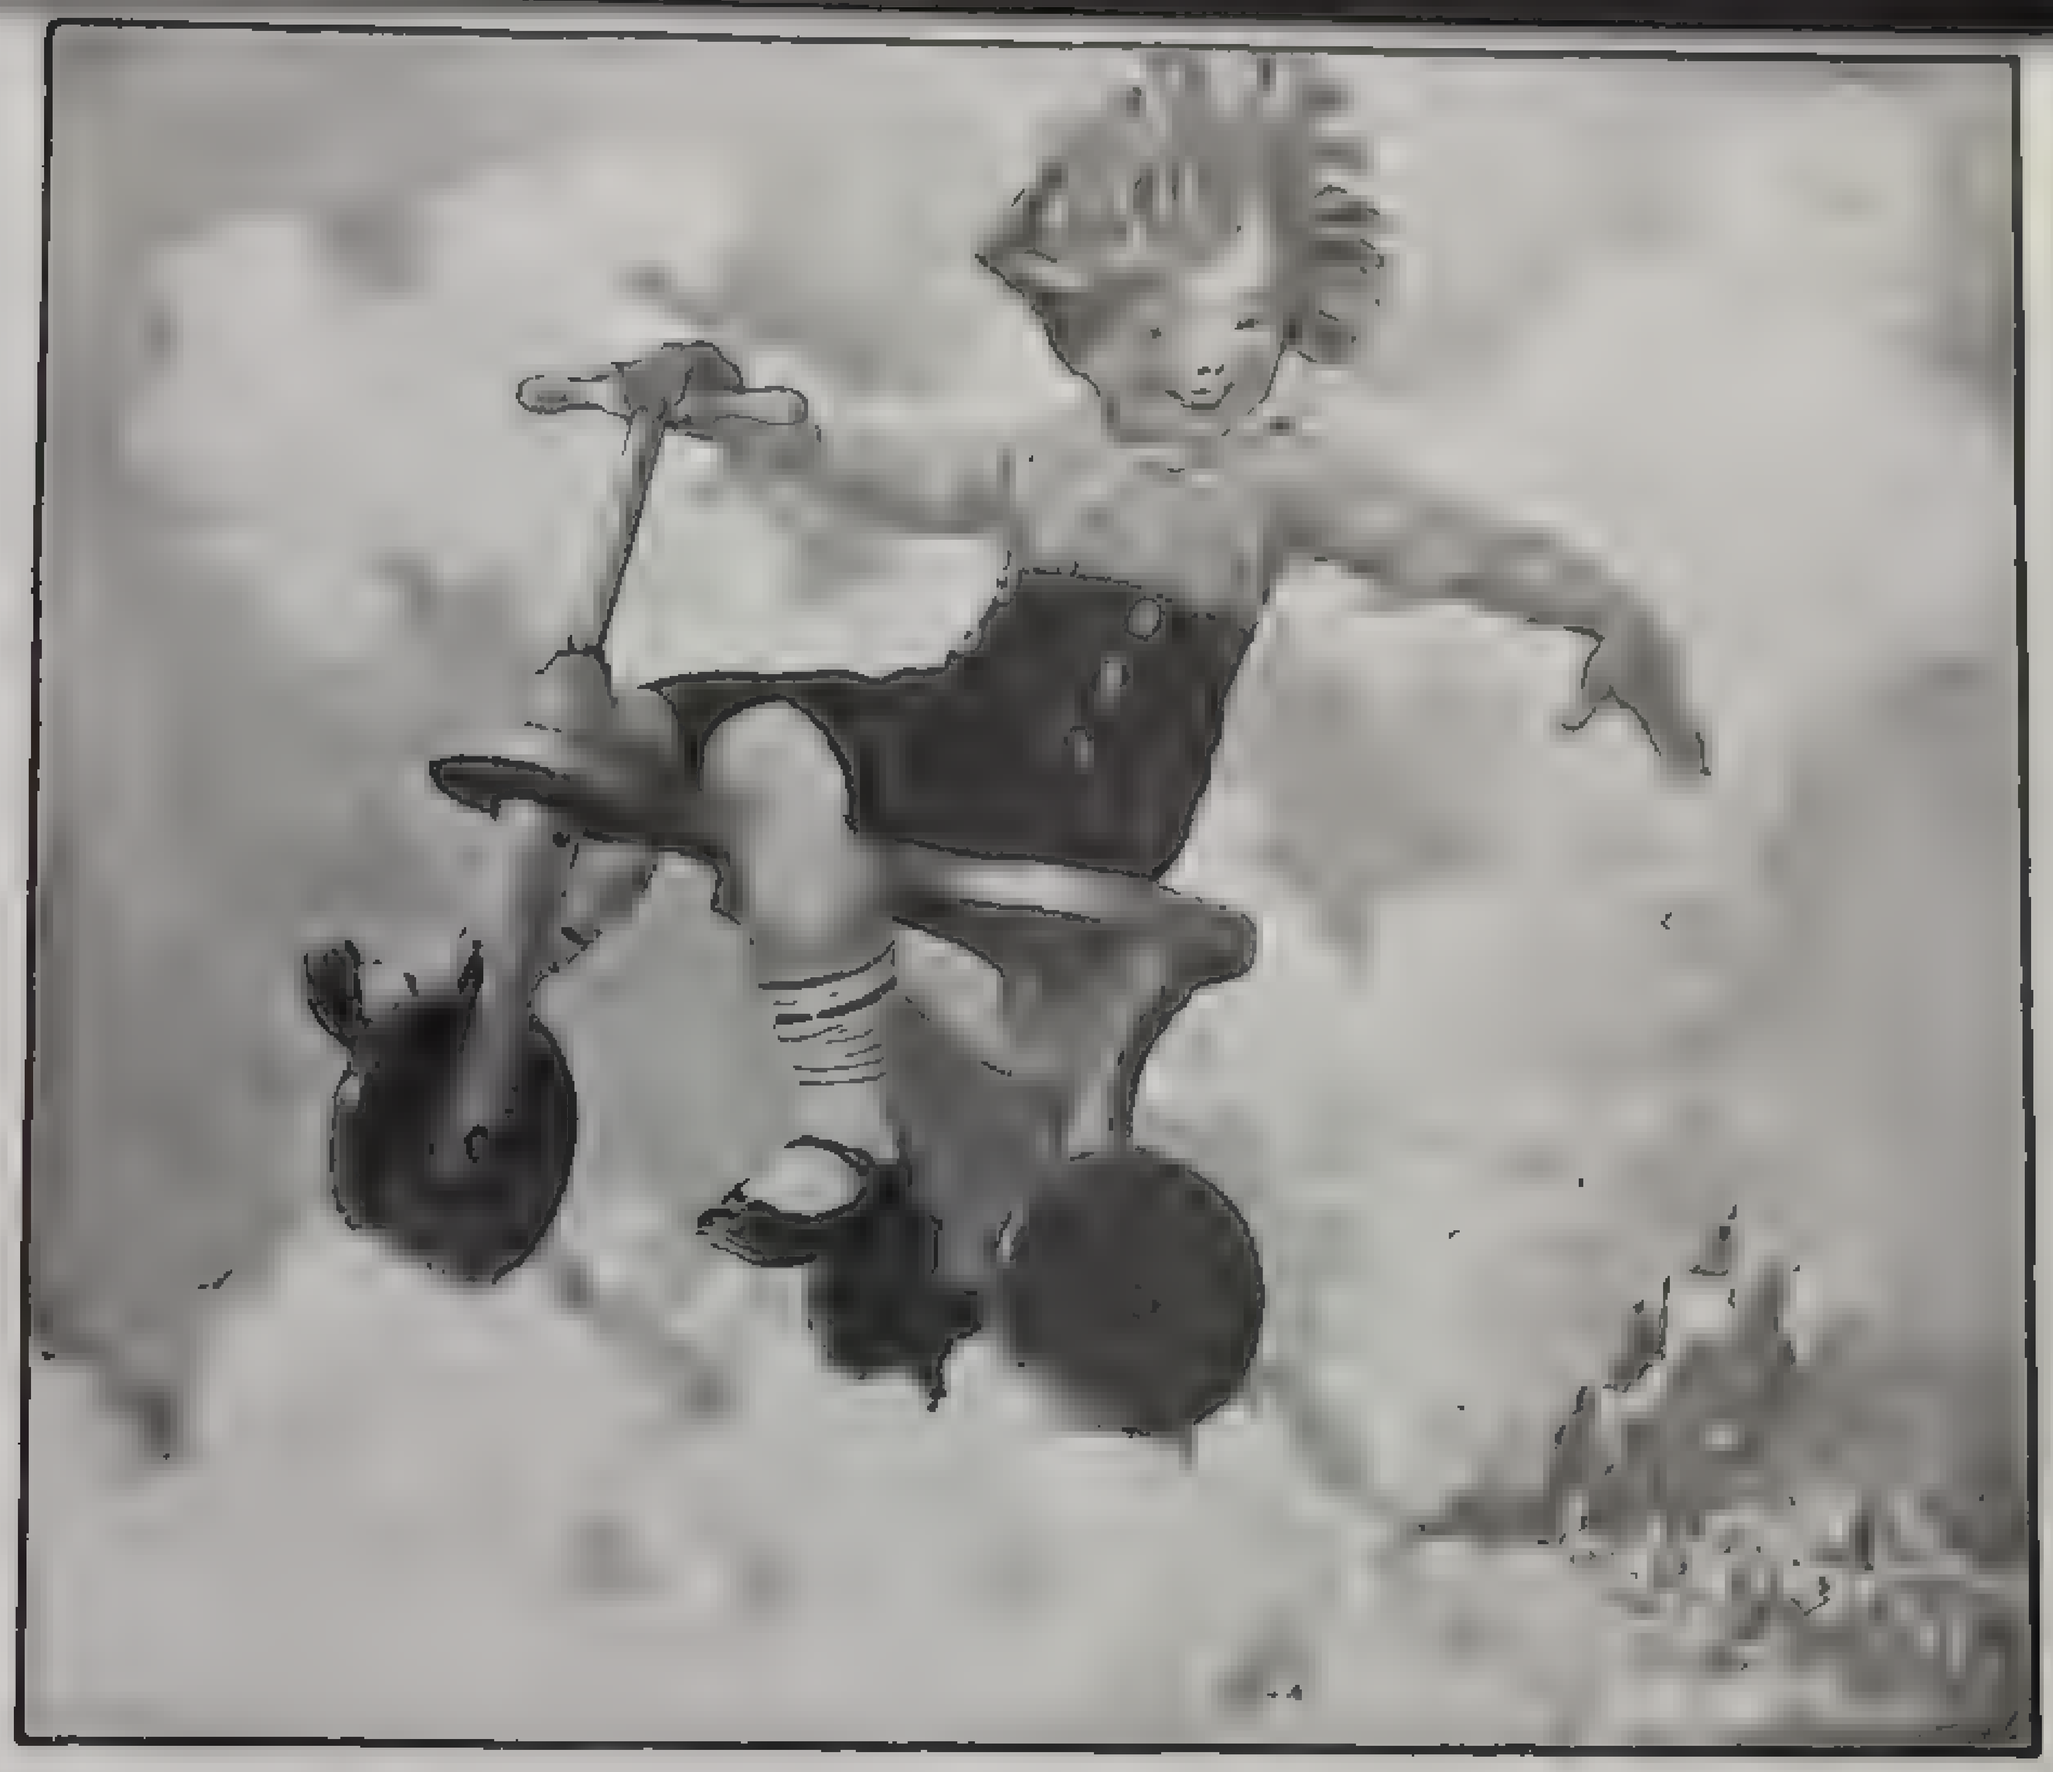
KIDDIE-KAR

Trade Mark Reg. U. S. Pat. Off.

MADE IN AMERICA FOR AMERICAN GIRLS AND BOYS

KIDDIE
H C
Outdoors. The name KIDDIE-KAR is a registered trade mark; it is always on the seat. The KIDDIE-KAR is protected by four patents



THE paths are white with winter snows,
Jack Frost is pinching ears and toes,
And out-of-doors it is too cold
For children not yet six years old.

But I don't care. I stay inside
Cozy and warm and satisfied;
For after breakfast every day
I straddle my Kar and ride away.

Out of the nursery, down the hall,
And then by magic through the wall
Out and above the trees I fly,
An aviator in the sky.

Through the clouds I dash and soon
I'm racing with the Man in the Moon;
Until at last, an easy winner,
I hurry home in time for dinner.

Sometimes my Kiddie-Kar's a ship
On which I take an ocean trip;
Sometimes a pony on the plain;
Sometimes an engine and a train.

It carries me to distant spots,
To see the Dutch or Hottentots;
To Egypt, France and Waikiki,
Japan, Peru and Italy.

The child who has no Kiddie-Kar
Can never travel off so far
And visit every land and city.
O, don't you think that is a pity?

KIDDIE-KAR is the ideal indoor vehicle for boys and girls from one year old up to seven and eight. As it is almost impossible to tip over and so simple that the child always has it in perfect control, it does not bang the furniture. As there are no sharp corners or metal parts, it does not scratch. The wheels have rounded treads and do not injure the floors and rugs. And it is almost noiseless.

It is also the ideal outdoor vehicle, affording the child healthful exercise in perfect safety. Nothing to punch fingers, or tear clothes. No paint to come off. Almost indestructible.

Don't wait until spring. Get one now It will last many winters and summers.

Try Libby's Beans fixed Mother's old time way

HERE is a dish of beans as they had them when mother was a little girl. Beans, sweet and mellow with the baking, topped off with tender young salt pork, fried crisp and sizzling hot.

What a supper dish to put before a hungry family!

Libby's Beans are just as savory and appetizing as beans ever were, even in mother's memory.

In the first place Libby's Beans are "hand-picked"—which means that all the beans not up to exacting Libby standard of plump perfection are discarded. The pork is fat and tender and the tomatoes for the sauce are picked ripe when they are full of sweet, fresh juices.

Then how carefully Libby chefs cook the beans—not too long but with a slow, steady fire until they are just ready to burst with meaty tenderness.

Order from your grocer today a package of Libby's Pork and Beans with or without the tomato sauce, as you like them. You will never be satisfied with ordinary beans again.

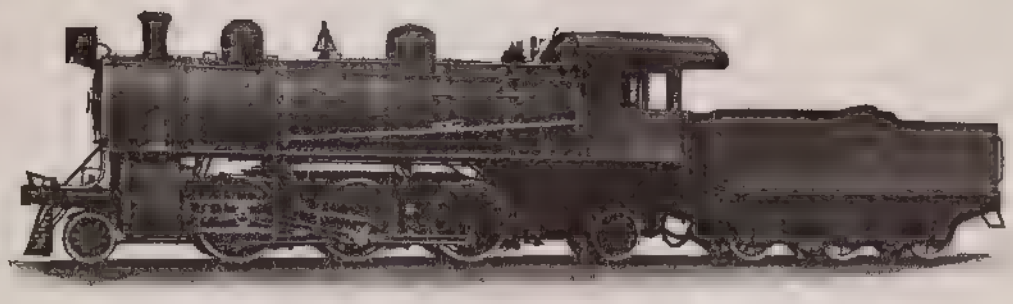
Libby, McNeill & Libby, 604 Welfare Bldg., Chicago

Libby, McNeill & Libby of Can., Ltd.
45 E. Front Street, Toronto, Ont., Can.

Try Libby's Catchup with Libby's Beans —it has just enough "tang"

An old-fashioned dish you will like

Slice salt pork in very thin slices and scald a few minutes in boiling water to which a little soda has been added. Fry in a frying pan as crisp as you like it. Remove from pan, drain a moment, dust with flour and dip in egg, well-beaten and seasoned with salt and pepper. Return to the frying pan to cook the egg, which should puff up and form a cover for the pork. Heat a can of Libby's Pork and Beans. Serve with the slices of pork



SPECIFICATIONS

Maximum ton-mile output at minimum maintenance cost demands locomotives that embody railroad company's practices that have proven themselves in service.

Lima is prepared to build exact duplicates of existing power or to co-operate with railroad engineers in designing locomotives that will even better meet the operating problems which are often changing.

Lima Locomotive Works, Incorporated

Lima, Ohio 30 Church Street, N. Y. City

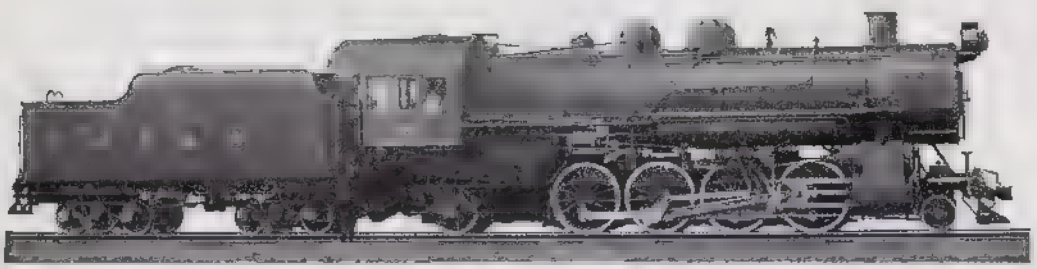
LOCOMOTIVES

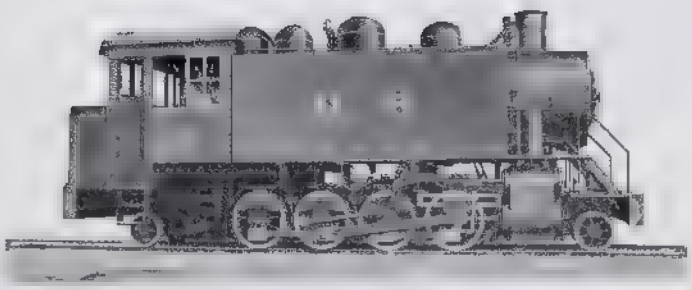
We are equipped to build locomotives of any type and size.

We will submit designs and specifications of locomotives to meet your operating conditions or will follow exactly your own design and specifications.

Lima Locomotive Works, Incorporated

Lima, Ohio — 30 Church Street, N. Y. City





Superheat for

All Types of Power

Four and sometimes three superheated yard engines accomplish the same work as five saturated engines of similar size.

Fewer locomotives, working in the same space make your yards more flexible.

Superheating all your yard power means increased yard capacity because a smaller number of engines accomplish the same work and there is more room for each to work in.

Yards become larger by using superheat.

You can demonstrate this—you have both superheated and saturated yard engines.

Pointed paint points on right paint and painting

There is a way of painting and there is a kind of paint to use that will surely insure you satisfactory painting results.

So far as we know it is best told in a book called The Happy Happening.

It tells the right ways as well as instructs you against the wrong way.

Further than that it tells you a surprising lot of other things about painting and varnishing, just such as you have long wanted to know.

Send 10c. in stamps and we will promptly see that a copy is sent you.

You will be glad to know that Lowe's Paints and Varnishes are sold by the one best dealer in each town.

Makes Your Hair Look Its Best

PROPER SHAMPOOING is what makes beautiful hair. It brings out all the real life, lustre, natural wave and color, and makes it soft, fresh and luxuriant.

Your hair simply needs frequent and regular washing to keep it beautiful, but it cannot stand the harsh effect of ordinary soap. The free alkali, in ordinary soaps, soon dries the scalp, makes the hair brittle and ruins it. This is why discriminating women use

WATKINS

MULSIFIED

REG. U.S. PAT. OFF.

COCOANUT OIL SHAMPOO

This clear, pure and entirely greaseless product, cannot possibly injure, and does not dry the scalp or make the hair brittle, no matter how often you use it

Be Sure to Get

WATKINS

If it doesn't say Watkins it isn't MULSIFIED

Industrial and Commercial Opportunity Abounds in Pittsburgh

PITTSBURGH is unique. Because of her central geographical location, abundant natural resources of fuel, unlimited transportation facilities and present industrial leadership she affords great opportunities for commercial and industrial enterprises in almost every line.

Financial co-operation has played an important part in Pittsburgh's development. Foremost among the great financial institutions that have participated in the growth of this industrial district is the Mellon National Bank. It is always ready with the accumulated value of fifty years banking experience and ample resources to aid enterprises of merit here.

INVESTMENT AND BANKING

(*Continued from page* 28)

law, goes as far in its liberal treatment of the roads as Congress intends it to go, there are better times ahead for American railroads.

One must not assume, however, that there is anything like a guarantee of earnings for individual roads in this new law, similar to the guarantee in the war measure which provided for Government operation of the roads. What has been done by Congress was simply to lay down directions for rate making. As has been stated, after September 1st, 1920, no road will get more than it actually earns. In order to make it easier for the rate-making body to treat the roads more liberally, and to make such treatment more acceptable to the public, those roads which earn more than 6 per cent. on their property valuation will have half of the excess above that rate taken away from them. Here again one must not jump to hasty conclusions, for when it comes to taking earnings away from a road that has "ploughed"

An active ally to business

New England manufacturing has thrived steadily since colonial days. In wool and cotton textiles, shoes, paper, leather and machinery in which New England leads, the yearly production now exceeds three billion dollars in value.

Working side by side with these industries, The National Shawmut Bank renders a banking service as valuable as it is complete. Personal interest in the business of clients is the foundation of the close relationship between this bank and New England business men.

The National Shawmut Bank studies markets and marketing methods systematically. In financing the sale and shipment of merchandise, it offers complete facilities. Trade and credit data are available to customers. Collections are made, credits arranged, acceptances bought and sold. Direct connections in all commercial centers promote quick service.

As an institution closely linked with New England manufacture and trade, The National Shawmut Bank invites additional business from nearby and distant points.

THE NATIONAL SHAWMUT BANK of Boston

BLEACHED BY
THE SUN

The time and patience involved in making fine embroidery demands good material for a foundation—so that the finished work will have a *lasting* value.

"OLD BLEACH" pure Irish Linens are excellently adapted for embroidering, both on account of the extraordinary long life of the fabric, due to its gentle "Sun-bleaching" method—and to the high valuation that is set upon these famous linens.

"OLD BLEACH" damasks, table cloths, napkins and towels, with their exclusive patterns make priceless family possessions—especially when individualized by an initial or monogram.

"OLD BLEACH" linen for Summer Dress has a value woven into it which makes it worthy of the finest embroidery work.

All these famous linens are pre-shrunk at the mill so that no allowance need be made afterwards for shrinking due to wear and washing.

The Trade Mark "Old Bleach" is stamped on every article except Table Damasks, which have the above mark woven in four corners.

"The OLD BLEACH" LINEN Co Ltd

One-half dozen in a box.

POWDER HEATER OR THAWER

KELLY

No. 1—Size, 10x10x14 in. Holds 40 sticks of ⅞ in. dynamite ..... Each, $6.75

No. 2—Size, 10x14x16 in. Holds 72 sticks of ⅞ in. dynamite ..... Each, $8.25

The Kelly Powder Heater consists of a box of heavy galvanized steel lined with asbestos, a pan with a screw cap fitting in the bottom of this box, and over that a wire rack which holds the sticks of powder away from each other.

To use, remove the screw cap, fill pan with water, place on forge or fire until the water boils, screw the cap on, replace pan in bottom of box, fill wire rack with powder, set in box over pan, cover box, and in two hours or less every stick is evenly and safely heated WITHOUT DRAWING THE NITROGLYCERINE TO THE WRAPPER as is done in other methods This is the result of a perfectly even AND SLOWLY DECREASING heat. The asbestos insulation holds the heat 24 to 48 hours and it can never rise to the danger point. Powder heated in the Kelly Heater retains its original strength and is from 20 to 50 per cent more efficient than when heated by the ordinary methods.

UNIVERSAL POCKET KNIVES

No. 02101½ 3⅜-inch Perfected Stag Handle. Large sheep foot and pen
Per dozen $9 00

No. 3[illegible] 3⅜-inch Ebony handles. Large Clip and pen blades, glazed finish. Iron lined steel bolsters.

Per dozen $30.00

Average weight per dozen, 3 to 5 lbs. One-half dozen in a box.

HUNTING KNIVES

MARBLE
WOODCRAFT

Leather handle with sheath. An entirely new knife in design, containing all of the essential features necessary for sticking, skinning, cleaning and breaking bones.

No.	49
Length of blade, inch	4½
Weight, ozs	5
Each	$2.25

IDEAL, WITH HILT

Heavy forged steel, hand tempered blade, adapted to sticking and skinning. Leather handle, with colored hard fibre and brass washers. Aluminum tip. Each complete with leather sheath.

No. 45—Length of blade, inch	5	6	7
Weight, ozs	5	6½	8½
Each	$2.75	3.00	3.25

Same as No. 45. With stag handle and tip.

No. 46—Length of blade, inch	5	6
Weight, ozs	5	6½
Each	$3.50	3 75

IDEAL, WITHOUT HILT

Blades hand forged from razor steel, oval ground, stag handle with guard. Well made leather sheaths.

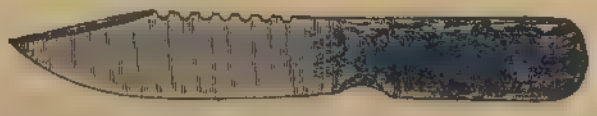
No. 42—Length of blade, inch	5	6	7
Weight per dozen, lbs	5	7	8
Each	$3.50	3.75	4.00

EXPERT

Leather handle, aluminum tip, complete with sheath. Particularly designed to meet requirements of professional hunters and trappers. The back of blade is designed for scraping skins while on the forms. Stag tip.

No.	545
Length of blade, inch	5
Weight, ozs	3½
Each	$2.50

DE WEESE PATTERN



Stag handle, with sheath. Has a dull saw back, on which the thumb is placed when skinning. When sticking the little finger should be doubled up, letting the end of handle rest against it. This takes the place of a hilt.

No.	62
Length of blade, inch	4
Weight, ozs	3
Each	$2.00

Five inch forged blade. Shaped ebony handle with three brass rivets. Without sheaths.

No.	175
Weight per dozen, lbs	3½
Per dozen	$21.00

SHEATHS FOR NO. 175

Weight per dozen, lb	1
Per dozen	$9.00

Ebony handles. Three large brass rivets. 4-inch blade; 7½ inches over all. Complete with leather sheath.

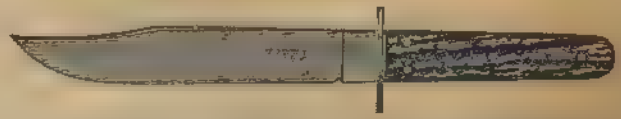
No.	740
Weight per dozen, lbs	1½
Per dozen	$14.00

MARBLE

Trout knife, with sheath. Made from finest forged cutlery steel. Handle, terminating in a ring one inch in diameter, is ⅛-inch thick.

No.	79
Length blade, inch	2
Weight, oz	1
Each	$0.75

UNIVERSAL



Forged polished crucible steel blades. Clip pattern, riveted stag handles, steel guards. Complete with leather sheaths.

No. 0020—Blade, inch	5	6	7
Weight per dozen, lbs	3	4	5
Per dozen	$32.00	34 00	36 00

WADE & BUTCHER

English forged steel blade. Extra fine, hollow ground. Fibre handle, brass trimmings and guard, leather sheath.

No. 1827—Length blade, inch	5	6
Weight per dozen, lbs	6	8
Per dozen	$48 00	60.00

All above, one-half dozen in a box.

Kelley-How-Thomson Co. of Duluth

INCANDESCENT ELECTRIC LAMPS

MAZDA LAMPS

Produces a pure white light which so closely resembles natural daylight that colors and shades can be accurately matched. The saving of Electric Current and its long life makes it a more economical lamp than the ordinary Carbon Lamp; it uses less current, produces more light and lasts longer than any other lamp. It is the most satisfactory lamp for Residences and Public Buildings.

Can be used on either Direct or Alternating Current, and burned any angle.

REMINGTON U. M. C. SHOTGUNS

AUTO LOADING

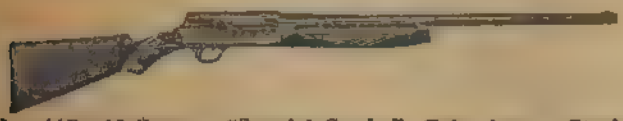
TAKE DOWN. SOLID BREECH

No. 11A—12 Gauge. "Standard Grade." Take down. 28-inch steel barrel. Full or modified choke. Five shot. Pistol grip. Walnut stock. Length, 14⅜ inches; drop, 2½ inches at heel, 1⅝ inches at comb. Weight each, about 7¾ lbs.
Each $75.50

No. 11AR—12 Gauge. Same as No. 11A, with solid matted ribbed barrel. Full or modified choke.
Each $86 83

No. 11AX—12 Gauge. "Standard Grade." With extra 26-inch cylinder bore barrel. Otherwise same as No. 11A.
Each $106.30

No. 11B—12 Gauge. "Riot Grade." Take down. 20-inch cylinder bore steel barrel. Otherwise same as No. 11A. These guns are used by the U. S. Government in the constabulary force of the Philippine Islands; also by prison guards, express messengers and at banks.
Each $75.50



No. 11B—12 Gauge. "Special Grade." Take down. Stock half pistol grip and forearm of selected English walnut, neatly checkered. Otherwise same as No. 11A.
Each $92.03

No. 11BR—12 Gauge. Same as No. 11B, with solid matted ribbed barrel.
Each $103 36

No. 11C—12 Gauge. "Trap Grade." Take down. 28-inch steel barrel. Five shot. Selected English walnut stock and forearm neatly checkered. Straight grip. Stock, 14¼ inches long; drop at heel, 2¼ inches; drop at comb, 1½ inches. Weight each, about 7¾ lbs.
Each $92.03

No. 11CR—12 Gauge. Same as No. 11C, with solid matted ribbed barrel.
Each $103.30

No. 11D—12 Gauge. "Tournament Grade." Five shot. Take down. 28 and 26-inch steel barrel. Any desired choke. Stock and forearm are of specially selected English walnut delicately hand checkered. The receiver and barrel are finished with a rich scroll hand engraving. All working parts are hand polished. Pistol grip stock, 14 inches in length; drop, 2½ inches at heel, 1⅝ inches at comb. Weight each, about 7¾ lbs.
Each $145.50

No. 11DR—12 Gauge. Same as No. 11D, with solid matted ribbed barrel.
Each $156.85

Remington automatic shotguns made in 12 gauge only.

PUMP ACTION REPEATING

SOLID BREECH. HAMMERLESS. TAKE DOWN

No. 10A—12 Gauge. "Standard Grade." Take down. Six shot. 30-inch fluid steel barrel, full choke. Blued finish. Half pistol grip stock and forearm of walnut, regular dimensions 13¾ inches long, drop at heel, 2¾ inches, drop at comb, 1⅝ inches. Full or modified choke. Weight each, about 7½ lbs.
Each $60.92

No. 10AR—12 Gauge. Same as No. 10A, with solid matted ribbed barrel. Full or modified choke.
Each $72.25

No. 10R—12 Gauge. "Riot Grade." Take down. 20-inch cylinder bore steel barrel, otherwise same as No. 10A. This gun is used in a number of state prisons and also by express messengers and watchmen.
Each $60.92

No. 10S—12 Gauge. "Trap Special Grade." Take down. Six shot. 30-inch fluid steel barrel, full choke. Blued finish. Straight grip. This grade differs from "No. 10C Trap" in that the stock and forearm are American walnut, the stock being furnished in but one dimension, which is 14 inches in length, drop, 2 inches at heel and 1½ inches at comb. The top surface of barrel is matted the entire length, to prevent the reflection of light. Weight each, about 7½ lbs.
Each $72.59

No. 10SR—12 Gauge. Same as No. 10S Trap Special, with solid matted ribbed barrel.
Each $83.92

No. 10B—12 Gauge. "Special Grade." Take down. Same as 10A, with the exception that stock and forearm are of selected English walnut, half pistol grip and neatly checkered.
Each $83 25

No. 10BR—12 Gauge. Same as No. 10B, with solid matted ribbed barrel.
Each $94 58

No. 10C—12 Gauge. "Trap Grade." Take down. Six shot. 30-inch fluid steel barrel. Full choke. Straight grip; stock and forearm are of selected English walnut and are neatly checkered. Weight each, about 7½ lbs.
Each $83.25

No. 10CR—12 Gauge. Same as No. 10C Trap, with solid matted ribbed barrel.
Each $94.58

SOLID BREECH. HAMMERLESS. TAKE DOWN

No. 17—20 Gauge. Six shot, 28-inch barrel. Barrel chambered for 2¾-inch shells. Stock and forearm of walnut. Length of stock, 13¾ inches. Weight, about 5½ lbs.
Each $60 92

REMINGTON U. M. C. RIFLES

MODEL 30, HIGH POWER BOLT ACTION

Bolt and action are the same design as used in the model 1917 army rifle. Special high pressure steel barrel 24 inches long, tapered. Half pistol grip. American walnut stock. New design forged steel butt-plate. Thumb operated safety; new model sporting rear peep sight. Kerr adjustable service type sling strap. Chambered for 30 calibre Springfield model 1906 cartridge. Magazine holds five cartridges. Weight, 8 lbs.

Model 30—30 calibre.....Each $65.00

AUTO LOADING
TAKE DOWN

22-inch barrel, straight grip, 5 shot. Weight each, 7¾ lbs.

Chambered to shoot a special rimless autoloading cartridge. Box magazine which can be loaded by using a clip containing 5 cartridges or by inserting one at a time. Heavy solid breech. Trigger pull is extra light from 1½ to 3 lbs. The balanced trigger prevents the gun from jarring off should it be accidentally dropped. The rapidity of fire is only limited by the speed the shooter can pull and release the trigger, but pulling the trigger once only fires one shot, and must be released again for each successive shot.

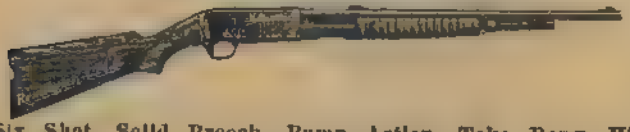
REPEATING HIGH POWER
PUMP ACTION. SOLID BREECH



A Six Shot, Solid Breech, Pump Action, Take Down High Power Rifle

A rifle having a solid wall of steel which lies between the firing chamber and the shooter's face. This affords absolute protection against injury to the shooter. Barrel of 22-inch special ordnance steel, half pistol grip stock of American walnut fitted with shotgun style rubber butt plate. Patented quick adjustable No. 1 buckhorn rear sight and copper bead front sight. The only high power rifle that can be cleaned from the breech preventing powder residue, or other foreign substances from entering the breech block. Weight 6¾ lbs., each.

Two New WEAVER Items

The men who know the problems of automobile and garage service have appreciated what WEAVER inventions have meant during the last eight years.

The hours of time, the amount of human energy, and the many dollars in cash which WEAVER accessories have saved, tell their own story of WEAVER'S service to the trade.

And now, to add the next chapter to the interesting history, come two new WEAVER products—each based on a new idea of convenience to automobile men—each with the definite purpose of making a mean job easy. And, like all the other members of the WEAVER family, both the WEAVER WIRE WHEEL REPAIR STAND and the WEAVER UNIVERSAL AXLE STAND earn dollars for garage men by turning out better work in the minimum of time.

To Start Our Biggest Year

The WEAVER WIRE WHEEL REPAIR STAND fills that need which garage men have always felt for a substantial, single-unit device on which the aligning, truing and repairing of wire wheels can be performed in the easiest and most efficient manner.

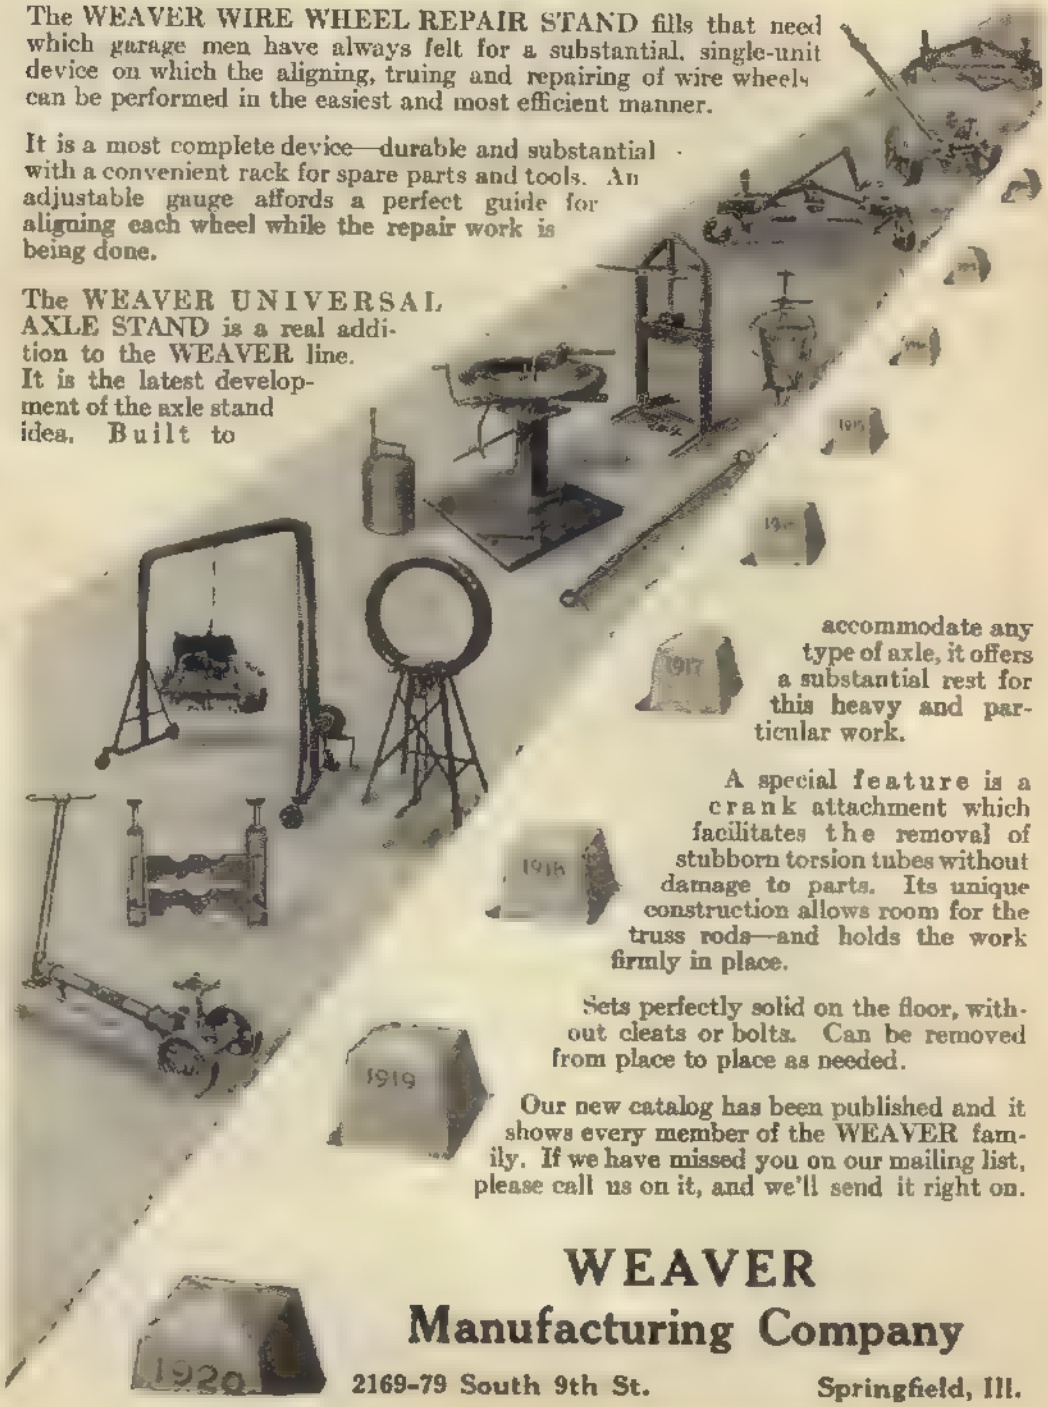
It is a most complete device—durable and substantial with a convenient rack for spare parts and tools. An adjustable gauge affords a perfect guide for aligning each wheel while the repair work is being done.

The WEAVER UNIVERSAL AXLE STAND is a real addition to the WEAVER line. It is the latest development of the axle stand idea. Built to accommodate any type of axle, it offers a substantial rest for this heavy and particular work.

A special feature is a crank attachment which facilitates the removal of stubborn torsion tubes without damage to parts. Its unique construction allows room for the truss rods—and holds the work firmly in place.

Sets perfectly solid on the floor, without cleats or bolts. Can be removed from place to place as needed.

Our new catalog has been published and it shows every member of the WEAVER family. If we have missed you on our mailing list, please call us on it, and we'll send it right on.



WEAVER
Manufacturing Company

2169-79 South 9th St. Springfield, Ill.

CHAMPION SPARK PLUGS

Champion Spark Plugs are guaranteed to give absolute satisfaction to the user, or full repair or replacement will be made.

Conical 2-piece ⅛-in Hex

Symbols ending with 3 are Conical Insulators.

Symbols ending with 4 are Petticoat Insulators.

Gaskets furnished with all Insulators

LIBERTY

The Liberty Spark Plug has been designed to fill the need for a high-grade plug. The insulator is made of material imported from Europe and will stand any heat; can be cooled instantly without damage and may be safely exposed to shock or sudden changes where porcelain insulators would be destroyed. The shell is made of brass, does not rust, and reduces carbon deposits to a minimum. The electrodes are of special nickel alloy, which will stand more heat and resist corrosion better than that employed by nearly all other makes of plugs. The special form and construction of these electrodes makes it impossible for the points to get out of position. The spark gap is constant. Liberty Spark Plugs are guaranteed for the life of the motor.

SPARK PLUG CLEANER

CHAMPION "MINUTE"

The Champion "Minute" Spark Plug Cleaner is one of the best time and trouble savers on the market. The illustration tells the story. You simply fill the tube half full of gasoline, screw the plug you want cleaned into the bushing at the end, then shake No grease, no dirt, no trouble, and you don't even have to take the plugs apart. If you have ever cleaned spark plugs the old way, you can appreciate what this means.

Champion "Minute"—Fits every size and make of spark plug.....Each, $0.75

Packed one in a wooden box.

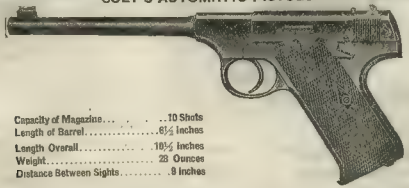
COLT'S AUTOMATIC PISTOLS



Capacity of Magazine	10 Shots
Length of Barrel	6½ Inches
Length Overall	10½ Inches
Weight	23 Ounces
Distance Between Sights	.9 Inches

COLT, 22 CALIBER LONG RIFLE, R. F.

This is the Only Automatic Pistol now made to handle the Standard Caliber .22 Long Rifle Cartridges, and will prove most popular with Shooters, Sportsmen, Trappers, and others desiring a High Grade Pistol Adapted for this Economical and Easily Obtained Ammunition.

With its Adjustable Target Sights, Long Barrel, Light Trigger Pull, and Splendid Balance, it Possesses all the Advantages of a Single-Shot Target Pistol, with the additional features of Automatic Action, obviating the necessity and inconvenience of reloading for each shot.

The Pistol is Equipped with a Safety Lock which, when the Arm is Cocked, may be pushed upward, thus positively Locking Hammer and Slide. This Safety Lock is located within easy reach of the thumb of the hand holding the Pistol and may be instantly pressed down when raising the Pistol to the Firing Position. It also acts as an Indicator showing whether or not the Pistol is Cocked.

An Extension of the Frame at Rear Serves as a Guard to Prevent the Hand of the Shooter from Slipping Upward and being injured by the Recoiling Slide; this also acts as a Guide to Keep the Hand in the Same Position for Each Shot, thereby aiding in Accurate Shooting. The Grip or Stock Slants at a Correct Angle in Relation to Barrel and Line of Sight, giving the Shooter the Proper "Hold" of the Piece Without Wrist Strain.

The Magazine is provided with a Thumb Grip or Pin which projects on the right side and enables the Operator to Compress or Relieve the Tension on the Magazine Spring to Facilitate Loading the Magazine.

Full Blued Barrel and Mountings; Checkered English Walnut Stock; Bead Front Sight, Adjustable for Elevation; Rear Sight, with Adjusting Screw, Adjustable for Windage

	Each
No. 22A—22 Caliber, R. F., Chambered for 22 Long Rifle, Greased Cartridges Only	$41.00

Weight, 28 Oz. Each

DULUTH HARDWARE STORE FIXTURES

REMOVABLE END PANELS

All Cabinets, Half Height Cabinets and Bases are Fitted with Removable End Panels. Fixtures, which are equipped in this manner, make it unnecessary for the Merchant to purchase additional ends when adding new cabinets or bases to his fixtures. The end panels on the old fixtures are Easily Removed, the new fixtures set up flush against the old and the ends transferred to the new sections, making one continuous line of shelving.

DULUTH HARDWARE STORE FIXTURES

"DULUTH" GLASS DISPLAY DOOR HARDWARE CABINET
(Length 9 ft. 3⅞ in., Depth 16¾ in., Height 57½ in.)

Display Doors—This cabinet is equipped with four sample display doors glazed with double strength glass. Each door is hung with three substantial hinges, brush brass finish and fitted with brass pull and ball catch. All doors, unless otherwise ordered, will be hinged so as to swing toward the front of the store.

Interior—Back of each door are four adjustable wood shelves. Any arrangement, however, of the interior can be had at a slight additional charge by use of insets which are fitted with a large variety of oak front steel drawers.

Sample Boards—Sample boards are covered with green felt and securely fastened into a recessed frame at the back of each door. They can be easily removed and are built of a crossbanded veneered panel so as to prevent warping or splitting. The backs of the sample boards are finished to match the exterior of the cabinet. They are made in sections, one, two, three or four sections to a door and by a very ingenious device they can be easily removed, the articles displayed on them shown to the customer and then put back in the door.

Weight—Shipped set up, shipping weight approximately 490 lbs. each.

	Each
No. 875—Without End Panels..	$134 00

(If End Panels are Wanted Add $7.00 to List Price.)

"DULUTH" SECTIONAL REMOVABLE PANEL DISPLAY DOOR
(Patent Applied For)

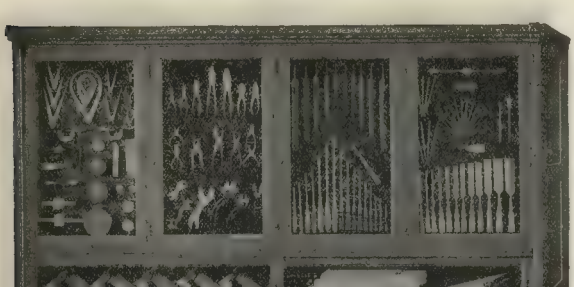
In addition to the regular display door with full length panel back, they are also manufactured with "Sectional Removable Panels," either two, three or four panels to a door. This feature cannot be had on any other make of Hardware Store Furniture and is exclusive with the "Duluth" line. It is worthy of the most serious consideration of every merchant who is contemplating the installation of hardware fixtures for it will display his goods to better advantage, save time for his clerks and systematize his whole store.

To better illustrate this feature, let us take the following example. Back of one of the display doors are stored several different classes or kinds of builders hardware. Instead of the ordinary shelves there is a cabinet inset fitted with oak front metal drawers. Each drawer has a label holder containing a card which gives the stock number of the article contained in it. The display door has four removable panels, one panel is sampled with padlocks, another with butts, still another with drawer pulls and sash lifts and the fourth with cupboard catches, small draw locks etc. Under each article on the panels is the stock number which corresponds with the number on the drawer which is directly in back of it. A customer wants a padlock; instead of taking down from the shelves a number of packages, opening them, unwrapping the padlocks (all of which consumes time) the clerk lifts out the panel on which they are sampled and lays the panel on the counter for inspection. The customer at one glance can see the merchant's entire stock and the selection of the one wanted is quickly made. The clerk slips the panel back in place on the door and takes the padlock selected from the drawer which bears the corresponding stock number. The whole transaction thus consumes only a few moments, the clerk is free to turn his attention to other prospective purchasers and the customer has been promptly waited on. In addition the stock has not become mixed nor have original packages been left on the base ledge to be put back later on the shelves.

For this important feature, which cannot be used or is sold independently or apart from "Duluth" Sectional Hardware Fixtures, the following slight extra charges are made.

Extra for each display door fitted with two Sectional Removable Panels.... $2.00
Extra for each display door fitted with three Sectional Removable Panels.... 3.00
Extra for each display door fitted with four Sectional Removable Panels.... 4.00

DULUTH HARDWARE STORE FIXTURES



"DULUTH" GLASS DISPLAY DOOR HARDWARE CABINETS
(Length 8 ft. 3⅝ in., Depth 16⅜ in., Height 57½ in.)

Display Doors—This cabinet is equipped with four sample display doors glazed with double strength glass. Each door is hung with two substantial hinges, brush brass finish and fitted with brass pull and ball catch. All doors, unless otherwise ordered, will be hinged so as to swing toward the front of the [illegible].

Sample Boards—Sample boards are covered with green felt and securely fastened into a recessed frame at the back of each door. They can be easily removed and are built of a cross-bonded veneered panel so as to prevent warping or splitting. The backs of the sample boards are finished to match the exterior of the cabinet.

Interior—Back of each door are four adjustable wood shelves. Any arrangement, however, of the interior can be had at a slight additional charge by use of inserts which are fitted with a large variety of oak front steel drawers.

Lower Display Below the display Doors are sliding glass doors glazed with a select quality of double strength glass. The back of this display portion is lined with a rich green felt and arranged with racks for guns, saws, etc. In ordering be sure and state the goods you intend to display so we can include the proper racks.

BOLT AND SCREW CASES

BROWN'S PERFECTION

Drawers are Square, with No Waste Space at Center. Labeled with Size of Screw or Bolt. Each Drawer will Hold a Full Package of Size Indicated. Case Revolves Easily, Whether Empty or Full.

BOLT

Made of Good Quality Tennessee Oak, Hard Oil Finish. Drawers are Made Square, with No Waste at Center. Forty Drawers. Height, 37 Ins. Diameter, 22 Ins.

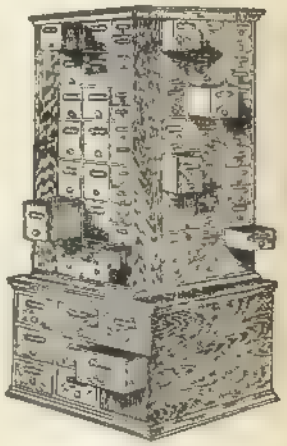
Labeled as Follows

1½x1½, 1¾, 2, 2¼, 2½, 3, 3½, 4, 4½, 5.
⅞x1½, 1¾, 2, 2½, 3, 3½, 4, 4½, 5, 6.
⅛x2, 2½, 3, 3½, 4, 4½, 5, 6, 7, 8,
⅛x3, 3½, 4, 4½, 5, 6, 7, 8, 9, 10

	Each	
No. 40—Wt., Each, About 180 Lbs.....	$27.00	**40.50**

COMBINATION BOLT AND SCREW CASES

Made of Good Quality Tennessee Oak, Hard Oil Finish. Same as No 40, Except Corners are Left Square and Filled in with Small Drawers for Screws.



UPPER CASE, ONLY; WITHOUT BASE

With 112 Boxes. 56 for Bolts and 56 for Screws. Height of Case, 50 Ins. Diameter, 24 Ins.

	Each	
No. 112—Wt., Each, Abt. 300 Lbs	$54.00	**$80.90**

CASE AND BASE, COMPLETE

Base is 30 Ins. Square, 20 Ins. High and Contains 18 Drawers Upper Case has 112 Boxes, 56 for Bolts and 56 for Screws. Height, Over All, 70 Ins.

No. 130—Wt., Each, Abt. 480 Lbs.....	$87.00	**$161.00**

No. 112 Cases Leave the Factory Labeled as Follows:

Washers, ½, ⅝, ¾, ⅞.
Bolts, ¼x1, 1¼, 1½, 1¾, 2, 2¼, 2½, 2¾, 3, 3½, 4, 4½, 5.
Bolts, ⅜x1½, 1¾, 2, 2¼, 2½, 2¾, 3, 3½, 4, 4½, 5, 6
Bolts, ½x1½, 1¾, 2, 2½, 3, 3½, 4, 4½, 5, 5½, 6, 7, 8
Bolts, ⅝x2½, 3, 3½, 4, 4½, 5, 6, 7, 8, 9, 10, 11, 12
Screws, ½—3, 4, 5 (in One Drawer).
Screws, ⅝—3, 4, 5, 6.
Screws, ¾—4, 5, 6, 7.
Screws, ⅞—5, 6, 7, 8, 9
Screws, 1—6, 7, 8, 9
Screws, 1—7, 8, 9, 10, 11
Screws, 1¼—8, 9, 10, 11, 12
Screws, 1½—9, 10, 11, 12, 13, 14
Screws, 1¾—11, 12, 13, 14.
Screws, 2—11, 12, 13, 14.

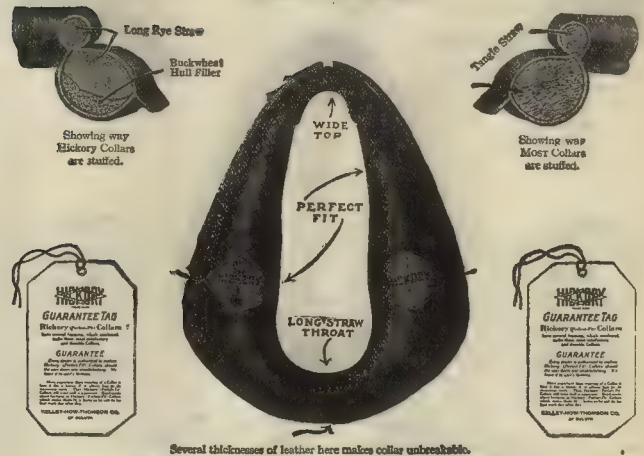
This Leaves 14 Small Drawers with Blank Labels, which can be Used for Tire Bolts or Stove Bolts, Etc

No 130, Case Labeled as Above, with the Following Added in the Base:
Washers ⅞, 1.
Bolts, ¼—5, 6, 7, 8, 9, 10, 11, 12.
Bolts ¾—7, 8, 9, 10, 11, 12, 14, 16.
Labels Can Easily be Changed to Suit Your Own Selection.

Not Carried in Stock. Can Only be Furnished by Shipping Direct from Factory in Tenn.

COLLARS

Hickory Guaranteed



Several thicknesses of leather here makes collar unbreakable.

HICKORY GUARANTEED COLLARS

are so superior to ordinary collars that we sell them on this Guarantee *"Satisfaction, New Collars, or Money Back".*

A Sweat Pad should not be used with them. A horse can work in a Hickory Guaranteed Collar 365 days in a year without shoulder trouble. They will fit any shaped horse's neck and are recommended by Dr. G. Ed. Leech, M. D. C., Secretary of the Minnesota State Veterinary Association.

No. 10—17 in. Draft, Russet Face, Whole Shoulder, Extended Liner, Thread Stitched Around Outer Seam, Wide Ribbon Stitched with Reinforced Solid Leather Throat, Sole Leather Collar Pad, 1¼ in. Billet, Thong Finish.....$33.68

TYPE M ALAMO KEROSENE ENGINES
MAROON LINE

3½ H. P. Kerosene Engine.

The increased cost of gasoline and the non-production of distillate has created a demand for an engine which will successfully operate on cheaper fuel, such as kerosene. This demand has led us to develop a kerosene engine which has spoken for itself like all other established products of this company, namely, by seventeen years of engine experience.

The kerosene engine we here offer must not be confused or compared with the ordinary kerosene engine that is found on the market, as we have spent large sums for research and experimental work, therefore a product of scientific and basic principles only is represented. We offer you an engine that has perfect combustion, therefore almost entirely eliminating the smoke and obnoxious gas resulting from improperly designed and constructed kerosene engines.

Simplicity is the next important item for thorough consideration, which is best illustrated by stating that our kerosene engine after put in operation is entirely automatic, or self-regulating. Fuel and air are drawn into the engine at proper proportion, varying, of course, to a weak or rich mixture as required by load conditions. The water spray necessary for the successful operation of any kerosene engine is also in this case automatically controlled, and is supplied only at times when needed for heavy engine loads. Designed to burn kerosene as successfully as it does gasoline and distillate.

3½ H. P. Kerosene Engine—Specifications and Equipment

Approximate shipping weight crated, domestic, lbs.	550
Approximate shipping weight boxed, export, lbs.	700
Cubic feet boxed, export	23

JANESVILLE BALL BEARING COASTER WAGONS

Constructed throughout of the Best Materials, Selected White Ash being used in Bodies and Bolsters. Wheels are made of Seasoned Hardwood and are of Special Design. Each Spoke is made with Tenon and the Rims are Drilled for the Tenon on Spoke to Fit properly. Wheels have ¾x1¼ in. Steel Tire and Steel Flanges are fastened to wheels with 8 rivets. Each rivet goes through the spoke. Wheels are fitted with Special Design of Ball Bearings. They are the Regular Annexable Cup and Cone type with ⅜-inch Balls, and the Balls, Cups and Cones are assembled as a unit with the wheel. The wheel can be removed without the Balls or Bearings coming out.

Axles are made of ¾ in. Cold Rolled Steel.

Both Front and Back Bolsters are Strongly Braced with ¾x1¾ in. Steel Braces and the Front Bolster is also fitted with an Extra Hound Brace. The Bolster Plates and the Front Bolster Braces are so made as to fit around the ½-in. Cold Rolled King Bolt.

	Per Dozen
No. 100—Size of Body 32x14 in.; Wheels 10 in. High; Weight per Dozen, about 420 Lbs.	$ 96 00
No. 200—Size of Body 36x16 in.; Wheels 10 in. High; Weight per Dozen about 480 Lbs.	108 00
No. 300—Size of Body 40x16 in.; Wheels 10 in. High; Weight per Dozen, about 540 Lbs.	120 00

Packed Two in a Crate

BOYS' WAGONS

AUTO-WHEEL COASTER

Removable Body; Roller-Bearing, Speedy, Sturdy and Durable

No. 0

The Auto-Wheel Coaster Wheel is of Standard Automobile type. The Hub and Bushings are of Cold Rolled Pressed Steel The Spokes are of well seasoned Second-Growth White Ash, Ovaled, Mitered and Machine Riveted in Hub, with Bushing turned over ends. The Felloe is ½x¾ inch, with Tire ½x¾ inch flat steel, electrically welded and shrunk on felloe by hydraulic pressure.

No. 0—Lettered "Buffalo," Body Not Removable, Bolster Braces omitted

The Bearings are hard-drawn Bessemer Steel Rollers, running on cold-drawn, absolutely true Steel Axles. A special designed cap protects hub and bearings from dust and grit, and a special washer prevents sliding out and consequent wear on roller bearings. Cotter pins are used instead of nuts because they are equally efficient and more easily replaced if lost.

Nos. 1, 2, 3, 4

Bolsters are of Seasoned Hard Maple and Handsomely Shaped and Ironed; ½ in. King Bolt.

Bed of Well-Seasoned, Second Growth White Ash, finished in the Natural Grain, filled and varnished with special wear-resisting compound.

Box mortised, glued and nailed to insure strong, durable construction and ornamented in Bright Vermilion, giving an unusual attractive body The whose body is thoroughly braced and easily removed.

Wheels are finished with Two Coats of Bright Vermilion Striped in Black and Varnished, Iron Parts Japanned and Baked.

Per Dozen	$144.00

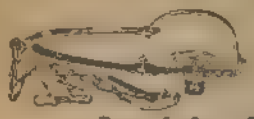
Packed One in a Crate

GAME TRAPS

VICTOR

Similar in pattern to the genuine Newhouse, though lighter in construction. Suitable for farmers and trappers of small game. Steel wire chain and ring.

SINGLE SPRING



Nos.	Kind	Spread of jaws, inch	Weight per doz, lbs	Per doz
V0	Rat	3½	5	$ 4.25
V1	Muskrat	4	7¼	5.00
V1½	Mink or skunk	4⅝	11¼	7.50

DOUBLE SPRING

Nos. V2, V3 and V4.

Nos.	Kind	Spread of jaws, inch	Weight per doz, lbs	Per doz
V2	Fox	4⅝	14½	$10.50
V3	Otter or coyote	5½	22¼	14.00
V4	Beaver	5⅞	25	16 50

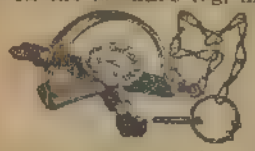
Nos. V0 to V1½, one dozen in box; balance loose.

Victor Giant is similar in pattern to Victor, except the Giant jaws catch far up on the animal's leg, the lightning-action spring rising high on the jaws. The pan and dog are wider and heavier, the chain larger and the spring faster.

No.	Kind	Spread of jaws, inch	Weight per doz, lbs	Per doz
VG1	Muskrat	4⅞	8[illegible]	$ 6.50

ONEIDA JUMP

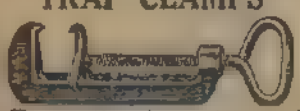
Sheet steel. Tempered spring. Steel wire chain and ring. Traps lie flat on the ground and can be secreted in runways of animals. Jaws have wide meeting faces, which prevent breaking animal's leg. Construction of springs causes trap to jump up and take a high grip on the animal's leg, instead of the foot.



Nos.	Kind	Spread of jaws, inch	Weight per doz, lbs	Per doz
J0	Rat or gopher	4	5½	$ 4.25
J1	Muskrat	4¾	8	5.00
J1½	Mink or skunk	5¼	9½	7 50
J2	Fox or raccoon	5½	14¼	10 50
J3	Badger or coyote	6½	22	14 00
J4	Otter or coyote	7¼	27¾	16 50

Nos. J0 to J1½, one dozen in box, balance, loose.

TRAP CLAMPS



Malleable iron. For setting large traps. By placing one on each spring large traps are easily and quickly set with a few turns of the thumb screw.

Nos.	N4	N5	N6
Size of opening, inch	2¼	4⅜	5⅝
Weight per dozen, lbs	2¾	4½	23½
Per dozen	$4.00	10.00	15.00

NEWHOUSE

Highest grade. Best crucible steel springs. Stock is a mixture of special Norway iron. Chain flat cut steel, smooth and flexible. Fully guaranteed. Used by professional trappers for catching all fur-bearing animals.

SINGLE SPRING

Nos.	Kind	Spread of jaws, inch	Weight per doz, lbs	Per doz
N0	Rat and gopher	3½	7½	$ 6.00
N1	Muskrat	4	10	7.50
N1½	Mink or skunk	4⅞	14½	10.00

DOUBLE SPIRNG

Nos.	Kind	Spread of jaws, inch	Weight per doz, lbs	Per doz
N2	Fox	4⅛	18	15 00
N3	Otter or coyote	5½	28½	20.00
N4	Beaver	6½	33¼	25 00
N4½	Wolf	8¾	92	80.00

N1, one dozen in box; balance, loose.

BEAR

Double spring, with toothed jaws and heavy chain.

Nos.	Kind	Spread of jaws, inch	Weight per doz, lbs	Per doz
N5	Common black bear	11¾	234	$190.00
N6	Grizzly bear	16	522	425.00

DEER OR BEAR, WITH OFFSET TOOTHED JAW

Heavy double spring. ⅜-inch offset jaw allows spring to rise, and prevents severing of the animal's leg.

Nos.	Kind	Spread of jaw, inch	Weight per doz, lbs	Per dozen
14	Deer	6½	40	$ 30.00
15	Bear	11¾	234	190.00

JUMP TRAP SETTER

Quickly and easily applied. With one turn of the wrist the spring is brought down, the jaws opened and the trap set.

Size, inch	9
Weight per dozen, lbs	4
Per dozen	$3.00

GOPHER TRAPS

MACABEE

Green enameled steel spring wire. Two prongs. Tinned steel lever. Has large catching surface.

No.	4
Length over all, inch	6
Weight per dozen, lbs	2½
Per dozen	$3.50

Two dozen in box.

WARDS PATTERN

Coppered steel spring brass jaws. Wrought iron bar.

No.	100
Length over all, inch	5½
Spread at point, inch	1⅝
Weight per dozen, lbs	3
Per dozen	$3.50

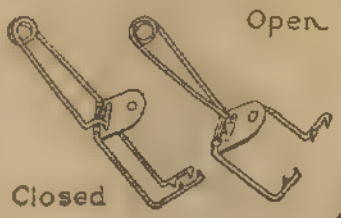
IMPROVED C. V.

Bright steel spring wire, 4 sharp pointed prongs. Double rings reinforced at top and bottom. Tinned steel lever.

No.	1
Length over all, inch	6
Height of ring, inch	3
Weight per dozen, lbs	3¼
Per dozen	$5.00

Above, one dozen in box.

ROY



Heavy spring wire. Japanned black. Sets automatically by pressing the wires together behind the trigger, therefore it is not necessary to touch the jaws or the dead animal.

No.	Roy
Length over all, inch	8¼
Net weight per dozen, lbs	2
Per dozen	$3.00

One dozen in a carton. Three gross in a case.

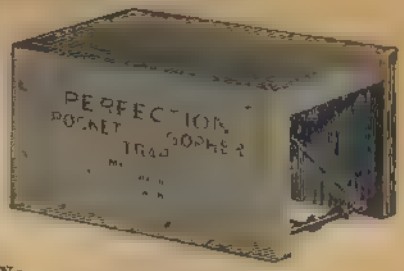
NEWHOUSE

Natural finish spring steel. 3 prongs. Steel wire ring and trigger. Flat steel lever.

No.	5
Length over all, inch	6
Height of ring, inch	3
Weight per dozen, lbs	3
Per dozen	$3.00

One dozen in box

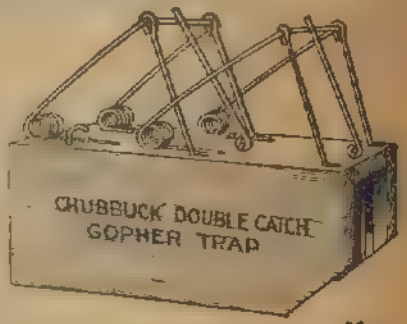
BOX



Wood frame, painted red. Coppered wire spring. Galvanized wire catch. Flat galvanized trigger. Has ½-inch hole in closed end.

No.	44
Size frame, inch	6½x3¾x3
Weight per dozen, lbs	5½
Per dozen	$4.00

CHUBBUCK DOUBLE SPRING



Wood box, painted green two coppered wire springs.

No.	50
Size, inch	6¾x3¾x3
Weight per dozen, lbs	7
Per dozen	$9 00

One-half dozen in a case.

MOLE TRAPS

Malleable iron, japanned. No. 4 gauge steel wire spring and trigger. Steel lever. Five teeth in each jaw.

No.	11
Width, inch	5½
Height, inch	8
Weight per dozen lbs	18
Per dozen	$18 00

One-twelfth dozen in box

REDDICKS

Tinned steel frame, japanned steel coil spring. Six steel prongs 5 inches long. Tinned steel lever.

No.	12
Length over all, inch	24
Width, inch	4
Weight per dozen, lbs	30
Per dozen	$15.00

One-half dozen in crate.

SPRING BALANCES

STRAIGHT

Japanned steel case. Polished brass face. Stamped figures. Tinned steel hook and ring.

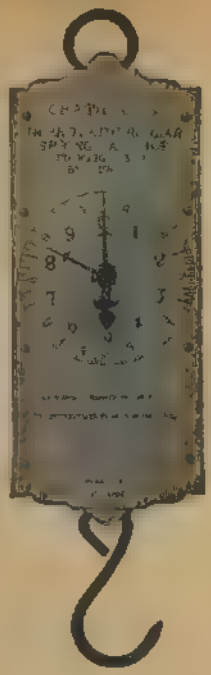
Nos. 3, 51, 81 and 82, one-half dozen in a box. Nos. 84, 86 and 87, one-quarter dozen in a box, and No. 88A one each in a box.

Note—Nos. 3 to 86 not legal for use in trade. For household purposes only. Nos. 87 and 88A pass legal inspection.



AUTOMATIC MILK AND CREAM

This spring balance is intended especially for use in connection with the Babcock test for keeping records of the quantity of milk from individual cows, together with the per cent fat, so as to calculate the butter yield. The scale is provided with a loose pointer, which, by means of a thumb screw, may be set anywhere on the dial to offset the weight of the milk pail, so this does not have to be deducted from the reading.

No. 260MD—30-lb scale, weighing by 1-20 lbs.
Each $8.00

No. 270MD—60-lb scale, weighing by 1-10 lbs.
Each $10.00

No. 280MD—120-lb scale, weighing by 1-5 lbs.
Each $15.00

One in a box.

STEEL KING

All steel, japanned case. Long brass dial. Japanned markings, very distinct. Spring cannot be strained beyond its capacity. Scale can be quickly adjusted by removing cap on top and turning screw slightly.

Heavy

No.	150
Capacity, lbs	150

UNIVERSAL

Warranted

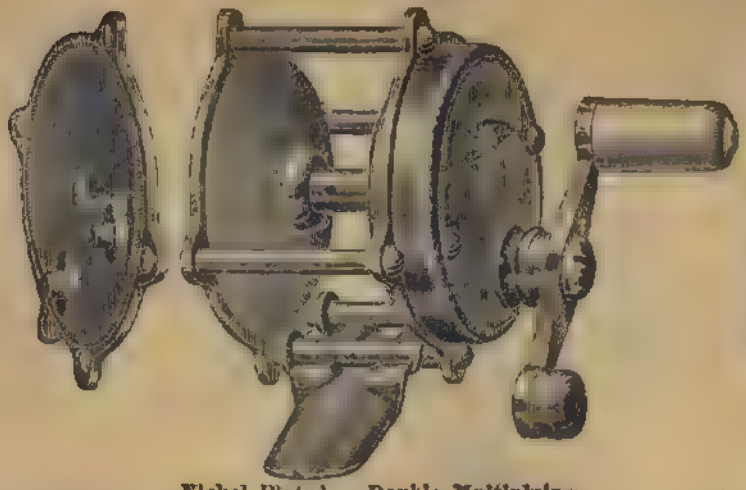
Tubular pattern. Made of steel throughout. Heavily nickel plated front with adjustment device.

No.	2022
Capacity, lbs	200
Graduation, lbs	2
Weight each, lbs	6
Each	$7.50

Note—Ice balances pass legal inspection.

FISHING REELS

DOUBLE MULTIPLYING

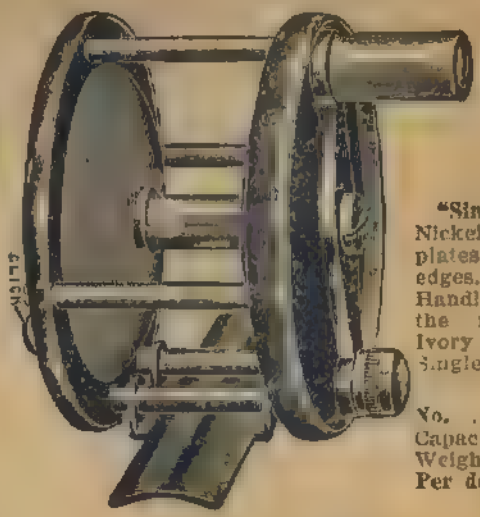


Nickel Plated.. Double Multiplying.

"Atlas"—Raised screw pillar. Sliding click and drag. Balanced handle.

No. 125—Capacity, yards.....	40	60	80	100	150
Weight per dozen, lbs.....	4	4½	5¼	6½	7½
Per dozen	$27.00	30 00	32.40	36.00	40.00

SINGLE ACTING



"Single Action Click"—Nickel plated. Rubber plates with metal bound edges. Adjustable click. Handle revolving within the metal raised dial. Ivory balanced handle. Single action.

No.	323
Capacity, yards	60
Weight dozen, lbs...	3
Per dozen	$18.00

SINGLE ACTING

PFLEUGERS GOLDEN WEST

Nickel silver, satin finish. Hard rubber discs interleaved with aluminum. Adjustable back, sliding click. Balanced handle.

No.	1131
Capacity, yards	80
Weight, ozs	12
Each	$18 00

Each reel in velvet lined display case with Marvel oil can enclosed.

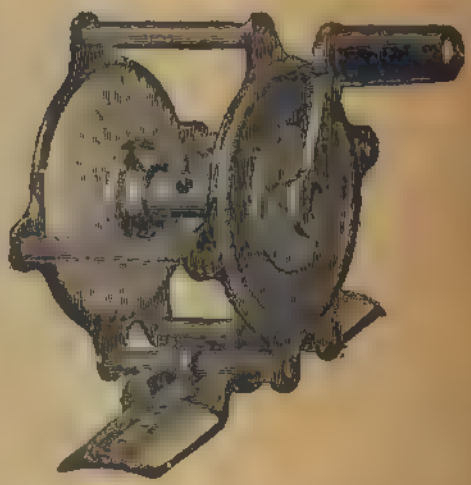
MEISSELBACH RAINBOW

A new reel modeled after some of the fine imported hand made reels. Single action. Is taken apart in a second without tools. Heavily built. Gun metal finish.

Nos.	627	631
Capacity, yards	40	60
Diameter of discs, inch.....	2⅞	3¼
Weight, ozs	3¼	4
Each	$7.50	9.00

All above, one in a box.

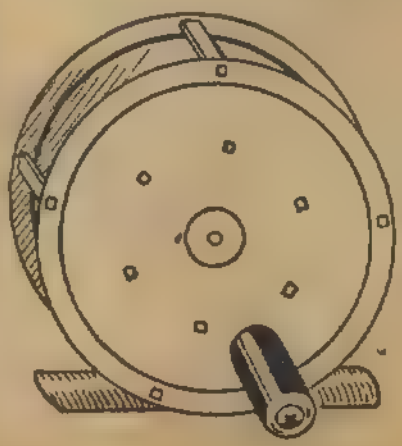
EXCEL



Nickel plated. Raised pillar. Single action, with click.

No. 110—			
Capacity, yards	25	40	60
Weight per dozen, lbs.....	1½	1¾	2
Per dozen	$9 50	11.00	13.00

One in a box



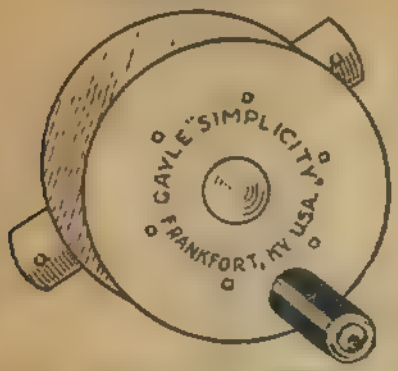
Cold rolled steel, nickel plated with adjustable click.

No.	106
Capacity, yards	40
Weight, lbs	2½
Per dozen	$0.50

One dozen in a box.

FISHING REELS

SINGLE ACTING



Cold rolled steel. Nickel plated. Fastens on side of rod.

No.	100
Capacity, yards	40
Weight, lbs	1½
Per dozen	$3.00

Three dozen in a carton

MONARCH

Full nickel plated. Free running with drag. Side plates are one piece of tempered brass, perforated and firmly riveted together to allow free ventilation, making the reel an excellent line dryer.

No.	1
Size, inch	4¾x1
Capacity, yards	150
Weight per dozen, lbs	8
Per dozen	$66.00

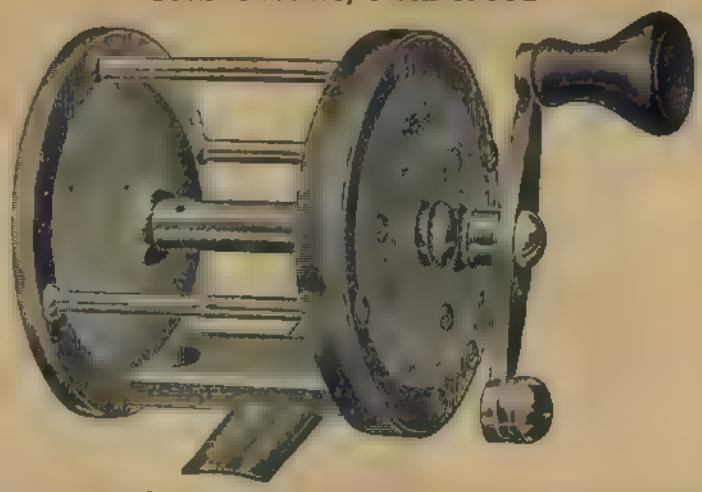
LIGHT WEIGHT TROUT

Gun metal finish. Very light, removable spool. Back sliding steel click and steel spindle.

Nos.	260 B	280 B	290 B
Size of spool, inch	¾x2¼	1x2¼	1x3
Capacity, yards	60	80	120
Weight per dozen about, lbs	4	4	4
Per dozen	$48.00	50.00	55.00

One in a box.

SURF CASTING, FREE SPOOL



"Interocean"—Generated spiral tooth gears. Hard rubber discs, reverse metal bound. Adjustable back sliding click. Front and back fancy oil cups, steel pivots, balanced crank with rubberoid handle. Tempered crucible steel clutch. To make reel free spool turn the crank a fraction of an inch backward. The clutch automatically takes hold when winding in.

	Full Nickel Plated			Nickel Silver	
Nos.	1817	1818	1819	1858	1859

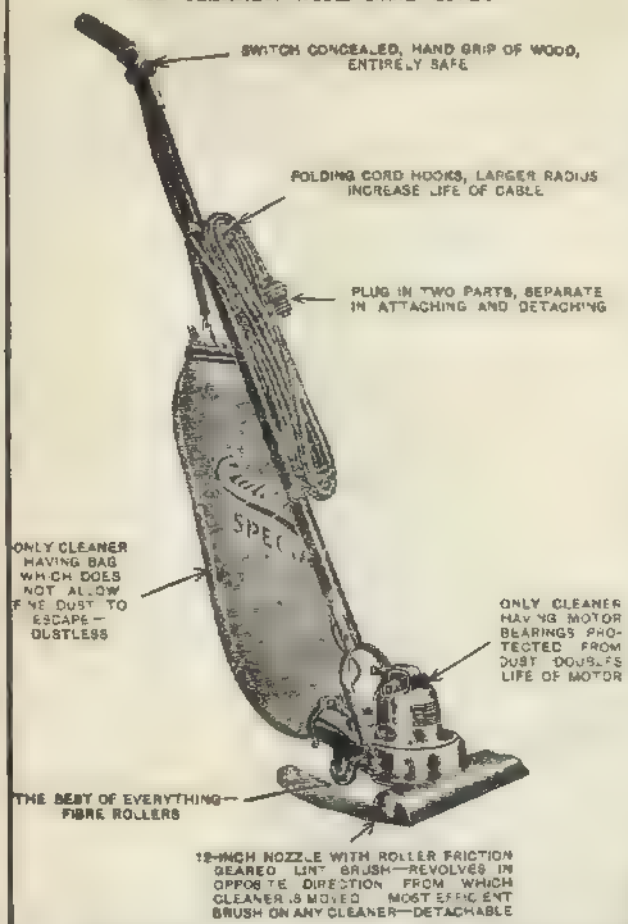
"THE CLEANER WITH NINE LIVES"



SWITCH CONCEALED, HAND GRIP OF WOOD, ENTIRELY SAFE
FOLDING CORD HOOKS, LARGER RADIUS INCREASE LIFE OF CABLE
PLUG IN TWO PARTS, SEPARATE IN ATTACHING AND DETACHING
ONLY CLEANER HAVING BAG WHICH DOES NOT ALLOW FINE DUST TO ESCAPE—DUSTLESS
ONLY CLEANER HAVING MOTOR BEARINGS PROTECTED FROM DUST DOUBLES LIFE OF MOTOR
THE BEST OF EVERYTHING—FIBRE ROLLERS
12-INCH NOZZLE WITH ROLLER FRICTION GEARED LINT BRUSH—REVOLVES IN OPPOSITE DIRECTION FROM WHICH CLEANER IS MOVED—MOST EFFICIENT BRUSH ON ANY CLEANER—DETACHABLE

Dust-proof Bearings, Steel Fan, Ping Switch, Dustless Dirt Bag, and Slotted Nozzle. The Dust-proof Bearings Keep the Dirt from Grinding and Cutting the Bearings and Prevent Excessive Oil from Penetrating the Motor Parts. The Special Fan has Six Blades which are Sectional and Should a Blade be Broken, it can be Replaced Without Entailing the Expense of a New Fan. The Ping Switch Gives Instant Control of Motor. The Material in the Dustless Dirt Bag is Treated by the Howard Dustless Duster Process. The Slotted Nozzle Increases Efficiency in Picking up Thread, Lint, and Hair. Self-locking Handle Stop Allows the Adjusting of the Handle to Any Angle. Guaranteed for an Unlimited Period Against Any Original Defects Caused by Carelessness in Workmanship and Defects in Material.

Each

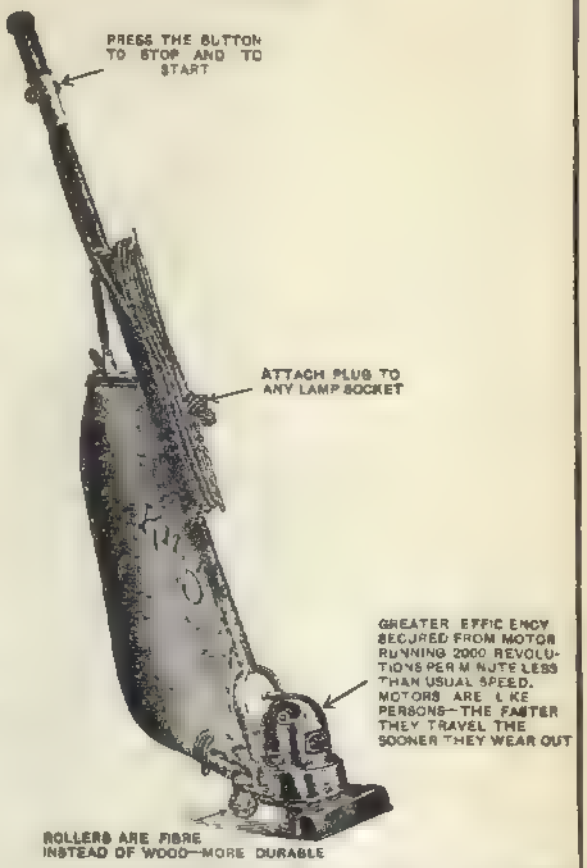
No. 2600—Model K **$71.00**

EXTRA ATTACHMENTS FOR No. 2600

1 Furniture and Mattress Nozzle
1 Wall or Floor Brush
1 Extension Handle
1 Blowing Nozzle, Radiator, and Edge Tool
1 Adapter
1 Hose Connection
1 Length—Covered Hose for Suction or Blowing

Per Set **$15.00** Complete

KING



PRESS THE BUTTON TO STOP AND TO START
ATTACH PLUG TO ANY LAMP SOCKET
GREATER EFFICIENCY SECURED FROM MOTOR RUNNING 2000 REVOLUTIONS PER MINUTE LESS THAN USUAL SPEED. MOTORS ARE LIKE PERSONS—THE FASTER THEY TRAVEL THE SOONER THEY WEAR OUT
ROLLERS ARE FIBRE INSTEAD OF WOOD—MORE DURABLE

Combines Efficiency, Durability, Strength, and Attractive Design. One-eighth Horse-power Motor. Roller Geared Revolving Brush for Ravelings and Lint. Same Can be Easily Detached from Nozzle. Switch is Fully Enclosed in Handle—No Knob to Break. Press Button to Start and Press it in the Opposite Direction to Stop. Dust Collector is Easily Attached and Detached from Machine and Permits Air to Percolate with Ease. Also Overcomes Back Pressure. Large, Open, Section Fan with Six Steel Blades. Parts can be Replaced, Saving Expense of Entire Fan if Broken. Ten-inch Nozzle. A 25-foot Gray Cord is Attached to Cleaner. The King can be Operated only on the Following Current: Alternating Current 60 Cycles, 110 to 120 Volts. Direct Current, 110 to 120 Volts. For Other Currents special Machines will be Furnished Without Extra Charge. Guaranteed Against Any Defects in Material or Workmanship.

Each

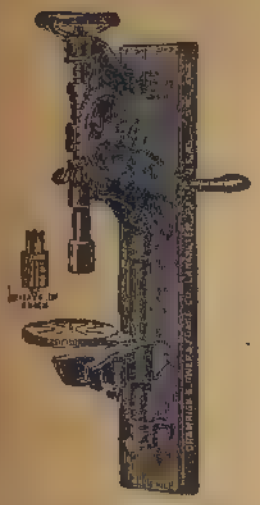
CHAMPION DRILLS
POST



Hand-feed, ball bearing. Diameter of spindle ⅞-inch. Drills ⅛ to ¾-inch hole to center of a 12-inch circle. Has a slotted lathe turned table. Spindle is made of ⅞-inch steel and has an up-and-down run of 3 inches.

No. 92—Never Slip chuck bored for 41/64-inch straight shank drills.

Each $21.35

No. 92½—Never Slip chuck bored for ½-inch straight shank drills.

Each $21.25

Weight, crated, 65 lbs

Self-feed, ball bearing. Drills ⅛ to ¾-inch hole to center of a 12-inch circle. Has slotted lathe-turned table. Diameter of spindle, ⅞-inch. Has an up-and-down run of 3 inches.

No. 101—Never Slip chuck bored for 41/64-inch straight shank drills.

Each $28 00

No. 101½—Never Slip chuck bored for ½-inch straight shank drills.

Each $28.00

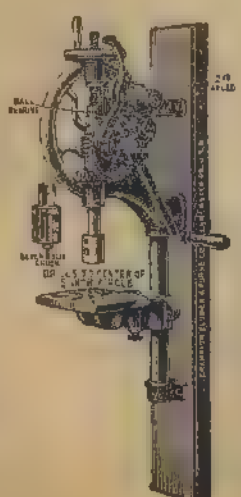
Weight, crated, 80 lbs

Self-feed, ball bearing. Drills holes from ⅛ to 1-inch to center of 14-inch circle. Has a lathe turned table. Spindle is made of 1-inch steel. Has an up-and-down run of 3 inches. Never Slip Spindle is bored for 41/64-inch shank drills

No. 98

Weight crated, lbs..... 95

Each $33 00

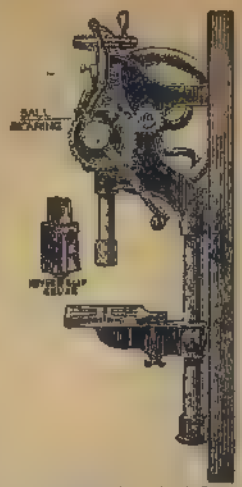


Self-feed, two speed, ball-bearing drill. Has back gears. Drills holes ⅛ to 1¼-inch. Drills center of 15-inch circle. Has a lathe turned table. Spindle, 1⅛ inches in diameter. Has an up-and-down run of 3 inches. Never Slip Spindle bored for 41/64-inch shank drills.

No. 95

Weight crated, lbs..... 115

Each $43.50

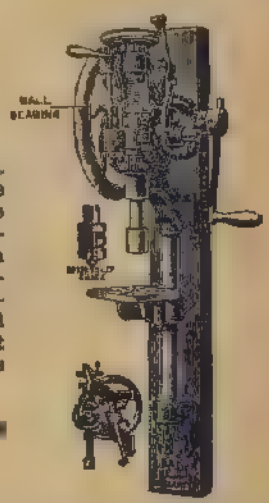


Ball bearing, self-feed with two speeds. Has double journal bearings to all gears. Lathe turned and slotted square table. Drills holes up to 1¼ inches and to the center of 15-inch circle. Spindle-bored like Never-slip chuck to take ⅝-inch straight shank drills. Has up and down run of 3 inches.

No. 93

Weight crated, lbs..... 125

Each $80.00



Self-feed. Quick return. Two speeds. Ball bearing. Drills ⅛ to 1⅛-inch hole to center of a 16½-inch circle. Has square, slotted, lathe-turned table. Spindle 1⅛ inches in diameter. Up-and-down run of 3 inches. Crank has forward motion on both speeds. All gears are protected with double journal bearings. All bearings are ground to a working fit out of solid metal. Never Slip spindle is bored for 41/64-inch shank drills.

No. .....

Each .....

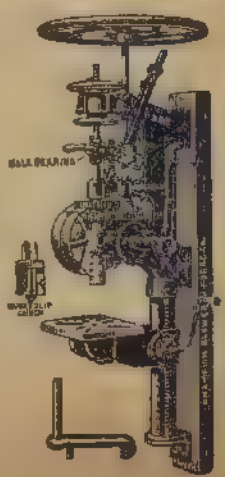
Weight, crated, 135 lbs.

Automatic self-feed and lever-feed, each independent of the other. Ball bearing. Two speeds. Drill bit raised or lowered instantaneously. Double back gears. Drills ⅛ to 1¼-inch hole to center of a 16-inch circle. Spindle 1¼ inches diameter and has an up-and-down run of four inches. Never Slip spindle, bored for 41/64-inch shank drills.

No. 200

Weight, crated, lbs 200

Each—Without pulleys $65 00



Automatic self-feed and double compound lever feed, each independent of the other. Cut gears and ball bearings. Bit raised or lowered instantaneously. Has table rack and wheel holder. Two speeds. Drills ⅛ to 1½-inch hole to center of 21-inch circle. Feed screw has an up-and-down run of 5½ inches. Never Slip spindle bored to take 41/64-inch No. 110 drills.

No. 203 .....Each $140.00

Weight, crated, 435 lbs.

POWER AND HAND

With Tight and Loose Pulleys

No. 203P .....Each $150.00

Weight, crated, 465 lbs.

With Cone Pulley and Countershaft

Each—With pulleys $130.00

Weight, crated, 400 lbs.

No. 201CP
Each—With cone pulleys and countershaft $150 00

Weight, crated, 445 lbs.

This drill is similar to No. 201 with smaller swing and lighter construction. Never Slip chuck is bored for 41/64-inch shank drills. Drills holes up to 1½ inches to center of 18-inch circle, spindle 1¼ inches, run of feed 5½ inches, run of table 10 inches.

No. 200½
Each—Without pulleys $90 00

Weight, crated, 240 lbs.

New improved. Self-feed. Two speeds. Quick return. Ball bearing. Cut geared. Has table rack and wheel holder. The bearings on this drill are the very best ground and polished out of the solid metal to a working fit. Drills ⅛ to 1½-inch hole to center of a 21-inch circle. Feed has a run of 5½ inches. Never Slip spindle is bored for 41/64-inch shank drills.

Without Pulleys

No. 7
Each $115.00

Weight, crated, 400 lbs.

POWER AND HAND

With Pulleys

No. ..... 7 P
Each $125.00

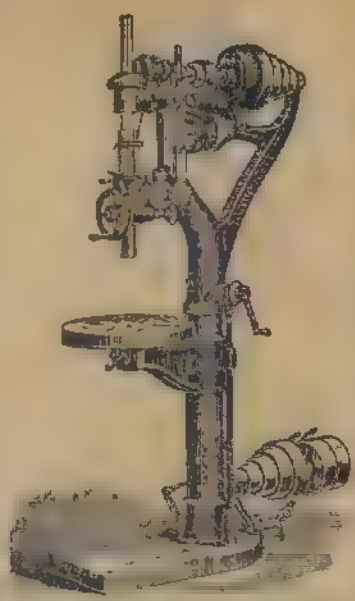
Weight, crated, 425 lbs.

With Cone Pulley and Countershaft

No. 7CP
Each $150.00

Weight, crated, 450 lbs.

20-INCH BACK-GEARED UPRIGHT POWER DRILL



An Exclusive Machine Shop Drill

Combines simplicity and speed in operation and drills with perfect accuracy holes up to 1½ inches. The change from plain to back geared drill is done in an instant by simply sliding the gears. The spindle is counterbalanced by a weight in the hollow column. Has screw for raising and lowering the table.

No. 20SB—Height of drill, 75 inches; distance between table and spindle, 27 inches; distance between spindle and base, 42¼ inches; distance from column to center of spindle, 10¼ inches; diameter of crown gear, 5¼ inches; diameter of pinion gear, 3¼ inches; diameter of column, 5¼ inches; traverse of table on column, 18½ inches; diameter of table, 16 inches; diameter of spindle, 1¼ inches; traverse of spindle, 8 inches; size of tight and loose pulleys, 8x2¾ inches; size of cone pulleys (4-step), 4, 5¾, 7½, 9x2-inch face; speed of driving pulleys, 300 revolutions per minute; floor space required (square base), 16x46 inches; horsepower required, 1; hole in spindle bored to fit Morse Taper No. 4.

Complete, with square base, less belts. Weight, 815 lbs.

Each $400 00

POWER BENCH DRILLS

The Champion power bench drill is strictly a high grade, powerful and well built bench drill. The top of the drill base is planed off to use as table, when the regular drill table is turned to one side, giving a space of 16 inches between the chuck and the base table. This drill will bore all sizes up to ⅞ with ease to center of 9-inch circle. Spindle is bored for No. 1 Morse taper shank drill. Up and down run of spindle, 3½ inches. This drill is adapted for garages, pattern makers and machine shops where light, rapid and accurate drilling is done.

CHAMPION FORGES

RIVET OR TOOL MAKERS

Pressed steel hearth and wind shield, encased fan and gearing; four bent tubular steel legs. Constructed from structural steel. Its gearing is the high speed Champion spiral gearing. Will produce blasts to weld 3½ to 4-inch iron in ten minutes. Crank turns in either direction to make blast, producing 46 revolutions of the fan wing with each turn. Adjustable ball bearings.

With shield. Hearth, 18 inches diameter. Height, 30 in. Fan, 9 in. diameter.

No. 401
Weight crated, lbs..... 115
Each $58.50

With shield. Hearth, 22 inches diameter. Height, 30 inches. Fan, 9 inches diameter.

No. 401½
Weight crated, lbs..... 120
Each $54 00

With half hood. Hearth, 18 inches diameter. Height, 30 inches. Fan, 9 inches diameter.

No. 402
Weight crated, lbs..... 120
Each $52.00

With closed hood. Otherwise same as No. 402

No. 403
Weight crated, lbs..... 125
Each $55.50

BLACKSMITHS AND CONTRACTORS

Reinforced stamped steel legs, stamped steel bowl and half hood. Ball bearing throughout. Spiral gearing and whirlwind blast tuyere iron. Blast is produced by turning crank in either direction. Blast is powerful enough for all kinds of light and heavy blacksmiths work.

Height to top of hearth 30 inches, fan 12 inches, steel sides 6 inches, hearth 30x36 inches.

No. 408—Without tank ..... Each $110 00
No. 408WT—With tank ..... " 115 00
Weight crated, 300 lbs.

Suitable for all kinds of heavy work in railroad shops, carriage and wagon shops, plow works, garages, etc. Spiral gearings and whirlwind blast tuyere iron. Height to top of hearth 30 inches, fan 12 inches. Steel sides 6 inches. Hearth 30x40 inches.

No. 409 Without tank.....Each $115.00
No. 409WT—With tank. ..... " 120.00
Weight crated, 310 lbs.

LANCASTER GEARED OR AGRICULTURAL

With shield. A strong, light forge for all kinds of portable work. Can easily be carried about, and is one of the best low priced forges manufactured.

Size of hearth, 22 inches. Diameter of fan, 10 inches.

No. 45
Each $50.00
Weight, crated 115 lbs.

With half hood. Same construction and finish as No. 45, except that it is supplied with half hood in place of shield.

Size hearth, 22 inches in diameter. Fan, 10 inches.

No. 46
Each $45.00
Weight, crated, 115 lbs.

CONTRACTORS OR BOILERMAKERS

Champion Rivet Forge. Same construction of blower and fan as No. 401. Height to top of hearth, 30 inches, fan 9 inches, hearth 24x24 inches.

No. 404—Without water tank.
Weight crated, lbs..... 170
Each $63.00

With shield. Hearth, 30x30 inches. Height, 30 inches. Fan, 10 inches diameter.

No. 406
Weight crated, lbs..... 230
Each—Without water tank.....$94.00
No. 406WT
Weight crated, lbs..... 240
Each—With water tank.....$100.00

BLACKSMITHS OR RAILROAD

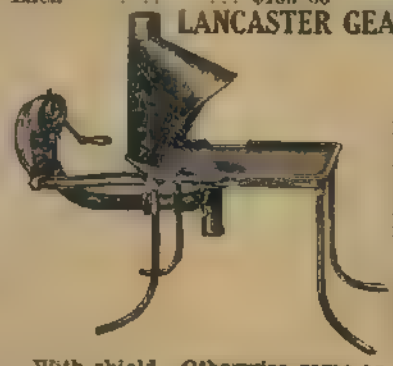
Recommended for heavy work of all kinds. Forge with cast iron hearth, half hood and slope bottom tool box. Hearth, 32x45 inches, height 30 inches, fan 12 inches in diameter, with "Whirlwind" blast anti-clinker heavy nest tuyere.

Without water tank.
No. 433
Each $100.00
Weight, crated, 375 lbs.

With water tank
No. 433WT
Each $105 00

LANCASTER GEARED OR AGRICULTRAL

With half hood.



A well-built, low-priced direct-drive forge, a good blast producer. With a large size hearth and fan, and is a suitable agricultural blacksmith forge where a direct-drive forge of these dimensions is required.

Hearth,23x35 inches. Height 30 inches. Fan, 12 inches diameter.

No. 43
Each $66 00

With shield. Otherwise same as No. 43, and is suitable for indoor work.

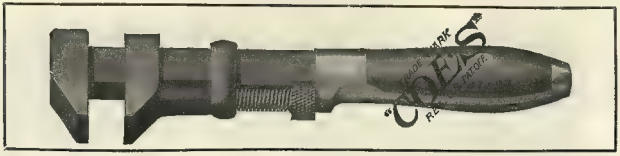
No. 42
Each $55.00
Weight, crated, 170 lbs.

MIDWAY

Made from structural steel, with steel hearth. It is the same forge as the Champion line, but having the Midway spiral-geared blower. Gearing runs in oil in a dustproof casing, the crank turning in the other direction. Simple in construction and without small gears or pinions. We recommend this blower as a strong and well built blower with a good blast.

Midway cross spiral-geared hearth, 18 inches in diameter. Height to top of hearth, 30 inches. Fan, 10 inches.

No. 78
Each $56 00
Weight, crated, 120 lbs.



Five Coes Wrenches

If you could visit our factory we would take pleasure in showing you five Genuine Coes Knife-Handle Wrenches that have been in continuous service for 138 years and are still in good condition.

Three of these wrenches were used in one shop. One saw 25 years service—another 26 years and the third 40 years.

The two wrenches used in another shop gave 22 and 25 years service respectively.

This represents an average service of over 27 years for each wrench.

When any "Doubting Thomas" asks you or your sales force how Coes Wrenches "stand up"—just cite this service record.

Coes Wrench Company

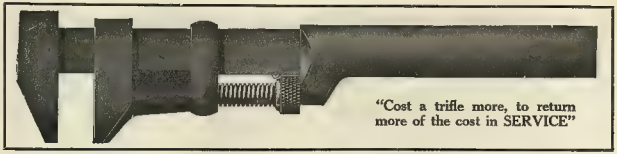
Worcester Established 1841 **Mass.**

AGENTS:

J. C. McCarty & Co., 29 Murray St., New York

Fenwick Frères, 8 Rue de Rocroy, Paris, France

John H. Graham & Co., 113 Chambers St., New York



In Service 138 Years

Now if Coes Genuine Knife-Handle Wrenches will last like that, what kind of service can your customers expect from Coes All-Steel Wrenches which are even heavier and stronger?

Do you now understand why we have been shouting: "Cost a trifle more, to return more of the cost in SERVICE?"

In our opinion a Million words would not emphasize Coes Quality like that service record. Those five wrenches taken from regular stock prove that what a user gets *out* of a wrench depends entirely upon what the manufacturers put *into* it.

Sell wrenches that *make* customers and *hold* them.

This Week's Best Letter

Here is the prize winner of this week's contest and his letter.

As previously announced this contest will continue until December, 1920 A prize of $10 (ten dollars) will be awarded each week for the best letter.

Let us have your letter now!

It is our belief that every retail hardware salesman has his own pet talk that sells the goods.

Passing these hints and pointers along will be beneficial to the man behind the hardware counters. This is the object of the contest.

Write your letter Now!

Send your photo with the letter. It will be returned as soon as we have finished with it.

HE SAYS:

The Sale of an Atkins Silver Steel Hand Saw

Gentlemen:

A week or so ago, a carpenter employed in the Trimming Department of a local factory called at the store and asked for a certain saw of another make other than Atkins. He wanted a short saw of rather fine cut, and I showed him a No. 66.

He seemed quite determined that he wanted the make of saw he asked for, saying that he had always used that make, and that he did not want to change, and that he guessed he would look elsewhere. However, I persuaded him to at least look at the Atkins Saw. I had often found it to be the case that a sale is helped along when the customer has the article in his own hands.

This model is a handsome saw to look at and just as appealing in its hang, and I could see that he was interested as soon as he got it in his hands; I first called his attention to the material—Atkins Silver Steel, made under a special process invented by E. C. Atkins in 1857. I told him that the result of this process brought out a steel equal in quality to Razor Steel.

My carpenter friend thought this sounded well enough and he admitted that the saw looked good, but said that the other make he always used was exceptional in toughness, and that he was afraid this saw might turn brittle. This gave me a good opportunity to go into the details of the tempering process which renders the Atkins absolutely the same in toughness throughout the blade. I told him about the grinding method of Atkins, comparing it with the grinding of other makes.

The next part of the sale shows an element of chance, but really goes further in showing up Atkins Quality. At this point of the sale, my attention was called from this customer by a matter which required immediate attention, so I reached in the saw drawer, opened up one of your Saw Sense booklets to page 6, about testing an Atkins Saw, handed it to the carpenter and asked him to read it over and test the saw accordingly, and that I would be back in a moment.

He had time to run through this article, and I believe the Atkins guarantee on the next page clinched the sale, for he said to me, "I see I am taking no chance for this says you will take the saw back if it fails to give perfect satisfaction."

He kept the saw and he tells me that it suits him perfectly, and he will soon be here to look at one of those Atkins Rip Saws

Very truly yours,

A. H. VAN VORIS

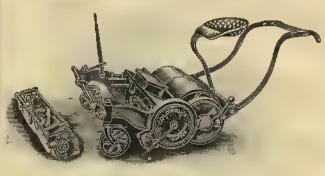
Direct Chain Drive. Gasoline Engine attached. Equipped with differential gears. No brakes necessary for down hill grades, as Engine will hold machine back.

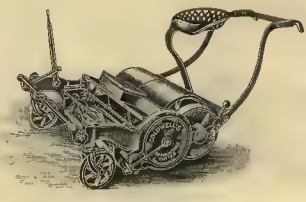
*COLDWELL'S "DEMOUNTABLE" CUTTER UNIT HORSE



Four Blades, With Extra Cutter Unit

Aluminum Finish, with Red and Gold Trimmings.

30-in. Cut ..... Each, $180.00
35-in Cut ..... " 220.00
40-in. Cut. ..... " 260.00



Six Blades, With Extra Cutter Unit

Aluminum Finish, with Red and Gold Trimmings.

30-in. Cut.. ..... Each, $190.00
35-in. Cut ... . " 230.00
40-in. Cut ..... " 270.00

Drive rollers 15 in. diameter, external front drive gears, double triple-pawl ratchets between rollers, diameter of revolving cutter 7 in., four or six blades, adjustable split bronze bearings, best laid steel bottom knife. Width of cut 30 to 40 inches. These mowers are equipped with Coldwell's Demountable Cutter Unit, which really makes them two lawn mowers in one.

The Demountable Cutter Unit Horse Mower is constructed upon an entirely new principle. The cutter section, which is the vital part of a lawn mower, is made into a unit and is independent and removable from the main frame of the mower. This unit consists of a simple frame containing the revolving cutter, the bottom or stationary knife and parts necessary for adjusting the same to each other. It is attached to the main frame of the mower by four locking screws and can be attached or removed in less than a minute. It being separate and independent of the main or larger frame, it relieves the knives from the twisting and strain that usually occurs in the frame of the ordinary horse mower when in use on rough ground. This unit, being the cutter section of the mower, is the only part necessary to send for sharpening or adjusting.

Furnished complete with seat, shafts and side draft attachment.

*Not carried in stock. For factory shipment only.

One in a box, handles separate.

LAWN MOWER SHARPENING COMPOUND

CLOVER

How It's Done With Clover

Illustrated, detailed instructions accompany each can, but, here is how it's done:

1—Adjust base blade to as even a contact as possible with each rotary blade for entire length. Don't set too tightly together.

2—Apply Clover Compound entire length of each rotary blade with finger tip.

3—Push the mower forward and back rapidly on level surface a dozen times, spinning the blades, and bringing them together sharply.

4—Wipe off compound; blades should cut newspaper like sharp shears; if not, proceed again as above until they do.

Contents of a Can Will Sharpen an Ordinary Mower Ten Times

Note—Some mowers are provided with special attachment for turning rotary blades by hand. In such cases use attachment instead of spinning the blades as described in No. 3; in which case it is also desirable to rotate the blades backwards instead of forwards during the grinding operation.

Clover Lawn Mower Sharpening Compound is a grinding compound. When applied in the right grade (Grade D) to the cutting edges of a mower, after these edges have been properly adjusted, it will grind them together in place sharp, and make a perfect job of it.

So simple is the whole operation, that any boy, girl, man or woman who can push a mower can sharpen one with Clover Compound, and do a better job than can a trained mechanic by employing the usual old-time methods.

Instead of paying from $1.00 to $2.00 to have your mower improperly sharpened once a season, buy a 50-cent can of Clover Mower Sharpening Compound, and sharpen it every time you use it—you will never know the delight of cutting grass until you do.

½-Pound Cans . . . . . Per Dozen, $6.00

LANTERNS

DIETZ

BEACON DASH

No. 382—Square tubular, with bright tin hood, 5-in. spun metal polished reflector, dash clip spring, top lift, No 1 burner, ⅞-in. wick, No. 2 cold blast globe. Holds oil to burn 20 hours. 7 candle power. Weight per dozen, 33 lbs..... Per dozen, $28.80

One in a Box

EASY HOOF TRIMMERS

Hold the Foot in the ordinary manner and remove soft parts from bottom with your toe knife; then with the Trimmer begin at the heel and cut down and around the toe and back on the other side, removing the part at one cut and in one piece.

Avoid all wrenching or prying. Hold the tool as near upright as you can. Cut straight through to the blank jaw regardless of balls of other obstructions and with very little leveling with the knife or rasp, your job is complete.

SAFETY RAZORS

AUTO-STROP SAFETY RAZORS

Shaves, Strops Automatically, and Cleans Without Removing Blade from the Holder

Only the Auto-Strop Blade can be used in the Auto-Strop Frame and the Blade is not removed from the holder for stropping or cleaning. Its Adjustable feature is Supremely Simple. No unscrewing. No possibility of the Adjustment Slipping after being fixed—this feature permits the user to adjust at will for a light or close shave.

The Razor and Automatic Stropper are Combined in One Piece—the frame serves the purpose of holding the blade when shaving and also acts as an Automatic Stropper. The blade can be stropped without removing it from the frame by inserting the Flexible Horsehide Strop, which accompanies each Razor, between the frame.

COMBINATION SET
Size of Case, 3½x4¼ inches

The "Pennsylvania" line is the Greatest Lawn Mower Value on the Market Today. The Distinctive Mower with the Distinctive Features

ROLLING STEP LADDERS

"MILBRADT"

Made In Different Styles to Fit All Kinds of Shelving; Shipped Complete Ready to Install

The Milbradt Rolling Step-Ladders are all Made to Order, and to Fit Each Particular Place, of Good Oak Lumber, in the Most Artistic and Neatest Style, Handsomely Finished, are Durable and Perfectly Safe, as they Cannot Jump the Track. They take up the Least Possible Space, Run Noiselessly and so Easily, either Empty or with Operator upon them, that a Slight Push Will propel a Ladder the Length of an Ordinary Store. All Ladders have an Extra Wide Shelf at the Top which affords great Convenience in Handling Stock. All Iron Work on Ladders, as well as the Brackets to Hold Up Steel Track, is Malleable, Made Artistic and Strong, and Aluminum Finished.

BENT SHELF LADDERS

Runs on Steel Track

Used on Shelving with Extended Base; Ladder Hangs From and Rolls on Steel Track Fastened to Shelving near Top; Bottom of Ladder is Bent and is equipped with Two Rubber Rollers which Rest Against and Roll on Edge of Extended Base Top; Wheels are Paper Filled and Run Noiselessly and Easily; Adapted to Any Store with Extended Base Shelf and Well Built Shelving

Each

No. 1—Aluminum Finished Metal Parts; Golden Oak Wood; Weight Each 50 Lbs. $22.00

BENT FLOOR LADDERS

Runs on Hardwood Track

Used on Shelving with Narrow Bottom Ledge, Ladder has Wheels which Roll on Hardwood Track Fastened to Shelving near top which Serves to Guide Course. Bottom of Ladder is equipped with Heavy Rubber Tired Wheels which run on floor, weight of the whole Ladder Rest on Floor, Runs Noiselessly and Easily; Wheels at Top are arranged in slide so as to adjust themselves to Unevenness of Floor. No Track is Used on floor; Adapted to Shelving Not Strongly Built, Adapted to Sloping Floor also.

Each

No. 2—Aluminum Finished Metal Parts; Golden Oak Wood; Weight Each 50 Lbs. $22.00

BENT SHELF LADDERS

Runs on Steel Track

Used on Shelving With or Without Narrow Bottom Ledge or Base Shelf; Ladder Hangs From and Rolls on Steel Track Fastened to Shelving Near Top; Bottom of Ladder is Bent and is equipped with Long Swinging Arms Fitted with Rubber Rollers which Rest Against and Roll on Edge of Ledge or may be Placed at Extreme End of Ladder and Roll Against Base Board; Arms may be Swung Up When Not in Use to allow Ladder to Swing Close to Shelving; Adapted to Any Store with Strongly Built Shelving.

Each

No. 3—Aluminum Finished Metal Parts; Golden Oak Wood; Weight Each 50 Lbs. $22.00

HOW TO ORDER

Give the Exact Height from Floor to Top of Base Shelf; the Exact Width of Base Shelf to Front Edge of Upright or Partitions in Shelving; and the Exact Height from Top of Base Shelf to Top of the Shelf to which Track is to be Fastened, and the Track should be Fastened to a Shelf that is Within Three or Four Feet Down from the Top of the Shelving.

It is Important that Measurements for Both Ladders and Track are Sent us According to Instructions. For Odd or Irregular Shelving, or for that matter, in all cases, it helps us a great deal to better understand what is wanted if you will write us for Special Order Blank and fill out same.

Note—In all cases give Exact Length of Track Required, as well as Number of Brackets Wanted. (To make a Solid Track, Brackets should be about 4 ft. apart).

ROLLING STEP LADDERS

"MILBRADT"

The Milbradt Rolling Step-Ladders are all Made to Order, and to Fit Each Particular Place, of Good Oak Lumber, in the Most Artistic and Neatest Style, Handsomely Finished, are Durable and Perfectly Safe, as they Cannot Jump the Track. They take up the Least Possible Space, Run Noiselessly and so Easily, either Empty or with Operator upon them, that a Slight Push Will propel a Ladder the Length of an Ordinary Store. All Ladders have an Extra Wide Shelf at the Top which affords great Convenience in Handling Stock. All Iron Work on Ladders, as well as the Brackets to Hold Up Steel Track, is Malleable, Made Artistic and Strong, and Aluminum Finished.

STRAIGHT LADDERS
Runs on Steel Track

For Track Fastened to Shelving Near the Top; this Ladder has Long Swinging Arms Attached and is for Use on Shelving with a Very Narrow or no Base Shelf, the Arms Holding the Lower End Out the Proper Distance for Convenient Climbing; the Arms are Made from 10 to 26 Inches Long and have Rubber Rollers at the Ends which Run Against the Ledge; If Ladder is to Hang Out Less than 10 Inches, Stationary Arms are Used, same as on the No. 1 Ladder on Previous Page, when not in Use, the Swinging Arms Fold Out of the Way; when Ladder is to be Used, the Arms Swing Into Place Automatically; Runs on Round Steel Track

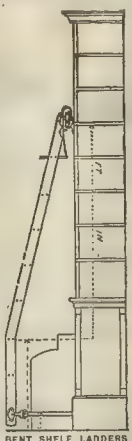
Each

No. 4—Aluminum Finished Metal
Parts: Golden Oak Wood; Weight Each 50 Lbs.....$20.00

HOW TO ORDER

Give Exact Height from Floor to Top of Base Shelf, the Exact Width or Projection of Base Shelf, the Exact Height from Top of Base Shelf to the Top of Shelf to which Track is to be Fastened; Track Should be Fastened to a Shelf between Two or Three Feet Down from the Top.

Note—In all cases give Exact Length of Track Required, as well as Number of Brackets Wanted. (To make a Solid Track, Brackets should be about 4 ft. Apart).



BENT SHELF LADDERS

Used on Shelving with Wide Extended Base or with Deep Base Bins; Ladder Hangs from and Rolls on Steel Track Fastened to Shelving Near Top; Bottom of Ladder is Bent and is Equipped at Extreme End with Rigid Arms Fitted with Rubber Rollers which Rest Against and Roll on Base Board of Bins. Adapted to Grocery and Hardware Stores where Spice Bins, Coffee Bins, Nail Bins, etc., are found.

Each

No. 11—Aluminum Finished Metal
Parts: Golden Oak Wood; Weight Each 50 Lbs.....$42.00

HOW TO ORDER

Give the Exact Height From Floor to Top of Platform Against Which the Rubber Rollers are to Run, the Exact Distance the Platform Projects Out Further Than Upper Part of Shelving, and the Exact Height From Floor to Top of the Shelf to which Track is to be Fastened (and the Track Should be Fastened to a Shelf that is Within Three or Four Feet Down from the Top)

Also give the Height of the Spice Cans and State How Far the Lower End of Ladder is to Hang Away From Platform.

CEILING TROLLEY LADDERS

Used in Places where Shelving is Inconvenient to Apply Ladders; Top of Ladder is Equipped with Trolley Wheels which Run on Tubular Steel Track attached to Ceiling; Base of Ladder is equipped with Turned Steel Wheels which Run on Floor Track; Running and Noiseless; Ceiling Wheels are Paper Filled; Easily Climbed and Convenient for Handling Goods; Adapted to Hardware Stores and Warehouses where Heavy Goods are Handled; Runs Independent of Shelving and is Strong and Durable.

Each

No. 12—Aluminum Finished Metal
Parts: Golden Oak Wood; Weight Each 50 Lbs.....$30.00

Per Foot

No. 12ST—Steel Trolley Track, for Above Ladder; Including Brackets and Leg Screws; Weight per foot 1½ Lbs.....$0.40

HOW TO ORDER

It is only necessary to Give the Exact Height from Floor to Ceiling. Also State the Number of Feet of Steel Track Wanted.

ROLLING STEP-LADDER BRACKETS

"MILBRADT"

FACE BRACKETS

Used to Hold up Steel Track which is attached to Shelving; but can only be used where the face of Upright or Pilaster to which it is to be screwed is 2 inches or more wide.

Intended for use where Steel Track is to be fastened up to a Face Board that may be below the Cornice or Moulding at Top of Shelving, but in order to fasten Bracket to face board underneath the moulding or cornice and to give room enough for the track and top fixture of ladder to work, the face board is required to be at least 8 in. wide, clear of mouldings.

Each

No. 7A—Malleable Iron; Weight about 1 Lb..... $0 60

SHELF BRACKETS

Used to Hold up Steel Track when same is to be applied to Spindle Shelving. Brackets of this style are screwed and bolted on top of shelf alongside of spindles. Also used in connection with bracket No. 7A to hold upsteel track on shelving where uprights to which brackets can be fastened are too far apart to make the track strong enough in such cases brackets are fastened on top of shelf in between the uprights.

Each

No. 8—Malleable Iron; Weight about ½ Lb.. $0 60

HOW TO ORDER BRACKETS

State the Number of Brackets Required to Hold Up Steel Track. Usually there is One Bracket Fastened to Each Upright or Partition, in Shelving, except when Uprights or Partitions are less than 2 feet apart, then One Bracket for Every Other Upright, or Partition, will be sufficient.

To make Regular Steel Track Strong Enough the Brackets Cannot be more than 4 feet apart.

ROLLING LADDER TRACK

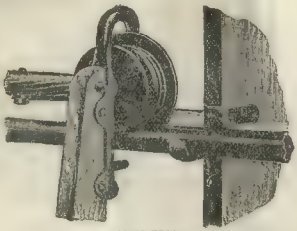
WOOD TRACK

For No. 2 Ladder

Made of Hard, Dry Maple, finished to Match Ladders. The Track is screwed to the edge of shelf, and does not block up any space.

Per Foot

No. 2T—Complete with Screws; Weight per Foot, 2 Lbs..... $0 30



STEEL TRACK

For Nos. 1, 3, 4 and 11 Ladders

The Steel Track is made of Round Tubing, in Two Weights and Strength, or what is called the **Regular** and **Extra Strong** Steel Track. The Regular Track is used on Shelving to which the Brackets to Hold Up Track can be Fastened 4 feet or less apart, and the Extra Strong Steel Track is used on Shelving to which it is Necessary to Fasten the Brackets more than 4 feet apart, and for this Track the Brackets can be as far as 5 feet apart. The Steel Track can be fastened to All Kinds of Shelving Without Making any Special Arrangements for it, and as both the Regular and the Extra Strong Steel Track is 1 inch in Diameter on the Outside and is Fastened up Opposite the Edge of a Shelf, it does not block up any space.

Complete with Brackets and Screws

	Per Foot
No. 7R—Regular; Weight per Foot, 1 Lb.....	$0 40
No. 7ES—Extra Strong; Weight per Foot, 1½ Lbs...	..... .50

PYREX TRANSPARENT OVEN-WARE

The highest scientific development in ovenware. It has the remarkable quality of quickly absorbing and retaining heat, causing foods to bake rapidly and thoroughly. It is ready for immediate service and may be used for foods baked in the oven. It never chips, flakes, crazes, dents or bends and remains new forever.

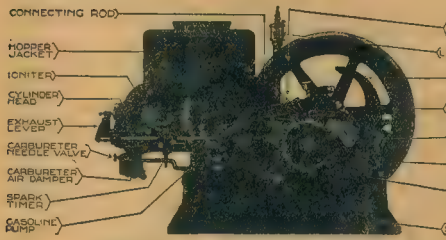
THE ALAMO TYPE M GASOLINE AND DISTILLATE ENGINES

MAROON LINE



Engine with fly wheel removed, showing working parts

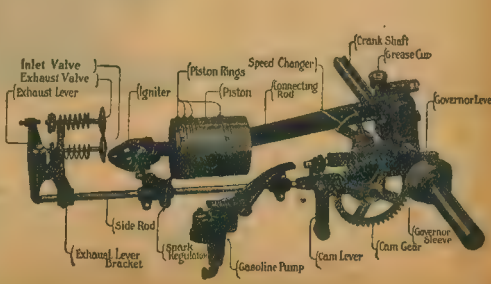
The Alamo Type M Engine is the result of fifteen years of gasoline engine experience combined with engineering skill and the best factory practice. They are of the well known four-stroke cycle type, governed by the hit and miss principle, which is acknowledged the most satisfactory for general service and most economical in fuel.

The engines are all attractive in appearance, symmetrical in design and substantial in operation, with liberal bearing surface for all moving parts. They have large hopper jackets, require a minimum amount of water for cooling, have electrical make and break system of ignition, which is the most simple and reliable for ordinary service. They are manufactured by modern methods in our up-to-date factory equipped with the latest and most efficient machine tools. Nothing but the highest grade material enters in their construction, and the workmanship is of the highest quality.

The Alamo Type M Engine has no parts that are not necessary, and nothing has been left off that would add to its service. All unnecessary parts have been eliminated, and all complication is simplified. All parts are made with ample weight and strength where they are subject to wear. All working parts are in plain sight so that the few adjustments that may be required can be made with ease and with the most simple tools. No special mechanical skill is required to operate an Alamo engine, and plainly written instructions accompany every engine, so that no former knowledge of machinery is required to handle these engines with ease.

The plain view at the side gives good idea of the simplicity of design, it also shows the distribution of metal, heavy bearings set at a thirty degree angle and the substantial design of the base between the cylinder and main bearings, where the greatest strength is required.

Perfect Balance—All Alamo Type Engines are properly balanced. Having an engine in perfect balance eliminates much trouble and annoyance. It is not necessary to bolt down an Alamo Engine, and the portables do not require special braces or pits for the truck wheels. Vibration and wear of the working parts is reduced to a minimum.



Governor—All Type M Engines govern by the hit and miss principle, which is now recognized as the most satisfactory manner to govern engines for general hard service. It permits the engine when running on light load to run with a minimum amount of fuel and with the fly wheel, perfectly balanced, and correct working governor, the regulation of speed is exceptionally close.

THE ALAMO TYPE M GASOLINE AND DISTILLATE ENGINES

MAROON LINE

Illustrating the 2½ Horsepower Engine. Skids Extra

The Governor is of centrifugal type. On engines smaller than 9 H. P. the governor is mounted in the fly wheel. The larger sized engines have a fly ball gear driven governor. All have speed regulator so the speed may be varied about 25 per cent while the engine is in motion, and permits the engine to be regulated instantly to the proper speed for various machines.

Gears and Cam—Only two gears and one cam are used on the Alamo Type M Engine. The gears are machine cut and the cam is ground on a specially designed machine to exact size, to insure the perfect movement of the valves and igniter.

Gasoline Pump—The Gasoline Pump is unique in construction, being operated by a lever so curved as to make its action noiseless. The pump has no packing whatever, and as it is placed slightly above the level of the carburetor, there is no possible chance for any leak of gasoline. The plunger can be easily removed and the ball valve examined without disturbing other working parts of the pump. The gasoline pump for larger engines is slightly different in design and has more capacity.

Cylinder, Piston and Rings—All cylinders are cast from a special mixture of charcoal iron, which makes a casting of great strength, density and of the greatest wearing qualities. The cylinders are of a pattern which permits of perfect and equal expansion of the cylinder walls, so that the cylinder remains perfectly round and straight under all conditions. The cylinder head is also thoroughly jacketed, and provided with large valves. The valves have cast iron heads and nickel steel stems.

The piston is of the trunk pattern, ample length, carefully machined and ground to size. All sizes are provided with four expansion rings perfectly fitted to the grooves in the piston and pinned in place. Oil grooves are also provided to make certain of perfect lubrication of all parts of the piston rings.

The piston wrist pin is of a large size, case hardened, ground and polished, and securely fastened in a manner which makes it quite impossible for it to become loose.

Alamo Type M Engines have long been notable for perfect fitting pistons and resultant excellent compression.

Illustrating the 3½ and 4½ Horsepower Engine. Steel Skids Extra

Crank Shafts—The crank shafts are forged from solid billets of open hearth crank shaft steel. They are carefully machined and ground accurately to size. The small size crank shafts are drop forged and the larger size hammer forged, and all are made from the same high grade quality of steel.

Connecting Rod—The connecting rod is of the I beam construction, carefully designed of ample length and strength and of steel especially fitted for this service. The piston end is fitted with bronze bushings and the crank end of genuine babbitt metal.

Carburetor—The Alamo carburetors are marvels of simplicity and efficiency. Each carburetor is carefully proportioned for the size of the engine to which it is fitted, and will perefectly control the mixture of gasoline and air under all conditions of service and climate. The size of the opening of the fuel nozzle inside is controlled by a needle valve which, when once set, seldom requires any changing, regardless of the changes of load or the conditions of the atmosphere. A perfectly working carburetor is of the greatest importance for satisfactory operation of the engine.

Magneto—Webster Oscillating furnished with all Alamo Type M Engines. This magneto does away with the use of batteries and furnishes a good spark for starting, as well as when running. It is fastened direct to the igniter, so that there is very little chance of failure by broken connections. A small attachment is provided for tripping the magneto by hand, so that the engine can be readily started by backing it against the compression.

Igniter—The construction of this as most important, as a good sparker is absolutely essential. The Alamo Type M Igniter is simple and rugged in construction. It is fitted to the side of the cylinder, and is held in place by two studs. It may be removed or replaced by only loosening or tightening two nuts. Pure mica is used for the insulation. An outboard bearing is provided for the rotating electrode, which holds it in perfect alignment and insures its always working properly. The igniter points are made of a non-corrosive alloy, the best obtainable for the purpose, and can readily be replaced by any one, without the use of special tools.

Pulleys—Stationary engines of all sizes and hand portable engines are furnished with solid iron pulleys as part of their regular equipment. Portable engines mounted on team trucks are regularly furnished with friction clutch pulleys. The pulleys are keyed and set screwed to the engine shaft and set up close to the hub of the fly wheel. The size of the pulley to be used should always be carefully calculated, as it is of the greatest importance that machinery be run at the proper speed.

Alamo Type M engines are regularly equipped without extra charge with muffler attached, magneto, wrenches, oilers, oil can and can of gas engine oil. Small sizes have fuel tank in the base of the engine of sufficient capacity for one day's run. 12 horsepower and 15 horsepower engines are supplied with 50 gallon outside fuel tank. **Small sizes furnished with solid iron pulley.**

†9, 12 and 15 horsepower furnished without pulley. Plain or clutch pulley for these sizes furnished as an extra.

ALAMO DIRECT CONNECTED PUMPING OUTFIT

1½ AND 2½ HORSE POWER SIZE

These combination outfits are compact and especially suitable for pumping purposes. The engine used is our standard 1½ and 2½-horsepower Alamo gasoline or distillate engine, complete with all catalog fittings and fixtures, including the Webster oscillating type of magneto; engine fitted with our standard make and break ignition. Engine and pump standard fitted to a cast iron sub-base, as per illustration; engine being geared direct to a No. 366 Myers pump jack. This jack is of the standard Myers manufacture with machine cut gears, and is back geared 6 to 1, and has a stroke of 6 and 9 inches, eliminating the use of belt entirely. By removing four bolts from the engine base into the substantial cast iron sub-base, the engine can be removed and is then ready to be used for any other job for which it might be required.

All parts going into the construction of these outfits are uniform and interchangeable, which is a great convenience in ordering such repairs, and in view of the fact that the engine is our regular stock of the Alamo type of engine, and our jack our regular stock of cut gear jacks, this puts us in a position to at all times take care of requests for duplicate parts out of our stock, preventing delay in ordering such parts for combinations offered that are not our regular stock.

GOGGLES

Shell Frame with Ventilated Leather Side Guards and Rust-proof Flexible Cable Temples of White Metal; Covered Steel Case with each Pair.

Per Dozen Pairs

No. Z1—1¾ in. Amber Lenses $16.00

Self-Adjusting, Refinement, Comfort, Convenience and Complete Protection. Shell Rims, Ventilated Leather Side Guards and Rust-proof Flexible Cable Temple of White Metal. A Pure Silk Bridge adjusts goggles automatically. Each pair in a steel case.

Per Dozen Pairs

No. Z2—1¾ in. Round Amber Lenses $24.00

Ventilated Leather Side Guards, Flexible Cable Temple, Adjustable Brass Bridge, Round Lenses. The Brass Bridge Fits Goggles snug to any Face and permits ordinary glasses to be worn underneath. Used by Aviators, Machinists, Grinders, and Railroad Men Everywhere. Used by British and U. S. Government for Military Service.

Per Dozen Pairs

No. A1—1⅞ in. Amber Lenses $16 00

TWO-COLOR HI-LO GOGGLES

Combination Amber, with Green Dimmers

Per Dozen

No. H2½—White Rubber Frame. Combination Amber and Green Dimmer; Well Ventilated; Elastic Bands for Fastening $8 00

The Willson Display Case Assortment includes a mahogany-finish, glass top display case and a complete assortment of goggles with amber, smoke, olive green and clear lenses in the best selling shades. The case measures 13⅝x15⅝x12⅜ in. and holds your stock. Following table shows the quantities, style numbers and prices of goggles in the outfit

You double your money on refill stock, which can be ordered in any quantity or assortment.

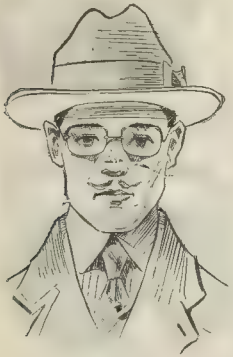
GOGGLES



MOORE MOTOR GOGGLES

The Lens can be Adjusted to Any Position which Affords the Best Protection to the Eyes, Day or Night

Automobile Drivers—For automobile drivers this is the perfect goggle as it can be adjusted to prevent the glare of headlights on other autos from blinding you. It relieves the eye strain and makes motoring a pleasure.

Steamboat Captains—Steamboat captains should not be without these as many lives are dependent upon his clear vision and commands. They will protect his eyes from the searchlights while entering the harbor and the glistening sun on the water.

Trap Shooters—Uncle Sam says "Hooverize" and to the true sportsman who wants every shot a hit, **Moore Motor Goggles** offers a sure guarantee. As the bird sails away in the air his "sight" is not destroyed by the bright sun although he has a clear vision of the mechanical parts of the gun at all times.

Street Car Motormen—To the street car motormen and the engineers these goggles will fill a long felt need. They will prevent the eye strain due to the bright glare of the sun and dazzling lights at night where the tracks run parallel with the public highway.

Golfers—To the golfer **Moore Motor Goggles** will prove a splendid asset. As he is sighting for that difficult hole his vision is not impaired by the dancing heat waves of an afternoon sun.

Housewives—The housewives who are "doing their bit" at home by sewing and knitting garments for the Red Cross for the boys "over there" will find these goggles an excellent aid to speed as they relieve the eyes of strain caused by the reflection of artificial light.

Heavy, Gold Plated Frame, with Flexible Cable Temple; Long Brace Bridge; Shaped Lens which can be adjusted to suit the occasion by simply pushing up or down; Lens firmly held in any position by means of tension ratchet at right hand side.

	Per Pair
No. MA—Amber Lens	$4.00
No. MLS—London Smoke (Green) Lens	4.00

GOGGLES

Rust-proof White Metal Frame with Easy Cable Temple; Large Round Lenses. A useful, inexpensive style for Driving, Motoring and Industrial Purposes, such as Grinding.

Per Dozen Pairs

No. N65—1¾ in. Amber Lenses.....$4.00

Shell Rim, with Flexible Cable Temples. Round Lenses; A Very Attractive Spectacle.

Per Dozen Pairs

No. Z57—1⅞ in. Amber Lenses.....$10.00

Shell Frame, with Rust-proof, Flexible Cable Temples of White Metal. Ideal for Recreation and Sports.

Per Dozen Pairs

No. Z21—1¾ in. Round Amber Lenses.....$12.00

All-Shell Spectacle, with Round Lenses. A distinctive and conservative style for resort and street wear.

Per Dozen Pairs

No. K7—1⅝ in. Amber Lenses.....$12.00

An unusually distinctive design in Imitation Shell Rims with Long Spring and Black Metal Guards; Round Lenses. A much preferred style by women who like protection without temples.

Per Dozen Pairs

No. Z5—1⅝ in. Amber Lenses.....$16.00

A handsome, conservative Drop Eye Glass for general wear. For Sun and Glare Protection.

Per Dozen Pairs

No. Z51—1⅝ in. Amber Lenses.....$8.00

All-Shell Goggle with Ventilated Side Guards; Strong, Light and Compact. Each Pair in a Steel Case.

Per Dozen Pairs

No. K1—1¾ in. Round Amber Lenses.....$15.00

Rust-proof, White Metal Frames, with Strong Wire-Screen Side Guards, Flexible Cable Temples and Round Lenses. Much used to reduce spark glare and as protection from flying dirt and small particles. Each pair in a steel case.

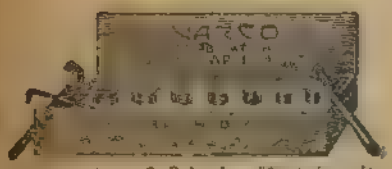
Per Dozen Pairs

No. N86—1⅞ in. Amber Lenses.....$10.00

VARCO AUTOMOBILE TOOLS

Our sockets are made of an especially selected alloy steel of high physical characteristics, and are subjected to an exacting heat treatment. The object of the modern hardening and tempering process is to create a structure within the material which will resist deformation to the highest degree, and it is in the hands of the skilful hardener to determine the proper heats and duration to which a material has to be subjected in order to arrive to its maximum strength and toughness. These tools are not stamped or pressed of tubing or pipe, but broached into solid material of superior quality, thereby insuring not only highest strength, but accuracy as well. The handles are made of heavy material, ⅝-inch diameter, which allows a liberal offset, and consequently proportionate tightening power, without precipitating a twisting or breaking off and the tools are practically indestructible. An entirely new departure is the interchangeability of sockets to the handle. The advantage of this feature is evident, as it allows the user the full range of a complete set without the necessity of having a different handle for each size socket. Fastened to the handle by means of a most simple and at the same time ingenious expansion arrangement, the sockets fit to the handle as if made of one piece, and can only be removed if so intended yet in a moment's time. The above described feature of interchangeability makes it possible to sell any combination of handles and sockets without the necessity of carrying a large stock, a fact which certainly will be appreciated by any merchant. The stock required for wrenches whose sockets and handles are either made of one piece or fastened solidly together is many times larger, whereas a moderate stock of our socket wrenches is sufficient for any combination.

COMBINATION SOCKET WRENCH SET



This is a small yet very useful set, which takes up but very little space and as a consequence is easily carried. These sockets fit and cover practically any nut in an automobile.

Contents: 1 8-inch offset handle, ⅝-inch diameter. 1 8-inch extension. 1 screw driver. 7 hexagon broached alloy steel sockets, heat treated, thin walls yet of extreme strength and toughness. Sockets easily interchangeable. Patented rigid taper fit of sockets to handle. Size: ¼-inch screw size to ⅝-inch screw size inclusive S. A. E. standard and corresponding U. S standard sizes. Openings: ⅛, 5/32, 3/16, ¼, 5/16, 11/32, 1 7/32-inch. Sockets are broached 1/32-inch larger than above dimensions. Handle and extension beautiful black glossy oil finish. Sockets blue tempering color. Rust proof. In a wooden box.

No. 99 ..... Each $6.50

RED BUTTON SPEED WRENCH SET

Contents: 1 red button speed wrench handle, ⅝-inch diameter, 4-inch shank. 1 offset wrench handle, 8-inch. 2 extensions 8-inch and 12-inch long. 1 screw driver. 7 hexagon broached alloy steel sockets, heat treated, thin walls, yet of extreme strength and toughness. Sockets easy interchangeable. Patented rigid taper fit of sockets to handle. Size: ¼-inch screw size to ⅝-inch screw size inclusive S. A. E. standard and corresponding sizes to U. S. standard. Openings: ⅛, 5/32, 3/16, ¼, 5/16, 11/32, 1 7/32-inch. Sockets are broached 1/32-inch larger than above dimensions. Handles and extensions beautiful black glossy oil finish. Speed button red enamel. Sockets blue tempering color. Rust proof. In a wooden box.

No. 100 ..... Each $9.50

RED BUTTON SPEED WRENCH SET

Contents: 1 red button speed wrench handle ⅝-inch diameter, 4-inch shank. 1 offset wrench handle. 2 extensions 8 and 12-inch long. 1 screw driver. 15 hexagon broached alloy steel sockets, heat treated, thin walls, yet of extreme strength and toughness. Easy interchangeable. Patented rigid taper fit of sockets to handle. Sizes: ¼-inch screw size to ⅝-inch screw size inclusive S. A. E. standard. ¼-inch screw size to ¾-inch screw size inclusive U. S standard ¼-inch screw size to 1-inch screw size inclusive cap screw size. Openings: ⅛, 5/32, 3/16, ¼, 5/16, 11/32, 3/8, 13/32, 7/16, 15/32, 1/2, 17/32, 9/16, 19/32, 5/8-inch. These openings will accommodate any size nut and bolt head in any hexagon system. Sockets are broached 1/32 larger than above dimensions. Handles and extensions beautiful black glossy oil finish. Speed button red enamel. Sockets blue tempering color. Rust proof. In a wooden box.

No. 110 ..... Each $14.30

COMBINATION WRENCH PARTS

⅝-inch diameter. Black glossy oil finish. Rust proof. Red enamel button. In a cardboard box.

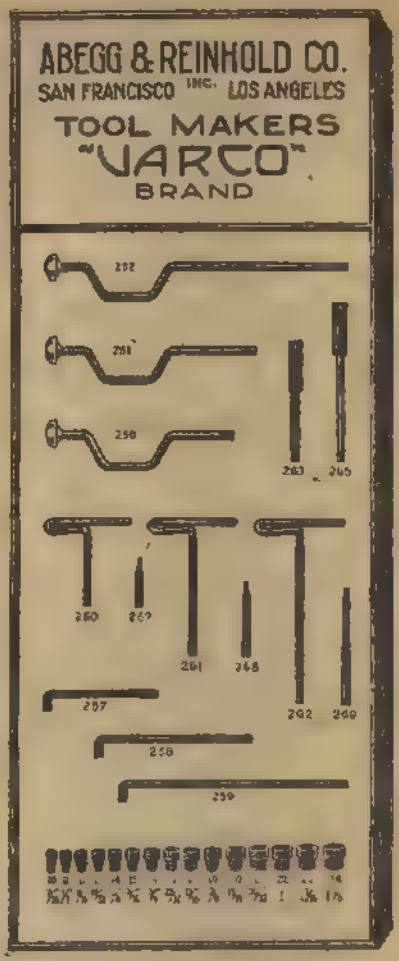
DEALERS DISPLAY STOCK BOARD



These highly ornamental boards carry the different handles and extensions together with sockets, and in this way they offer a practical solution of display and selling medium. Sockets and handles being interchangeable any desired combination can be obtained and consequently a comparatively small stock will be found sufficient—a welcome feature for the merchant, no doubt.

ASSEMBLY BOARD FOR FORD CARS

Represents the latest design in tools for Ford assembly.

While especially constructed to meet the requirements of the assembly mechanic, they are also preferable to the car owner.

The same material feature of interchangeability, guarantee, etc., goes with these tools.

The display board is beautifully finished and is furnished at an additional charge with above assortment of wrenches

TWO OF THE MANY USES OF MYERS SELF-OILING BULLDOZER POWER PUMPS

SELF-OILING

At work on road and highway building, delivering water from two to three miles in either direction. A great saving in time and expense.

Power pump business in many localities is being rapidly taken over by dealers who have been quick to realize the importance of the improvements in the construction of Myers Self-Oiling Bulldozer Power Pumps and Working Heads.

And what is most significant—wherever these pumps are sold it soon becomes difficult to convince prospective power pump purchasers that another type of pump is just as good. This is but natural, for we have yet to hear of anyone who is particularly fond of oiling a power pump two or three times daily.

Consequently, when the comparison is made between the Myers Self-Oiling Power Pumps and the older types of pumps and the self-oiling and other practical features are mentioned, the decision is invariably in favor of the Myers. And there have been so many decisions of this kind made ever since the first Myers Self-Oiling Pump put in its appearance, that our power pump department with its enormous production has been taxed to the limit at all times.

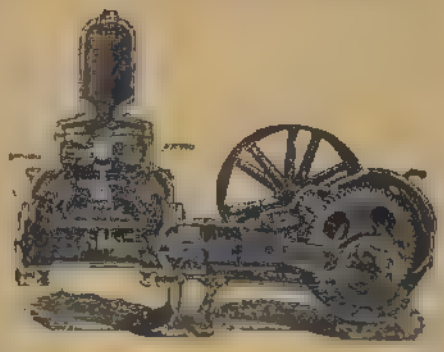
As a dealer it will pay you to "jump aboard the band wagon" and get your share of the business, for Myers Self-Oiling Bulldozer Power Pumps and Working Heads are practical, and because of their economical, safe and dependable operation have found instant favor with users everywhere.

As used for irrigating general farm truck with the Skinner irrigation system.

See following pages for general information.

MYERS SELF-OILING BULLDOZER POWER PUMPS
FOR GENERAL SERVICE
FIGURE 1866

Self Oiling **Fully Enclosed** **Removable Bearings Marked "A"** **Back Geared 5 to 1**
Double Acting Horizontal **100-lbs. Pressure,** **225-ft. Elevation.**



Sectional View, Showing all Parts, Including Oiling System. Large Valves and Direct Waterway.

Fig. 1866, The Myers Self-Oiling Bulldozer Power Pump, is a single cylinder, double-acting power pump for general service on farms, plantations, country estates, in apartment houses, hotels, mills, factories, railways, tanks, stations or wherever from 500 to 1,000 gallons of water per hour are required against 100 lbs. pressure or 225 ft. elevation. This design has been brought out to meet the general needs of the trade for an efficient, durable pump of modern construction at a moderate price.

The power end consists of a one-piece casting which forms the base of the pump and oil reservoir, and in connection with a lid encloses all working parts, protecting them from dirt or injury, and securing safety of operation. This casting is completely machined at one setting for all bearings, the crosshead cylinder head and shaft bearings, insuring alignment of all working parts. The pinion and gear are mounted between double bearings. All these bearings are renewable. Both gear and pinion are machine cut from the solid, the gear is cast iron and the pinion steel. An eccentric cast integral with the main gear operates the crosshead through a connecting rod which is adjustable for wear at the eccentric end and is fitted with a renewable bronze bushing at the crosshead end. The crosshead is of large diameter running in a bored guide. From the oil reservoir in the base oil is carried by the main gear to the highest parts of the pump and by a system of channels distributed to all moving parts and returned again to the reservoir. This system of forced lubrication contributes quiet operation and long life with a minimum of attention.

The cylinder, which is brass lined, is a one piece casting, attached to the power end by heavy bolts. Large poppet valves on bronze grid seats are all located above the cylinder insulating jacketing. Suction and discharge valves are easily accessible for inspection and repair without disturbing pipe connections. Suction and discharge piping may be taken from either side.

As compared with older designs this pump has larger valves, more liberal and direct waterways, and a positive oiling system, enabling it to be operated against a heavy pressure or at high speed, securing large volume and high efficiency.

Maximum capacity 500 gals. per hour at 70 RPM. Usual speed 60 to 65 RPM.

MYERS HIGH PRESSURE SELF-OILING BULLDOZER POWER PUMPS

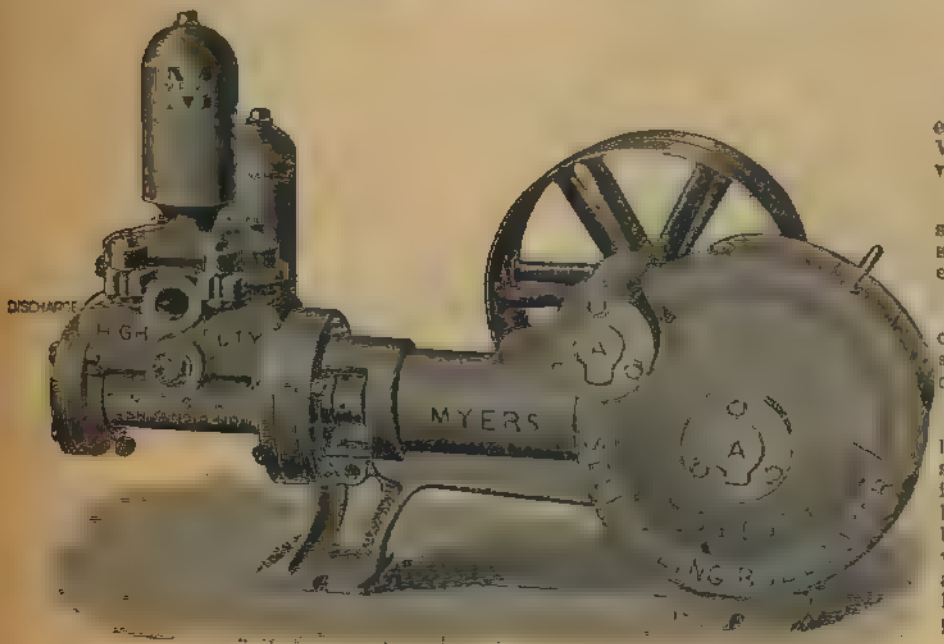

FIGURE 1929

Self-Oiling, Fully Enclosed, Back Geared 5 to 1. For Pumping Oil, Hot or Cold Water. 200 lbs. Pressure or 450 Feet Elevation.

Fig. 1929 illustrates the Myers High Pressure Self-Oiling Bulldozer Power Pump for service against 200 lbs. pressure or 450 feet elevation

The power end is the same as used with our standard line of Self-Oiling Pumps with all working parts enclosed and running in oil. Renewable bearings.

The cylinder is a one-piece casting, brass lined and fitted with bronze valves on bronze seats, all accessible for inspection by removing air chamber and without disturbing pipe lines. The piston is packed with double cup leathers (Canvas packing used for hot water) supported by heavy castings. Suction and discharge may be taken from either side. Brass covered piston rod. Adapted for high pressure pumping or boiler feed service.

Maximum capacity 1100 gallons per hour at 60 R.P.M. Usual Speed 45 to 55 R.P.M.

STEWART HORSE CLIPPING MACHINES

NO. 1—THE BALL BEARING ENCLOSED TYPE

Has rigid base. Tubular upright. Gears all cut from solid metal and enclosed in dust proof metal box. All wearing parts are of hardened steel. New style, light, easy running flexible shaft—6 feet long. Compact—can be carried in a satchel or handled as shelf goods. Size of box only 6x11x12½ inches. The most perfect clipping machine ever made at any price.

No.	1
Weight boxed, lbs.	36
Each	$16.00

CHICAGO STEWART PATENT

Has rigid base. Tubular upright. Large strong crank handle. 6½-foot flexible steel shaft. Teeth in large gear all cut from solid metal. Wearing parts all hardened tool steel. Positive power. No belt to slip. Can be turned with either hand. Simple, strong, durable. It is light running and noiseless. Will clip a horse in 30 minutes.

No.	2
Weight, lbs.	56
Weight boxed, lbs.	70
Each	$22.00

HORSE CLIPPING ATTACHMENT FOR SHEEP SHEARING MACHINES

Can be used on the Stewart New Model or No. 9 Sheep Shearing machine. Attachment consists of eye spindle and 6½ feet of high grade flexible shaft. Complete with chain and the Stewart One-nut Dust-proof Clipping Knife.

Attachment complete—Weight, 10 lbs. ..... Each $9.50

STEWART SHEEP SHEARING MACHINES

NO. 9—ENCLOSED GEAR

Iron tripod and upright painted black, gearing and cogs cut from solid bar metal. Gearing is enclosed in a dust and dirt proof metal case and runs in oil constantly. All wearing parts of hardened tool steel. The solid jointed shaft consists of two solid steel spindles running in tubular sheaths which are connected together by a universal joint. Runs practically without any friction or wear. Fitted with No. 7 ball bearing shear, four combs and four cutters.

No.	9
Weight, lbs.	50
Each	$25.00

NEW MODEL SHEEP

Has all its gearing cut from solid metal. All wearing parts are of tool steel hardened. Has the latest improved shear. Simple in construction with few parts. Easy to adjust. Easy to keep in order. A small boy can turn the crank without tiring.

It shears clean, saving 1 to 1½ lbs of wool to a fleece. Saves time, saves wool and saves the sheep.

New Model—With 4 combs and 4 cutters.

Weight boxed, lbs.	60
Each	$25.00

Horse Clipping Attachment

Each $9.50

Combined New Model Machine—For both horse clipping and sheep shearing. ..... Complete $34.50

STEWART NO. 11 GRINDER
FOR HORSE CLIPPING AND SHEEP SHEARING MACHINE KNIVES

May be put on Stewart No. 1 Horse Clipping or No. 8 Sheep Shearing Machine in place of the shaft in a few seconds. Grinds all horse and sheep knives equal to new in a moment's time. No experience required. You can soon save enough in postage and grinding charges to pay for one of them. Besides you have the knives sharp and in cutting condition when you want them. No waits or breaks caused by carelessness or poor packing as when sending knives by mail for grinding. The illustration shows how it looks attached to the machine and how the knives are held during the grinding process. You will never be delayed on account of dull knives if you have one of these grinders. It is suitable for grinding either horse or sheep knives. The attachment is light and compact, strong and durable and will wear for years

PARTS FOR STEWART CLIPPING MACHINES

STEWART NO. 5 SHEAR

Can be used on any Stewart hand power sheep shearing machine. Guaranteed to cut any wool that grows. No matter what the condition of the wool, be it long and thick and matted and greasy or fine and crinkly and soft. These remarkable shears will cut just as fast and easy as the operator can handle the sheep. Comb and cutters are made of a carefully selected high grade metal, hardened by a special process and carefully ground ready for use.

No. 5—Shear Handle Complete. Cutter knife has 3 teeth. Comb, 10 teeth. Weight, 3 lbs, 2 ozs. ..... Each $8.50

PARTS FOR NO. 5 SHEAR

No. 277—Comb, 10 teeth. Weight, 2 ounces. ..... Each $0 75
No. 276—Cutter, 3 teeth. Weight ⅓ ounce ..... " .25

Combs and cutters carried only in stock; balance of parts can only be furnished by shipment direct from factory.

STEWART NO. 7 BALL BEARING SHEAR

This shearing head is regularly supplied on the Stewart Ball Bearing Shearing Machine No. 9, and is also ball bearing. In all other respects it is the same as our Stewart Shearing Head No. 5 and takes the same comb and three-point cutter. The ball bearings assist materially in making it operate easily, because friction of the moving parts is reduced to the minimum. The ball bearings also measurably increase the life of the shear, which is carefully and accurately made from first quality materials throughout. This is a very fine shearing head.

No. 7—Shear Handle Complete. Cutter knife has 3 teeth. comb, 10 teeth. Weight, 3 lbs, 2 ozs. ..... Each $10.00

HORSE LAWN MOWERS

*FENDEN

Four revolving blades ⅛-inch thick, made of the best knife steel, vanadium crucible analysis, oil tempered. Drive rollers, 15 inches; reel, 8 inches diameter.

Frame construction is the strongest that is possible to build and is reinforced at each end with heavy steel bars. All parts accurately machined and fitted. Equipped with the only graduated raising and lowering device, enabling the operator to instantly adjust the cutting height from ½ to 2¼ inches, or allow the knives to pass over a stone.

The bottom knife, revolving reel, and iron roller are demountable without disturbing the frame of the mower. Reel bearings turn in adjustable split brass bushings. Double riveted malleable reel braces throughout.

Fitted with a train of three gears and durable triple pawl ratchets. Reel is quickly adjusted to bottom knife.

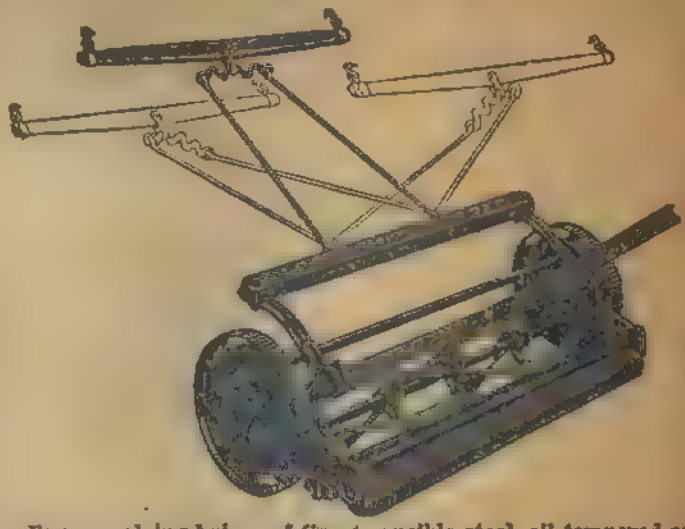
Can be furnished with five revolving knives and bottom knife with upturned edge or lip.

Fully equipped with drivers seat, shafts and side-draft attachments.

Finish, dark green and empire red; decorations, gold.

Width of cut, inch	30	35	40
Gross weight each, lbs	645	710	760
Each	$225 00	250.00	275 00

*CRESTLAWN PONY STYLE



Four revolving knives of finest crucible steel, oil tempered and self-sharpening. Drive wheels, 11 inches high; width of cut, 30 inches; reel, 6 inches in diameter; reel axle, ¾-inch. Double riveted malleable reel braces.

Has an automatic interlocking adjustment which cannot be jarred nor twisted out of alignment. The reel has self-adjusting ball bearings.

Patented horse attachment that can be adjusted quickly and in such a manner that in operation the mower is held to the ground. The draft of the mower is just the same as when operated with the handles.

Finish, light green and gold bronze; decorations red.

Shipping weight, lbs. 150

Each $80.00

DUNHAM LAWN ROLLERS

Drums of heavy sheet steel with seams welded. Weights keep the handle in an upright position. Rollers can be filled with water or sand; when filled with sand the roller weighs about 50 per cent more than when filled with water.

No.	WB 5
Diameter, inch	18
Length, inch	24
Sections	1
Weight, empty, lbs.	85
Weight, filled with water, lbs	300
Each	$26 00

CAPITOL LAWN TRIMMER AND EDGER

Cuts every blade of grass left by the lawn mower close to the walk and fences. Cast iron wheel 8¼ inches in diameter with 1½-inch face. Cylinder 5 inches in diameter with four crucible steel blades, hardened and tempered in oil.

Width of cut, inch	6
Extreme width, inch	13¼
Shipping weight each, lbs.	20
Each	$15.00

OSBORN LAWN MOWER SHARPENER

Simple, practical and easily operated. Always ready for use. Will fit any lawn mower blade. Files made of high grade steel, with four cutting edges. Groove of sharpener follows the curve of reel blade.

To operate, place the short side of groove on the bevel side of the blade.

Tuscan bronzed cast iron holder, held together by two machine screws. ¼-inch square double cut file.

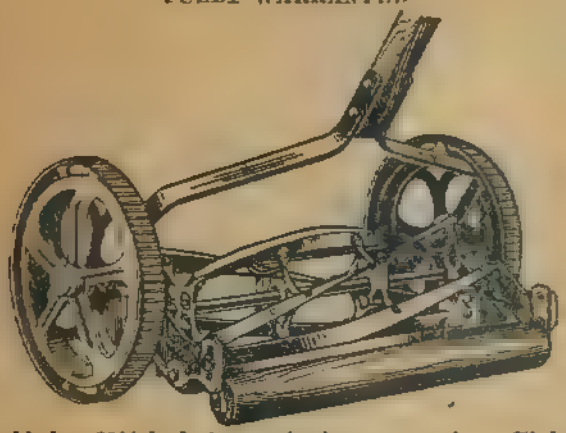
Length, inch	3½
Width, inch	2⅛
Weight per dozen, lbs.	8
Per dozen	$10.00

*For shipment from factory only.

One dozen in a display box.

LAWN MOWERS

BALL BEARING
FULLY WARRANTED



Five blades, 10½-inch drive wheels, open spokes. Finish, egg shell enamel, gold bronze and brilliant colors.

The design is the most attractive that is possible to produce and permits of the mower being so lightly constructed where strength is not needed that its weight is materially less than other high grade mowers, adding to the easy running qualities of the ball-bearing features, parts and joints carefully machined and reinforced shoulders are turned on the shrub guard forming a strong frame construction. On the ends of this heavy shaft or shrub guard, which pass through the side plates, are mounted the ball-bearing drive wheels. Hence, the strain caused by the wheels in motion falls on the shaft and not on the side plates, as in the ordinary type of mower where the wheel spindles are a part of the cast sideplates. Self adjusting. Five revolving blades of vanadium crucible steel. Oil tempered stationary blade has upturned lip or edge, cutter bar adjusted by top and bottom screws, extra wide case, hardened pawls.

Size, inch	14	16	18	20
Gross weight each, lbs.	50	62	65	68
Each	$25 50	26.50	27.50	28 50

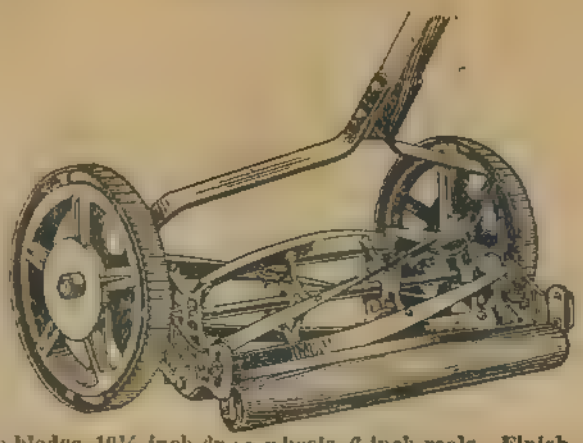
CRESTLAWN
BALL-BEARING

Five blades, 11-inch drive wheels. 6-inch reel. Finish, silver and gold bronze; decorations, empire red.

The wheels as well as the revolving knives turn on ball-bearings. Cutter bar is secured to the four-squared rigid frame by a patented interlocking adjustment that is absolutely impossible to be knocked or twisted out of alignment. Blades of razor steel, tempered in oil and self-sharpening. A ¾-inch reel shaft and double riveted end spiders prevent the reel from being sprung and adds increased momentum.

Size, inch	14	16	18	20
Gross weight each, lbs.	62	64	66	68
Each	$26.00	27.00	28.00	29.00

HERCULES
BALL BEARING



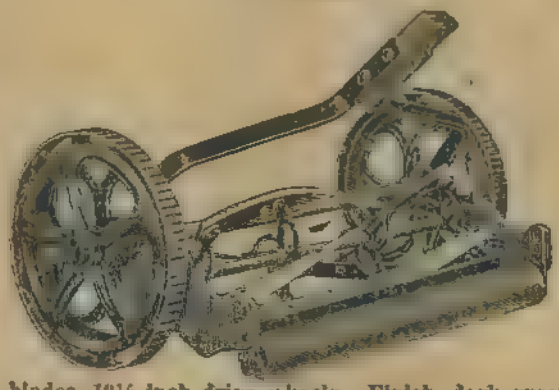
Five blades, 10½-inch drive wheels, 6-inch reels. Finish, white enamel frame and reel, gold enamel wheels with green center and green handle irons; decorations, red.

This mower is attractive and permits of being lightly constructed where strength is not needed, and its weight is materially less than that of any high-grade mower on the market. Each point of construction has been tried out individually in other styles and are combined with patented features, such as self-adjusting ball bearings and steel wheel mountings.

Blades of vanadium crucible steel, oil tempered. Stationary blade has upturned lip or edge. Cutter bar adjusted by top screws on each side of pivotal point. Extra wide case-hardened pawls, insuring a ratchet of long life and durability.

Size, inch	14	16	18
Gross weight each, lbs.	62	64	66
Each	$21 00	22 00	23.00

FENDEN
BALL-BEARING



Four blades, 10½-inch drive wheels. Finish, dark green with white enamel wheels; gold trimmings.

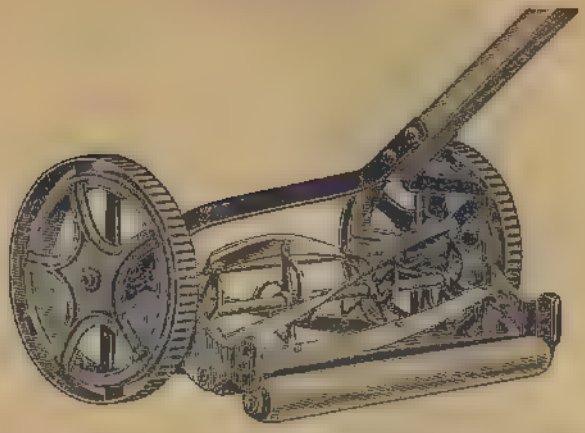
An attractive light-weight, ball bearing mower. Shoulders are turned on the shrub guard, forming a strong frame construction. On the ends of the heavy shaft or shrub guard, which pass through the side plates are mounted the ball-bearing drive wheels. Hence, the strain caused by the wheels in motion falls on the shaft and not on the side plates, as in the ordinary type of mower where the wheel spindles are a part of the cast side plates. Blades of vanadium crucible steel, oil tempered, self-adjusting and self-sharpening. Cutter bar adjusted by top and bottom screws.

Size, inch	14	16	18
Gross weight each, lbs.	55	58	61
Each	$24 50	25.00	26.50

LAWN MOWERS

ADMIRAL

BALL-BEARING



Four blades, 10½-inch wheels, 6-inch reels. Finish, gold bronze and blue; decorations, silver bronze and blue.

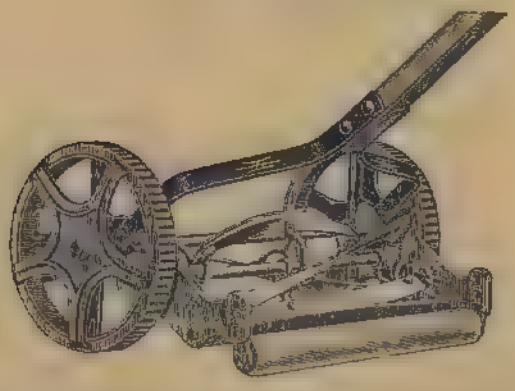
A strictly high grade mower, and one of the most beautiful and graceful designs ever produced. The shrub rod runs through the center of the mower, forming an axle for the wheels. All wood parts are of carefully selected stock and lacquered to protect from weather. Accurately fitted and adjusted throughout. Screw adjusting.

Blades of highest grade crucible steel, oil tempered, spirally formed and self-sharpening.

Size, inch	14	16	18
Gross weight each, lbs	48	51	54
Each	$18.00	19.00	20 00

DIRECTOR

BALL BEARING



Four blades, 9-inch wheels, 5½-inch reels. Finish, red and gold; decorations, gold and silver.

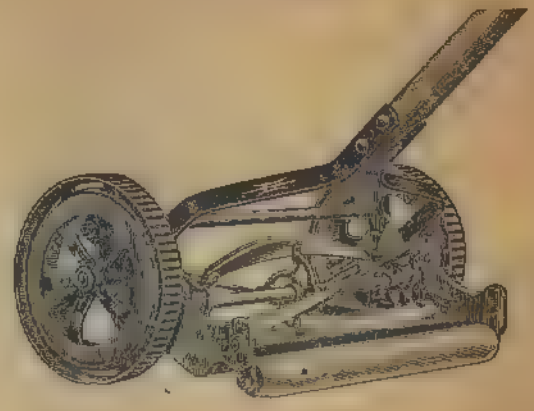
This mower is very graceful in outline, and very easy running. Perfectly machined and fitted and parts are interchangeable. Screw adjusting cutter bar. The ball bearing cones are made of best quality tool steel and tempered glass hard. Automatically adjusted.

Blades of highest grade crucible steel, spirally formed and self-sharpening, which are attached to the reel shaft by means of malleable iron spiders. Shaft is made of cold rolled machinery steel.

Size, inch	12	14	16	18
Gross weight, lbs	40	42	45	50
Each	$13.50	16.00	16.50	17.00

PARAGON

BALL-BEARING



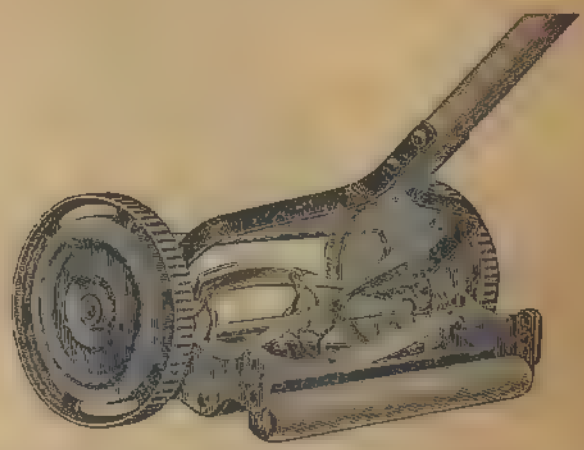
Four blades, 8½-inch wheels; 5½-inch reels. Finish, gold and aluminum bronze; decorations, green.

Semi-open type, light and easy running. A smaller ball-bearing mower that would give better satisfaction could not be built. Every bearing is accurately machined and all material is carefully selected. Blades of high-grade crucible steel, oil tempered and water ground. All ball bearing parts automatically adjusted.

Size, inch	10	12	14	16
Gross weight each, lbs	38	40	42	44
Each	$14.50	15.00	15.50	16.00

BABY GRAND

BALL-BEARING



Four blades, 8-inch wheels; 5½-inch reels. Finish, aluminum and gold; decorations, blue.

An attractive light-weight, ball-bearing mower. Suitable for owners of small lawns. Accurately fitted; strongly made and has full screw adjustment. Ball-bearing parts are automatically adjusted. All material is first-class. Cones are of tool steel tempered glass hard. Blades of high quality knife steel ground under water.

Size, inch	10	12	14	16
Gross weight each, lbs	38	40	42	45
Each	$14 50	15 00	15 50	16 00

LAWN MOWERS

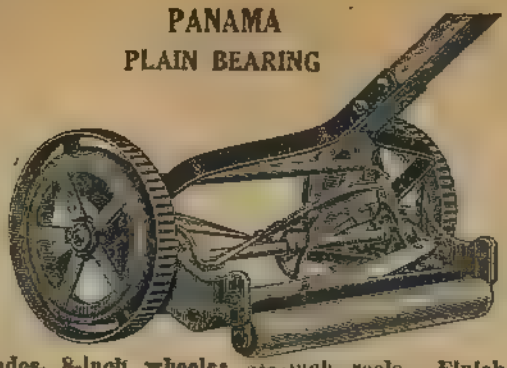
CLOVER LEAF
PLAIN BEARING

Three blades, 8-inch wheels; 5½-inch reels. Finish, apple green and gold bronze; decorations, green.

New and attractive design. All parts are machined and fitted to ensure accurate construction. Screw adjustments throughout. The reel shaft is made of machinery steel and has adjustable brass bushings for taking up wear. Blades of high-grade blade steel, carefully tempered and spirally formed.

Size, inch	10	12	14	16
Gross weight each, lbs.	38	40	42	44
Each	$12 50	13.00	13 50	14.00

PANAMA
PLAIN BEARING



Three blades, 8-inch wheels; 5½-inch reels. Finish, gold bronze and green.

Guaranteed to be the best and most attractive, low-priced mower ever made. Very light in weight, yet strongly constructed. All connecting points carefully milled to exact dimensions. Shoulders are machined on each end of cross-rod to produce a rigid frame. Blades of crucible steel, thoroughly tempered. The reel is equipped with brass bushings and a locknut device for taking up wear. Screw adjusting.

Size, inch	10	12	14	16
Gross weight each, lbs.	38	40	42	44
Each	$12.50	13.00	13.50	14.00

GRASS CATCHERS

EASY EMPTYING

Heavy galvanized wire frame. Galvanized wire handle, hook and arms fastened to frame. Heavy white duck sides. Perforated to prevent grass from slipping. Complete with adjustable eye brackets and hooks for attaching. Will fit 12 to 18-inch mowers of any make.

PACIFIC

Non-Slipping Galvanized Steel Bottom.

HORTON WASHING MACHINES

ELECTRIC

With Three-Way Wringer

Combined hand or electric washing and wringing machine. High speed mechanism. Cut gears mounted on side. Steel frame cut geared wringer, ball bearing, with 1¾x10-inch rolls, guaranteed for five years Tub Louisiana red cypress, natural finish. Four ball bearing casters. Motor equipped for alternating 110 or 220-volt current

We stock No. 32 in 110V, 220V, 60 cycle and 110V, 50 cycle.

Horse Power of Motor, ¼.

No.	32
Extreme hght crated, in	39
Weight crated, lbs	203
Tub dimensions, inch	21½x22x12
Each	$120.00

MIRACLE HIGH SPEED HAND

Louisiana red cypress tub. Dovetailed staves. Steel hoops. High speed. Lever operated. Cut gears. Metal cap over end of post prevents injury to clothes. Legs are extensions of staves.

No.	22
Height crated, inch	31½
Weight crated, lbs	166
Tub dimensions, inch	20¾x22½x12
Each	$30 00

VACUUM HAND OR POWER

Agitator makes 2½ strokes to each operation of lever. Mechanism disconnected when lid is open.

The many perforations or air valves cause so much agitation clothes are cleaned in less time than other vacuum machines. Gears covered. For power use 8x1¾ pulley in place of fly wheel.

No.	35
Height, crated, inch	36
Weight, crated, lbs	101
Tub dimensions, inch	20½x22½x12
Each	$37.50

HIGH SPEED POWER

Cut shows Miracle Belt Driven Power Machine. Pulley, 8x1¾ inches, should run 245 revolutions.

No.	22 P
Extreme height crated, inch	31½
Weight crated, inch	89
Tub dimensions, inch	20¾x22½x12
Each	$30.00

PEERLESS WATER MOTOR

Tub of Louisiana red cypress. Dasher post guarded with cap, preventing injury to clothes. Stave leg type. Operated with the Peerless water motor.

"McPherson" Player Piano Style No. 300

Beautiful Mahogany Finish, has Sliding Doors and Fold in Pedals.

30 DAY FREE TRIAL

Because Player Pianos are a comparatively modern invention there are those who impose excessive profits upon any who are inclined to take advantage of the practical character of the instrument. Thoughtful persons among us who have neither the ability, time or inclination to become proficient in the production of music, but who, nevertheless delight in the pleasures of harmony and concord, and who recognize in the mechanical player a broad and satisfying compensation, are in position to appreciate the genius that has brought forth this contribution to art. But [illegible] seek to put upon you. You ought to have a [illegible] and here it is—the McPherson Full Guaranteed 88-Note Player Piano we have a truly [illegible] producing machine that may be made easily to appeal to every artistic mood, every emotional period as the greatest maestro would want it to do—and at a price within the reach of any of us. That is the wonder of it. As good as the best-priced as fairly as can be done. Another demonstration of our Co-operative Factory to you method of buying direct and eliminating the Jobber, Wholesaler and Dealer. It is handsomely designed, and can be furnished in a beautiful mahogany finish case, with sliding doors, fold in panels, and beautifully turned trusses. Height, 4 feet 9 inches; length, 5 feet 2 inches; depth, 2 feet 5 inches. These are some of the features: Seven and one-third octaves. Three strings in unison and overstrung bass, nickel-plated brackets, double repeating action, pin block made of several layers of hard rock maple, direction of grain alternating successively, convex sounding board, imported wire. Empire top, and Genuine Ivory keys. A positive governor that will insure perfect tempo control under any and all conditions of pumping and one of the easiest operating players made. Material and workmanship fully guaranteed for 25 years. Weight, boxed for shipment, about 1000 pounds. Shipped from Chicago Factory.

F-4067 McPherson Player Piano $360.00

"McPherson" Player Piano Style No. 280

A MASTER PIECE

Quality of Tone Unequalled. Handsomely Finished Mahogany, Walnut or Oak Case.

The McPherson Player Piano, No. 280, is a magnificent strictly high class instrument, one that you will be proud to own. The case is very massive, is constructed of thoroughly seasoned and selected materials, very finely finished in a handsome mahogany, golden or fumed oak finish. Every part of the McPherson Player Piano has the scrupulous care and attention of the master builder. In mechanical attainment, as in musical qualities, excellence can go no further than the limit reached in this instrument. In design, size, shape, finish and workmanship the McPherson Player Piano conforms in all ways to all accepted standards. It is built along lines demonstrated by the years as the best suited, the best fitted and the best adapted for the purpose, and it is constructed to withstand every test, artistic and mechanical, to which it can be subjected. The McPherson Player Piano is an attractive piece of furniture, designed with extra heavy Colonial trusses and rounded pilasters, substantially constructed throughout. Height, 4 feet 9 inches; length, 5 feet 2 inches; depth, 2 feet 5 inches. Seven and one-third octaves. Three strings in unison and overstrung bass, nickel-plated brackets, double repeating action, pin block made of several layers of hard rock maple, direction of grain of each layer alternating sucessively, full bell metal bronzed plate, bushed tuning pins, convex sounding board, imported wire; genuine ivory keys and Empire Top. A positive governor that will insure perfect tempo control under any and all conditions of pumping and the easiest operating player piano made. Our McPherson Player Piano, No. 280, is a finely built, first class instrument in every respect, and is sure to please you beyond expectations. It is sold with our twenty-five year guarantee against defects, etc., as are all of our pianos. Weight, about 1 000 pounds. Shipped from Chicago factory.

McPHERSON PLAYER PIANO—STYLE No. 20.

Music hath charms for all. If you love music, but cannot play, there is absolutely no reason for being without music in your home, as with our McPherson Player Pianos you can produce any piece nearly as perfect as the greatest genius can play it. CONSTRUCTION OF CASE. Every part of the McPherson Player Piano has the scrupulous care and attention of the master-builder. The cases are as perfect as first-class, carefully selected materials in the hands of efficient, experienced workmen can make them. In mechanical attainment, as in musical qualities, excellence can go no further than the limit reached in this instrument. In design, size, shape, finish and general design the McPherson conforms in all ways to all accepted standards. It is built along lines demonstrated by the years as the best suited, the best fitted and the best adapted to the purpose, and it is constructed to withstand every test, artistic and mechanical, to which it can be subjected. It is finely hand rubbed and polished and finished in a beautiful mahogany or quarter sawed oak finish. The piano is provided with full Empire top. Piano has sliding doors and fold in panels. The cut above shows the player parts concealed by sliding panels, making it look like a regular piano. It is 4 feet 9 inches in height, 5 feet 2 inches in length and 2 feet 5 inches in depth. MECHANISM: Seven and one-third octaves. Three strings in unison and overstrung bass, full bronze plate, bushed tuning pins, nickel plated brackets, double repeating action, pin block made of several layers of hard rock maple, direction of grain alternating successively, convex sounding board, imported wire, genuine ivory keys. Empire top. Five-point frictionless motor. Equalized bleeds. Folding key slip. Divided hammer rail. Fold-in pedals. A positive governor that will insure perfect tempo control under any and all conditions of pumping and one of the easiest operating players made.

GUARANTEED FOR 25 YEARS.

"McPHERSON" EMPIRE GRAND PIANO

$215.00 An Uncomparable Value.

MAHOGANY, GOLDEN OR FUMED OAK FINISH. COLONIAL TRUSSES AND PILASTERS. PAY CASH AND SAVE $30.00.

The McPherson Empire Grand Piano is manufactured, as are all of our pianos, in one of the oldest and largest piano factories in the United States, by a firm who have been manufacturing pianos for years and who have a reputation for producing pianos of tone, touch, action and finish that are the equal of any high priced piano on the market, regardless of the price you have to pay for them. We know what other houses are asking for the same grade of a piano, and our prices are so much lower that there is no comparison. We ask you to compare the description of our McPherson Empire Grand Piano with any other similar pianos and you are sure to be convinced that the above statements are true. This piano is constructed in the same factory and by the same workmen as all of the very highest priced pianos sold by us and you can rest assured that if you decide to order our McPherson Empire Grand Piano that it will give you complete satisfaction in every way. The Action of the McPherson Empire Grand Piano is particularly responsive to the touch, so that every stroke upon the key is registered with absolute precision and with extreme promptitude. It repeats with that fidelity which the musician requires. None but the highest grade materials enter into it. High grade felt hammers, dependable bushing to prevent the slightest rattle, and perfect adjustment of its various parts make of it all that can be desired. The Scale, seven and one-third octaves of keys (88 keys in all), is accurately and scientifically made of the best material. The case is constructed of well seasoned and selected stock and beautifully finished in a handsome mahogany or selected quartered oak. It is hand rubbed and highly polished. Has heavy and artistic colonial trusses and pillars. Height, 4 feet 6 inches; length, 5 feet 2 inches; depth, 2 feet 3 inches. Seven and one-third octaves. Three strings in unison and overstrung bass, full bronzed plate, bushed tuning pins, nickel plated brackets, double repeating action, pin block made of several layers of hard rock maple, direction of grain alternating successively, convex sounding board, imported wires and Empire top. Our McPherson Empire Grand Piano is sold with the following 25 year guarantee: **Guaranteed for 25 Years.** We guarantee that every McPherson Empire Grand Piano is constructed throughout of the finest materials, that all lumber is thoroughly seasoned, that it is built by experienced piano builders and with wear and tear excepted, is GUARANTEED 25 YEARS against defective material or workmanship.

Guaranteed For Twenty-five Years.

We, however, do not guarantee this piano against checking of the varnish or other troubles resulting from extreme heat, cold or dampness. Weight about 850 pounds. Shipped direct from Illinois factory.

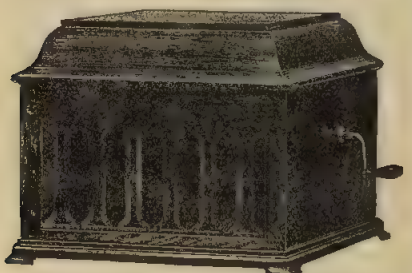
F-4066-McPherson Cabinet Grand Piano **$295.00**

Metropolitan Phonographs

One of our greatest Philosophers has said: "Let me write the Songs of a nation, and I care not who makes the laws." Music has been one of the chief pleasures of man since the dawn of civilization. No home is complete without music of some kind, and the latest developments in phonographs has placed the best music within the reach of every one. The machine we offer is the result of patient effort and careful research on the part of competent men, and we believe it to be the best that can be obtained. We have noted the defects in the older talking machines, and have been successful in overcoming many of them. The fibre back of our sound box does away entirely with the "rumbling" on high notes, and reduces "scratching" surface sound to a minimum. Our full bell shaped horn, extending from the exact center of Cabinet to the front, being constructed entirely of wood, insures a beautiful deep tone, and overcomes the obnoxious phonograph swang so prominent in many of the older machines. We have the volume sufficient for any occasion, and have not detracted from the quality of reproduction to obtain it.

Our adjustable sound box enables you to play any make of disc record, Victor, Columbia, and all other lateral cut records in the vertical position and our Paramount records, Edison, Pathe and all other makes in the horizontal position. The position is changed by means of a thumb screw, and is a simple operation, quickly accomplished. Each machine comes equipped with Jewel Point for Edison records, Sapphire Ball Point for Pathe, and one package each half-tone and full tone steel needles for Victor, Columbia and Paramount records.

Our motors are the best that can be obtained; strong, double spring, and perfectly adjusted to do away with vibration and consequent noise. Our Tone Modulator is simple in construction and perfect in operation, reducing the volume without changing quality of tone. METROPOLITAN PHONOGRAPHS ARE MADE IN FIVE DIFFERENT MODELS. THE SAME HIGH GRADE CONSTRUCTION IS USED THROUGH-OUT, AND EVERY ONE IS GUARANTEED AGAINST DEFECTS IN MATERIAL AND CONSTRUCTION AND TO SATISFY AND PLEASE YOU IN EVERY WAY



Metropolitan MODEL V.

Genuine Mahogany
Quarter Sawed Golden Oak
Quarter Sawed Fumed Oak

The Metropolitan Model V is finely finished in Genuine Mahogany, as shown in illustration, or of Quartered Sawed Oak finished in a rich Golden or Beautiful Dull Varnish finish. All metal parts are heavily nickel plated. Double strong motor; can be wound while playing. Regular Metropolitan Arm and Sound Box, taking steel, tungsten or fibre needles, jewel or diamond points. 12 inch turn-table felt lined, full bell center wooden horn. Tone Modulator to regulate volume of sound. Plays any disc record and produces the full volume and purity of tone of which any record is capable. Dimensions are 18½ inches high, 16¾ inches wide and 18¼ inches deep. Equipped complete with one Jewel Point Needle, one Sapphire Ball Point Needle and one package each of half-tone and full tone steel needles. Shipping weight about 40 pounds. Carefully crated and shipped direct to you from Wisconsin factory.

P-4022—Metropolitan Model Phonograph ..... $

Metropolitan Model VI.

$64.00

var s finish. All metal parts heavily nickel plated. Regular Metropolitan tone reproducer and box, taking fibre, steel or tungsten needles, jewel or diamond points. Full bell center wooden horn giving a volume and quality of tone equal to much larger machines of other makes. Double spring worm gear motor; very smooth in operation; can be wound while playing twelve inch turntable. Tone modulator enables you to regulate volume of scratch, loud or soft. Stands 42½ inches high, is 19½ inches wide and 21 inches deep. Has a roomy four album record compartment, conveniently arranged and furnishing absolute protection for records. Plays Edison, Columbia, Victor, Paramount, Emerson or any disc record. **With each Metropolitan Model VI, we furnish Free: 3, 9½ in Paramount records (any selection, see following pages for list) one Jewel pointed needle, one Sapphire Ball Point and one package each of half tone and full tone steel needles.** Complete guarantee of satisfaction with each machine. GUARANTEE

Metropolitan Talking Machines are guaranteed against defects in material, workmanship and construction, and to satisfy and please you in every way.

METROPOLITAN MODEL IX

$139.50

FREE

SEVEN
9½ Inch Double Records

PLAYS
Victor, Edison, Columbia, Pathe, Paramount or any Disc Record Made

Height, 49½ inches
Width, 23 inches
Depth 24½ inches

Every Machine Is Guaranteed To Give Complete Satisfaction.

Model IX is a massive piece of furniture, beautifully designed and perfectly proportioned; unequalled workmanship and finish. Heavy hand carved posts, elaborately scrolled grill. The cabinet is hand finished in genuine mahogany of exquisite grain or of selected quarter sawed oak finished in a rich golden or fumed finish. Trimmings are in perfect harmony with cabinet. All metal parts are heavily nickeled. Regular Metropolitan Tone arm and sound box. A powerful and extra quiet durable spring motor, of great strength and perfect adjustment; can be wound while running. Each machine is equipped with our patented automatic record stop. Has 12-inch turntable, faced with green felt. Lower cabinet is equipped with numbered vertical record rack, very convenient and furnishing absolute protection for records.

The cabinet is 49½ inches high, 23 inches wide and 24½ inches deep. Crated ready for shipment, weighs 175 pounds. The tone modulator "a special feature of all our machines" regulates the volume of tone. Each machine is equipped with our patented be l shaped elongated wood horn, which completely removes the metallic sound, so often heard in ordinary phonographs, and improves the resonance of an inferior record. Its capacity for softening and sweetening all records is marvelous. With each Model IX phonograph we furnish **free**—seven, 9½ inch double disc records, one Sapphire ball point, one Jewel point, one package half tone and one package full tone needles. Each machine is carefully crated and shipped direct to you from factoryin Wisconsin. Satisfaction and safe delivery guaranteed.

PLANET JR. GARDEN TOOLS

FIRE-FLY PLOW

Owners of small gardens will find this tool indispensable. It will throw a furrow 4 to 6 inches wide and 1 to 3 inches deep—or still deeper if gone over twice. Furrows for manure or seeds may be opened and covered. This tool will enable a busy man to do in his spare time all the work of a large family garden. Chicken raisers find it of great advantage in plowing up their scratching yards.

Weight, lbs 13
Each .....

PLANET JR. STAR PULVERIZER, LEVELER AND WEEDER

This new tool is especially adapted for preparing the seed bed. After the ground has been plowed with the wheel hoe plow or spaded, this pulverizer will be found of great value in smoothing and fining the surface of the soil, putting it in the best possible condition for the seed planter. It is more thorough and rapid in its work than an ordinary garden rake, thoroughly pulverizing lumpy soil. Use like a carpet sweeper or vacuum cleaner with sufficient pressure to cut the lumps and thoroughly pulverize the soil. The rear blade cutting 13½ inches levels the ground perfectly. After the crops are started it may be used between the rows as a weeder or as a crust breaker, leaving a fine mulch. It is a great tool for the small garden, while the vegetable grower will find many uses for it, especially under the laterals in overhead irrigation. Works equally well both forwards and backwards.

Weight, lbs 10
Each .....

EXTRAS FOR PLANET JR. HAND MACHINES

Planet Jr. seeders and wheel hoes have been in successful use so many years we get many calls for wearing parts. If anything not named below is wanted send for special repair circular, giving the name and number of the tool.

Hoes—S100 and S101. For cast or steel frames. Supersede C & D1 and C11 & D11. New and very well liked. Two sizes only, 4½ and 6-in. C & D1 for cast frame wheel hoes. C11 & D11 for steel frames. Made in four widths. Cutting 4½, 6, 7 and 8-in each.

Disc Hoes—Are valuable as weeders and pulverizers.

Cultivator Teeth—No. 1395. Fit combined seeders and double and single wheel hoes.

Narrow Cultivator Teeth—No. 2775. These work particularly well in hard soil.

Plows—For single wheel hoes. 107X for cast frames, 1758X for steel frames.

Plows—For double wheel hoes. 116X and 117X for cast frames, 1771X and 1772X for steel frames.

Three-Prong Cultivator Teeth—For fine, deep work.

Double Mouldboard Plow—It can be set to furrow wide or narrow, or to hill much or little. Width at widest, 14 in; narrowest, 10 in. With connecting piece for double wheel hoes and No. 25.

Wheel Hoe Sweeps— Sold in sets of three: one 4-inch, one 8-inch and one 10-inch, with standard for single wheel hoes. In sets of four: two 4-inch and two 8-inch, with two standards for double wheel hoe.

Rakes—Made in three sizes: three-tooth, five-tooth and seven-tooth.

PLANET JR. GARDEN TOOLS

No. 1

COMBINED DRILL SEEDER, WHEEL HOE, CULTIVATOR AND PLOW

This combination drill was designed expressly for garden farming. It is changed from a drill to its other uses by removing two bolts, when hoes, cultivator teeth or plows can be quickly attached.

The seed is sown in a straight line, the covering being done by flanges on the wheels. Adjustments for sowing different seeds or for plowing, cultivating and rolling are quickly made. The 6-inch hoes are of a shield shape, permitting work being done close to the rows without danger of injuring the plants. Hoes can be changed from side to side and the plants worked closer and deeper or shallow. The names of the principal seeds are stamped on the index. The opening plow is directly between the wheels.

Equipped with one pair 6-inch hoes, three cultivator teeth, one large garden plow and one marker.

No.	1
Hopper capacity, pints	8
Weight, lbs.	44
Each	

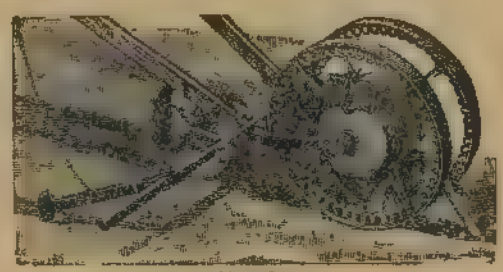
DRILL SEEDER ONLY

All varieties of garden seed can be sown with this machine and it is especially adapted to sowing small seeds shallow, as the plow is directly between the wheels. This implement is almost identical with Planet Jr. No. 1 Combined Drill, but is larger, holding twice as much seed.

Marker can easily be changed from side to side from between the handles. The clearing finger is very useful among stones, roots, trash, etc.; lower than the plow, it leaves a clear track.

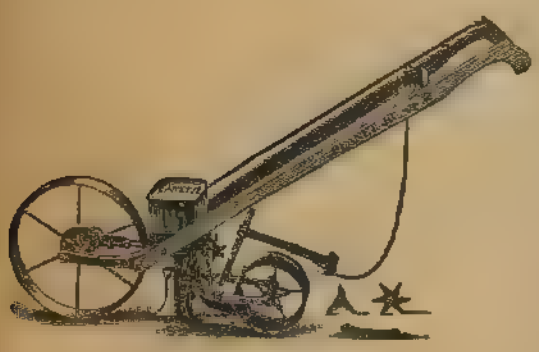
The flow of seed is instantly stopped when wheeling around on the roller. Shields over the discharge openings make the flow of seed regular.

No.	2
Description	Drill Seeder only
Weight, lbs.	38
Each	



No. 2

HILL AND DRILL SEEDERS



Nos. 3 and 5

This seeder has long been recognized as the most perfect hand seed drill for market gardeners and seed men. It will sow evenly in drills and can be adjusted to drop in hills 4, 6, 8, 12 or 24 inches apart. A convenient lever, enables the operator to throw it out of gear immediately and by pushing down the feed rod the flow of seed may be stopped instantly. No time is lost and no seed is wasted. Can be quickly set to sow the different kinds of seeds in the exact thickness required.

The plow is adjustable and plants in a narrow line. Coverers can be adjusted to throw the proper amount of dirt on the seed. Drag bar is adjustable from 6 to 20 inches. No. 3 has a 15-inch steel wheel and No. 5 has a 16½-inch steel wheel.

Nos.	3	5
Hopper capacity, quarts	3	5
Weight, lbs.	46	51
Each		

Note—These tools are identical, with exception of size of wheels and capacity of hoppers.

PLANET JR. GARDEN TOOLS

COMBINED HILL AND DRILL SEEDER, WHEEL HOE, CULTIVATOR AND PLOW

No. 4

In a single implement this tool combines a first-class hill dropping seeder, a single wheel hoe or weeder, a cultivator, a furrower and a plow. Will sow in a continuous row or seed can be dropped in hills 4, 6, 8, 12 or 24 inches apart.

By removing one bolt the drill is detached and the tool frame substituted. It then becomes a single wheel hoe. The small farmer can do practically all the work in his small crops with this one implement.

On the right side of the hopper in plain view of the operator is the index, on which are stamped the names of the principal seeds. It indicates the quantity and is quickly regulated.

Equipped with one pair 6-inch hoes; three cultivator teeth and extension piece for hoeing both sides of row at one passage, one garden plow, one marker and one leaf lifter, which enables the operator to work close to the rows of plants without fear of injuring them.

Nos.	4 D	4
Hopper capacity, quarts	2½	2½
Weight, lbs.	38	47
Each		

No. 4D—Seeder only, without single wheel hoe attachments. No. 4—Combined seeder and single wheel hoe.

COMBINED HILL AND DRILL SEEDER, SINGLE AND DOUBLE WHEEL HOE, CULTIVATOR AND PLOW

For the economical gardener who has a large enough acreage in crops to warrant the use of a double-wheel hoe and does not care to buy separate tools this implement is especially designed.

Adjustable to sow in drills any thickness or to drop in hills 4, 6, 8, 12 or 24 inches apart. Equipped with an automatic device for stopping the feed. The hoes are shaped in such a way as to allow work being done close to the rows without danger to the plants.

As a drill it is almost identical with Planet Jr., No. 4 Drill, and as a wheel hoe it is identical with the Planet Jr., No. 12 Double Wheel Hoe. The change from drill to wheel hoe can be made instantly. Has 11¼-inch steel wheels.

Equipped with one pair 6-inch hoes; four cultivator teeth, one pair plows; two leaf guards, and one marker.

Hopper capacity, quarts	2½
Weight, lbs.	59
Each	

No. 25

No. 31

COMBINED DRILL SEEDER AND WHEEL HOE

No. 31 Planet Jr. is a new combined tool of great value to thousands of gardeners who have never felt able to own, either a seed drill or a wheel hoe. It is thoroughly well made and offered at a price that makes it pay the smallest gardener. It will sow even a small packet of garden seed the thickness desired with great precision from ¼ to 2 inches deep, in a narrow row. The index is most simple, easily set for every kind of seed. The flow of seed is stopped simply by raising the handles, and the tool may be thrown in or out of gear in a moment. The bottom of the hopper is open to full view. Seeds difficult to sow, like salsify, parsley, beets and lettuce, or radishes, beans, peas, turnips, cucumbers, carrots, pickles, spinach, celery, cantaloupes, etc., are handled admirably. It holds one quart.

The seed drill attachment may be removed in a moment and be replaced as quickly by a tool standard to which are fitted all the various cultivating attachments.

The large garden plow is constantly useful from spring to fall. After the ground is prepared, run out furrows for fertilizers, manure and large seeds such as peas beans and potatoes, and then cover them with it. As the crops grow, throw light furrows away from the row and then back again a few days later.

Use the cultivator steel to open narrow furrows; also useful for setting out plants. Use the five-prong cultivating attachment for both deep and shallow work.

The sweeps, of two widths, come into use during the whole season. The whole combination will delight the suburbanite or equally the growing boy who knows that a certain amount of garden work is to be part of his service. Women, younger or older, will find in this tool a light running wheel hoe that will save them hard work and help much to supply the table with fine vegetables.

Equipment—One large garden plow, one 5-inch sweep, one 10-inch sweep, one 2-inch cultivator tooth, one 5-prong cultivating attachment.

Nos.	31	31 D
Weight, lbs.	32	26
Each		

No. 31—Drill seeder and wheel hoe. No. 31D—Drill seeder only.

STANDARD AND TRUE TEMPER GARDEN TOOLS

STANDARD COMBINED HILL AND DRILL SEEDER, SINGLE AND DOUBLE WHEEL HOE, CULTIVATOR AND PLOW

No. 9S

The No. 9S combination fills all the needs of the gardener or farmer who has not sufficient work to justify buying separate implements. It is easily changed from a double to a single wheel cultivator. The seeder not only delivers seed in drills but by shifting one part only, without the use of tools, it will drop in hills 4, 6, 8, 12 and 24 inches apart. The index is in plain view and very easily adjusted with a brass thumb screw to give the required amount of seed. To cut off the flow of seed entirely at the ends of the rows or in moving from one field to another, pull out the seed slide just past the gauge marks where it will latch by pressing lightly to the right a spring will pull it back to position without in any manner changing the adjustment. A stiff Russian bristle is used in the seed brush which will feed a positive regular flow of seed the brush being cased in at the bottom of the hopper to prevent unnecessary agitation of the seed and wear on the brush. A special shape shoe is provided, which is nicely polished and will open up a clean furrow, and is adjustable in depth up to 2 inches. An extra shoe made of tin is also furnished which fits inside the regular shoe to distribute seed in a very narrow row. This allows for close cultivation after the plants are up. The coverer is hinged to the seeder and does its work well. A concave roller wheel in the rear finishes the job in proper shape. This outfit cannot be recommended too highly. Directions with each machine show how to set up and operate. Equipped with four shovels, one pair hoes, one pair diamonds, all oil tempered and finely polished, two leaf guards and wrench.

Hopper capacity, quarts	
Weight, lbs	56
Each	

One in a crate, handles bundled separately.

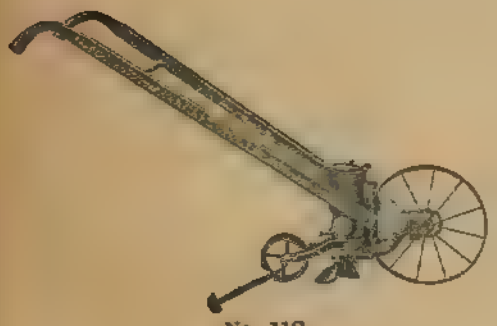
STANDARD COMBINED HILL AND DRILL SEEDER, SINGLE AND DOUBLE WHEEL HOE

No. 10S

The No. 10S is the same as No. 9S, except having fewer cultivating attachments. See above for detailed description. Other cultivating attachments can be purchased at any time.

No.	10S
Hopper capacity, quarts	
Weight, lbs	54
Each	

STANDARD HILL AND DRILL SEEDER ONLY



No. 11S

This is the practical implement for users who do not wish to be changing combinations. The seeder delivers seed in hills and drills by shifting one part only. It will drop in hills 4, 6, 8, 12 and 24 inches apart. The index is in plain view and very easily adjusted with a brass thumb screw to drop the required amount of seed. To cut off the flow of seed entirely at the ends of the rows or in moving from one field to another, pull out the seed slide just past the gauge marks where it will latch; by pressing lightly to the right, a spring will pull it back to position without in any manner changing the adjustment. A stiff bristle is used in the seed brush which will feed a positive, regular flow of seed; the brush is cased in at the bottom of the hopper to prevent unnecessary agitation of the seed and wear. A special shape shoe is provided, which is nicely polished and will open up a clean furrow, and is adjustable in depth up to 2 inches. The shoe is so constructed as to distribute seed in a narrow row which allows close cultivation after the plants are up. The coverer is hinged to the seeder and does its work well. A concave roller wheel in the rear finishes the job in proper shape.

No.	11S
Hopper capacity, quarts	
Weight, lbs	44
Each	

PLANES

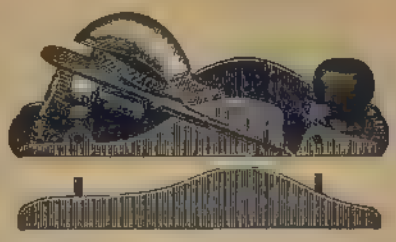
Manufactured by Stanley Rule and Level Co.

BLOCK

Nickel plated trimmings. Knuckle joint. With screw, lever and throat adjustments.

Nos.	18	19
Length, inch	6	7
Size of cutter, inch	1⅝	1⅝
Weight each, lbs.	1½	1⅝
Each	$4.50	5.00

RABBET AND BLOCK



Nickel plated trimmings. With screw adjustment. Right side detachable to change to rabbet cutter, set on a skew.

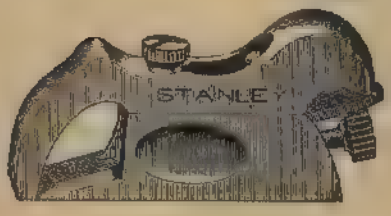
No.	140
Length, inch	7
Size of cutter, inch	1¾
Weight each, lbs.	1½
Each	$4.75

BULL NOSE RABBET

Japanned trimmings. Not adjustable.

No.	75
Length, inch	4
Size of cutter, inch	1
Weight each, lb.	¾
Each	$1 30

CABINET MAKERS RABBET



Plane will lie perfectly flat on either side and can be worked either right or left hand. Has adjustable throat and handy grip. Nickel plated. With screw adjustment.

No.	90
Length, inch	4
Size of cutter, inch	1
Weight each, lb.	1
Each	$6.75

Nickel plated. With screw adjustment.

No.	92
Length, inch	5½
Size of cutter, inch	¾
Weight each, lbs.	1¾
Each	$6 75

Nickel plated. Without screw adjustment

Nos.	93	94
Length, inch	6½	7½
Size of cutter, inch.	1	1¼
Weight each, lbs	1¾	2
Each	$9 00	9.75

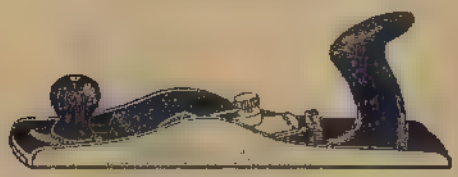
Note—No. 92 planes are designed for fine cabinet work where extreme accuracy is required. The sides and bottom being square with each other, the plane will lie perfectly flat on either side, and can be used right or left.

SIDE RABBET

Used for side rabbeting and trimming dadoes, moulding and grooves of all kinds. The reversible nose piece gives the tool a form by which it will work close into the corners.

	Right hand	Left hand
Nos.	98	99
Length, inch	4	4
Size of cutter, inch	½	¾
Weight each, lb.	½	½
Each	$3 30	3.30

LOW ANGLE JACK



This plane is especially adapted for use in cutting across the grain on heavy work, where more power is required than can be obtained from the ordinary block plane. Throat and screw adjustments.

No.	62
Length, inch	14
Size of cutter, inch	2
Weight each, lbs.	3⅝
Each	$10.25

PIANO MAKERS EDGE

No 97

A useful tool for piano makers and all cabinet workers, for trimming inside work where space prevents the use of any other plane. Screw adjustment.

No.	97
Length, inch	10
Size of cutter, inch	2¼
Weight each, lbs.	3¾
Each	$9.00

CARRIAGE MAKERS RABBET

For heavy framing in mining work, carriage or wagon building or work of similar nature.

Nos.	10½	10
Length, inch	9	13
Cutter, inch	2½	2½
Weight each, lbs.	3	4½
Each	$9.75	11.75

All above, one in a cardboard box.

PLANES

Manufactured by Stanley Rule and Level Co.

IMPROVED RABBET

Will lie perfectly flat on either side, and can be used right or left hand equally well, while planing into corners or up against perpendicular surfaces. Fitted with a depth gauge. Improved rabbet and spur, permitting using across grain.

	Without Spur Cutter		With Spur Cutter		
Nos.	180	182	190	191	192

Each	$6.00	6.10	6.25	6.75	7.25	7.50	7.75

Adjustable fence slides under the bottom, regulating the width of cut. Fitted with two spurs, one on each side, and it also has an adjustable depth gauge. Cutter is adjustable endwise.

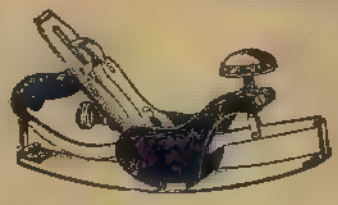
No.	278
Length, inch	5¾
Cutter, inch	1
Weight each, lbs	2
Each	$6.00

SKEW CUTTER, FILLETSTER AND RABBET

Tempered and polished tool steel cutters. Equipped with a fence which can be attached to either side of the plane so that it can be used either right or left hand.

No.	289
Length, inch	8½
Cutter, inch	1¾
Weight each, lbs	4
Each	$7.50

ADJUSTABLE CIRCULAR



By means of the graduated scale on the gears, the flexible steel face can be easily shaped to any required arc, either concave or convex, by turning the knob on the front of the plane.

No.	113
Length, inch	10
Cutter, inch	1¾
Weight each, lbs	4
Each	$12.50

COMBINED BEADING AND MATCHING

By adjustment of the fence, center beading can be done up to 5 inches from the edge of a board. Except for working across the grain the spurs need not be used.

The cutters comprise 7 plow and dado bits, ¼, ⅜, ⅜, ½, ½, ⅝ and ⅞-inch; 7 beading tools, ⅛, ⅜, ¼, ⅜, ⅜, ½ and ½ inch; and a ¼-inch tonguing tool.

Nickeled stock and fence.

No 50

No.	50
Length, inch	9¼
Weight each, lbs	4
Each	$15.00

All above, one in cardboard box.

PLANES

Manufactured by Stanley Rule and Level Co.

SWINGING FENCE MATCH

Has two plow cutters of the width, and one extra wide cutter. The fence in one setting exposes two cutters for cutting the tongue, and, when reversed, leaves only one exposed for cutting the groove. On thicker boards than the plane works on center, the extra wide cutter is substituted for groove cutter when cutting tongue. Nickel plated. Rosewood knobs.

No.	48	49
Cuts groove, inch	⅛	⅛
On boards, inch	¾ to 1¼	½ to ¾
Centers on, inch	⅞	½
Weight each, lbs	3¾	2⅝
Each	$9.75	9.75

DOUBLE END MATCH

Provided with both tongue and groove irons. With one side a tongue can be cut, and by reversing ends the plane will cut a groove to fit. The tonguing tools are made wider on one side for use on thicker stuff than the plane will tongue and groove in the center.

No.	148
Cuts groove, inch	¼
On boards, inch	¾ to 1
Centers on, inch	⅞
Weight each, lbs	2⅝
Each	$8 00

ROUTER

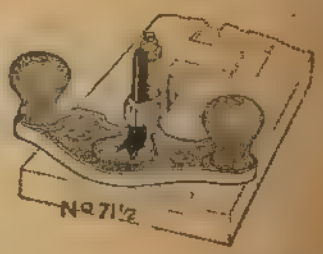
OPEN THROAT

For surfacing the bottom of grooves or other depressions parallel with the general surface of the work. Open throat. Bottom designed so that an extra wooden bottom of any size desired can be screwed on, enabling routing on large openings. Nickeled.

No.	71
Length, inch	7½
Cutter, inch	¼–½
Weight each, lbs	2⅝
Each	$7.50

CLOSED THROAT

Same as No. 71, but with closed throat.



No.	71½
Length, inch	7½
Cutter, inch	¼–½
Weight each, lbs	2⅛
Each	$6.40

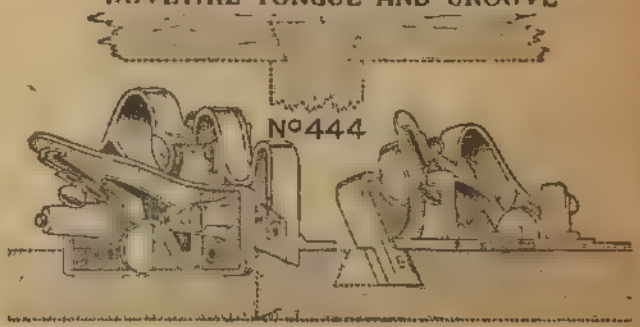
DOOR TRIMMER

Will make mortises for butts, face plates, strike plates, escutcheons, up to depth of ⅝-inch and a width of 3 inches. The fence regulates the position of the cut and insures sides of cut being parallel. Japanned.

With three forged steel cutters, ⅜, ½ and ⅞-inch.

No.	171
Length, inch	11
Weight, lbs	3¾
Each	$10.50

DOVETAIL TONGUE AND GROOVE



Cuts both tongue and groove for dovetail work. Four cutters are furnished with each plane, three of which are for cutting grooves of different sizes and one for cutting tongues of any size. Complete instructions for operating accompany each plane. Nickeled.

No.	444
Length, inch	9
Weight, lbs	6½
Each	$21 50

All above, one in a cardboard box.

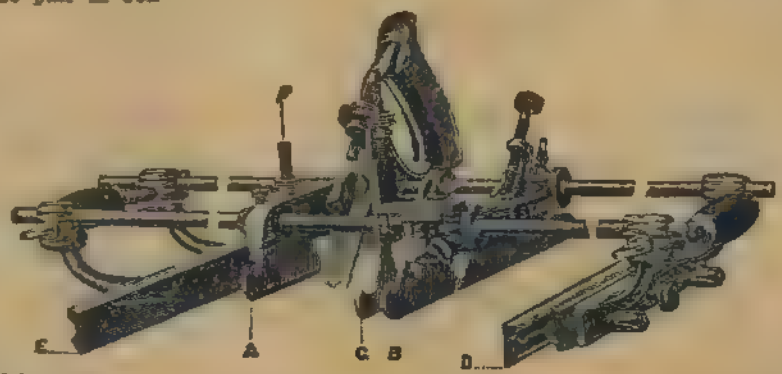
One pair in box

STANLEY FIFTY-FIVE



This tool in the hands of an ordinary carpenter, can be used for all lines of work covered by a full assortment of so-called fancy planes.

The 52 cutters are arranged in 4 separate cases.

This plane consists of:

A main stock (A) with 2 set screws of transverse sliding arms a depth gauge (F) adjusted by a screw, and a slitting cutter with stop.

A sliding section (B) with a vertically adjustable bottom.

The auxiliary center bottom (C) is to be placed in the front of the cutter, as an extra support, or stop, when needed. This bottom is adjusted both vertically and laterally.

Fences (D) and (E) Fence D has a lateral adjustment by means of a screw for extra fine work. The fences can be used on either side of the plane and the rosewood guides can be tilted to any desired angle, up to 45 degrees, by loosening the screws on the face Fence E can be reversed for center beading wide boards.

An adjustable stop to be used in beading the edges of matched boards is inserted on left hand side of sliding section (B).

No. 55—Nickel plated, with 52 tools, bits, etc. Weight, 15 lbs.
Each $50.00

One in a steel box.

The Sargent Steel Square, standard the world over, is made from high-grade tool steel and is carefully tested for trueness and accuracy of marking. It has the proper balance or hang.

In order to explain the marking on the Square we call the side upon which the word "SARGENT" is stamped, the FACE; the reverse side the BACK. The larger arm is called the BODY or BLADE, and the shorter arm the TONGUE. We then have the—

OUTSIDE FACE of the BODY or BLADE
INSIDE FACE of the BODY or BLADE
OUTSIDE FACE of the TONGUE
INSIDE FACE of the TONGUE

OUTSIDE BACK of the BODY or BLADE
INSIDE BACK of the BODY or BLADE
OUTSIDE BACK of the TONGUE
INSIDE BACK of the TONGUE

All above one-quarter dozen in a package.

Improved Levels for Testing Shafting, Etc.

In addition to the regular parallel vial, the bases have a cross level which enables one to place or hold the base on a shaft level in its cross section, not canted sidewise; for the shape of a level glass is such that, though true as adjusted on a flat surface, it will not be reliable when canted sidewise. Hence the value of the cross level, not only to test the truth of shafting, but other surfaces which tend to throw the level base into a canting position

The base of this level has our improved concaved groove running through the length of its base, leaving a flat margin each side, which improves its seat for flat work, while forming an absolutely true and reliable seat for shafting, etc., and is better than a V groove.

PLUMBS AND LEVELS

SAND'S

CARPENTER'S AND MASON'S ALUMINUM LEVELS

Work Either End or Edge Up.

SAND'S Aluminum Levels are the standard of accuracy. Not only the most accurate but the easiest to read in dark places. Made of aluminum which will never rust. SAND'S Aluminum Levels cannot warp, split or crack like the ordinary wood levels. They are the lightest levels made, and 50% stronger than any other, because the greatest strength is placed where most needed. They will plumb any end up or level edge. This allows overhead use to plumb ceilings, girders, beams, etc. THE ONLY LEVEL SO DESIGNED.

No. 18V—"V" Bottom, 18 in. long, 2¼ in. wide, 1 ⅛ in. thick, two Plumbs and two Levels. Wt. each, 1⅝ lbs....Each, $4.25

The "V" bottom is very convenient for leveling up shafting, piping, etc., and is equally useful on flat surface.

No. 24V—V Bottom, 24 in. long, 2¼ in. wide, 1 ⅛ in. thick, two Plumbs and two Levels. Weight each, 2 lbs....Each, $5 50

No. 30-F—Flat Bottom, 30 in. long, 2⅜ in. wide, 1 ⅛ in thick, four Plumbs and two Levels. Wt. each, 3 lbs... Each, $7 00

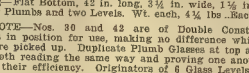
No. 30-V—Grooved Bottom, otherwise same as No. 30-F. .... Each, 7.00

No. 42—Flat Bottom, 42 in. long, 3½ in. wide, 1⅝ in. thick, four Plumbs and two Levels. Wt. each, 4¼ lbs ...Each, $8.00

NOTE—Nos. 30 and 42 are of Double Construction, always in position for use, making no difference which way they are picked up. Duplicate Plumb Glasses at top and bottom, both reading the same way and proving one another increase their efficiency. Originators of 6 Glass Levels.

All above one in a box.

SAND'S LEVEL SIGHTS

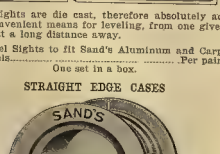


These Sights are die cast, therefore absolutely accurate, and are a convenient means for leveling, from one given point to another, at a long distance away.

No. 10—Level Sights to fit Sand's Aluminum and Carpenter's Wood Levels.....Per pair, $0.60

One set in a box.

STRAIGHT EDGE CASES



Model A—Single Glass. Weight each, 5 oz. . Each, $0 60
Model B—Double Glass. Weight each, 6oz ..... " .60

Made of High Grade Aluminum. Strong and Light. They can be used on any length Straight Edge from ⅝ in to 4¼ in thick by simply drilling a hole 1⅝ in diameter When fastened to Straight Edge they are dust, dirt and waterproof.

Above one in a box, twelve in a carton

CARPENTER'S BLACK WALNUT LEVELS

Work Either End or Edge Up.

SAND'S Walnut Levels are very high grade, possessing the same features that made the Sand's Alum. and Mason's Wood Levels famous. They are new and different. A rugged, practical every day Level made for hard use. Finished in the natural wood. The levels that will be most in demand on account of their superiority.

No. 118—18-20-24 in. long, 2½ in. wide, 1⅛ in. thick, two Plumbs and two Levels. Weight each, 1⅞ lbs.....Each, $1.50

No. 126—26-28-30 in. long, 2¼ in. wide, 1⅛ in. thick, two Plumbs and two Levels. Weight each, 2 lbs.....Each, 1.80

All above one in a box.

The Spirit Glasses used on all Sand's Levels are of special design, SET SOLID, have a slight crown, a quick acting bubble and are very accurate. They are set in such a manner as to give the least amount of trouble and the greatest efficiency. Clear, distinct wire bands on the spirit glasses, one at each end of bubble, enable the user to very quickly and accurately center the bubble, allowing easy reading of the same even at a considerable distance. All Spirit Glasses are covered and sealed by heavy plate glass, protecting them and making these important parts dust, dirt and waterproof.

MASON'S WOOD LEVELS

No. 1-A—48 in. long, 3 in. wide, 1⅝ in. thick, two Plumbs and two Levels, Bob-hole, Hand-hole and Scribe. Levels either edge up. Weight each, 3 lbs.....Each, $2.25

No. 1—48 in. long, 3 in. wide, 1⅝ in. thick, two Plumbs and one Top Level, two Side Views, Bob-hole, Hand-hole and Scribe. Weight each, 3 lbs.....Each, $2.25

No. 3-A—48 in. long, 3 in. wide, 1⅝ in. thick, two Hand-holes, four Plumbs, two Levels, works either end or edge up. Weight each, 3 lbs.....Each, $3.00

No. 7—Fully Brass Bound. Otherwise same as No. 3-A. Wt. each, 4 lbs..... .. .. Each, $5.00

Nos. 3-A and 7 have Reversible Plumbs and Levels—HANDY, CONVENIENT and TIME SAVERS. The advantages are: Being of double construction, no matter how they are picked up, they are always in position for use, while the duplicate plumb glasses, one at the top and the other just below the center, both reading the same way, add to the convenience. For low work upper plumb glass is read and for overhead work the lower glass is in range. The most Popular and best selling Levels made.

The wood used in Nos. 1-A, 1-3-A and 7 Levels is carefully selected, thoroughly air-dried White Pine. Each piece being left to stand from six to twelve months before being made into finished stock, thereby insuring absolute accuracy. All Mason's Levels are finished with 3 coats of Weather-Proof Paint.

No. 1A, 1 and 3-A, twelve in a box.
No 7, six in a box.

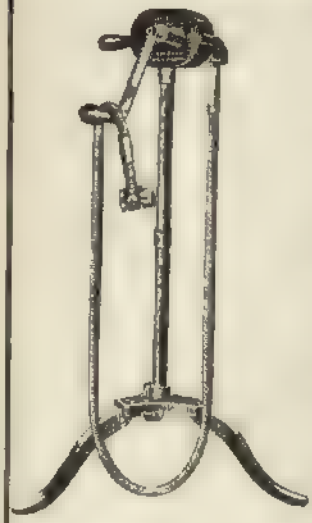
SEATTLE HARDWARE COMPANY

STEWART HORSE CLIPPING MACHINES

Every Horse Worth Keeping is Worth Clipping This Should Be Done at the Proper Season. A Clipped Horse Looks Better Feels Better, and Works Better He Dries Out Quickly after the Day's Work, Rests Well, and his Food Does Him Good He is More Easily Kept Clean and Increases in Value

The Machines on This Page are Used Extensively by Dairymen for Clipping the Flanks and Udders of Cows.



THE STEWART No. 1 BALL BEARING

STANDARD OF THE WORLD

The Most Perfect Clipping Machine made. Is Sturdy and Compact in Form, Can be Taken Apart and Carried in a Satchel.

The Tripod is Rigid and Strong; the Gears are Cut from Solid Metal and Enclosed in a Dust-Proof Case where they Run Constantly in Oil, Eliminating Friction and Wear.

Cast Iron Tripod Base; 1-inch Tubular Steel Jointed Post Dust-Proof Cast Iron Gear Case Flexible Steel Shaft Running in a 1¼-inch Seamless Canvas Cover Fitted with the Stewart One-Nut Tension Knife

Each

No. 1—Height 39 inches, Spread at Base, 22 inches, Length of Shaft Including Knife Head, 6½ feet; Width of Blade, 3 inches; Weight, 36 pounds . $9.75 **$14.75**

One in a box, Size 12½ x 11 x 8 inches

THE No. 2 CHICAGO

A Big, Strong Machine for one who has much Clipping to do

A Special Favorite with Blacksmiths and Liverymen

Showing Handle Complete.

The Large Gear is Carefully Machined with Milled Teeth, Which Fit with Perfect Precision into the Teeth of the Hardened Steel Pinion. Power is Direct and Positive; no Retarded Motion, no Belts to Slip.

The Balance Wheel on the Pinion Shaft Revolves at Great Speed, Imparting a Smooth Motion to the Machine

Cast Iron Tripod Base and Top Frame 1-inch Tubular Steel Jointed Post Flexible Steel Shaft, Running in a 1¼-inch Seamless Canvas Cover; Fitted with the Stewart One-Nut Tension Knife.

No. 2—Height, 44 inches; Spread at Base, 22 inches, Diameter of Gear Wheel, 18 inches, Length of Shaft, Including Knife Head 6½ feet, Weight 77 pounds $11.00 **$21.50**

One in a box, Size, 25 x 21 x 11 inches

STEWART SHEEP SHEARING MACHINES

Shearing with a Machine Takes Off the Wool Evenly, Leaving no Waste Stubble, and the Staples are Full Length, therefore of Highest Value. The Sheep are Cut Smoothly and the Wool Grows Evenly

STEWART BALL BEARING

ENCLOSED GEAR

Base and Upright of this Machine are the Same as the Base and Upright of the Stewart No. 1 Ball Bearing Clipper They are as Substantial as it is Possible to Make Them. Every Joint in the Shaft and the Shearing Head Itself is Fitted with Ball Bearings, Producing a Machine that Turns Easier and Cuts Faster with Less Effort on the Part of the Operator, than Any Machine Ever Made.

Every Owner of Five or More Sheep Should Use a Shearing Machine.

Each

No. 9—Height, 39 inches Spread at Base, 22 inches. Fitted with No. 7 Ball Bearing Shear, Four Combs and Four Cutters. Boxed, 50 pounds..... $14.00 **$21.50**

One in a box.

PARTS FOR CLIPPING AND SHEARING MACHINES

The Construction is Exceedingly Simple, there are no Unnecessary Parts The Adjustment is Made by a Single Nut Centrally Located so that Tension is Equally Distributed and it is Impossible to Adjust One End of the Knife More Tightly than the Other

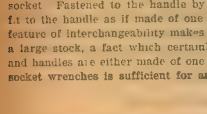
1Y4... Assted 3 doz. in carton Doz $1.75

VARCO AUTOMOBILE TOOLS

Our sockets are made of an especially selected alloy steel of high physical characteristics, and are subjected to an exacting heat treatment. The object of the modern hardening and tempering process is to create a structure within the material which will resist deformation to the highest degree, and it is in the hands of the skillful hardener to determine the proper heats and duration to which a material has to be subjected in order to arrive at its maximum strength and toughness. These tools are not stamped or pressed of tubing or pipe, but broached into solid material of superior quality, thereby insuring not only highest strength, but accuracy as well. The handles are made of heavy material, ⅝-inch diameter, which allows a liberal offset, and consequently proportionate tightening power, without precipitating a twisting or breaking off, and the tools are practically indestructible. An entirely new departure is the interchangeability of sockets to the handle. The advantage of this feature is evident, as it allows the user the full range of a complete set without the necessity of buying a different handle for each size socket. Fastened to the handle by means of a most simple and at the same time ingenious expansion arrangement, the sockets fit to the handle as if made of one piece, and can only be removed if so intended, yet in a moment's time. The above described feature of interchangeability makes it possible to sell any combination of handles and sockets without the necessity of carrying a large stock, a fact which certainly will be appreciated by any merchant. The stock required for wrenches whose sockets and handles are either made of one piece or fastened solidly together is many times larger, whereas a moderate stock of our socket wrenches is sufficient for any combination.

COMBINATION SOCKET WRENCH SET



This is a small yet very useful set, which takes up but very little space and as a consequence is easily carried. These sockets fit and cover practically any nut in an automobile.

Contents: 1 8-inch offset handle, ⅝-inch diameter. 1 8-inch extension. 1 screw driver. 7 hexagon broached alloy steel sockets, heat treated, thin walls yet of extreme strength and toughness. Sockets easily interchangeable. Patented rigid taper fit of sockets to handle. Size: ⅞-inch screw size to ¾-inch screw size inclusive S. A. E. standard and corresponding U. S. standard sizes. Openings: ½, ⅝, ⅝, ¾, ⅞, 1, 1⅛-inch. Sockets are broached ⅛-inch larger than above dimensions. Handle and extension beautiful black glossy oil finish. Sockets blue tempering color. Rust proof. In a wooden box.

No. 99 ..... Each $6.50

RED BUTTON SPEED WRENCH SET

Contents: 1 red button speed wrench handle, ⅝-inch diameter, 4-inch shank. 1 offset wrench handle, 8-inch. 2 extensions 8-inch and 12-inch long. 1 screw driver. 7 hexagon broached alloy steel sockets, heat treated, thin walls, yet of extreme strength and toughness. Sockets easy interchangeable. Patented rigid taper fit of sockets to handle. Size: ⅞-inch screw size to ¾-inch screw size inclusive S. A. E. standard and corresponding sizes to U. S. standard. Openings: ½, ⅝, ⅝, ¾, ⅞, 1, 1⅛-inch. Sockets are broached ⅛-inch larger than above dimensions. Handles and extensions beautiful black glossy oil finish. Speed button red enamel. Sockets blue tempering color. Rust proof. In a wooden box.

No. 100 ..... Each $9.50

RED BUTTON SPEED WRENCH SET

Contents: 1 red button speed wrench handle ⅝-inch diameter, 4-inch shank. 1 offset wrench handle. 2 extensions 8 and 12-inch long. 1 screw driver. 15 hexagon broached alloy steel sockets, heat treated, thin walls, yet of extreme strength and toughness. Easy interchangeable. Patented rigid taper fit of sockets to handle. Sizes: ⅞-inch screw size to ⅝-inch screw size inclusive S. A. E. standard. ¼-inch screw size to ⅝-inch screw size inclusive U. S standard. ⅞-inch screw size to 1-inch screw size inclusive cap screw size. Openings: ½, ⅝, ⅝, ¾, ⅞, ¾, ⅞, ⅛, ⅞, ⅛, 1, 1⅛, 1⅛, 1¼-inch. These openings will accommodate any size nut and bolt head in any hexagon system. Sockets are broached ⅛ larger than above dimensions. Handles and extensions beautiful black glossy oil finish. Speed button red enamel. Sockets blue tempering color. Rust proof. In a wooden box.

No. 110 ..... Each $14.30

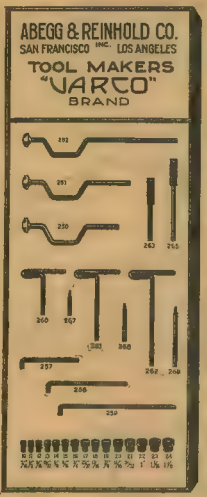
DEALERS DISPLAY STOCK BOARD



These highly ornamental boards carry the different handles and extensions together with sockets, and in this way they offer a practical solution of display and selling medium. Sockets and handles being interchangeable any desired combination can be obtained and consequently a comparatively small stock will be found sufficient—a welcome feature for the merchant, no doubt.

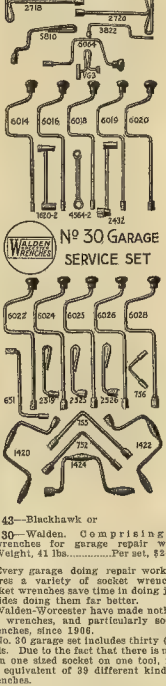
Size of board, 6 ft. by 2 ft.

WIRE HANDLE GARAGE SERVICE SET



No. 43—Blackhawk or

No. 30—Walden. Comprising 30 wrenches for garage repair work Weight, 41 lbs.....Per set, $34.00

Every garage doing repair work requires a variety of socket wrenches. Socket wrenches save time in doing jobs, besides doing them far better.

Walden-Worcester have made nothing but wrenches, and particularly socket wrenches, since 1906.

No. 30 garage set includes thirty (30) tools. Due to the fact that there is more than one sized socket on one tool, it is the equivalent of 39 different kinds of wrenches.

There are thirteen sizes of offsets; ten sizes of speed wrenches; six sizes of L wrenches; five special designed wrenches; three demountable rim wrenches; two T handles.

There are no two of the same size of wrench from the same type of handle This set of wrenches has been selected to fit the popular makes of cars, including places where a particular type of wrench is needed.

Packed in wooden case 20½x7x7 in. and weigh 41 lbs.

FORD

MASTER WRENCH

No. 1-MW—Set consists of Master Wrench, 5 hexagon sockets, ⅞, ½, ⅞, ⅝ and ⅜ in., and 1 adapter. Weight complete, 3 lbs... Set, $10.50

A Universal Joint Socket Wrench with all driving parts incased in a heavily knurled, stationary, hand-grip sleeve.

The Billmont should be in the tool case of every automobile. It takes the place of many special wrenches. It is the universal tool for all Ford repairs and adjustments.

One hand holds the wrench firmly in place while the other does the turning. That strong, long T-bar handle gives plenty of leverage and makes the hardest thread-bound, rusted or frozen nut turn loose and come off.

The fourth connecting rod nut, the terror to repair men and Ford owners, is a simple job for the Billmont. With this master wrench you can get right at it—no need to lift motor from frame—fifteen minutes to three hours saved on every job. For this work alone the Billmont is worth ten times its price.

Center main bearing nuts and bolts easy to reach—radiator side bolts, right at the radiator, but not too close for the Billmont. Bottom inspection plate—there are 14 stud bolts here, but the Billmont gets them all in half the time. Fan bolt, hard to get at, but simple with the Billmont. Motor bolts, body bolts, rear hub flange bolts, steering post lock nut, front fender brackets, commutator brush lock nuts, even grinding the last valve is easy work for the Billmont.

No 70 No. 65 No. 60

No. 65—Offset Screw Driver.....Each, $0.40

No 70—Standard Socket Adapter and Oil Plug Remover.....Each, .40

No. 60—Ford Valve Grinder Attachment..... " .35

ROW BOATS

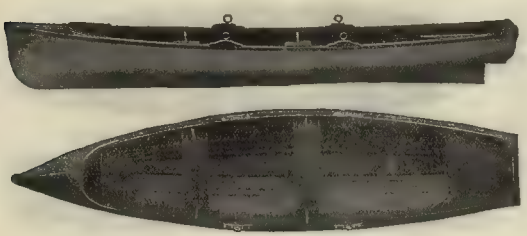
Not Carried in Stock; Can Only be Furnished by Shipping Direct from Factory



SPECIAL SMOOTH PLANKED FISHING BOAT

Specially Built for Outboard Motors

Built Very Substantial. The Wide Transom and Almost Flat Stern Section, together with the Straight Keel Line, provides for the Added Weight of the Motor and Operator, and Keeps the Entire Length of the Boat in the water. The Large Comfortable Stern Seat Allows the Operator Sufficient Room to Handle the Steering Device on the Engine. The perfectly Smooth Enameled Planking glides through the water with the least resistance. The dimensions of the frame work and general construction of the entire boat reduces the vibration of the motor to a minimum. These Boats are Constructed Heavier than the ordinary standard row boat, and the increased weight adds to the strength and safety, making it well adapted to family use. The added weight of the motor does not decrease the speed, as the under body is so designed that it glides on top of the water instead of displacing it.

Specifications

The Frame Work is made from Clear Selected White Oak. Ribs are 1x1 in. Spaced 6 in. Center. Transom is 1⅜ in. Thick White Oak, Reinforced with Iron Bolts. Decking and Coaming are of Selected Oak. Gunwales are 1½x⅝ in. Copper Riveted at Every Rib through inner and outer gunwale. Interior of Boat is provided with Three Cross Seats 12 in. Wide. Seats are made from Clear Selected Cedar or Spruce Finished Natural with Three Coats of Spar Varnish. The Inside of Boat is Painted Battleship Gray; the Outside is thoroughly Smoothed, Joints Caulked with Sesne Twine and all screws and Nail Holes are Filled with White Lead Putty and Painted Three Coats of Moss Green. Decks, Gunwales and Seats Finished Natural with Spar Varnish. One Pair of Galvanized Oar Locks Furnished with Each Boat. Oars are not included.

Nos.	Length	Beam	Depth at Bow	Depth at Stern	Depth Amidship	Shipping Weight	Each
97	16 ft.	48 in.	27 in.	23 in.	18 in.	240 Lbs.	$120 00

46	14 ft.	34 in.	8½ ft.	90 Lbs.	55.00

CANOES

LIVERY

Designed and built to take care of the demand for an Absolutely Dependable Canoe for Cruising, Livery and other Hard Usage. It is of the Batten Seam Construction, made Leak Proof by Laying a Water Proof Glue Covered Tape the Entire Length of Each Batten and Planking Seam. The Frame Work is of Selected Oak and Planking Clear Selected Cedar—the kind of wood that will not water log or "bulge" away from the ribs as the basswood planked canoe does. It has liberal beam and freeboard and is designed to stand rough water and the hardest kind of service.

Specifications for No. A1300

Keel of Selected White Oak ⅞x1⅝ in.; Stem of Selected White Oak, Double, Steam Bent to Shape. Inner Keel ⅝x1¾ in. Dadoed for over ribs. Ribs are White Oak ⅝x⅜ in. Spaced 4 in. Center. Battens Selected White Pine ½x1 in. Dadoed Over Ribs. Planking of Clear Selected Cedar ⅛ in. Thick. Inner and Outer Gunwales of Clear Northern Fir. Decks of Clear White Spruce 30 in. Long, with Oak Covering Boards. Coaming Selected White Oak. Thwarts and Seats Clear Red Birch. Seats are Hand Caned, All Fastenings of Copper and Brass. Decks, Seats, Gunwales and Floor Risings Finished Natural with Three Coats Spar Varnish. Inside Painted Three Coats Straw Colored Lead Paint. The Outside is Painted Three Coats of Green and One of Enamel.

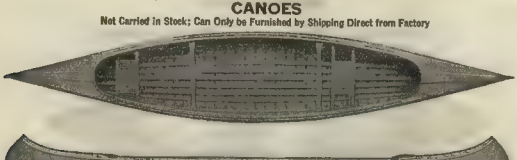
Specifications for No. B1300

Specifications the same as those for No. A1300, excepting that the Decks are 15 in. Long with No Coaming. Seats are not included with this Canoe, but will be furnished at an additional charge of $2.25 Each.

Nos.	Length Overall	Beam	Depth of Ends	Depth Amidship	Shipping Weight	Each
A1300	16 ft.	34 in.	24 in.	13 in.	90 Lbs.	$95.80
B1300	16 ft.	34 in.	24 in.	13 in.	90 Lbs.	87.20

CANOES

Not Carried in Stock; Can Only be Furnished by Shipping Direct from Factory



Indian Girl Model
CANVAS COVERED

RIBS.—Ribs are made from Clear Selected White Cedar ⅝ in. Thick and 2 in. Wide, Machined with Neatly Rounded Edges and thoroughly Smoothed Before Finishing Coats are Applied. Ribs are Very Closely Spaced Insuring Rigidity and Strength.

PLANKING. All Planking is made from Clear Selected Cedar of Uniform Color. The Planking is Put On in Long Lengths Laid with Square Joints as it Securely Fastened to Each Rib. Thickness of Planking is ⅜ in.

FASTENINGS.—All Fastenings are Copper and Brass. Planking is Fastened to Ribs with Copper Tacks, One at Center and Two at Each Edge of Plank for Each Rib. Thoroughly Clinched on Inside of Rib. Keel is Fastened with Brass Screws and Gunwales with Copper Rivets and Nails. Stem Bands are Polished Brass Fastened with Brass Nails.

CANVAS.—Canvas is of Special Close Weave put on in One Piece Over the Hull, thoroughly Stretched and Fastened to the Top and Stems with Copper Tacks.

SEATS.—Standard Canoe Seats are made from Selected Red Birch, Hand Caned and made to Stand Hard Usage; Fastened about 4 in. Below the Gunwale.

PAINTING.—The Outside of Canoe is Filled with a Special Canvas Filler and Finished with Four Coats of Green Canoe Enamel. Gunwales, Decks, Seats and Inside are Finished with Three Coats of Best Marine Spar Varnish.

WOOD SPLIT PULLEYS

Construction of Pulleys, 9 to 36 Inches Inclusive

"DODGE INDEPENDENCE"

Pulleys are put together without nails, so that in event of there being any shrinkage or swelling there will be no appreciable effect on the Pulley, whereas if nails were used, the slightest swelling would draw them, and in shrinking the segments would split, from the fact that when the nails are once loosened and drawn they will never go back to their original position

Every Pulley, large or small; is carefully balanced by a special process, which assures an accurate balance and true running on the shaft.

Construction of Pulleys having a diameter of 38 Inches or more

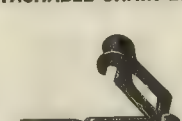
NOTE—In Ordering Give Exact Size of Shaft; Width of Face, and Kind of Face (Crown or Flat)

DETACHABLE CHAIN BELT

Do not set an Idler too hard against the Chain Belt, nor run it too tight, as the Positive action renders it unnecessary to strain it as tightly as a friction belt. At first it should be held firmly to the wheels by the Idler or Tightening Wheel, but it is always smooth.

Chains should generally be kept oiled, but when used in exposure to sand, grit or any cutting dirt, then good Black Lead is better.



Open Hook Chain Belt should be used with the backs of the hooks to the Sprocket Wheel as it is generally calculated to fit the pitch of the Sprocket Wheels upon that side; but it may be run with the open side of the hooks to the wheel, where one or more wheels in a series require it, as in the case of an Idler or Tightening Wheel, but it is always best to plan an Idler to run on the slack portion of the Chain Belt.

Kelley-How-Thomson Co. of Duluth

STEEL SPLIT PULLEYS

Great Strength with Light Weight; No Slipping on Shaft, No Breaking, No Time Loss for Shut-Down

KEYSTONE

Oval Crown Substantial Rims, $\frac{5}{16}$ or $\frac{3}{8}$ in. Thick according to diameter; Will not break under sudden strains or high speeds. Arms are Placed Directly at the Rim Partings, one half of each arm on either side of the parting; these Arms Rigidly Support the Rim at these Vital Points and entirely eliminate the possibility of destructive vibration.

In sizes up to 24 in. in diameter the Arms are Securely Riveted to a Sheet Steel Casing, to which, in turn, are riveted to Malleable Iron Yoke through which the compression bolts pass. Above 24 in. the Hub is made Entirely of Malleable Iron. Steel Clips reinforce the important connection between Arms and Hub.

Wherever there is a Rivet the metals through which the Rivet Passes are interlocked male and female by countersinking; the flange thus formed on the metals takes all the lateral strain; Impossible to shear.

NATIONAL

Recommended for Work Requiring High Speeds, such as on Dynamos, Motors, etc.

To Find Diameter of Driving Pulley: Multiply revolutions of Driven Pulley by its Diameter and divide the product by revolutions of Driver.

To Find Diameter of Driven Pulley: Multiply revolutions of Driver by its Diameter and divide product by revolutions of driven pulley.

To Find Revolutions of Driven Shaft: Multiply diameter of Pulley on Drive Shaft by its number of revolutions and divide product by diameter of pulley on driven shaft. Reverse above rule to ascertain number of revolutions of Drive Shaft.

ROLLER BEARING COASTER WAGONS

Prices on Request

BUFFALO AUTO-WHEEL

To Meet the Demand for a Medium Priced Coaster Wagon, the No. O Auto-Wheel Coaster was Designed, which in All the Absolute Essentials of Speed Durability, and General All-round Efficiency is Unquestionably a Winner. A Splendid Wagon at an Exceedingly Moderate Price

Per Dozen

No. 0—Body 12 x 28 Inches. Wheels 8 Inches. Weigh Each, About 20 Pounds

Two in a Carton

WITH QUICK DETACHABLE BOX

Differs from the Regular Auto-Wheel Only in the Addition of a Special Patented Device for Instantaneous Removal and Secure Replacement of Box, a Feature Appreciated by Every Boy

This is Accomplished by the Fastener and Release. This Release is Arranged on Principle of an Ordinary Window Fastener and a Turn of the Finger Opens or Closes It

When the Lever is Turned to Lock Box to Platform It Forces the Box Back so that the Curved Steel Pins Shown are Forced Under the Steel Protection Plates on the Bottom of Platform. When Releasing Box, the Body is Pushed Forward and the Box Lifts Off the Platform Readily

Per Dozen

No. 11—14 x 32 Inches— 8-inch Wheels. Weight, Each, 25 Pounds
No. 22—14 x 34 Inches—10-inch Wheels. Weight, Each, 30 Pounds
No. 33—16 x 38 Inches—10-inch Wheels. Weight, Each, 35 Pounds
No. 44—18 x 40 Inches—12-inch Wheels. Weight, Each, 40 Pounds

Nos. 11 to 44 Not Carried in Stock Can Only be Furnished by Shipping Direct from Factory

TUBULAR LANTERNS

DIETZ

Mechanically Perfect. Convenient and Safe. Made for Wear. Not Affected by Draughts.

"WIZARD" COLD BLAST

A New Type of Lantern, Having the Exposed Wick and Convenient Short Globe. Has Dome-shaped Solderless Oil Fount with Large Oil Filler, Patent Reinforced Tubes and Security Standing Bail Hooked into Patent Brass Eyelets. **No. 2** Patented Tinned Steel Burner Wick, 1 Inch. "D-Lite" Globe. Will Burn **20 Hours.** Height Over All, 13¼ Inches.

	Per Dozen
No. 45—Bright Tin	**$22.70**
No. 46 Bright Tin, Brass Fount and Top	**31.25**

One dozen in a case. Weight, per dozen, about 45 pounds.

"VICTOR" HOT BLAST

Equipped with **No. 1** Safety Wing-lock Burner, Positive-locking Globe Lift and Security Standing Bail Hooked into Patent Brass Eyelets. Has Dome-shaped Solderless Oil Fount with Large Oil Filler. Fount Holds Enough Oil to Burn **12 Hours** Wick, ¾ Inch "Fitzall" Globe

	Per Dozen
No. 35—Bright Tin. Height Over All, 13½ Inches	**$15.00**

One dozen in a case. Weight, per dozen about 33 pounds

IMPROVED "HY-LO" HOT BLAST

Designed to Fill Demand for a Satisfactory Low-priced Lantern. **No. 1** Patent Tinned Steel Burner Fount Capacity such as to Burn **12 Hours.** Wick, ¾ Inch "Fitzall" Globe. Height Over All, 13½ Inches. **Bright Tin.**

	Per Dozen
No. 10	**$14.60**
No. 10R—With Contractors Red Globes	**20.60**

One dozen in a case. Weight, per dozen, about 36 pounds

WIZARD COLD BLAST

10 Candle Power Light

Burns 40 Hours

Extra Large Fount

Made of AA Quality Open Hearth Charcoal Tin. DeLite Globe (Loc-Nub) Double Seamed Solderless Dome Shape. Upright Bail Put On with Brass Eyelet. Double Wing Lock Burner. Reinforced Corrugated Tubes 1-inch Wick

	Per Dozen	
No. 875—Size 2. Height over all, 13½ in Half dozen in a case	$19.00	**$24.00**

"LITTLE STAR" HOT BLAST

Modeled on the Lines of the Famous Dietz "Victor," but Smaller in Size. Has the Security Standing Bail Hooked into Patent Brass Eyelets. **No. 1** Patent Safety Wing-lock Burner Positive-locking Globe Lift and Dome-shaped Solderless Oil Fount which Holds Sufficient Oil to Burn **12 Hours** Wick, ¾ Inch. U. S. Globe

	Per Dozen
No. 20—Bright Tin. Height Over All, 11 Inches	**$14.00**

One dozen in a case. Weight, per dozen, about 27 pounds.

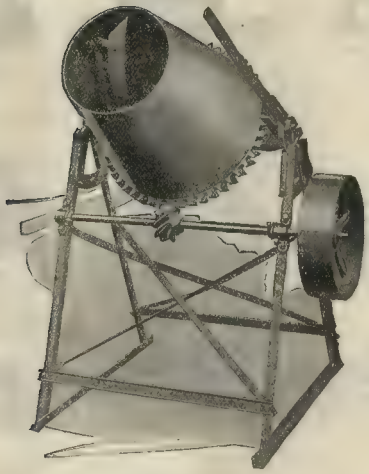
J8198—11¾ in., Egyptian optic satin finish, heavy floral spray with leaf pendant, satin finish notched top . . . . . Each, $3.75

CONCRETE MIXING MACHINE



THE PONY MIXER

A Mixer Intended Especially for Individual Use
Inexpensive and Efficient

No machine can be of more general convenience to the farmer than one of these small machines. With it during his spare time he can build his own watering troughs, side walls, floors, foundations, cement barn floors, etc. The Mixer will soon pay for itself on one fair sized job.

The illustration above shows the machine with drum set in mixing or charging position. Charging is done on one side of the machine, discharging on the other (the drum reverses motion during the discharge).

Observe that the construction is entirely of steel or iron and that on account of its extreme simple construction there are practically no parts to wear out.

There is nothing about the Pony Mixer to get out of order; the driving is done through one speed gear which revolves the drum forward while in mixing position. When the drum is thrown to dumping position, the gear around its circumference again meshes with the spiral gear and the direction of the drum is reversed.

	Each
Pony Mixer—Equipped with both pulley for power and hand work; Weight 260 Lbs.	$48.00

Capacity, 3 Cubic Feet

CEMENT SIDEWALK TOOLS

STEARNS

SOLID BRONZE AND FINE GREY IRON

Our Solid Bronze Tools are Made of Extra Hard Metal Carefully Grained and Highly Polished Faces, with Backs Finished in Gold Bronze; They Will Scour Perfectly; Will not Rust. Handles are Wax Finished Natural Wood

Coldwell's Demountable Cutting Unit

Width of Cut, 40 inches.

Weight on Drive Roller, 1100 Lbs.

Diameter of Drive Roller, 15 inches.

Cutting Capacity, 1½ to 2¼ Acres per Hour.

Length Overall, 7 feet.

Height Overall, 4 ft. 5 in

COMBINATION LAWN ROLLER AND LAWN MOWER

Ride Type Motor Driven

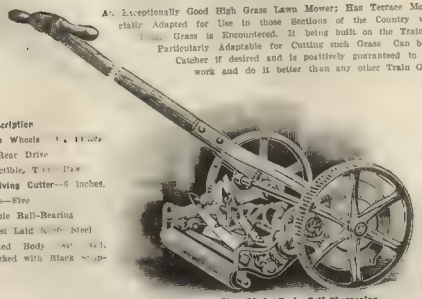
In order to maintain a perfect lawn, it is just as important to have it well and continuously rolled as it is to have it well and continuously cut It is equipped with the latest up-to-date type of motor, transmission and cooling devices. All materials used throughout, workmanship and finish are of the best. The amount of weight on the rollers is just right as we have determined it by years of experience and it is so simple that the ordinary laboring man can be taught to operate it in a few hours.

	Each
Model J—Combination Lawn Roller and Lawn Mower . . .	$1300 00

LAWN MOWERS

COLDWELL PARK—BALL BEARING

An Exceptionally Good High Grass Lawn Mower; Has Terrace Mowing Arrangement. Specially Adapted for Use in those Sections of the Country where a Quick Growing [illegible] Grass is Encountered. It being built on the Train Geared Style makes it Particularly Adaptable for Cutting such Grass. Can be supplied with a Grass Catcher if desired and is positively guaranteed to do a greater variety of work and do it better than any other Train Geared Lawn Mower.



Description

Diameter of Drive Wheels—[illegible] Inches
Gears—External, Rear Drive
Ratchets—Indestructible, Triple Pawl
Diameter of Revolving Cutter—6 Inches.
Number of Blades—Five
Bearings—Adjustable Ball-Bearing
Bottom Knife—Best Laid Knife Steel
Finish—Bright Red Body and Gear. Trimmings: Marked with Black Striping

Ball-Bearing; High Wheel; Five Blade Reel; Self-Sharpening

Made throughout of the Best Material, and has several of the Latest Devices, such as the Indestructible Triple Pawl, Ratchets, Adjustable Bearings, etc., and Patent Device for Handle Adjustment, which is absolutely necessary for terrace mowing.

WOODLAND

Brass Bushed Journals; High Wheel; Self-Sharpening

Same in Construction as the Maple shown above, with the exception that it is made with Adjustable Brass Bushed Journals in place of ball bearing. The Teeth of the Gears are of the right shape, ratio and pitch and are cut much finer than those used in a mower of this grade, which insures a quiet-running machine. The Knives, **3 in number,** are full-sized and will not spring out of line when something of a hard nature enters between them while mowing. The Bottom Knife is Adjusted to the Revolving Cutter by Steel Set Screws.

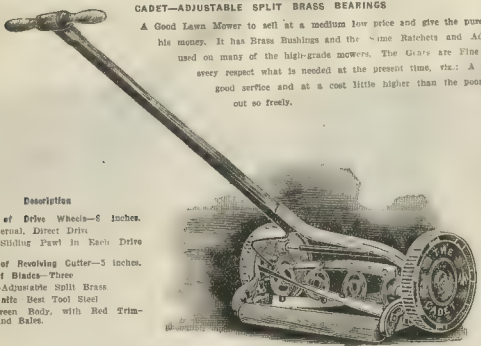
LAWN MOWERS

CADET—ADJUSTABLE SPLIT BRASS BEARINGS

A Good Lawn Mower to sell at a medium low price and give the purchaser full value for his money. It has Brass Bushings and the Same Ratchets and Adjustments that are used on many of the high-grade mowers. The Gears are Fine Cut and it is in every respect what is needed at the present time, viz.: A mower that will do good service and at a cost little higher than the poor trash that is put out so freely.



Description

Diameter of Drive Wheels—8 inches.
Gears—Internal, Direct Drive.
Ratchets—Sliding Pawl in Each Drive Pinion.
Diameter of Revolving Cutter—5 inches.
Number of Blades—Three.
Bearings—Adjustable Split Brass.
Bottom Knife—Best Tool Steel.
Finish—Green Body, with Red Trimmings and Rules.

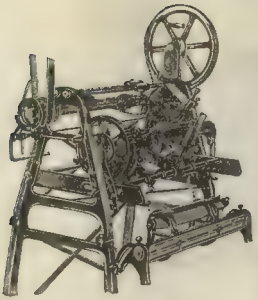
LAWN MOWER GRINDERS

For Shipment from Factory

IDEAL



Japanned Cast Iron Frame (18 in. Wide on Floor, 30 in. Wide Overall), Stationary Carriage and Large Sprocket Wheel 16 in. in Diameter, with 5 in. Wood Handle; Frame is Full Steel Braced, Height Overall 36 in.; Carriage has Gas Pipe Front and Rods with Gas Pipe Front Bar (on which mower rests); Ball Bearing Steel Main Driving Shaft 1¼ in. in Diameter, with Ball Bearing Carborundum Wheel 8 in. in Diameter with ⅝ in. Face; Main Bearings are Babbitted with extra good babbitt, and are Self-Aligning. The Grinding Wheel is driven by a ⅜ in. High Grade Bicycle Chain from the Main Shaft and the Main Shaft Connected to the Large Sprocket Wheel by ¼ in. Bicycle Chain, while the Screw Feed Shaft is driven by a Round Leather Belt. The Grinding Wheel is Mounted on a Ball Bearing Hub which makes it easily Adjustable and very easy running. The Arm which carries the Grinding Wheel is pushed along the shaft by a Sliding Head. The Sliding Head is driven by a ¾ in. Steel Screw Shaft behind the Guide Shaft. The Feed is thrown out by a small Trip Lever. The lawn mower is turned upside down and rests upon the Supports. The Roller also rests upon Supports; the Hook is hooked in under the Straight Blade which forms the guide for grinding. As the Grinding Wheel passes along the Knife it grinds the spiral reel to fit the straight Blade, even though it may be crooked. When operating by power, which is strongly recommended, four 18 in. blades can be ground in 4 minutes; the adjusting of the mower should not take over 6 minutes. Cast Iron Japanned Adjustable Attachment Bar will hold any straight cutting mower blade; or a few ¼ in. bolts of various lengths will clamp any mower blade to the attachment. The Attachment Bar is placed on one side to hold Planer Knives. Japanned Steel Roller Rest with Pin Adjustable in Height. Complete with Skate Sharpener Attachment. Circular giving full directions for use furnished with each machine.

	Each

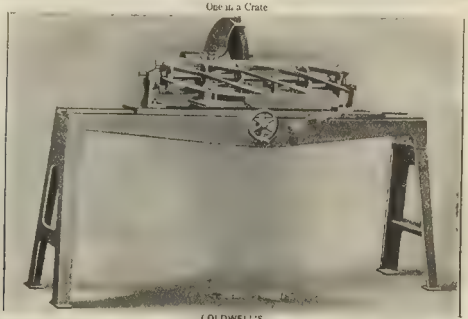
No. SB –SUB BASE (For Nos. 2 and 1), Japanned Cast Iron, Steel Braced 28 in. Wide on Floor, 34 in. Long, 8 in. High. Weight Each about 40 Lbs.	2 50

One in a Crate



COLDWELL'S

A Strong, Heavy, Serviceable Machine such as is used in the Latest Mower Factories for Grinding Lawn Mower Knives. It is so arranged that the Revolving Cutter is supported while grinding either by the ends of shaft held in bearings or on centers. The Table Carrying the Revolving Cutter is carried forward and backward in the face of the emery wheel by means of the hand crank. As the Emery Wheel wears smaller in diameter it is brought forward to its work by means of the hand wheel. The machine is furnished with One Emery Wheel of the Best Quality, 14 in. Diameter, with a 1½ in. Face, and Drive Pulley of 4 in. Diameter and 4 in. Face. Wheel should run about 1000 R. P. M.

	Each
Coldwell's Sharpener—Approximate Weight about 530 Lbs.	$125 00

One in a Crate; Shipping Weight about 600 Lbs.

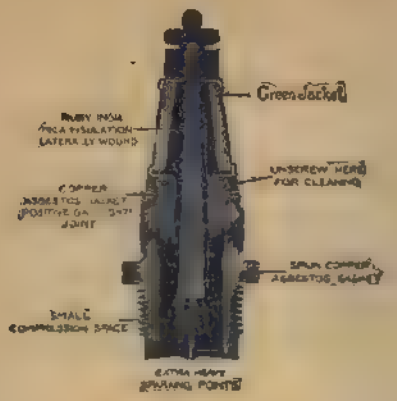
SPLITDORF GREEN JACKET SPARK PLUGS



Made in a variety of types—in standard sizes and of special dimensions to suit engines of every make—the keynote of the highest quality is sounded in the whole line of Splitdorf plugs. They are as nearly soot proof, leak proof and unbreakable as human ingenuity can make them. India ruby mica, the highest grade of electrical insulation known, is used exclusively in Splitdorf plugs.

Special for Fords

½-inch standard
Recommended for all Ford cars.

MINUTE

SPARK PLUG CLEANER

The quick and easy way to clean spark plugs.

Simply fill glass tube half full of gasoline—screw the plug into bushing at the top and shake vigorously.

The needles within the tube pick the carbon from the porcelain while the gasoline dissolves the oil.

The Champion Minute Spark Plug Cleaner comes in a neat box which fits nicely into any tool case.

Each $0 75

SPARK PLUG BRUSHES

An excellent wire and bristle brush with two flat steels for cleaning parts not accessible with brush.

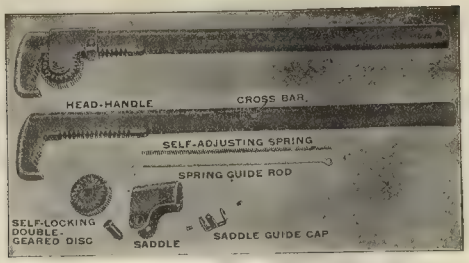
PIPE WRENCHES



CRAFT SELF-ADJUSTING

Combines the Grip of a Vise with the Smooth Operation of a Ratchet

Self-Adjusting: No Screwing or Locking by the Workman is needed. The Double-geared self-locking disc grabs hold instantly with a bull-dog grip; it cannot slip, either when first taking hold or under strain of pressure if properly applied; the harder you pull down on the handle the harder the disc wedges the pipe into the hook of the head.

Made of Cold Rolled and Forged Steel of Special Analysis; Each of the six parts is Tempered and Treated for its Special Work.

CLOTHES HANGERS

These items pile up a surprising total of sales in a season's time. Our own enormous business, larger than any other distributors, is due to our offering better values

WOOD CLOTHES HANGER

H5507—Stained and waxed finish 17 in round wood hanger, coppered hook 100 in crate Per 100, $3.50 Lots of 1 M, $33.00

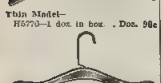
WOOD COMBINATION COAT AND TROUSERS HANGER

H5509 17 in dark grade stained hardwood bars, chrome, with hook inserted trousers bar 1 doz. in box Doz 96c

FANCY ENAMELED COAT HANGERS

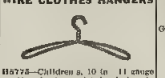
Selected hardwood superior baked enameled equally assid white, pink, blue and lavender

Thin Model—
H5770—1 doz. in box . Doz. 96c

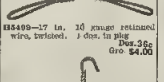


Shaped Model—
H5775—1 doz. in box Doz. $1.50

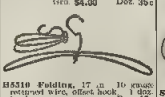
WIRE CLOTHES HANGERS



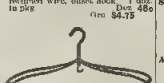
H5778—Children s, 10 in 11 gauge retinned wire, twisted 1 doz in pkg. . . . Doz. 29c
Gro $3.25



H5489—17 in, 16 gauge retinned wire, twisted, 1 doz. in pkg Doz. 36c
Gro $4.00



H5495—17 in., 10 gauge, 1 pc tinned twisted wire 1 doz in pkg Gro $4.80 Doz. 35c

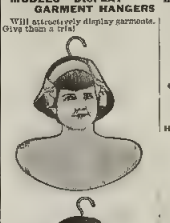


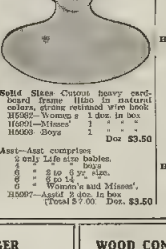
H5510 Folding, 17 in 16 gauge retinned wire, offset hook 1 doz in pkg Doz 46c
Gro $4.75

H5502—Folding, 17 in , 9 gauge, nickeled wire, offset hook 1 doz. in box . . . . . Doz $1.05

"MODELO" DISPLAY GARMENT HANGERS

Will attractively display garments. Give them a trial





Solid Sizes Custom heavy cardboard frame H500 in natural colors, giving retinned wire hook

H5502—Young s 1 doz. in box
H5501—Misses' 1 " "
H5503 Boys 1 " "
Doz $3.50

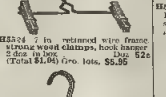
Asst—Asst comprises
2 only Life size babies.
4 " Boys
6 " 2 to 6 yrs. age.
6 " 6 to 14 "
6 " Women's and Misses',
H5507—Assid 2 doz. in box
(Total $7.00 Doz. $3.50

COMBINATION WIRE CLOTHES HANGER

H5772—17 in., 10 mugge twisted wire, offset hook, lower bar with wood trousers or skirt clamps 1 doz. in pkg. Gro. Temp Out

TROUSERS OR SKIRT HANGERS

H5515—7 in. retinned wire frame, wood clamps, loop hanger 2 doz in box Doz 36c
(Total 72c) Gro. lots, $4.10

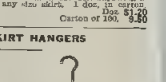


H5324 7 in retinned wire frame, nickel wood clamps, hook hanger 2 doz in box Doz 52c
(Total $1.56) Gro lots, $5.95

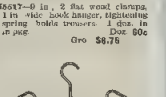
H5505—Faultless 8 in. waxed hardwood, 9 in spring hook running through frame, sliding clamp holds garments tight felt pad ends 2 doz. in box. Doz. 52c
(Total $1.04)

COMBINATION SUIT AND SKIRT HANGER

H6355—Heavy 8gauge retinned wire 18 in Hardwood self adjusting to any size skirt. 1 doz. in carton. Doz $1.20
Carton of 100, $9.50



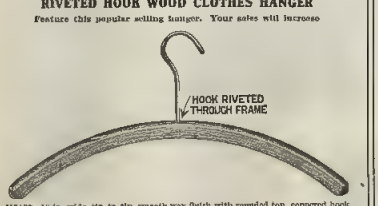
H5517—9 in , 2 flat wood clamps, 1 in wide hook hanger, tightening spring holds trousers 1 doz. in pkg Doz 80c
Gro $8.75



HN949 A metal hanger made of heavily tinned wire, self adjusting to any size skirt 1 doz in pkg Doz 89c

RIVETED HOOK WOOD CLOTHES HANGER

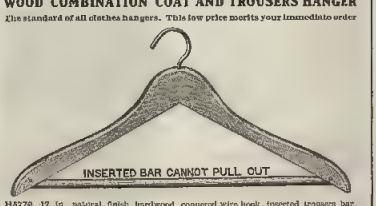
Feature this popular selling hanger. Your sales will increase



H5497 16 in wide sip to tip, smooth wax finish with rounded top coppered hook 100 in carton.
LOTS of 1M, **$33.00** CARTON of 100, **$3.50** LOTS of 1 doz , Doz. **43c**

WOOD COMBINATION COAT AND TROUSERS HANGER

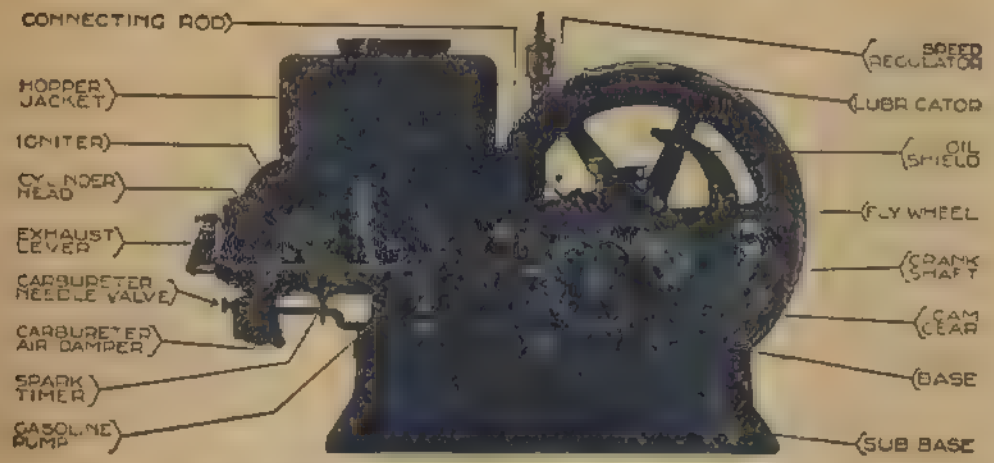
The standard of all clothes hangers. This low price merits your immediate order



H5770 17 in natural finish hardwood coppered wire hook, inserted trousers bar 100 in carton
LOTS of 1M **$65.00** CARTON of 100, **$6.75** LOTS of 1 doz., Doz. **89c**

THE ALAMO TYPE M GASOLINE AND DISTILLATE ENGINES

MAROON LINE



Engine with fly wheel removed, showing working parts

The Alamo Type M Engine is the result of fifteen years of gasoline engine experience combined with engineering skill and the best factory practice. They are of the well known four-stroke cycle type, governed by the hit and miss principle, which is acknowledged the most satisfactory for general service and most economical in fuel.

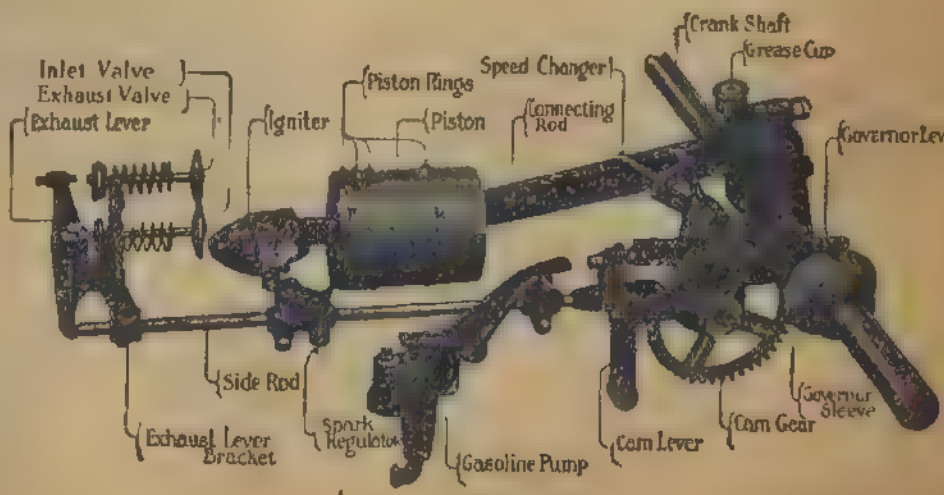
The engines are all attractive in appearance, symmetrical in design and substantial in operation, with liberal bearing surface for all moving parts. They have large hopper jackets, require a minimum amount of water for cooling, have electrical make and break system of ignition, which is the most simple and reliable for ordinary service. They are manufactured by modern methods in our up-to-date factory equipped with the latest and most efficient machine tools. Nothing but the highest grade material enters in their construction, and the workmanship is of the highest quality.

The Alamo Type M Engine has no parts that are not necessary, and nothing has been left off that would add to its service. All unnecessary parts have been eliminated and all complication simplified. All parts are made with ample weight and strength where they are subject to wear. All working parts are in plain sight so that the few adjustments that may be required can be made with ease and with the most simple tools. No special mechanical skill is required to operate an Alamo engine, and plainly written instructions accompany every engine, so that no former knowledge of machinery is required to handle these engines with ease.

The plain view at the side gives good idea of the simplicity of design. It also shows the distribution of metal, heavy bearings set at a thirty degree angle and the substantial design of the base between the cylinder and main bearings, where the greatest strength is required.

Perfect Balance—**All Alamo Type Engines are properly balanced. Having an engine in perfect balance eliminates much trouble and annoyance. It is not necessary to bolt down an Alamo Engine, and the portables do not require special braces or pits for the truck wheels. Vibration and wear of the working parts is reduced to a minimum.**

Governor—**All Type M Engines govern by the hit and miss principle, which is now recognized as the most satisfactory manner to govern engines for general hard service. It permits the engine when running on light load to run with a minimum amount of fuel and with the fly wheel, perfectly balanced, and correct working governor, the regulation of speed is exceptionally close.**



THE ALAMO TYPE M GASOLINE AND DISTILLATE ENGINES

MAROON LINE

Illustrating the 2½ Horsepower Engine. Skids Extra

The Governor is of centrifugal type. On engines smaller than 9 H. P. the governor is mounted in the fly wheel. The larger sized engines have a fly ball gear driven governor. All have speed regulator so the speed may be varied about 25 per cent while the engine is in motion, and permits the engine to be regulated instantly to the proper speed for various machines.

Gears and Cam—Only two gears and one cam are used on the Alamo Type M Engine. The gears are machine cut and the cam is ground on a specially designed machine to exact size, to insure the perfect movement of the valves and igniter.

Gasoline Pump—The Gasoline Pump is unique in construction, being operated by a lever so curved as to make its action noiseless. The pump has no packing whatever, and as it is placed slightly above the level of the carburetor, there is no possible chance for any leak of gasoline. The plunger can be easily removed and the ball valve examined without disturbing other working parts of the pump. The gasoline pump for larger engines is slightly different in design and has more capacity.

Cylinder, Piston and Rings—All cylinders are cast from a special mixture of charcoal iron, which makes a casting of great strength, density and of the greatest wearing qualities. The cylinders are of a pattern which permits of perfect and equal expansion of the cylinder walls so that the cylinder remains perfectly round and straight under all conditions. The cylinder head is also thoroughly jacketed, and provided with large valves. The valves have cast iron heads and nickel steel stems.

The piston is of the trunk pattern, ample length, carefully machined and ground to size. All sizes are provided with four expansion rings perfectly fitted to the grooves in the piston andpinned in place. Oil grooves are also provided to make certain of perfect lubrication of all parts of the piston rings.

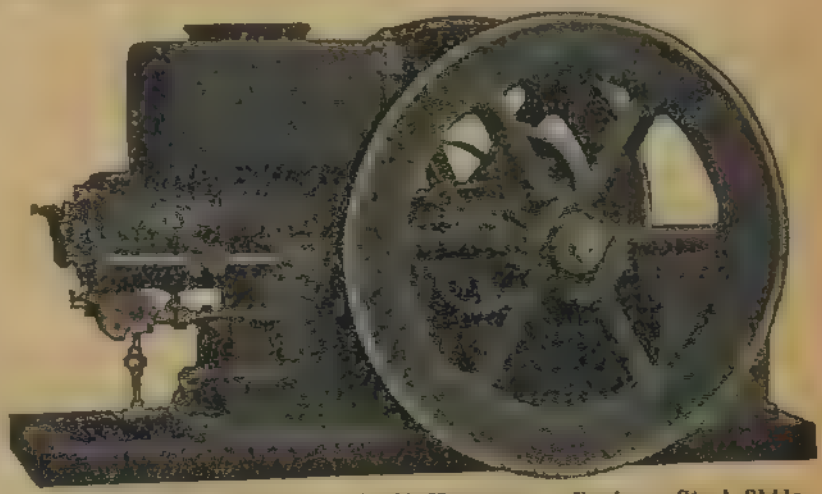
The piston wrist pin is of a large size, case hardened, ground and polished, and securely fastened in a manner which makes it quite impossible for it to become loose.

Alamo Type M Engines have long been notable for perfect fitting pistons and resultant excellent compression.

Crank Shafts—The crank shafts are forged from solid billets of open hearth crank shaft steel. They are carefully machined and ground accurately to size. The small size crank shafts are drop forged and the larger size hammer forged, and all are made from the same high grade quality of steel.

Connecting Rod—The connecting rod is of the I beam construction, carefully designed of ample length and strength and of steel especially fitted for this service. The piston end is fitted with bronze bushings and the crank end of genuine babbitt metal.

Carburetor—The Alamo carburetors are marvels of simplicity and efficiency. Each carburetor is carefully proportioned for the size of the engine to which it is fitted, and will perefctly control the mixture of gasoline and air under all conditions of service and climate. The size of the opening of the fuel nozzle inside is controlled by a needle valve which, when once set, seldom requires any changing, regardless of the changes of load or the conditions of the atmosphere. A perfectly working carburetor is of the greatest importance for satisfactory operation of the engine.



Illustrating the 3½ and 4½ Horsepower Engine. Steel Skids Extra

Magneto—Webster Oscillating furnished with all Alamo Type M Engines. This magneto does away with the use of batteries and furnishes a good spark for starting, as well as when running. It is fastened direct to the igniter, so that there is very little chance of failure by broken connections. A small attachment is provided for tripping the magneto by hand, so that the engine can be readily started by backing it against the compression.

Igniter—The construction of this is most important, as a good sparker is absolutely essential. The Alamo Type M Igniter is simple and rugged in construction. It is fitted to the side of the cylinder, and is held in place by two studs. It may be removed or replaced by only loosening or tightening two nuts. Pure mica is used for the insulation. An outboard bearing is provided for the rotating electrode which holds it in perfect alignment and insures its always working properly. The igniter points are made of a non-corrosive alloy, the best obtainable for the purpose, and can readily be replaced by any one, without the use of special tools.

Pulleys—Stationary engines of all sizes and hand portable engines are furnished with solid iron pulleys as part of their regular equipment. Portable engines mounted on team trucks are regularly furnished with friction clutch pulleys. The pulleys are keyed and set screwed to the engine shaft and set up close to the hub of the fly wheel. The size of the pulley to be used should always be carefully calculated, as it is of the greatest importance that machinery be run at the proper speed.

Alamo Type M engines are regularly equipped without extra charge with muffler attached, magneto, wrenches, oilers, oil can and can of gas engine oil. Small sizes have fuel tank in the base of the engine of sufficient capacity for one day's run. 12 horsepower and 15 horsepower engines are supplied with 60 gallon outside fuel tank. **Small sizes furnished with solid iron pulley.**

†9, 12 and 15 horsepower furnished without pulley. Plain or clutch pulley for these sizes furnished as an extra.

ALAMO DIRECT CONNECTED PUMPING OUTFIT

1½ AND 2½ HORSE POWER SIZE

These combination outfits are compact and especially suitable for pumping purposes. The engine used is our standard 1½ and 2½-horsepower Alamo gasoline or distillate engine, complete with all catalog fittings and fixtures, including the Webster oscillating type of magneto; engine fitted with our standard make and break ignition. Engine and pump standard fitted to a cast iron sub-base, as per illustration; engine being geared direct to a No. 366 Myers pump jack. This jack is of the standard Myers manufacture with machine cut gears, and is back geared 6 to 1, and has a stroke of 6 and 9 inches, eliminating the use of belt entirely. By removing four bolts from the engine base into the substantial cast iron sub-base, the engine can be removed and is then ready to be used for any other job for which it might be required.

All parts going into the construction of these outfits are uniform and interchangeable, which is a great convenience in ordering such repairs, and in view of the fact that the engine is our regular stock of the Alamo type of engine, and our jack our regular stock of cut gear jacks, this puts us in a position to at all times take care of requests for duplicate parts out of our stock, preventing delay in ordering such parts for combinations offered that are not our regular stock.

TYPE M ALAMO KEROSENE ENGINES
MAROON LINE

3½ H. P. Kerosene Engine.

The increased cost of gasoline and the non-production of distillate has created a demand for an engine which will successfully operate on cheaper fuel, such as kerosene. This demand has led us to develop a kerosene engine which has spoken for itself like all other established products of this company, namely, by seventeen years of engine experience.

The kerosene engine we here offer must not be confused or compared with the ordinary kerosene engine that is found on the market, as we have spent large sums for research and experimental work, therefore a product of scientific and basic principles only is represented. We offer you an engine that has perfect combustion, therefore almost entirely eliminating the smoke and obnoxious gas resulting from improperly designed and constructed kerosene engines.

Simplicity is the next important item for thorough consideration, which is best illustrated by stating that our kerosene engine after put in operation is entirely automatic, or self-regulating. Fuel and air are drawn into the engine at proper proportion, varying, of course, to a weak or rich mixture as required by load conditions. The water spray necessary for the successful operation of any kerosene engine is also in this case automatically controlled, and is supplied only at times when needed for heavy engine loads.

Designed to burn kerosene as successfully as it does gasoline and distillate.

ALAMO TYPE M GASOLINE AND DISTILLATE PORTABLE ENGINE OUTFITS

4½, 6½, 9, 12 AND 15 H. P.

The above illustration is of the 4½, 6½, 9, 12 and 15 horsepower Alamo gasoline and distillate engines, which are the favorite sizes for use in ordinary farm work. All kinds of work can be done, from the running of a pumping plant to the operating of a wood saw or ensilage or feed cutter. These engines may be run on a minimum amount of fuel and yet have power enough for all but the heaviest class of farm machinery. For an all-round purpose engine there is nothing better made than the Alamo Type M distillate or gasoline engine.

The above engines have been pronounced by the best critics as being the most perfect engine yet produced for general utility purposes. Its perfect balance, ease of starting in all kinds of weather, and its simplicity and substantial construction is best appreciated by those who have used these engines under the most severe conditions.

Trucks—Made completely of steel and fully guaranteed; channel beams carrying engines very stiff and rigid; axles made of one piece of solid steel.

All mounted outfits are shipped with pole, but singletrees and doubletrees are not included

Pulleys—Regular equipment includes plain, solid pulleys. Friction clutches are extra if desired. See page 5565.

ALAMO TYPE M GASOLINE AND DISTILLATE ENGINES WITH PORTABLE SAWING RIGS

MOUNTED ON STEEL TRUCKS

4½, 6½, 9 H. P.

Back View

Front View

Equipped with No. 41 all steel sliding table, unless ordered with swing table.

The engines used on these sawing outfits are the regular Alamo Type M.

Truck—The same specifications apply to the truck as with the mounted engine, only the channel beams are made longer to receive the saw frame. These channel beams are 10 feet long, thus enabling the use of a belt of sufficient length. Wheel base, 7 feet, 10 inches.

Saw Frame—Steel sliding table styles firmly bolted to the channel beams. It will take a saw blade up to 30 inches in diameter. The saw arbor is 1½ inches in diameter. The pulley on the same is 6x6 inches. Saw blades furnished with each outfit, belting is included. If required, the saw frame can easily be removed from the channel beam, so that the engine can be used for other work. Equipped regularly with 26-inch saw.

Equipment—The engine is furnished with the same equipment as with the Alamo Type M mounted engines.

Pulleys—Engines are supplied with friction clutch pulley of suitable diameter, which gives the saw the proper speed.

CROSS CUT SAWS

SIMONDS MFG. CO.

Made of Highest Grade Crucible Cast Steel, Oil Tempered, Hand Filed and Set and Highly Polished and Etched

The Improvement in the Simonds Crescent Ground Saw Consists in Grinding the Saw in Crescent Lines, Parallel to the Cutting Edge in which case the Teeth are of Even Thickness Throughout the Entire Length of Saw, while the Ends are Increased Two Gauges in Thickness. In Consequence the Saw can be Ground Thinner on the Back, and it Does not Bind in the Kerf. It Requires Less Set, for Each Tooth Does an Equal Amount of Work, and has Equal Thickness or Strength to Hold the Set Required for Clearance. Being Two Gauges Heavier and Connected by Stiffer at the Ends, the Operator can Push as well as Pull without Causing it to "Buckle," and for Pulling Trees it has been Demonstrated that it has no Superior.

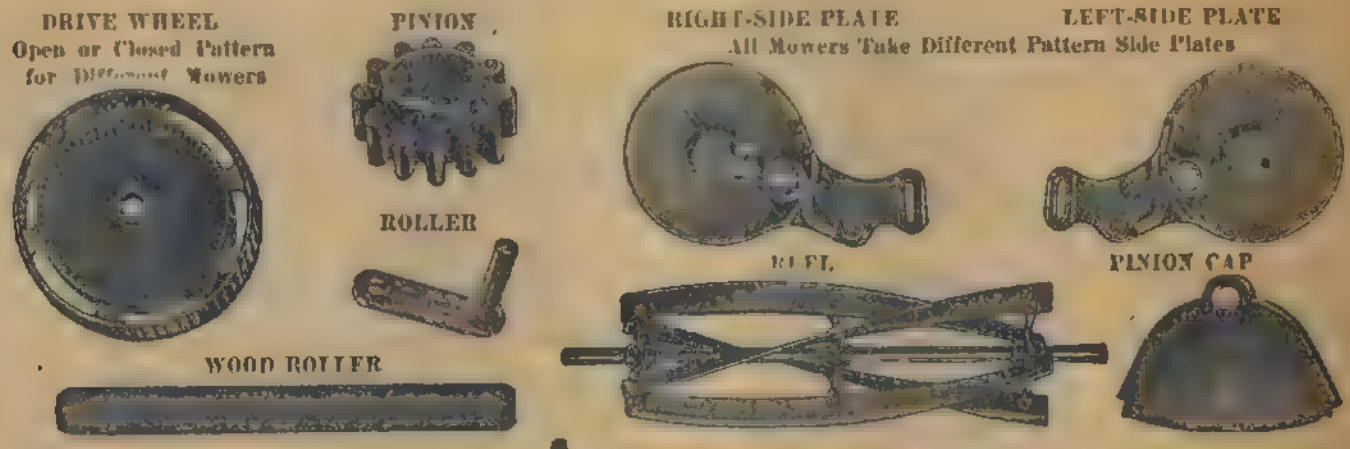
The terms "right" and "left" are used with relation to the position of the operator when using mower. Be sure and give diameter of drive wheel.



CRESTLAWN

	Parcel Post or Express
No. C6-10—Drive wheel; weight, 8 lbs; each	$3 00
No. C03—Right-side plate; weight, 6½ lbs; each	3 00
No. C04—Left-side plate; weight, 6¼ lbs; each	3.00
Reel, 5 blade, complete, all sizes. (State size of mower, number of blades and cutter bar number); express only; each	7.50
L614—Cutter bar, complete, with lipped edge steel blade (state size wanted, give number appearing on cutter bar); weight, 5¾ lbs; each	3.00
L616—Cutter bar, complete, with lipped edge steel blade (state size wanted, give number appearing on cutter bar); weight, 6½ lbs; each	3.00
L618—Cutter bar, complete, with lipped edge steel blade (state size wanted, give number appearing on cutter bar); weight, 6¼ lbs; each	3 00
L620—Cutter bar, complete, with lipped edge steel blade (state size wanted, give number appearing on cutter bar); weight, 6¾ lbs.; each	3 00
Handle irons, both sides alike (state size of mower and cutter bar number); weight, 3½ lbs.; per pair	.60
Wood roller, all sizes (state size wanted and cutter bar number); weight, 2 lbs; each	.75
Wood handle, complete, express only; each	3 00
Wrench; weight, 7 oz.; each	.35
Steel wheel spindle, complete; weight, 5 oz.; each	2 25
Right C15, Left C16—Pinion; mail; weight, 4 oz.; each	.35
No. 4—Roller arms, both sides alike; mail; weight, 4 oz.; each	.30
No. 6—Cones, both sides alike; mail; weight, 2 oz.; each	.60

	Parcel Post or Express
No. A63—Pin on cap, both sides alike; mail; weight, 2 oz., each	$0.20
No. 1912—Hardened steel pawls, both sides alike (state side plate number); mail; weight, 1 oz; each	.10
No. 3—Ball-bearing case, both sides alike; mail; weight, 1 oz; each	.50
No. 42—Ball retainer, both sides alike, with balls; mail; weight, 2 oz.; each (Extra balls, 5 cents each).	.60
Cutter bar adjusting bolts, with nuts; mail; weight, 1 oz.; each	.10
Roller arm bolts, with nuts; mail; weight, 1 oz.; each	.10
Handle iron bolts, with nuts; mail; weight, 2 oz.; each	.10
Handle grip joint bolt, with nut; mail; weight, 2 oz.; each	.10
Pin for cutter bar adjustment; mail; weight, 1 oz.; each	.10
Stationary cone for wheel (give number of wheel); mail; weight, 1 oz.; each	.60
Outside adjusting cone for wheel (give number of wheel); mail; weight, 2 oz.; each	.60
Upper handle cap; mail; weight, 2 oz.; each	.15
Lower handle cap; mail; weight, 4 oz.; each	.30
Shrub rod nuts; mail; weight, 1 oz.; each	.10
Cutter bar adjusting nuts; mail; weight, 1 oz.; each	.10
Metallic sleeve for ball-bearing device; mail; weight, 1 oz.; each	.30
Pins for ball-bearing device; mail; weight, 1 oz.; each	.10
Springs for ball-bearing device; mail; weight, 1 oz; each	.30
Pinion cap machine screws, with nuts; mail; weight, 1 oz.; each	.10
Steel wheel sleeve, complete; mail; weight, 3 oz.; each	2 00

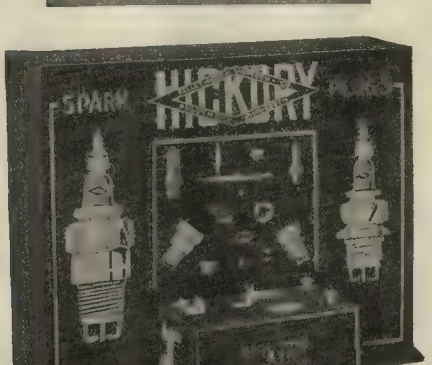
SPARK PLUGS



HICKORY SPARK PLUG ASSORTMENTS

A Mahogany Case or Cabinet, with Large, Beautifully Finished Demonstrating Coil for Plugs, Lamps, Horns and other Electric Equipment; a Large Wall Poster Showing Spark Plug Sizes, a Counter Sign for General Display and Consumer Descriptive Circulars, are the chief elements The Case itself would be an ornament in a Tiffany window, and it shows in actual color the parts, construction and assembly of the HICKORY line of Plugs.

We shall be pleased to give you details as to how you may obtain this advertising, coupled with the co-operation and assistance we expect to place at your disposal.

These Plugs are Offered in Two Models—the Giant or Heavy Duty, and the Junior or Standard Type. Either of these models will be furnished in any and all sizes, whether standard or special. The assortments we are offering this year will take care of the requirements of practically any and all types of gasoline motors, yet there are included in the assortment no sizes which will be slow moving or will lie indefinitely on the shelves of the dealer.

The HICKORY Special Blue Stone Insulator has become an added Identifying Mark of the Highest Quality and Serviceability, and the HICKORY Plug is recognised as the Leader in the Northwest field.

We should be glad to send you full descriptive literature, giving the Details of Construction and Special Features, if you will write us.

	Per Assortment
No. 1—Consisting of **120 Junior Plugs** and Counter Display Cabinet	$96 00
No. 2—Consisting of **75 Giant Plugs** and Counter Display Cabinet	90 00
No. 3—Consisting of **75 Junior and 30 Giant Plugs** and Counter Display Cabinet	96.00

Kelley-How-Thomson Co. of Duluth

SPARK PLUGS

In the Hickory Line of Spark Plugs we are offering a Special Design and features which render it the greatest value on the market today. We have chosen this type to carry our Hickory Trade Mark because it embodies the Uniform Quality and High Efficiency which must characterize all merchandise featured under this Trademark.

These Plugs are oversize in every part, with Reinforced Electrode to provide against warping and distortion under heat, Loose-Assembled into the Porcelain against Soft Copper and Highly Tempered Verona Spring Washers, Every Metal Part is turned from Bar; Electrodes, both Center and Ground, are Staked, not Welded, while each Plug is subjected to rigid final inspection and test before passing to our packing and shipping departments.

⅝ IN. S. A. E.

This Particular Model is Built in Accordance with Specifications Laid Down by the Society of Automobile Engineers and is the size which is standard in the majority of American Built Cars.

Each

No. 1—⅝ **in. S. A. E.**.....$1 00

⅝ In. EXTENSION

This Model carries and Extension Below the Thread to Allow Deeper Penetration into the Firing Chamber. It is Designed Specially for such Cars as the Buick, Dodge, Interstate and others.

Each

No. 2—⅝ **In. Extension**....$1.00

½ IN. STANDARD

Adapted for Stationary Farm Gasoline Engines and all Cars Requiring Regular ½ in., such as E. M. F. 30, Regal, Studebaker, etc.

Each

No. 3—½ **In. Standard** $1.00

FORD SPECIAL

The Ford Motor is usually subjected to Extremes of Service not encountered in the larger car Maximum efficiency is essential from the Spark Plug as from every working part. In this model we are offering a design superior to any Ford Plug on the market. Interchangeable in other cars with ½ in. Standard

Each

No. 4—Ford Special.....$1 00

THE BEST KNOWN
HARDWARE MARK
IN THE NORTHWEST

HICKORY GIANT

The "Hickory Giant" is made for service and in appearance, design and general construction excels all others in the spark plug field.

Every part of the "Hickory Giant" is oversize and the highest grade materials enter into its construction throughout. The porcelains are of highly glazed specially selected and blended clays, and offer the greatest possible degree of resistance to heat, oil and vibration. Other items of superiority are cold rolled steel shell, loose-assembled center stem and double contact spark points.

Each

No. 11—⅝ in.; Required for such cars as the Ford, Studebaker, Overland and engines requiring Regular ⅝ in. size. The heavy duty type is especially adaptable where excessive lead and oil are encountered ..$1 50

No. 22—⅞ in. S. A. E.; Especially recommended for all high powered motors using this type of threa 1 50

No. 33—½ in. Tractor Special; Especially designed for use in high powered Tractor Motors where extreme heat, oil and vibration are encountered and in extreme oversize 1 50

No. 44 ⅞ **in. S. A. E. Extension**; This Model is generally known as the Buick type plug. The Giant types always recommended for high speed and high powered motors. 1 50

All Hickory Spark Plugs are put up One in a Handsome Lithographed Carton; Average Weight About 6 Oz. Each

HICKORY SPARK PLUG PORCELAINS

Hickory Porcelains are not Moulded, but are Turned from Special Kaolin of Foreign Blend, insuring against even slight variation of clay body or form. In addition, these cores carry an Extra Heavy Glaze of Hickory Blue which serves the double purpose of reinforcing the core and sealing against oil seepage.

Each

Hickory Regular Porcelains will fit ⅝ S. A. E. and ½ in. Standard.. .. .. . $0 50

Hickory Extension Porcelain will fit ⅝ in. Extension and Ford Special 50

Hickory Giant Porcelains.. .. .. .

SPARK PLUGS

CHAMPION

Champion Spark Plugs are Standard Factory Equipment on four out of every five Automobiles, Tractors and Stationary Gas Engines made in America. Fourteen Separate and Distinct Inspections must be passed before a single Spark Plug leaves the factory. Every Part is machined and Gauged with Extreme Care, and the Assembling is Thorough.

CHAMPION "STUDEBAKER"

For Studebaker Cars made previous to 1920 models, and Truck, Tractor Farm and Stationary Engines.

	Each
No. A13—⅝ inch	$0.90

SPARK PLUG CLEANERS

CHAMPION "MINUTE"

The Quick and Easy Way to Clean Your Plugs

You don't even have to take the plugs apart.

No more fussing or fuming with emery paper; No more dirty, grimy hands; No more greasy clothes.

You fill tube half full of gasoline—Screw the plug into a bushing at the red—and then shake. The needles pick the carbon from the porcelain while the gas dissolves the oil.

In a minute or two you have a clean set of plugs—good as new.

Could anything be simpler or easier. The plugs become clean right before your eyes.

The Champion "Minute" Spark Plug Cleaner is the simple, sane and sweetless way of doing a hard job quickly and easily.

		Each
No. MC⅛	Threaded for ⅛ in. Spark Plugs	$0 75
No. MC¼	Threaded for ¼ in. Spark Plugs	.75
No. MCM	Threaded for Metric Spark Plugs.	.75

SPLITDORF

THE PLUG WITH THE GREEN JACKET

Owing to the fact that mica can expand and contract without damage, SPLITDORF is able to use a very large central electrode which manufacturers of porcelain plugs are unable to do, as the larger the central electrode, the greater the expansion and contraction and the greater the chance of their breaking the porcelain. This is the primary reason why in all porcelain plugs the central electrode will be found to be of very small diameter.

The mica, after being wrapped around the spindle, or central conductor is forced into a metal bushing with such pressure as to make it practically a solid mass and there is not the slightest possibility of compression leakage through or past it. One gasket only is used outside of this bushing, allowing the bushing to be tightened up to a point where compression leakage is impossible.

It is essential that a plug be easily taken apart for cleaning and, in the case of the "Green Jacket" plug, this operation is simple in the extreme. Any carbon deposits may be lightly scraped from the mica insulation, leaving it as clean and in as perfect condition as when the plug was new. In the case of the porcelain plug, each cleaning has a tendency to scratch the glazing from the insulator, and this allows it to become carbonized very soon again. Through this process the plug soon becomes worthless.

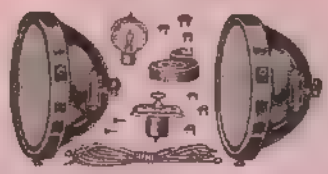
Lots of 10 or more, " **1.75**

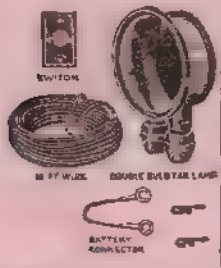
FOR FORD CARS

HEADLIGHT ASSEMBLY



4K4567—For models prior to 1915. 9 in. black enameled lamps, distance between props 7 in., bright polished parabolic reflectors, double rod 1 pc. doors, 15 c. p., 9 volt Mazda bulb, double contact type, complete assembly including all necessary parts for installing, full directions and diagram with each assembly, easily installed. Set, **$5.50**

TAIL LAMP ASSEMBLY



4K3339—Tail lamp switch with resistance coil mounted, 1 wire 12 ft. cable. When connected properly, current flows from magneto when engine is running, lamp lights. Each **$1.50**

OIL TAIL LAMP

4K4443—For steel sided Fords, 9½ x 4 plus 4 x 4 door pockets, all black enamel, to fit body, all parts riveted no solder used, special bolt fastener adapted to those cars, crystal lens on the side, has 2 brass lever to raise patent screw top air chamber. 1 in box. Each **$1.85**

HEADLIGHT REFLECTORS

4K4586 — Drawn parabola shape, light polished and silver plated. 1 pr. in box. Pr. **$1.65**

PARTS FOR FORD LAMPS

Oil Font with Burner—Complete for tail and side lamps, black enameled.
4K3343—1 in box. Each. **65c**

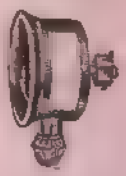
Door Guts for 1911 and later models 9 in. black enameled.
4K5687—1 in box. Each **45c**

Door and Glass—For 1915 and later models 9 in. black enameled door.
4K3342—1 in box. Each **60c**

MAGNETO SPOTLIGHT

4K7981 Complete, 1 post to magneto, no battery required, 7 in. long, 4½ in. diameter glass, 3 in., rear waterproof pressed steel bracket. 1 in box. 3 lbs. Each **$4.15**

ELECTRIC TAIL AND SIDE LAMPS



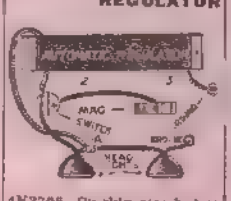
Tail—For 1915 & later Ford cars, diam., 3½ in., black enameled, 3 in. removable semaphore ruby lens, latest type off and on switch fitted with a special bolt fastener for late model Fords, uses 2 c. p. Tungsten bulbs, white side lens.
4K3336—1 in box. Each. **60c**

Side—1915 & later Fords. 4 x 4 in. cast, all black enamel, highly polished, special bolt fastener, hinged door, possible to replace if accident fastens, uses 2 c. p. bulbs, 6 volts, Tungsten filaments, double contact connection.
4K3341 1 pr. in box. Pr. **$3.15**

COMBINATION ELECTRIC TAIL LIGHT & LICENSE HOLDER

4K4536—6½ in. black enameled bracket, 3 in. pan with adjustable rubber lens, with recess for illuminating license number, latest type of off and on switch, by which lamp can be easily disconnected, 2 c. p. Tungsten bulbs, dustproof. 1 in box. Each. **95c**

AUTOMATIC LIGHT REGULATOR



4K3765—Quickly attached to any model Ford car, gives brilliant light at lowest engine speed, prevents lights from burning out when the engine races, uses regular Ford connections and same system of wiring, automatic in operation. 1 in box with directions. Each **Out**

HEADLIGHT INTENSIFIER

4K3766—This Intensifier plug socket is an appliance that will increase the light of your Ford headlights 100%. Simple [illegible] guaranteed. 1 in carton. Each. **65c**

WIRING OUTFITS

Spark Plug Set—Braided covers, copper terminals, cut to correct sizes.
4K4146—1 set in pkg. Set. **35c**

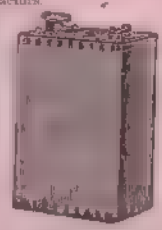
Ignition Harness—18 gauge copper wire rubber insulated, braided cover, each wire with copper terminals and different color covered braid, oil and waterproof, jacket, 1 set in pkg.
4K4144—4 wire set. Set **45c**
4K4145—5 wire set, 5th wire for electric light. Set. **60c**
4K4154—6 wire set. " **65c**

Ignition Harness, Metallic Covered. 18 gauge copper wire, rubber insulated in metallic tube, exceptionally durable, impervious to moisture and oil, waterproof.
4K4143—5 wire set. Set. **85c**

Ignition Harness, Loom Covered. 18 gauge copper wire, rubber insulated, heavy loom, proof against moisture and oil, will not short circuit.
4K4141 5 wire set. Set. **Out**
4K4158—6 wire set, for Fords equipped with storage battery and self starter wires. Set. **72c**

DASH COIL UNIT

For Ford Cars or Fordson Tractors.



4K9751—In this Kingston coil only high grade materials are used and are guaranteed in every respect. A replacement unit for this coil is [illegible] Each **$2.15**

GOODRICH SWITCH WITH YALE LOCK

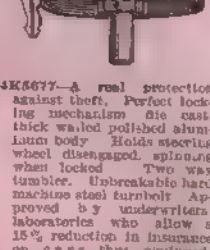
Absolute security against theft. Fits over regular coil and takes place of original switch using pocket covers screws which attach it. Every Ford owner needs one.

4K3933—Polished aluminum plate, counter-sunk screw holes covered by brass arms when locked, key turns switch on and off, attached in a few minutes, 3 keys and directions with each lock. 1 in box. Each. **$2.85**

K. W. AUTOLOCK

4K5643—Approved by Insurance Underwriters, who allow a 15% reduction on insurance. Locks automatically and simultaneously with the stopping of the car. Easily installed. 1 in box with directions. . . Each. **$2.85**

SIMPLEX STEERING WHEEL LOCK



4K5677—A real protection against theft. Perfect locking mechanism die cast, thick walled polished aluminum body. Holds steering wheel disengaged, spinning when locked. Two way tumbler. Unbreakable hard machine steel turnbolt. Approved by underwriters laboratories who allow a 15% reduction in insurance on cars thus equipped. Easily installed. . . box. Each **$4.75**

GILL PISTON RINGS

Can be furnished for any car—special order. In ordering state make, name, year & model of car on which to be used.

One piece, adjust themselves, increase power, decrease fuel consumption, prevent smoking and lessen carbon troubles. 1 in pkg Each
4K9747 Standard size 65½c
4K9748—.015 oversize 66 2c
4K9749—.03125 oversize 66½c

"K-P" PISTON RINGS

4K4480—3½x¼x⅛, 3 pieces. Is Hooked interlocking gas & heat ring in place. A set to replace for any one piston construction of ring, guaranteed not to break Each 96c

"GARCO" GASKETTE ROLL

4K7841 — Asbestos composition material 1p 10x40 in. roll can be cut into gaskets of any size, flexible, tough, resilient, heat & oil resisting, especially desirable for gasket purposes. 1 roll in box . Roll, $1.75

"APCO" CORK GASKET SET

4K4050—Pressed cork gasket set, durable, extensive assortment 15 pieces in set, 1 set in box Set 85c

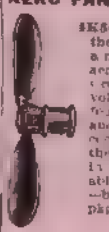
"VICTOR" GASKETS

Made of copper brass and asbestos. Whenever cylinder head of Ford car motor is removed for grinding in valves etc a new gasket is necessary and to make a new one from asbestos sheet is quite a task. 1 in pkg
4K9724—Cylinder head gasket only Each 35c
4K9728—Cylinder head gasket 1 set and exhaust pipe gaskets and transmission cover gasket set 45c

OFFICIAL ADJUSTABLE FAN BELT GUIDE

4K3691 — 1 pc. steel copper plated prevents the fan from slipping off pulley. Easily applied, no need to remove radiator or any part of car. Adjustable to any position. Adds to the life of the belt belt need not be tight. 1 in box. Each 12c

AERO FAN ASSEMBLY



4K3676 — Built on the same principle and design as aeroplane fans creates twice the volume of air as a four bladed fan and draws the cool air from the floor. Has spread durable construction—black finish. 1 in pkg Ea. $1.15

FAN AND PULLEY ASSEMBLY

4K4508 Duplicate of the regular Ford equipment
Each 90c

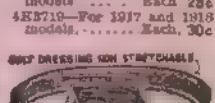
FORD NO. 3508

FAN BELTS

Patent Clamp Belt—Heavy oak tanned leather securely joined by patent clamp
4K3715—For 1916 and earlier models . . . . Each, 24c
4K3716—For 1917 and later models . . . . . Each, 27c

Quick Detachable Belt—Quick detachable type heavy oak bark tanned leather. Stands the action of mineral oil better than any other belt
4K3717—For 1916 and earlier models Each 30c
4K3718—For 1917 and later models Each 32c

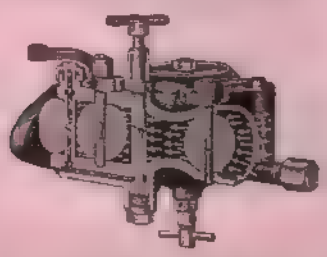
Silent Running Belt—Selected oak tanned leather oil and waterproof. Has an invisible waterproof splice
4K4680—For 1916 and earlier models . . . Each 28c
4K3719—For 1917 and 1918 models. . . . . Each, 30c



Specially Treated Fabric—Oil and waterproof reinforced switch cannot stretch guaranteed against defects.
4K3578—1916 and earlier models . . . . . Each 30c
4K3579— 1917 and later models Each 35c

Mechanical—Chain belt with leather grips, which make it impossible to stretch or slip easily installed. The most practical belt on the market especially adapted to truck use.
4K4020—For 1916 and earlier models. . . . Each. 95c
4K4021—For 1917 and later models Each, 96c

"TOQUET" CARBURETOR

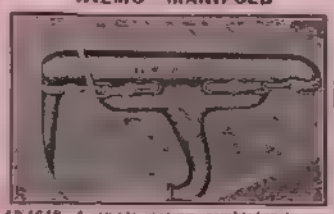


4K3749—Solid cast bronze, 1 pc. vacuum principle, atomizes perfectly, air is added to fuel at three different stages breaking it up into the smallest particles. Only 1 adjustment required same as standard Ford carburetor. Fits perfectly will not warp parts. No moving parts to get out of order easily cleaned. 1 in box Each Out

"ANCO" EVENHEAT MANIFOLD

4K9754—Fits all models of Ford cars in place of old style manifold, without cutting fitting of the new. Special gaskets. Cast in one piece, no moving parts, gives more power and mileage and insures a smooth running motor. 1 in carton Each $6.75

"WILMO" MANIFOLD



4K4648—A simple casting combining in one piece the exhaust pipe & intake manifold easy access to valve adjustments, no holes to bore and easily applied by use of a wrench. Actual tests have proven that the "Wilmo" manifold gives more miles per gallon of gasoline less carbon trouble and adds engine run smoother, extensively advertised in leading Motor Magazines. 1 in carton with complete directions for installing Each $6.67

GRAY IRON PISTONS

Accurately machined. Give increased power and speed. Wrapped in oil paper and packed in mirror fire carton.

Fine grade of soft gray iron. Light in construction, averaging 2¼ lbs. a Ford motor equipped with four pistons of the same weight and of light weight, and smooth running motor overcome many bearing troubles, give increased power and speed, complete with rings and wrist pin. Wrapped in oil paper. 1 in carton

4K4761—Standard size.
4K8262— .0025 oversize.

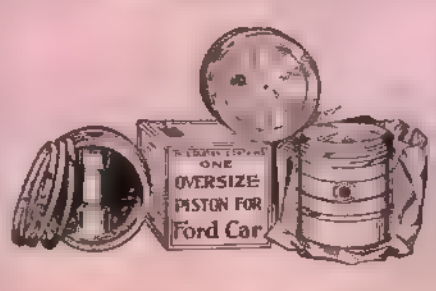
Each. $1.65
6 or more, " $1.50



COMPLETE CONNECTING ROD

You cannot duplicate this price anywhere in today's market

4K8805—Highest grade material, superior to most rods on the market and equal to any, interchangeable with regular Ford rod. Complete with babbitt bearing. 1 in box Each, $1.25
Lots of 6 or more, " $1.15

WALDEN AUTOMOBILE TOOLS

COMBINATION SOCKET WRENCH SETS

An entirely new line of sets. Sockets are steel, machine turned from the bar and broached accurately to size. Inside depth of socket ⅛-inch more than thickness of the nut. Ratchet wrench an improved design, simple, strong and reliable. All parts are machine finished to size and designed to give the user the best that can be produced in combination socket wrench sets.

Sets Nos. 8, 16 and 27 are each packed in tool boxes as illustrated. Boxes are hardwood, oil finish, made extra thick and with substantial hinges unlike the usual set box.

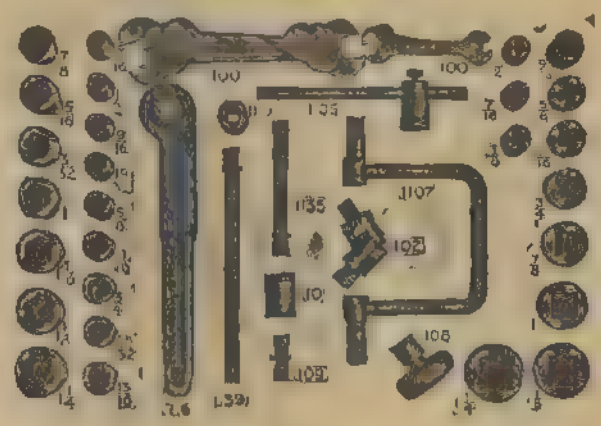
COMBINATION SET

No. 516—9-inch ratchet wrench.
No. 1139—9-inch extension bar.
No. 1102—Universal joint
7 Sockets—Hexagonal, ½, ⅝, ¾, ⅞, 1, 1⅛, 1¼-inch.
1 Socket—Square, ⅞-in.
Assortment particularly selected to fit Ford cars.
Box, 10⅜x4⅜x2⅝-inch.
Weight, 5½ lbs.
No. 8 .....Per set $9.00

COMBINATION SET

No. 516—9-inch ratchet wrench
No. 1139—9-inch extension bar.
No. 1102—Universal joint
16 Sockets—Hexagonal, ⅜, ½, ⅝, ¾, ⅞, 1, 1⅛, 1¼, 1⅜, 1½, 1⅝, 1¾, 1⅞, 2, 2⅛, 2¼-inch.
Assortment covers all the various bolt and nut standards
Box, 12x5¼x2⅝-inch.
Weight, 9½ lbs.
No. 16.....Per set $13.20

COMBINATION SET



No. 716—12-inch ratchet wrench.
No. 1139—9-inch extension bar.
No. 1104—Combination T and offset wrench.
No. 1102—Universal joint.
No. 1178—Brace socket wrench.
No. 1109—Plug connector.
No. 1110—Socket connector (2).
16 Hexagonal Sockets—⅜, ½, ⅝, ¾, ⅞, 1, 1⅛, 1¼, 1⅜, 1½, 1⅝, 1¾, 1⅞, 2, 2⅛, 2¼-inch.
11 Square Sockets—⅝, ¾, ½, ⅝, ¾, ⅞, 1, 1⅛, 1¼-inch.

No. 100 set—5 open end wrenches. Box, 16x10x2⅞-inch. Weight, 22 lbs.

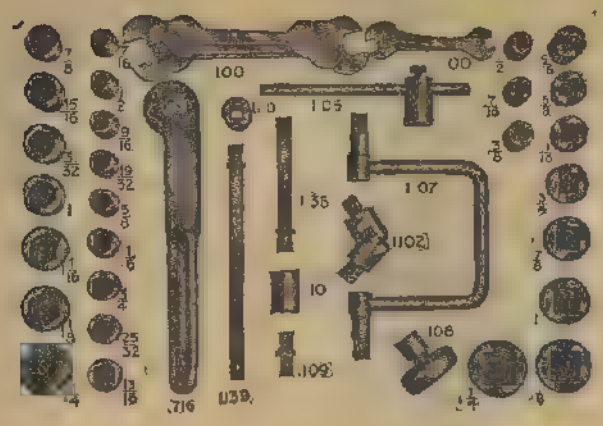
No. 27 .....Per set $24.20

OPEN END WRENCH SET

Thin stamped wrenches are most useful in many places. Special steel used to give strength and wearing qualities. Sizes are shown on illustration. Sold in sets only.

No. 100—5 wrenches.
Per set $1.65

WALDEN AUTOMOBILE TOOLS
COMBINATION WRENCH PARTS AND SOCKETS



Universal joints are solid steel, full machined finish, used in combination with ratchet wrench extension bars and sockets working successfully at 45 degree angle.

No. 1102 ..... **Each $1.65**

Brace wrench, length over all 9¾-inch, sweep 10-inch. For use with various sockets and combination parts. Ends of brace are provided with ball friction to hold parts in engagement.

No. 1107 ..... **Each $1.10**

Brace top, a pressed steel handle, working on cone bearing and provided with socket end to fit brace wrench and various combination parts. Valuable auxiliary with extension bar ratchet wrench and socket on overhead work—millwrights particularly will appreciate this attachment and combination.

No. 1108 ..... **Each $0.55**

Brace wrench with top handle. When ordering complete tool please use this number—1178.

No. 1178 ..... **Each $1.65**

Extension bars, also shanks, for combination tee and offset handle No. 1105 bars have ball friction on either end to retain sockets and other parts in engagement.

No. 1135—5-inch ..... **Each $0.44**

No. 1139—9-inch ..... " .55

Combination tee and offset handle wrench with extension (1135). The knurled set screw allows for use of the handle in any position. The shank or extension bar (1135) is removable. The ball friction on both ends to couple combination parts or sockets.

No. 1104 ..... **Each $0 99**

Combination tee and offset handle. This number covers the handle only as illustrated. If complete tool is wanted order No. 1104.

No. 1105 ..... **Each $0.55**

Plug connector. Square bar connector, with ball friction on each end for coupling combination parts.

No. 1109 ..... **Each $0.33**

Socket connector. Round socket with ¼-inch square hole for coupling combination parts.

No. 1110 ..... **Each $0.33**

SOCKETS

Introducing an entirely new line-up on sockets. Sockets are machine made from the solid bar. Broaching depth is the thickness of the nut to be fitted, and broached ⅛-inch over the size of the nut. Sockets are counter drilled, making extreme bolt size depth of socket ⅛-inch more than the thickness of the nut. The outside diameter of the socket size and taper have been designed to insure strength and service conditions. The broached end is countersunk slightly to relieve the square edges and to allow more rapid placing of socket on bolt head.

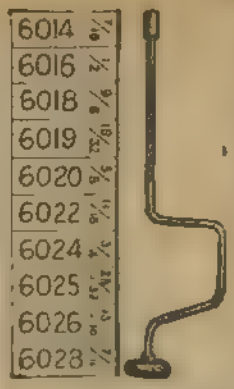
SPEED WRENCHES



Long shank brace socket wrenches are used as speed tools in assembling and dismantling cars. Are most efficient when used on a series of the same sized nuts as on cylinder heads. To gain the most time in removing nuts first release the nut with an offset socket wrench then spin nut off with brace or speed wrench. These tools are big time savers and considered indispensable in garages where they have been tried.

No. 6000 Series—All sizes....Each $0.88

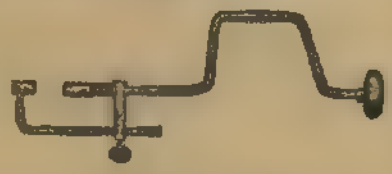
Speed Wrench Set

This set includes one each of the ten sizes above.

No. 600—Complete **$8.80**

NUT AND BOLT SPEED WRENCHES

A one man tool. The extension socket holds either the nut or bolt head while the operator spins it off. Extension arm is adjustable for different bolt lengths.



Socket sizes, ½-inch hexagon and ⅝-inch hexagon. Length over all, 20⅝-inch. Will fit the following: Rear axle housing bolt and nut.

No. 6316 .....**Each $3.00**

Socket sizes, ⅞-inch hexagon and ⅞-inch hexagon. Length over all, 20⅝-inch. Will fit the following: Ball socket, bolt and nut; crank case arm, bolt and nut (side); steering post bracket, bolt and nut; steering yoke clamp, bolt and nut; transmission cover, bolt and nut.

No. 6318 .....**Each $3.00**

DISPLAY BOARDS

This free display board is a great salesman. Sizes are plainly marked on the board and on the wrenches. Every mechanic has need for one or more of these tools and this attractive display in your store will make the sales. The face of the board is covered with sheet metal which is handsomely lithographed in black and golden rod; a fine setting for the finished wrenches. Walden-Worcester wire handle socket wrenches are recognized standards for service.

Ten Sizes—Hexagonal—Sockets

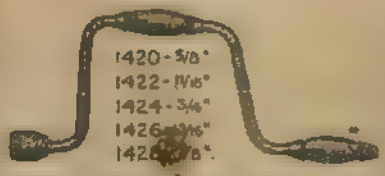
50	Offset wrenches	$0.50	$25.00
50	S. S. tee wrenches	.55	27.50
50	L. S. tee wrenches	.60	30.00
150	Wrenches	Total	$82.50

Complete With Display Board

Board and hooks (crated), lbs.	60
Wrenches boxed for shipment, lbs.	170
Wrenches net, lbs.	147
Size of board, feet	6x2

No. 180—150 wrenches with board.$82.50

BRACE RIM WRENCHES



This is the popular type of wrench for use on demountable rims. The steel sockets are machine turned and broached accurately to size and so fastened to the wire that they cannot turn (no pins to shear off). The swivel handles are pressed steel. There is only one size nut on any rim so that this solid handle tool fills all requirements (no loose socket to be misplaced). Tire changes are emergency work and dependable tools are worth all they cost.

No. 1400 Series—All sizes.....**Each $1.10**

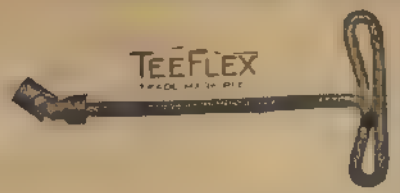
RATCHET WRENCHES

¼-inch square opening 9-inch and 12-inch lengths. The special type of pawl reduces tension in backing up wrench, also gives maximum strength and always positive smooth action. The ratchet action is reversed by turning over the wrench, eliminating complicated reversing mechanism which also would reduce strength and positive action of the tool—only three working parts which are made of high grade steel and properly tempered.

No. 516— 9-inch .....**Each $2.75**
No. 716—12-inch ..... **" 3.30**

WALDEN AUTOMOBILE TOOLS

UNIVERSAL JOINT TEE HANDLE WRENCHES

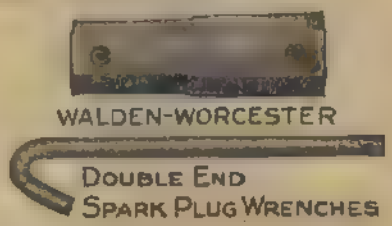


Tee Flex universal joints and sockets have been used in combination with wrenches, and are now complete in one solid tool. Will reach nuts otherwise inaccessible.

No. 1016	⅛-inch
No. 1018	7/32-inch
No. 1020	5/16-inch
No. 1022	11/32-inch
No. 1024	¾-inch

No. 1000 Series—All sizes ..... Each $2 50

DOUBLE END SPARK PLUG WRENCHES



Pressed steel. Case hardened two sizes in one. ⅛-inch over size of spark plug, which prevents stretching, and gives better outside clearance where plugs set in port plugs or deep in block.

No. 2933	57/64-inch—1-1/64-inch
No. 2937	57/64-inch—1-9/64-inch
No. 3137	61/64-inch—1-9/64-inch

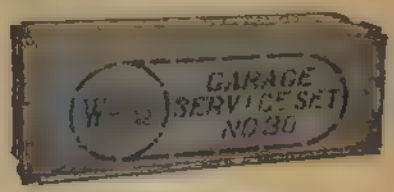
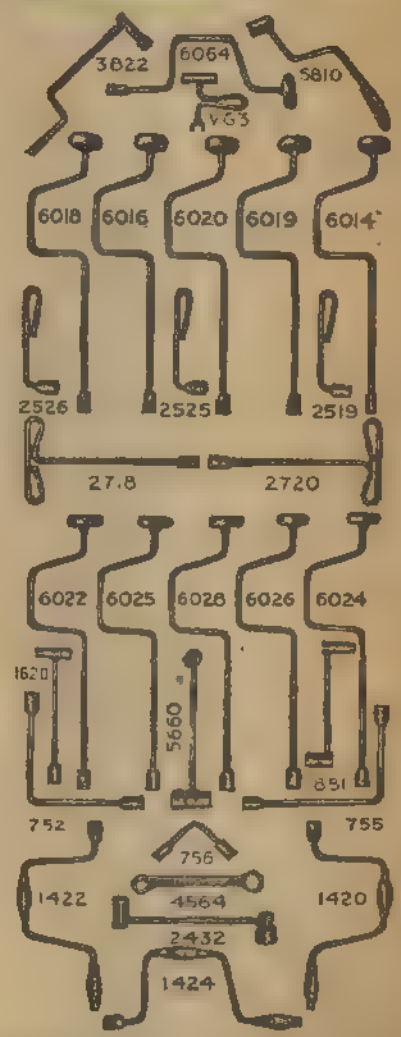
GARAGE SERVICE SET





A wrench assortment perfectly adapted for work on any motor car, with which time and labor cost to the customer may be economized, and the productiveness of the shop and its facilities largely increased.

These are special tools, designed after careful study of garage service, each serving a specific purpose and having qualities necessary for thoroughly good work.

These 30 wrenches, some with two sockets, are equivalent to 39 different sizes and types, as follows:

Offset wrenches	13
Speed wrenches	10
L-wrenches	6
Special wrenches	6
Demountable rim wrenches	3
Tee-handle wrenches	2
Total	39

In wooden tool box. Weight, 41 lbs.

No. 30 ..... $24.00

WALDEN AUTOMOBILE TOOLS

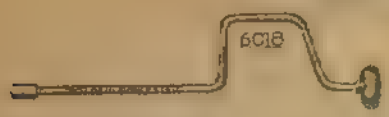
INDIVIDUAL WRENCHES FOR FORD CARS

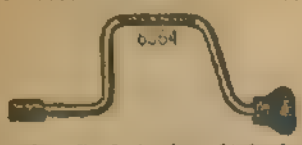


Long shank, 11-inch, brace speed tool. Overall length 19¼-inch Socket size ⅞-inch. Used on:
Commutator case support bolt.
Crank case and cylinder cover cap screw.
Cylinder cover cap screw.
Fan adjusting screw and nut.
Magnet bolts.
Transmission cover bolt and nut.

No. 6018 ..... **Each $0.88**

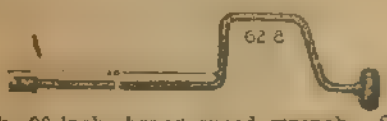
Long shank, 11-inch, brace speed tool. Over all length, 19¼-inch Socket size, ⅝-inch. Used on:
Commutator case support bolt. On cars with self starters.
Cylinder cover cap screw. On cars with self starter
Cylinder head cap screws.

No. 6020 ..... **Each $0.88**



Short speed wrench. Socket size, ½-inch hexagon. Length over all, 12⅜-inch. Will fit the following:
Crank case, lower cover screw.
Differential drive gear case.
Muffler rod nut.
Rear axle housing, bolt and nut.
Steering tube flange, bolt and nut.

No. 6064 ..... **Each $0.77**



Long shank, 20-inch, brace speed wrench. Socket size, ⅞-inch. Over all length 28 inch. Used on
Front fender iron bolt nut, side.
Radiator stud nut.

No. 6218 ..... **Each $1.10**

NUT AND BOLT SPEED

A one-man tool. The extension socket holds either the nut or bolt head while the operator spins it off. Extension arm is adjustable for different bolt lengths.
Socket sizes, ½-inch hexagon and ½-inch hexagon. Length over all, 20⅜-inch. Will fit the following:
Rear axle housing bolt and nut.

No. 6316 ..... **Each $3.00**

Socket sizes, ⅞-inch hexagon and ⅞-inch hexagon. Length over all, 20⅜-inch. Will fit the following:
Ball socket, bolt and nut.
Crank case arm, bolt and nut, side.
Steering post bracket, bolt and nut.
Steering yoke clamp, bolt and nut.
Transmission cover, bolt and nut.

No. 6318 ..... **Each $3.00**

TEE FLEX

Universal joints and sockets have been used in combination with wrenches and are now complete in one solid tool. Will reach nuts otherwise inaccessible.

Socket size, ½-inch hexagon. Length over all, 13¼-inch. Will fit the following:
Crank case, lower cover screw.
Dash bracket to dash, bolt nut.
Muffler rod nut.
Steering tube flange, bolt nut.

No. 1016 ..... **Each $2.50**

Socket size, ⅞-inch hexagon. Length over all, 13¼-inch. Will fit the following:
Carburetor flange, bolt and nut.
Commutator case support bolt.
Cylinder valve cover stud nut.
Inlet and exhaust clamp, stud nut.
Universal ball cap, bolt and nut.
Universal ball cap, cap screw.

No. 1018 ..... **Each $2.50**

Socket size, ⅝-inch hexagon. Length over all, 13¼-inch. Will fit the following:
Connecting rod cap nut.
Cylinder head cap screw.
Water cylinder inlet connections, cap screw.

No. 1020 ..... **Each $2.50**

VALVE GRINDERS

Short valve grinder wrench—all steel. The original wire handle valve grinder re-designed with ⅝-inch bar handle, which swivels on cone bearing. The fork end fits the head perfectly.

No. VG3 ..... **Each $0.55**

Long shank brace grinder wrench. Some garage men prefer the brace grinder in place of short grinder VG3. Fork end flexible and will reach all valves, including one under the dashboard.

No. VG2 ..... **Each $0.85**

WALDEN AUTOMOBILE TOOLS

COMBINATION SOCKET WRENCH SETS

An entirely new line of sets Sockets are steel, machine turned from the bar and broached accurately to size. Inside depth of socket ½-inch more than thickness of the nut. Ratchet wrench an improved design, simple, strong and reliable. All parts are machine finished to size and designed to give the user the best that can be produced in combination socket wrench sets.

Sets Nos. 8, 16 and 27 are each packed in tool boxes as illustrated. Boxes are hardwood, oil finish, made extra thick and with substantial lunges unlike the usual set box.

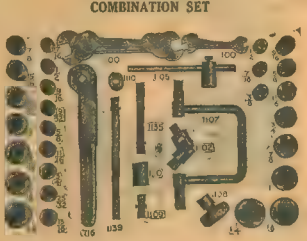
COMBINATION SET

No. 516—9-inch ratchet wrench.
No. 1139—9-inch extension bar.
No. 1102—Universal joint
7 Sockets — Hexagonal, ½, ⅝, ¾, ⅞, 1-inch.
1 Socket—Square, ½-in.
Assortment particularly selected to fit Ford cars.
Box, 10⅝x4⅜x2⅝-inch.
Weight, 5½ lbs.
No. 8 .....Per set $9.90

COMBINATION SET

No. 516—9-inch ratchet wrench
No. 1139—9-inch extension bar.
No. 1102—Universal joint
16 Sockets Hexagonal, ⅜, ½, ⅝, ¾, ⅞, 1, 1⅛, 1¼, 1⅜, 1½, 1⅝, 1¾, 1⅞, 2-inch.
Assortment covers all the various bolt and nut standards
Box 12x5¼x2⅝-inch.
Weight, 9½ lbs
No. 16.....Per set $13.20

COMBINATION SET



No. 716—12-inch ratchet wrench.
No. 1139—9-inch extension bar.
No. 1104—Combination T and offset wrench.
No. 1102—Universal joint.
No. 1178—Brace socket wrench.
No. 1109—Plug connector.
No. 1110—Socket connector (2).
16 Hexagonal Sockets—⅜, ½, ⅝, ¾, ⅞, 1, 1⅛, 1¼, 1⅜, 1½, 1⅝, 1¾, 1⅞, 2-inch.
11 Square Sockets—⅜, ½, ⅝, ¾, ⅞, 1, 1⅛, 1¼, 1⅜, 1½, 1¾-inch.

No. 100 set—5 open end wrenches. Box, 16x10x2⅞-inch. Weight, 22 lbs.

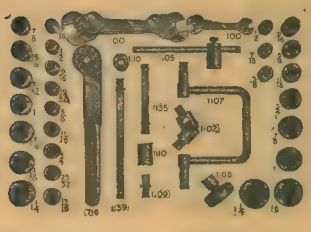
No. 27 .....Per set $24.20

OPEN END WRENCH SET

Thin stamped wrenches are most useful in many places. Special steel used to give strength and wearing qualities. Sizes are shown on illustration. Sold in sets only.

No. 100—5 wrenches.
Per set $1.65

WALDEN AUTOMOBILE TOOLS
COMBINATION WRENCH PARTS AND SOCKETS



Universal joints are solid steel, full machined finish, used in combination with ratchet wrench extension bars and sockets working successfully at 45 degree angle.

No. 1102 ..... Each $1.65

Brace wrench, length over all 9¾-inch, sweep 10-inch. For use with various sockets and combination parts. Ends of brace are provided with ball friction to hold parts in engagement.

No. 1107 ..... Each $1.10

Brace top, a pressed steel handle, working on cone bearing and provided with socket end to fit brace wrench and various combination parts. Valuable auxiliary with extension bar ratchet wrench and socket on overhead work—millwrights particularly will appreciate this attachment and combination.

No. 1108 ..... Each $0.55

Brace wrench with top handle. When ordering complete tool please use this number—1178.

No. 1178 ..... Each $1.65

Extension bars, also shanks, for combination tee and offset handle No. 1105 bars have ball friction on either end to retain sockets and other parts in engagement.

No. 1135—5-inch ..... Each $0.44

No. 1139—9-inch ..... " .55

Combination tee and offset handle wrench with extension (1135). The knurled set screw allows for use of the handle in any position. The shank or extension bar (1135) is removable. The ball friction on both ends to couple combination parts or sockets.

No. 1104 ..... Each $0.99

Combination tee and offset handle. This number covers the handle only as illustrated. If complete tool is wanted order No. 1104.

No. 1105 ..... Each $0.55

Plug connector. Square bar connector, with ball friction on each end for coupling combination parts.

No. 1109 ..... Each $0.33

Socket connector. Round socket with ⅛-inch square hole for coupling combination parts.

No. 1110 ..... Each $0.33

SOCKETS

Introducing an entirely new line-up on sockets. Sockets are machine made from the solid bar. Broaching depth is the thickness of the nut to be fitted, and broached ¼-inch over the size of the nut. Sockets are counter drilled, making extreme bolt size depth of socket ⅛-inch more than the thickness of the nut. The outside diameter of the socket size and taper have been designed to insure strength and service conditions. The broached end is countersunk slightly to relieve the square edges and to allow more rapid placing of socket on bolt head.

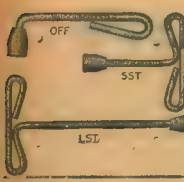
WALDEN AUTOMOBILE TOOLS

TEE AND OFFSET HANDLE SOCKET WRENCHES



Wire handle construction and machine turned sockets make it possible to produce an equally well made and servicable tool at much less cost than usual drop forged wrenches. Sockets are steel, machine turned from solid bar and broached accurately to size. Wire handles are proper size and class of material to guarantee service. Sockets are so fastened to the wire they will not turn or loosen.

Offset socket wrenches. Handles 7 inches. 10 sizes as listed.

No. 2500 Series—All sizes. Each $0.50

Short shank tee handle wrenches. Handle 6 inches. Shank 6 inches. 10 sizes as listed.

No. 2600 Series—All sizes. Each $0.55

Long shank tee handle wrenches. Handle 6 inches. Shank 12 inches, 10 sizes as listed.

No. 2700 Series—All sizes. Each $0.60

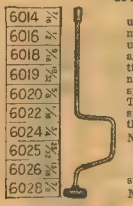
SPEED WRENCHES



Long shank brace socket wrenches are used as speed tools in assembling and dismantling cars. Are most efficient when used on a series of the same sized nuts as on cylinder heads. To gain the most time in removing nuts first release the nut with an offset socket wrench then spin nut off with brace or speed wrench. These tools are big time savers and considered indispensable in garages where they have been tried.

No. 6000 Series—All sizes....Each $0.88

Speed Wrench Set

This set includes one each of the ten sizes above.

No. 600—Complete $8.80

NUT AND BOLT SPEED WRENCHES

A one man tool. The extension socket holds either the nut or bolt head while the operator spins it off. Extension arm is adjustable for different bolt lengths.

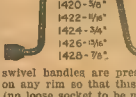
Socket sizes, ½-inch hexagon and ¼-inch hexagon. Length over all, 20⅝-inch. Will fit the following: Rear axle housing bolt and nut.

No. 6316 ..... Each $3.00

Socket sizes, 7/16-inch hexagon and 7/16-inch hexagon. Length over all, 20⅝-inch. Will fit the following: Ball socket, bolt and nut; crank case arm, bolt and nut (side); steering post bracket, bolt and nut; steering yoke clamp, bolt and nut; transmission cover, bolt and nut.

No. 6318 ..... Each $3.00

BRACE RIM WRENCHES



This is the popular type of wrench for use on demountable rims. The steel sockets are machine turned and broached accurately to size and so fastened to the wire that they cannot turn (no pins to shear off). The swivel handles are pressed steel. There is only one size nut on any rim so that this solid handle tool fills all requirements (no loose socket to be misplaced). Tire changes are emergency work and dependable tools are worth all they cost.

No. 1400 Series—All sizes..... Each $1.10

RATCHET WRENCHES

¼-inch square opening 9-inch and 12-inch lengths. The special type of pawl reduces tension in backing up wrench, also gives maximum strength and always positive smooth action. The ratchet action is reversed by turning over the wrench, eliminating complicated reversing mechanism which also would reduce strength and positive action of the tool—only three working parts which are made of high grade steel and properly tempered.

No. 516—9-inch ..... Each $2.75
No. 716—12-inch ..... " 3.30

WALDEN AUTOMOBILE TOOLS

UNIVERSAL JOINT TEE HANDLE WRENCHES

Tee Flex universal joints and sockets have been used in combination with wrenches, and are now complete in one solid tool. Will reach nuts otherwise inaccessible.

No. 1016	⅜-inch

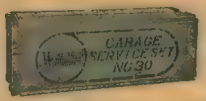
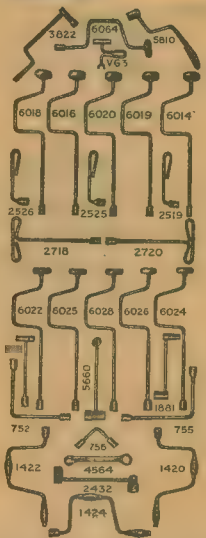
GARAGE SERVICE SET





A wrench assortment perfectly adapted for work on any motor car, with which time and labor cost to the customer may be economized, and the productiveness of the shop and its facilities largely increased.

These are special tools, designed after careful study of garage service, each serving a specific purpose and having qualities necessary for thoroughly good work.

These 30 wrenches, some with two sockets, are equivalent to 39 different sizes and types, as follows:

Offset wrenches	13
Speed wrenches	10
L-wrenches	6
Special wrenches	5
Demountable rim wrenches	3
Tee-handle wrenches	2
Total	39

In wooden tool box. Weight, 41 lbs.

No. 30 ..... $24.00

WALDEN AUTOMOBILE TOOLS

INDIVIDUAL WRENCHES FOR FORD CARS

Long shank, 11-inch, brace speed tool. Overall length 19¼-inch Socket size ⅞-inch. Used on:
Commutator case support bolt.
Crank case and cylinder cover cap screw.
Cylinder cover cap screw.
Fan adjusting screw and nut.
Magnet bolts.
Transmission cover bolt and nut.

No. 6018 ..... Each $0.88

Long shank, 11-inch, brace speed tool. Over all length, 19¼-inch. Socket size, ⅝-inch. Used on:
Commutator case support bolt. On cars with self-starters.
Cylinder cover cap screw. On cars with self-starter.
Cylinder head cap screws.

No. 6020 ..... Each $0.88

Short speed wrench. Socket size, ½-inch hexagon. Length over all, 12⅜-inch. Will fit the following:
Crank case, lower cover screw.
Differential drive gear case.
Muffler rod nut.
Rear axle housing, bolt and nut
Steering tube flange, bolt and nut.

No. 6064 ..... Each $0.77

Long shank, 20-inch, brace speed wrench. Socket size, ⅞-inch. Over all length, 23-inch. Used on:
Front fender iron bolt nut, side.
Radiator stud nut.

No. 6218 ..... Each $1.10

NUT AND BOLT SPEED

A one-man tool. The extension socket holds either the nut or bolt head while the operator spins it off. Extension arm is adjustable for different bolt lengths.

Socket sizes, ½-inch hexagon and ⅝-inch hexagon. Length over all, 20⅜-inch. Will fit the following:
Rear axle housing bolt and nut.

No. 6316 ..... Each $3.00

Socket sizes, ⅞-inch hexagon and ⅞-inch hexagon. Length over all, 20⅜-inch. Will fit the following:
Ball socket, bolt and nut.
Crank case arm, bolt and nut, side.
Steering post bracket bolt and nut.
Steering yoke clamp, bolt and nut.
Transmission cover, bolt and nut.

No. 6318 ..... Each $3.00

TEE FLEX

Universal joints and sockets have been used in combination with wrenches and are now complete in one solid tool. Will reach nuts otherwise inaccessible.

Socket size, ½-inch hexagon. Length over all, 13¾-inch. Will fit the following:
Crank case, lower cover screw.
Dash bracket to dash, bolt nut.
Muffler rod nut.
Steering tube flange, bolt nut.

No. 1016 ..... Each $2.50

Socket size, ⅞-inch hexagon. Length over all, 13¾-inch. Will fit the following:
Carburetor flange, bolt and nut.
Commutator case support bolt.
Cylinder valve cover stud nut.
Inlet and exhaust clamp, stud nut.
Universal ball cap, bolt and nut.
Universal ball cap, cap screw.

No. 1018 ..... Each $2.50

Socket size, ¾-inch hexagon. Length over all, 13¼-inch. Will fit the following:
Connecting rod cap nut.
Cylinder head cap screw.
Water cylinder inlet connections, cap screw.

No. 1020 ..... Each $2.50

VALVE GRINDERS

Short valve grinder wrench—all steel. The original wire handle valve grinder re designed with ⅝-inch bar handle, which swivels on cone bearing. The fork end fits the head perfectly.

No. VG8 ..... Each $0.55

Long shank brace grinder wrench. Some garage men prefer the brace grinder in place of short grinder VG2. Fork end flexible and will reach all valves, including one under the dashboard.

No. VG2 ..... Each $0.85

HAY TOOLS

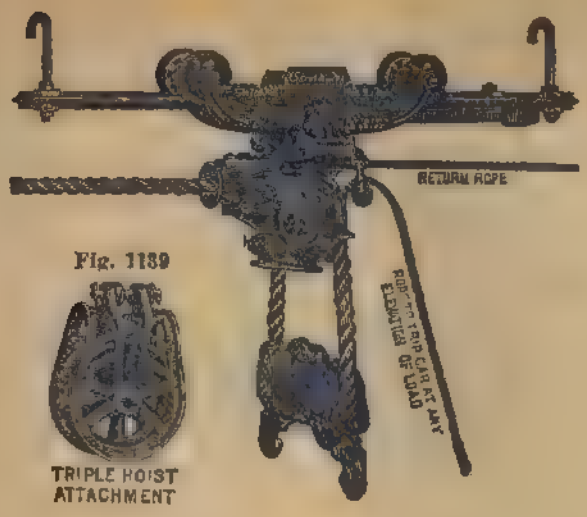

Fig. 1139

TRIPLE HOIST ATTACHMENT

CLOVER LEAF RIGHT ANGLE SLING ELEVATOR
FOR DOUBLE STEEL TRACK

This elevator is made entirely of malleable iron, with a truck operating on an 18-inch wheel base, is very heavy and of sufficient strength to withstand the ordinary usage to which such machines are subjected. The machine is so arranged that it elevates the load at right angles with the track, with the result that when the load is discharged in the mow, it lays parallel with the load on the wagon.

The lock on this elevator is so arranged that the resistance is actuated by the weight of the load, making it impossible for the rope to slip. The lock adjusts itself to any size rope from ¾ to 1 inch.

The right angle fork and sling elevator operates automatically and is tripped by the sling pulley striking a plate immediately unde rthe carrier. It is arranged with a separate trip rope, by use of which the load may be carried into the mow at any elevation desired without drawing entirely to top of barn.

Adapted to be used in connection with slings or with one or two ordinary hay forks, as desired.

No. 70—Clover Leaf Right Angle Sling Elevator; weight, 52 lbs .....Each .....
Fig. 1139—Triple Hoist Attacchment; weight, 3 lbs.. " .....

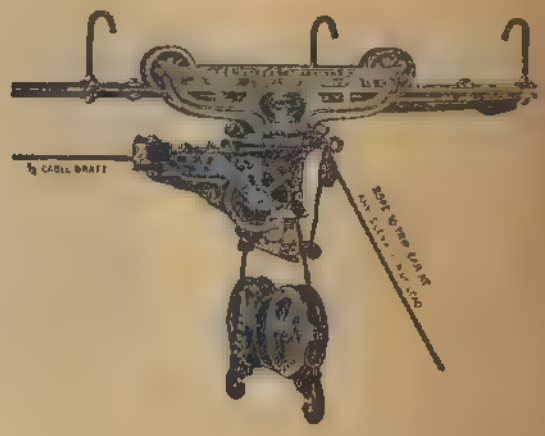
MYERS SURE GRIP SLING UNLOADER
FOR DOUBLE STEEL TRACK

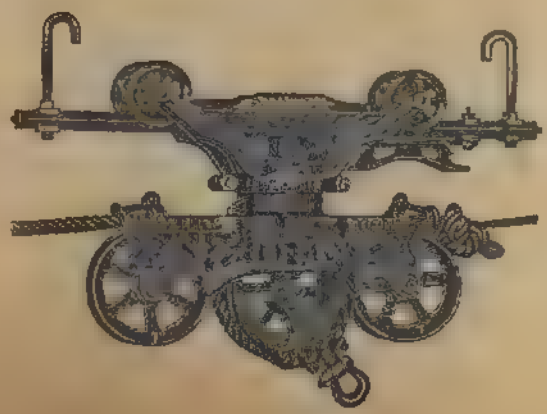
This Sure Grip Sling Unloader is fitted for cable draft instead of rope draft. It is arranged to raise the load at right angles with the track, with the result that when the load is discharged in the mow, it lays parallel with the load on the wagon, doing away entirely with the quarter turn of the load, which has always been a serious objection on sling carriers unless they use a separate attachment.

The tension of the lock is regulated entirely by the weight of the load. The heavier the load the tighter the lock. It is practically impossible for the cable to slip.

The Sure Grip Unloader operates automatically and is tripped by the sling pulleys striking a plate immediately under the machine. Equipped with an extra trip rope, by the use of which it is not necessary to raise the load to the top of the barn.

No. 60—Sure Grip Sling Unloader, for D. S. track, cable draft; weight, 65 lbs.....Each $17.85





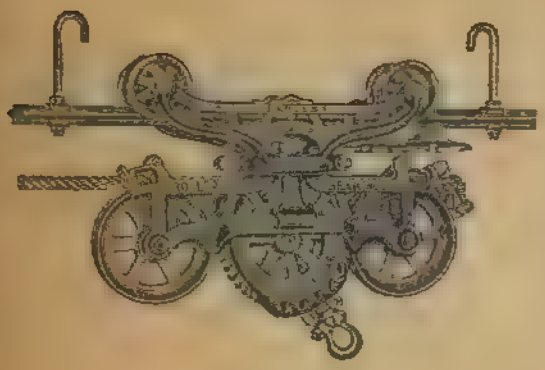
FEARLESS HAY UNLOADER
FOR DOUBLE STEEL TRACK

This Fearless Unloader is built for rope or wire cable for draft rope. The special advantage of wire rope is that it is much easier to handle than a large rope. It also gives practically three times the amount of wear, while the original expense of the wire rope over the manila is but slight, the unloader being adapted to either the rope or cable.

The sheaves are 7 inches in diameter, with a groove suitable for carrying ⅜ or ½-inch wire rope. The bearings on all rope sheaves are 1⅛-inch in diameter, hard turned steel. The machine is especially designed for heavy work. The long truck distributes the load on the track and adapts the car for using two forks or slings.

No. 309—Fearless Unloader; weight, 36 lbs.... .....Each

HAY TOOLS



FOR DOUBLE STEEL TRACK

Fearless Unloader, combination, reversible as made to be used with double angle steel track. Embodies all the features of the straight reversible and swivel reversible carrier and has many advantages over other unloaders on the market. It is fitted with a reliable double lock, which engages the fork pulley on each side, thus insuring a perfect locking device. One of the important features is the wide open mouth, which permits the fork pulley to enter when swinging at any angle.

The rope sheaves are 7 inches in diameter, fitted with wide hub, and have large steel roller bearings revolving on steel axles, assuring long life and easy draft. They carry a special shaped groove fitted for either rope or cable.

No. 315—Fearless Unloader; weight 38 lbs.....Each .....

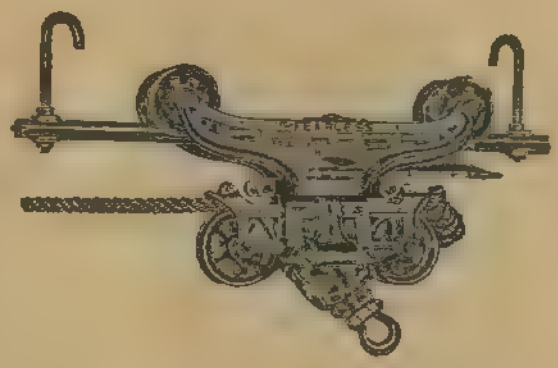
FEARLESS UNLOADER

FOR DOUBLE STEEL TRACK

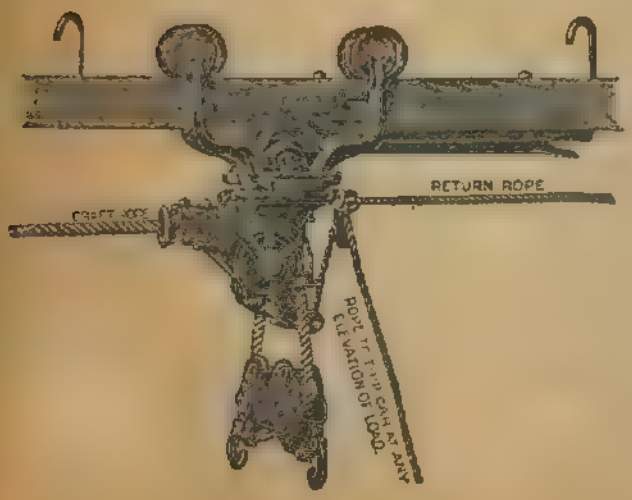
This Fearless Hay Unloader embodies all the features of the straight reversible and swivel reversible carrier, and has many advantages over any other machine on the market. Fitted with a double lock, which engages the fork pulley on each side, thus insuring a perfect locking device. One of the important features of this machine is the wide open mouth, which permits the fork pulley to enter when swinging at any angle, thus insuring a satisfactory working carrier under any and all working conditions. The rope sheaves are fitted with wide hub and have longer bearings on the axle than any other make of carrier. Weight, complete, 27 lbs.

No. 300—Fearless Unloader for D. S. track, rope draft

Each ....



RIGHT ANGLE SLING ELEVATOR



FOR WOOD TRACK

Made entirely of malleable iron, with a truck operating on an 18-inch wheel base, is very heavy and of sufficient strength to withstand the ordinary usage to which such machines are subjected. Elevates the load at right angles with the track.

The ordinary sling carrier is constructed to hold a certain weight of load. If by chance the operator overloads the carrier, the result is that the rope slips through the lock, causing it to wear. On this tool it is so arranged that the tension of the rope lock is regulated by the weight of the load. The heavier the load the greater the resistance. Lock adjusts itself to any rope from ⅝ to 1-inch.

By the use of a separate trip rope the load may be carried into the mow at any elevation desired without drawing entirely to the top of the barn.

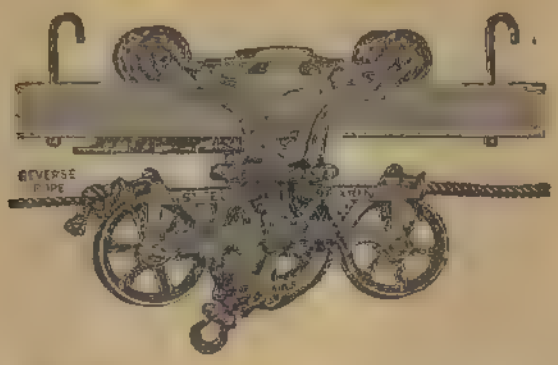
No. 75—Rope draft; weight, 60 lbs.....Each .....
No. 76—Rope draft, triple hoist; weight 63 lbs.....Each .....

Triple hoist attachment only..... .....

HAY TOOLS

FEARLESS UNLOADER

FOR WOOD TRACK



Fearless Hay Unloader, combination, reversible, as made to be used in connection with wood track. It embodies all the features of the straight reversible and swivel reversible carrier. It is fitted with a double lock which engages the fork pulley on each side, thus insuring a perfect locking device.

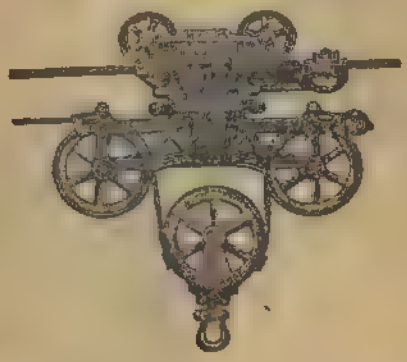
One of the important features of this machine, is the wide, open mouth, which permits the fork pulley to enter when swinging at any angle, thus insuring a satisfactory working carrier under all conditions. The rope sheaves are seven inches in diameter for use with either rope or cable, fitted with wide hub, and have large steel bearings, insuring long life and easy draft.

No. 312—Fearless Hay Unloader for wood track. Weight, 38 lbs.

Each .....

MYERS UNLOADER

FOR CABLE OR ROD TRACK



This unloader is suitable for cable or rod track. Built with 7-inch rope sheaves for use with ⅜ inch wire rope or a ¾-inch or ⅞ inch manila rope. It has been found by actual practice that a ⅜-inch wire rope has many advantages over the ordinary manila rope, the wire rope being much lighter and stronger, more easily handled, and will wear three times as long.

Has a large open mouth, swing fork pulley and 1⅞-inch plain steel bearings.

Fitted with special pulleys, suited for using either manila rope or wire cable.

No. 171—Myers Unloader for Cable or Rod Track. Weight, 39 lbs ..... Each ....

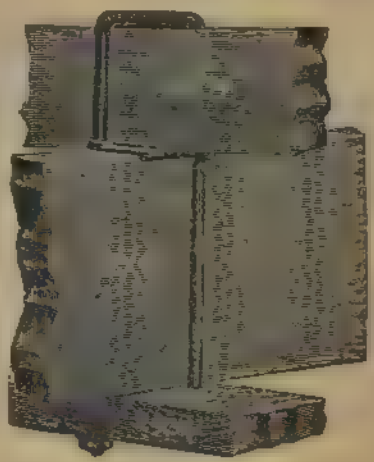
HAY RACK CLAMPS



NEW STAR

The boring of holes in constructing hay racks is not necessary when this clamp is used. Wrench and saw are the only tools required. When clamps are tightened rack is rigid. Intermediate bracket is studded and flanged, preventing twisting or slipping of timbers at the joints.

Clamps placed astride of the timbers are stronger than bolts, grooved steel washers makes it impossible for the clamp to cut into the crosspiece, and steel clips keep the bottom crosspieces from splitting.

JACKSON PATTERN

Equipped with patent hardwood bearing boxes which, if kept properly oiled, will last indefinitely. The frame is constructed of two pieces which can be readily and cheaply replaced. Sheaves can be furnished to take either manila rope or steel wire cable. Specify which is to be used when ordering. The blocks are easy running and of such a pattern that the cable cannot slip between the sheave and frame.

Nos. 5 and 6 have hook to hang up, and Nos. 50 and 60 have bolt for fastening to the floor.

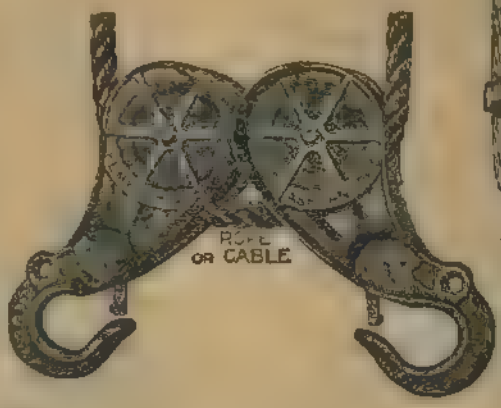
HAY SLING PULLEYS

Sling pulley with hard maple frame and sheave, heavy steel yoke and hook, 5-inch sheave.

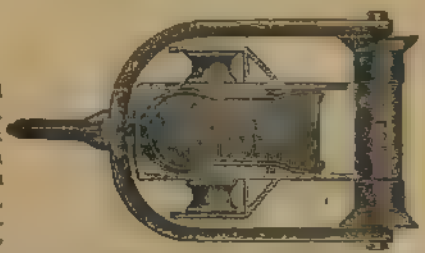
No.	981
Weight, lbs	10
Each	



Malleable frame, parallel sling pulleys, with iron sheaves, fitted for using ⅜-inch or ½-inch cable or ⅞-inch manila hoisting rope, in handling slings for stacking purposes.

No.	1709
Weight, lbs	16
Each	

SELF-LOCKING
BOTTOM VIEW



This pulley can be used with any hay carrier. It cannot be misplaced on the load, can be used with either side up, and with any style of fork pulley. When the bundle is compressed, the fork pulley passes up against the sling pulley, trips it and dislodges the center section of the pulley and allows the fork pulley to pass through the bundle being tightly compressed.

With this sling attachment the hay is deposited in the mow in the same relative position as on the wagon and not crosswise, as on many other sling carriers.

No.	1052
Weight, lbs	17
Each	

SELF-LOCKING

These self-locking sling pulleys can be used with any style wood or steel track carriers. When ordering registering heads for those pulleys give number and state name of carrier on which they are to be used.

MYERS DOUBLE LOCK

Malleable iron. Suitable for large slings of style No. 1309.

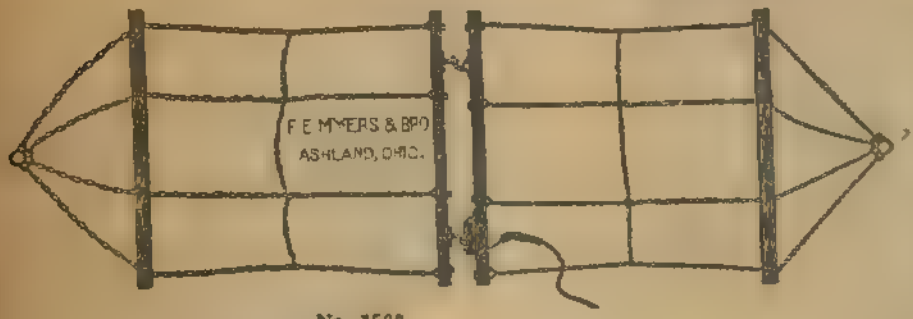
No.	1311
Weight, lbs	5
Each	

PEORIA SINGLE LOCK

A new lock, extra heavy, malleable construction. It may be attached without cutting or knotting rope, which makes it preferable to other styles. Has three eyes, making it possible to extend a third rope to trip, taking the strain off center bar.

No.	78
Weight, lbs	2
Each	

HAY SLINGS



No. 1590

DOUBLE LOCK ROPE

Has two connections between the two halves of the sling, instead of the one center lock as generally used. Double lock device has a hook and eye at one end of the sling stick, and a lock at the other end. This does away with the load drooping on each side. It is connected and locked with one motion.

No.	1508
Length of rope sling, feet	6
Weight, lbs.	37

No. 621

DOUBLE LOCK WIRE CABLE

This sling is constructed of flexible wire cable or rope. The cables are light and very flexible. Fitted with a double lock device. They are easily tripped and do not tangle.

Nos.	1309	1309
Length of cable sling, feet	5	10
Weight, lbs.	42	74

DOUBLE LOCK CHAIN

This sling is a new design made of No. 00 brown chain galvanized, having two connections between the two halves of the sling, instead of the one center lock, as generally used. The construction of this double lock device is such that we use a hook and eye at the one end of the sling stick, and a lock at the other end, thus making two separate connections, adding great strength, and causing the load to be carried without drooping at each side. The sling is connected and locks with one motion.

No.	1590
Length of chain sling, feet	6
Weight, lbs	42

No. 1308

CALIFORNIA SINGLE LOCK ROPE

Extra strong, for heavy work. Specially roped for carrying fine hay or grain, leaving no litter. Adjustable from 16 to 21 feet. Hardwood spreaders. ½-inch loose twist ropes with adjustable take-ups at each end, to meet requirements of the hay rack. Positive lock center trip.

No.	621

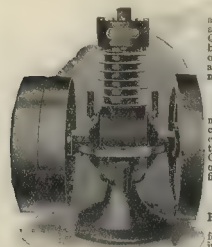
Kelley-How-Thomson Co. of Duluth
AIR COMPRESSORS

Designed Especially for Automobile Garages, Electric Motor Cleaning, Water Systems, Machine Shops, Foundries and All Other Purposes Requiring not over 6½ or 13 cu. ft. of Free Air per Minute at not exceeding 300 lbs. Pressure.



The No. 0 Compressor is a small compressor built to furnish air at high pressure. All Bushings and Bearings are of Bronze; and both Crankshaft and Connecting Rod are of the Best Quality Forged Steel. There is a perfect balance maintained between the tight and loose pulley on one side and the Fly-wheel on the other. These three features alone—to be found in few, if any, other small compressors—indicate the care which is taken to make the Air Compressor give long and perfect service.

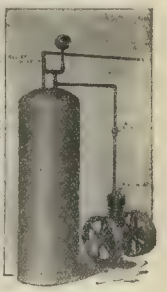
Its Efficiency

The Air Compressor is built to take care of itself. It is all metal—no leather packing or washers to wear out. It is air-cooled—no freezing, no troublesome tanks, water jackets, or pipe connections. The location of the pipes in the crank case, permitting the fanning process both inside and out, enables the Air Compressor to develop its remarkable speed and pressure without overheating. Its valves are easily removable by taking out only five bolts and without breaking pipe connections.

Its Reliability

The Air Compressor is thoroughly tested under 300 Lbs. Pressure before it is pronounced ready for shipment.

The Air Compressor is built of the best materials obtainable for the purpose, under the hands of expert machinists. All moving parts are given an ample margin of mass and strength to withstand exceptional strain. Cylinders are made of a special carbon cast iron.



Power Required—1½ H. P.
Pressure—Constant Pressure at over 200 Lbs. Without Overheating.
Capacity—6½ cubic feet of Free Air per Minute at 400 Revolutions.
Crank Shaft—Forged High Carbon Steel.
Connecting Rod—Forged High Carbon Steel.
Cap—Forged High Carbon Steel.
Bearings—Bronze (Very Best Grade).
Bushings—Bronze (Very Best Grade).
Cylinder—3 inch Bore.
Piston—4 in. Stroke—Three Eccentric Rings, Two at One End, One at the Other End.
Valve—New Type—Accessible by Removal of but Five Bolts, with No Breaking of Pipe Connections.
Gaskets—Best Quality Asbestos.
Pulleys—Tight and Loose—13 in. Diameter—2 in. Crown Face; Weight about 20 Lbs. Each.
Fly-Wheel—14 in. Diameter—Weight about 40 Lbs.—to Balance Perfectly and give Absolutely Even Wear on Bearings.
Lubrication—Splash.
Air Intake—Diameter ¾ in.—21 in. above the Floor (to Avoid Dust).
Air Outlet—Diameter ½ in.
Maximum Pressure Guaranteed—300 Lbs.
Hight—21 in. Overall.
Floor Space Required—14x18 in.
Weight—130 Lbs.
Speed Recommended—400 Revolutions per Minute.

COMPLETE OUTFITS

One No. 0 Air Compressor.
One 10x48 in., 41 Gal. Tank.
One Model "B" Iron Case Gauge.
One ¼ in. No. 76 Check Valve.
One ¾ in. No. 72 Safety Valve.
One ½ in. No. 86 Needle Valve.

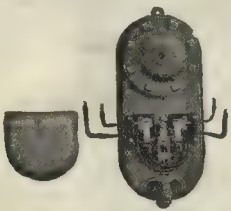
A Completely Automatic Self-Contained Unit consisting of Two Stage Compressor, with Cylinders 3x3 in. and 1½x3 in., ½ H. P. Motor of Standard Quality, Automatic Electric Controller, Automatic Air Purifier, 30 Gallon Tank, Automatic Pressure Release, Pressure Gauge, leak proof check valve, needle point valve, 25 feet Real Quality Air Hose and Automatic Air Chuck, all complete and ready to run when attached to electric current Shipping Weight, 640 Lbs. Dimensions, 48x30x40

Each

No. 4—Capacity 4 Cu. Ft. per Minute..... $343 75



U. S. AUTOMATIC ELECTRIC CONTROLLER

This is one of the simplest Controllers to install and it is absolutely dependable in operation, requiring no attention whatever. It contains no delicate mechanism to get out of order, or rubber diaphragms to deteriorate. It is constructed entirely of metal, is rigid and simple in design. It starts and stops the motor at the predetermined pressure. Can be adjusted to maintain any desired pressure within its range by tightening or loosening adjusting nut.

Although usually installed on wall back of outfit this controller can be placed in any position. For Single Phase, alternating or direct current the main line wires are connected with the tap wires, and wires run from bottom of controller down to motor. For three phase current the two tap wires are connected as above, and the third wire brought from the main line direct down to the motor. A small air line is then run from the tank or some other position on the main air line to the top of controller.

Each

Model H-2—U. S. Automatic Controller..... $31 25

AIR COMPRESSORS

"USACO" TWO STAGE AIR COMPRESSOR

With Tight and Loose Pulley for Line Shaft Drive

	Each
No. 31 —Equipment; Capacity 4 Cu. Ft. per Minute...	$ 93 75

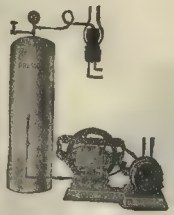
Large Single Wheel for Direct Motor Drive

	Each
No. 32 -Equipment; Capacity 4 Cu. Ft. per Minute	$ 93.75
No. 42—Equipment, Capacity 10 Cu. Ft. per Minute	143 75

Equipment 31 and 41 vary only in size and capacity. They are adapted for Line Shaft work and are stopped and started by shifting belt from one pulley to the other.

Equipment 32 and 42 have large wheel for direct motor drive, and are adapted for use with tank and automatic controller.

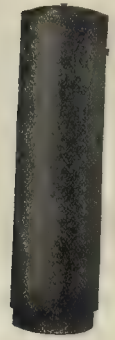


"USACO" TWO STAGE AUTOMATIC AIR UNITS

"Usaco" Two Stage Complete Air Units

	Each
No. 34—Equipment: Capacity 4 Cu. Ft. per Minute	$316 25
No. 44—Equipment; Capacity 10 Cu. Ft. per Minute	425 00

Automatically maintains air supply at the desired pressure. Suitable for Garages, Free Air Stations, or other air requirements within their capacities.



BUTLER PRESSURE TANK

Absolutely leak proof, all seams welded; Butler Pressure Tanks are all made with both ends bilged out, thus providing a strong substantial, sturdy job. Note the neat circular stand upon which the tank rests securely when installed in vertical position; Stand is securely welded to tank and is a very substantial base; Each stand is provided with four holes, one placed each quarter way round, to take care of drain pipe. No extra charge is made for stand; This tank is made of very heavy material, and the Butler system of welding makes the seam even stronger than the metal. Unless otherwise specified, tanks are furnished for vertical use; Tappings are welded and in standard tanks are as follows: One 1¼ in. pipe connection opening in center of each end and a ¾ in. pipe connection 6 inches from top in the side, all tanks painted outside with a coat of special metal paint to prevent corrosion.

AIR COMPRESSORS

BRUNNER GARAGE AIR COMPRESSORS

No. 102—TWO-CYLINDER BELT DRIVEN AIR COMPRESSOR

No. 102 Belt Driven Compressor

This is the standard Air Compressor for garage service and will deliver more air at higher pressure with less power than any other compressor of equal rating on the market.

We recommend this machine for garages housing up to 60 cars and to be used with air tanks up to 50 gal. capacity.

Requires ½ H. P. for operation, delivers 3 cu. ft. free air per minute at 400 R. P. M. and 175 lbs. pressure. Tested to 300 lbs.

Adjustable safety valve on each cylinder.

Net Weight 38 lb. Shipping Weight 46 lbs. Height 13 in. Floor Space 6½x10 in.

No. 50 Portable Electric Outfit

No. 50—PORTABLE ELECTRIC OUTFIT

This is a very high grade, practicable Portable Air Compressor Outfit, entirely complete with all fittings and accessories ready to operate upon removal from shipping crate.

It has a powerful ¼ H. P. electric motor that can be operated from any Lighting circuit and which will readily start the 1 cu. ft. compressor against a pressure of 120 lbs. and drive the pressure to 175 lbs. The tank is 12x30 in. and of seamless drawn steel construction.

This outfit when filled to 160 lbs. pressure will fully inflate two 35x4½ in. tires to 90 lbs. without recharging. It is heavily constructed to meet severe conditions.

Net Weight 230 lbs. Shipping Weight 330 lbs. Height 32 in. Floor Space 20½x36 in.

No. 50 with 32 Volt Direct Current Motor	

A. C. Motors other frequency at additional charge.

AIR COMPRESSORS

BRUNNER MOTOR DRIVEN AIR COMPRESSORS

No. 45 Motor Driven Compressor

No. 45—MOTOR DRIVEN COMPRESSOR

A machine of intermediate capacity between the No. 42 and No. 47 Brunner models, employing the new Brunner No. 105 direct geared to 1½ H. P. motor through cloth pinion and cut cast iron spur gear, with heavy iron base and proper gear guard. Capacity of 5 cu. ft. free air per minute is ample for large garages, for pneumatic truck tire service and for certain shop work.

Compressor is two-cylinder, 2½x3 in., air-cooled, of balanced load type. The motor, gears and base are similar in general to same parts of the Brunner No. 42 and this new machine will be found very efficient.

Recommended for use with storage tanks up to 100 gals. and for pressure up to 200 lbs., in connection with automatic controller.

Height 20 in. Floor Space 22x26 in. Net Weight 310 lbs. Shipping Weight 360 lbs.

	Each
With 220-440 Volt, 2 or 3 Phase, 60 Cycle A. C.	$240.00
With 220-440 Volt, 2 or 3 Phase, 25 Cycle A. C.	270.00
With 110-220 Volt, 1 Phase, 60 Cycle A. C. Motor	275.00
With 110 or 220 Volt, Direct Current	240.00
A. C. Motors of other frequency at additional charge.	

MOTOR DRIVEN GARAGE OUTFIT NO. 170

For Large Service Stations

1 No. 45 Compressor with 220-440 Volt, 2 or 3 Phase, 60 Cycle, A. C. Motor	$240.00
1 80 Gal. 18x72 in. Galvanized Air Tank for 150 lbs. Working Pressure	70.00
1 Model "B" Air Gauge	3.00

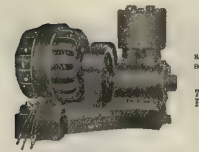
1 No. 83 ¾ in. Needle Valve	1.80
1 No. 82 ½ in. Needle Valve with Swivel Hose Connection	2.10
2 Specially Ground Brass Unions, ½ in. and ¾ in.	1.85
1 Automatic Tire Connection	1.00
1 25 ft. Drop Line ¾ in. "Resistol" Air Hose	4.50
	$336.50
1 Model "M" Controller to make outfit automatic (Optional)	32.00
	$368.50



No. 47 Motor Driven Compressor

No. 47—MOTOR DRIVEN COMPRESSOR

A heavy duty machine for large garages and especially adapted to pneumatic truck tires service. With appropriate tank and fittings the No. 47 will serve the largest garage having frequent demand for air at several outlets.

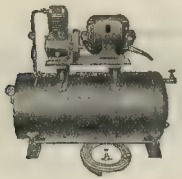
Compressor is Brunner No. 17 2 cylinder, water-cooled, balanced load type, with displacement of 7 cu. ft. free air per minute. Motor is 2 H. P. Drive is through cloth pinion and cut cast iron spur gear. Power plant is mounted on heavy iron base and carries substantial gear guard.

Height, No. 47, 22 in. Floor space 25x22 in. Weight, Net, 350 lbs. Shipping Weight 410 lbs.

	Each
With 220-440 Volt, 2 or 3 Phase, 60 Cycle A. C. Motor	$300.00
With 220-440 Volt, 25 Cycle, 2 or 3 Phase A. C. Motor	337.00
With 110 or 220 Volt, Single Phase 60 Cycle A. C. Motor	340.00
With 110 or 220 Volt Direct Current Motor	300.00
A. C. Motors of other frequency at additional charge.	
Model "M" Controller can be used with No. 47 A. C. but not with D. C.	
Model "E" Controller is specified for No. 47 D. C.	

5224 *Kelley-How-Thomson Co. of Duluth*
AIR COMPRESSORS

"BRUNNER"



No. 542—MOTOR DRIVEN OUTFIT

This Compressor Assembly needs no introduction to the garage trade, having been already installed in many service stations throughout the country by progressive concerns during the past five years. The unusual efficiency of this outfit is attributed to the correct assembly of the whole, employing standard Brunner parts.

The Compressor is the Standard No. 102 with capacity of 2¼ cu. ft. free air per minute direct geared to a ½ H. P. motor. The cloth driving pinion is employed with cut cast iron spur gear reducing the gear hum to a minimum. The power plant is mounted on a substantial iron base which surmounts a 32 gallon Brunner air tank recommended for 150 lbs. working pressure.

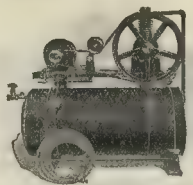
Construction is entirely of metal, there being no wooden parts which might warp or crack and throw the power plant out of alignment. Equipment as illustrated is furnished and this machine is ready for use when uncrated. Hose may be attached to fittings as shown or pipe line may be extended to any part of the building.

In connection with automatic controller, this machine is recommended for garages housing up to 50 cars.

Height 34 in. Floor space 18x36 in. Net Weight 310 lbs. Shipping Weight 385 lbs.

	Each
With 1 Phase, 60 Cycle, 110-220 Volt, A. C. Motor	$225 00
With 110-220 Volt, 25 Cycle, 1 Phase, A. C. Motor	245 00
With 110 or 220 Volt Direct Current Motor	210 00
With 32 Volt D. C. Motor	215 00

A. C. Motors of other frequency at additional charge.



No. 742—MOTOR DRIVEN OUTFIT

This Assembly was developed to meet the demand for an outfit duplicating the efficiency and economical operation of the No. 542 but employing belt drive to eliminate the gear hum of the latter type. General construction is the same as the No. 542 with appropriate changes in the design of the base to accommodate the belted construction.

The No. 102 (2¼ cu. ft. free air per minute capacity) is belted to a ½ H. P. motor with efficient belt tightener. The power plant is assembled on a heavy iron base, the whole being mounted on a 32 gallon Brunner tank tested to 300 lbs. and suited for 150 lbs. working pressure.

Metal construction is used throughout. The excellent assembly achieved by experienced mechanics at the factory is therefore rigidly maintained and the alignment of the power plant is permanent.

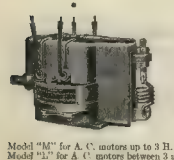
This model is particularly suited to filling stations for sales rooms where noise of gear drive would be objectionable. Garages housing not more than 50 cars will find this machine ample if controlled with Brunner automatic controller.

Height 34 in. Floor Space 18x36 in. Net Weight 325 lbs. Crated. 4[illegible] lbs.

	Each
With 1 Phase, 60 Cycle, 110-220 Volt A. C. Motor	$235 00
With 110-220 Volt, 25 Cycle, 1 Phase A. C. Motor	235 00
With 110 or 220 Volt Direct Current Motor	220 00
With 32 Volt D. C. Motor	225 00

A. C. Motors of other frequency at additional charge.

BRUNNER AUTOMATIC PRESSURE CONTROLLERS



In connection with any motor driven compressor outfit up to 5 H. P. a Brunner Controller will automatically maintain tank pressure at any pre-determined maximum up to 200 lbs. Usual setting is for 145 lbs. maximum and 120 lbs. minimum but maximum setting may be adjusted. At any setting, however, the "cut-in" will be 25 lbs. below the "cut-out" pressure.

The Brunner Controller is furnished in three models, suited to various motors. These may be used with any motor driven outfit, Brunner or other makes. They are reliable, accurate, safe and durable.

A Controller saves profitable time, insures service to your customers, avoids dangerous pressures, and saves current by operating compressor only when air is needed.

	Each
Model "M" for A. C. motors up to 3 H. P. (inclusive, or D. C. motors up to ½ H. P. inclusive, for voltage not more than 440	$32 00
Model "1" for A. C. motors between 3 and 5 H. P.	40 00
Model "2" for D. C. motors 3¼ H. P. to 3 H. P. (inclusive), for current up to and including 440 volts	90 00

Kelley-How-Thomson Co. of Duluth
AIR COMPRESSORS
CURTISS GARAGE AIR COMPRESSORS
"Air Free From Oil"

The selection of your Air Compressor has much to do with the success or failure of the service you render your customer.

PURE AIR for your customer means good service, because oil ruins tires, and AIR FREE FROM OIL means fewer blowouts—fewer punctures—greater tire mileage—less repairs; saves them many dollars upkeep every month.

EXCLUSIVE CURTIS FEATURES

1. Controlled-splash, self-oiling system. No excess of oil in cylinder, as external leakage, nor waste of oil; no oil getsinto the tires. Enclosed crank case keeps out dust.
2. Uses about one-tenth of the oil used by any competing machine; owning in oil alone soon pays price of machine.
3. High and low level oil-filling gauge, so you can tell at a glance the amount of oil in the crank case.
4. Fan fly-wheel cools cylinder; increases capacity.
5. Inspectable valves, light weight, large area.
6. Valves cannot drop into cylinder and wreck machine.
7. Hand unloader permits starting compressor against full tank pressure without burning out motor, blowing fuses or burning or jumping of belt.
8. Drop forged crankshaft. Adjustable, renewable non-cutting die cast bearings.
9. Head removable without breaking or bending any pipe connection or pipe fittings; only one gasket.

The Curtis is the only Compressor whose design and construction gives any guarantee for pure air—that is, air free from oil; it is the only enclosed splash oiling machine in which only enough oil is permitted to reach the cylinder to properly lubricate it without any excess carried over in the discharge line. Our controlled-splash system, with the cylinder lubrication of the controlled-splash permanently regulated, insures AIR FREE FROM OIL.

AIR COMPRESSOR FITTINGS

Good fittings are as essential as a good compressor. Don't retard the effectiveness of a good compressor with a leaky tank or fitting of any description. Select your entire outfit from our list, and insure a perfect working, satisfactory outfit to be the best that money can buy and our prices are very little, if any, more than for inferior grades.

NEEDLE VALVES

Designed for use in place of an ordinary Air Stop Cock.

This Valve is heavily constructed of brass designed for use on compressed air lines, carrying pressure up to 175 lbs. Either ¼ in. or ⅜ in. male connection on one end to screw into pipe line and swivel hose connection on the other end to fit either ⅜ in. or ½ in. hose.

A reliable fitting much handier than a stop cock.

Each

No. 82—With either ¼ in. or ⅜ in. Male Connection.....$2.10

Weight about 1 Lb.

NEEDLE VALVES

This valve is very similar to the No. 82 but is for use in the pipe line, doing away with an ordinary globe valve. This valve is air tight, and with proper care, will stay tight indefinitely.

Both ends have female connections, tapped for either ¼ in. or ⅜ in. iron pipe.

Each

No. 83—With either ¼ in. or ⅜ in. Female Connection..... $1 80

Weight about 1 Lb.

This Valve is of exactly the same construction as the No. 83 Needle Valve, but is made in ½ in. size only.

Each

No. 84—With ½ in. Female Connection..... .....$3 00

Weight Each about 1 Lb.

SAFETY VALVE

This is an Adjustable Safety Valve having a ball seat, and is air tight. The tension of the spring can be readily adjusted to blow off at any desired pressure up to 175 lbs. and is very reliable. It is made entirely of brass and is very durable. To be used on air tanks carrying a high pressure. Always set for 150 lbs. when shipped unless otherwise specified.

Each

No. 72—With either ¾, ⅜ or ½ in. Male Connection.....$2.75

VERTICAL CHECK VALVE

This Check Valve is made especially for air lines and should always be used in a vertical position. This valve will give very good service and is well constructed fitting.

Each

No. 75—With either ¼ or ⅜ in. Female Connection $1 80

Weight Each about 2 Oz.

This is exactly similar to the No. 75, but is larger and made with ½ in. female connections only.

Each

No. 76—With ½ in. Female Connection..... . . . $3.00

Weight Each about 2 Oz.

HORIZONTAL CHECK VALVE

A radically different design distinguishes this from other check valves. Will outwear several ordinary valves and is more perfect as to tightness. The No. 70 should be installed wherever a horizontal valve is permissible. ¼, ⅜ or ½ in. female connections.

Each

No. 70A—With ¼ or ⅜ in. Connections.....$3.00

No. 70B—With ½ in. Connection..... 3.00

BRUNNER AIR PRESSURE GAUGES

These Gauges are exceptionally well made, especially designed for air pressure, and are graduated to 200 lbs.

They are made in Polished Brass Case with Bevel Glass and in Iron Case with Brass Ring. They are of heavy construction and extremely accurate.

In 6 Case is 2½ in. diameter, and has bottom male connection for ¼ in. iron pipe.

Each

Model B—Iron Case..... . . . . $3 00

WRENCHES

"PERFECT HANDLE" SCREW No. P. H. 311

One Solid Forging from Tip to Toe. The Drop-forged Bar, the Extra Leverage from the End-swell Water proofed Handle, the Strengthening Yoke on the Back of the Sliding Jaw—All Combine to Make the "Perfect Handle" the Highest Type of Wrench. A Powerful Press, Capable of Exerting a Hundred Tons Pressure, is Used on Each and Every "Perfect Handle" Tool to Close in the Steel Against the Wooden Handles and Lock Them in Better than Any Wooden Handle Tool Ever was Made Before. At Every Important Step in the Production of the "Perfect Handle" Wrench it is Inspected. Making 38 Inspections and Practically an Equal Amount of Tests.

WRENCHES

"FAVORITE" REVERSIBLE STEEL RATCHET

Adopted for Standard Use by Railroads, Bridge, Ship or Engine Builders, Contractors, Etc.
Of Special Value to Wood-Stave Pipe Builders

Its motion is continuous until nut is seated or removed.
Opening through head allows bolt to pass clear through.
Nut encompassed on all sides by head, cannot slip and become injured.
Reverse motion instantaneous by simply turning pawl from right to left or vice-versa.

Can be used in narrower places than an ordinary wrench.

LANE'S UNIQUE

Ford—In strong leatherette case. Weight, 22 ounces ..Per set, $4.00

Set contains one 7-in. Reversible Ratchet Handle; two Screw Driver Bits; one 6 in. Extension Bar; six Steel Sockets, machined from the solid bar, fitting all nuts and bolt heads on Ford Cars, including the Cylinder Head.

CURKO

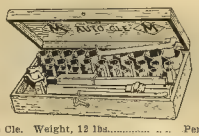
Milled from Solid Bar

No. C-2—Curko—Fits ⅞, ⅜, ⅞ and ½ in. A. L. A. M. Nuts and Screws and ⅞ in. S. A. E. Nuts and Screws. Weight per set, 1¼ lbs..... .....Per set, $1.75

No. C-3—Curko—Fits ⅞, ⅜, ⅞ and ½ in. A. L. A. M. Nuts and Screws and S. A. E. Nuts and Cap Screw Heads ¼ to ⅝ in. inclusive. Weight per set, 1½ lbs.. .....Per set, 2.75

Both above sets furnished in a canvas container.

MOSSBERG



No. 1—Auto Cle. Weight, 12 lbs..... .. .. Per set, $14.00

Set includes 28 Hexagon Rust-Proof Sockets, fitting U S Standard Hexagon Nuts ⅛ to ⅜ in. inclusive; U. S. Standard cap screws, ¼ to 1 in. inclusive; S. A. E. nuts and cap screw heads, ¼ to ⅞ in. inclusive; 3 square rust-proof sockets, fitting U. S. Standard nuts, ¼ and ⅞ in.; square head set screws, ⅜, ½ and ⅝ in.; one take-down, reversible handle, nickel plated; one universal joint; one 9½ in. extension bar; one 1⅝ in. extension bar, and one offset screw driver.

One set in a wooden box

No. 9—Weight, 9 lbs. .....Per set, $10.00

Set includes 19 Mottled, Hardened, Pressed Steel Sockets, fitting U. S. Standard hexagon nuts, ¼ to ⅜ in. inclusive; hexagon head cap screws, ¼ to 1 in. inclusive, and S. A. E nuts and cap screws heads, ⅜ to ⅝ in. inclusive, also 7 Mottled, Hardened, Pressed Steel Sockets, fitting square head set screws, ⅜ to 1 in. inclusive; U. S. Standard square head machine bolts, ¼, ⅞ and ⅜ in.; one 9½ in. ratchet socket wrench handle, one extension bar, one universal joint and two screw driver bits.

One set in a wooden box.

SOCKET WRENCH SETS

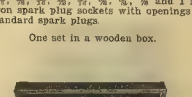
MOSSBERG

No. 10—Universal Automobile Set. Weight, 9 lbs. ..... Per set, $10.00

For use in automobile repair and garage equipment.

Set consists of ratchet, one socket wrench handle, one 9½ in. extension bar, one universal joint, two screw driver bits and 21 mottled, case-hardened, pressed steel hexagon sockets to fit U. S. Standard hexgxon nuts, ¼, 5/16, ⅜, 7/16, ½, 9/16, ⅝, ¾ in.; S. A. E. Standard hexagon nuts and screws, 3/16, 7/32, 1/4, 9/32, 5/16, 11/32, 3/8, 13/32, 7/16 in.; U. S. Standard hexagon head cap screws, ¼, 5/16, ⅜, 7/16, ½, 9/16, ⅝, ¾ and 1 in., and two special hexagon spark plug sockets with openings 13/16 and 1 1/16 in., fitting standard spark pluga.

One set in a wooden box.



No. 11—Automobile, Aeroplane and Autoboat Set. Weight, 6 lbs .. .. Per set, $7.50

For factories, power plants, mills and machinery use.

Set consists of ratchet wrench, extension tube 9½ in. long, hexagon spark plug socket with 13/16 in. opening, and 14 mottled, case-hardened, pressed steel sockets to fit U. S. Standard hexagon nuts, ¼, 5/16, ⅜, 7/16, ½, 9/16, ⅝, ¾ in.; hexagon head cap screws, ¼, 5/16, ⅜, 7/16, ½, 9/16, ⅝ and ¾ in.

One set in a wooden box.

No. 13—Weight, 6 lbs. ..... Per set, $5 50

Set includes one ratchet socket wrench handle; one extension tube, 9½ in. long; 15 hexagon, rust proof, hardened pressed steel sockets, fitting U S Standard hexagon nuts, ¼ to ⅝ in inclusive, hexagon head cap screws, ¼ to ¾ in inclusive, S A E nuts and cap screw heads, ¼, 5/16, ⅜, 7/16, ½, 9/16, ⅝ and ¾ in , and one hexagon spark plug socket with 13/16 in. opening.

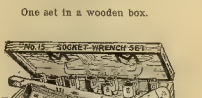
One set in a wooden box

MOSSBERG

No. 14—Machinists' and Automobile Set Weight, 18 lbs. ..... Per set, $17.00

Set consists of ratchet wrench, take-down handle and extension bar, offset socket wrench, nickel-plated combination plier, pipe grip, general service double-end wrenches, universal joint, 3 special spark plug sockets, 3 sizes of screw-driver bits, cotter-pin extractor, 23 sizes hexagon sockets and 11 sizes square sockets, properly hardened and mottled, fitting U. S. Standard hexagon nuts, ¼ to ⅝ in. inclusive; hexagon head cap screws, ¼ to 1 in. inclusive; S. A. E. nuts and cap screw heads, ¼ to 7/8 in. inclusive; square head set screws, ⅜ to 1 in. inclusive; U. S. Standard square head machine bolts, ¼, 5/16, ⅜, ½, 9/16 and ⅝ in.

One set in a wooden box.



No. 15—Mcsaberg Ford Set. Weight, 6 lbs.. ..... Per set, $8.00

Set consists of one ratchet socket wrench, one swivel or universal joint, permitting the use of the wrench at any angle; one tubular extension bar, one screw driver bit; one 6 in. monkey wrench, and 11 sizes pressed steel sockets, mottled finish, nine with hexagon opening and two with square opening, fitting U. S. Standard hexagon nuts, ¼, 5/16 and ⅜ in.; hexagon head cap screws, 3/16, 7/32 and 1/4 in.; S A. E. nuts and cap screw heads, 3/16, 7/32, 1/4 and 5/16 in.; square head set screws, ¼ and 5/16 in.; also one 13/16 in. oval socket, which fits crank shaft bearing bolts, and one 13/16 in. spark plug socket for Champion "X" spark plugs. The 13/16 and 13/16 in. sockets are tapered so as to fit rear axle housing and engine base bolts.

One set in a wooden box.

No. 45—Heavy Duty. Weight, 9¼ lbs . . Per set, $11.00

This set has a black, rust-proof finish. Instead of buying fifteen individual speed wrenches, it is possible to obtain, in this set, one brace handle with sockets to fit. When a socket is worn out it may easily be replaced at small expense. The set consists of one speed brace handle No. 359; 15 heavy duty sockets, fitting all U. S. Standard nuts, ¼ to ⅝ in; U. S. Standard cap screws, ¼ to 1 in., and S. A. E. nuts and cap screw heads, ¼ to 7/8 in.; also contains one universal joint No. 336 and one connecting socket No. 167.

One set in a chestnut wood box.

SOCKET WRENCH SETS

WALDEN

No. 8—Walden. Weight, 5½ lbs..... Per set, $9 90

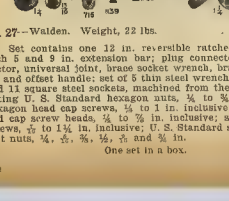
This set contains one 9 in. reversible ratchet wrench, one 9 in. extension bar, one plug connector, one socket connector, one universal joint, seven hexagon steel sockets and one square steel socket. These sockets are made from the solid bar and fit U. S. Standard hexagon nuts, ¼, ⅜ and ½ in.; U. S. Standard cap screw heads, ⅛, ⅜, ⅛, ½ and ⅝ in; S. A. E. nuts and cap screw heads, ⅛ to ⅝ in. inclusive. The square socket has a ⅛ in. opening and fits the latest crank shaft bearing bolts on a Ford car.

One set in a finished tool box.

No. 16—Walden. Weight, 9½ lbs.....Per set, $13 20

This set contains one 9 in. reversible ratchet wrench, one 9 in. extension bar, one plug connector, one socket connector, one universal joint and 16 hexagon steel sockets, machined from the solid bar, fitting U. S. Standard hexagon nuts, ¼ to ⅝ in. inclusive; hexagon head cap screws, ¼ to 1 in. inclusive, and S. A. E. nuts and cap screw heads, ¼ to ⅝ in. inclusive

One set in a finished tool box



No. 27—Walden. Weight, 22 lbs. . Per set, $24 20

Set contains one 12 in. reversible ratchet wrench; one each 5 and 9 in. extension bar; plug connector, socket connector, universal joint, brace socket wrench, brace top handle, tee and offset handle; set of 5 thin steel wrenches; 16 hexagon and 11 square steel sockets, machined from the solid bar, and fitting U. S. Standard hexagon nuts, ¼ to ⅝ in. inclusive; hexagon head cap screws, ¼ to 1 in. inclusive; S. A. E. nuts and cap screw heads, ¼ to ⅝ in. inclusive; square head set screws, ⅛ to 1¼ in. inclusive; U. S. Standard square machine bolt nuts, ¼, ⅜, ⅜, ½, ⅝ and ¾ in.

One set in a box.

VLCHEK

No. 926—Vlchek Bent Socket Wrench Set for Ford Car, in canvas case. Weight, 2¾ lbs..... ...Per set, $7.00

Set consists of one each of the following wrenches, in a heavy canvas case:

Size F51—For rear axle housing bolt nut and all ¼ in. U. S. Standard nuts and ⅛ in. cap screws.

Size F52—For rear axle housing stud nut and all ⅜ in. cap screws.

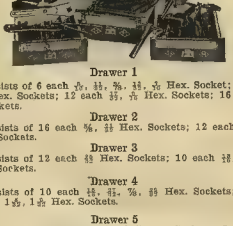
Size F53—For drive shaft housing nut and all ⅛ in. U. S. Standard nuts and ⅛ in. cap screw heads.

Size F55—For crank shaft bearing bolt nut and all ½ in. cap screws

Size F58—Special for flat head of low speed adjusting screw.

Contained in heavy canvas case, including bars for turning.

MOSSBERG CABINET ASSORTMENT



Drawer 1

Consists of 6 each ⅛, ¼, ⅜, ½, ⅝ Hex. Socket; 10 each ⅛, ½ Hex. Sockets; 12 each ⅜, ⅛ Hex. Sockets; 16 each ½ Hex. Sockets.

Drawer 2

Consists of 16 each ⅜, ½ Hex. Sockets; 12 each ⅛, ⅝, ¾ Hex. Sockets.

Drawer 3

Consists of 12 each ⅝ Hex. Sockets; 10 each ⅞, ⅞, ⅞, ⅛ Hex. Sockets.

Drawer 4

Consists of 10 each ⅛, ⅛, ⅞, ⅝ Hex. Sockets; 5 each 1 ⅛, 1 ⅛, 1 ⅜, 1 ½ Hex. Sockets.

Drawer 5

Consists of 4 each ⅜, ⅛, ⅜ Square Sockets; 5 each ⅜, ½ Square Sockets; 3 each ⅝, ⅝, ⅞, 1 ⅛, 1 ¼ Square Sockets; 4 each Universal Joints No. 336, 55c each.

Drawer 6

Consists of 4 each No. 350 Handles, $2.50 each; 4 each No. 355 Handles, $1 28 each; 4 each No. 351 Extra Tubes, 60c each

Drawer 7

Consists of 5 Canvas Kits No. 3, no charge; 10 Catalogs

Drawer 8

Consists of 4 No. 340 Handles, 60c each; 4 No. 322 Handles, 35c each; 6 No. 401 Spark Plug Wrenches, 36c each; 6 No. 406 Spark Plug Wrenches, 36c each; 3 No. 411 Spark Plug Wrenches, 36c each; 6 No 421 Spark Plug Wrenches, 36c each; 21 Wire Handles.

No. 300 Mossberg Cabinet Assortment. Weight, 134 lbs. ..... Each, $85.00

Extra Sockets—One dozen in a box. ..... Per dozen, $4.20

This Chest affords a very convenient way to stock these parts and the dealer in automobile supplies will readily appreciate its usefulness.

No. 1108—Brace Top Handle. Pressed steel working on a cone bearing. To be used with various combination parts. Weight, ½ lb..... Each, $0 55

WRENCH SOCKETS

The Walden Worcester Co. have discontinued the pressed steel socket and are making an entirely new line of steel sockets, machine made from the solid steel bar. The square or hexagon hole is broached out 1/64 oversize instead of 1/32, making a snug, firm fit, which prevents "ringing" of the socket.

Fit all Mossberg, old style Walden and Black Hawk Sockets

SOCKET WRENCHES

WIRE HANDLE

The usefulness of this type of wrench in the automobile field has created a persistent demand for Walden, Blackhawk and Mossberg Wrenches.

On the following pages we illustrate these three lines.

Early in January, 1920, the Walden-Worcester Inc. installed a new automatic plating machine, which gives to their tools a Triple Rust-Proof Finish. Successive deposits of zinc, copper and nickel produce a lasting finish. The Blackhawk Wrenches have a black, rust-proof finish.

The openings are made 1/64 oversize (instead of 1/32 oversize, which practically eliminates the old trouble of "ringing" the wrench.

The Mossberg Company recognized the demand for a more sturdy Wire Handle Socket Wrench than either the Walden or Blackhawk and have introduced their line of Heavy Duty Indestructible Wrenches.

In order to readily find out just what nuts or bolt heads these Wrenches will fit we give the table as shown below:

The following table is especially adaptable to the Walden and Blackhawk lines, but is also applicable to the Mossberg line.

Size of Socket.	S. A. E. Nuts and Cap Screws	U. S. Std. Nuts.	U. S. Std. Cap Screws.	U. S. Std. Bolt Heads Unfinished
No. 0014	7/32	1/4	1/4	
No. 0016	1/8	5/16	5/16	1/4
No. 0018	5/32	3/8	3/8	
No. 0019	3/16	7/16	7/16	5/16
No. 0020	7/32	1/2	1/2	
No. 0022	1/4	9/16	9/16	3/8
No. 0024	5/16	5/8	5/8	7/16
No. 0025	3/8	3/4	3/4	1/2
No. 0026	7/16	7/8	7/8	9/16
No. 0028	1/2	1/2	5/8	1/2
No. 0030	1/2	5/8	5/8	
No. 0031	9/16	3/4	3/4	5/8
No. 0032	1	11/16	3/4	3/4
No. 0034	1 1/16	3/4	7/8	5/8
No. 0036	1 1/8	7/8	7/8	
No. 0040	1 1/4	7/8	1	3/4

The last two figures of either the Walden, Mossberg or Blackhawk numbers represent the size of the socket. For instance, the No. 2514 Walden Wrench shows that the opening of the socket is 14/32 or 7/16 (.004 in the table). The exact opening is 29/64, but both Walden and Blackhawk consider this 1/64 as clearance.

The Mossberg Company, however, give the size opening in 64ths. Therefore the wrench with an opening of 29/64 has the last two figures of the number as 29. For instance, No. 1529 shows that the opening is 29/64, which is the same as a 7/16 in. opening in the Walden or Blackhawk Wrench. In order to facilitate the use of the table we are cataloging the openings of the Mossberg Wrenches the same as the Walden line.

All Sizes. . . . . Each, $0.56

Openings of all Wrenches shown in this column are actually 1/64 in. larger than shown.

Construction—Made of 1/2-in. Steel Bar. Length, 10 in. over all. Finish, Black Rust Proof. The case-hardened sockets are round on the outside and have on the upper part square face on which a wrench may be applied to turn an especially obstinate nut. The handle does not have the customary loop leaving an opportunity to use a piece of pipe to obtain more leverage.

No. 1428	No. 5128—Opening, 7/8 in	"	1.10

The steel sockets are machine turned and broached accurately to size and so fastened to the wire that they cannot turn (no pins to shear off). The swivel handles are pressed steel. There is only one size nut on any rim, so that this solid handle tool fills all requirements (no loose socket to be misplaced). Tire changes are emergency work and dependable tools are worth all they cost.

Sizes for Demountable Rims

5/8—Kelsey.
11/16—Firestone, Fisk Dem, Goodrich.
3/4—Baker, Continental, Detroit, Stan-Weld, Goodyear, Fisk.
13/16 Stan-Weld, No. 2 Universal.
7/8—Fisk Tires.

All wrenches shown on this page have openings 1/64 in larger than indicated. See page 189 for table showing different size nuts these wrenches will fit.

MOSSBERG BRACE DEMOUNTABLE RIM

No. 360 Series

All Steel, Black, Rust Proof.

No. 361—5/8 in. Socket. Fits Kelsey Rims. ..... Each, $1.10

No. 364—13/16 in Socket. Fits Old Style No. 1 and No. 2 Standard Demountable Rims..... Each, 1.10

No. 365—7/8 in. Socket. Fits Firestone Dual and Old Style Fisk Rims..... Each, 1.10

MILLERS FALLS

The aim in making these wrenches has been to have a socket that will accurately fit the nut for which it is intended and be extra strong to resist cracking at the corners or wearing of the sides of the hexagon. These wrenches comply with such requirements. Also in accordance with their quality they are handsomely finished with nickel-plated rod, ebony enameled handles and red painted elbow of the socket. The handles are free acting with inserted brass rings and the knob handle comfortably fits the hand.

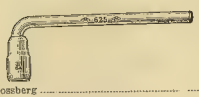
SEATTLE HARDWARE COMPANY

SOCKET WRENCHES

WIRE HANDLE

Especially for Ford Cars

"L" SOCKET



No. 625—Mossberg ....Each, $0.36

The great quantity of ⅜-in. Bolts on a Ford car demand a short, sturdy "L" shaped socket wrench.

This wrench is 7¼ in. long, offset 2 in. and the opening of the socket is ⅞ in., fitting ⅜ in. bolts.

Some of the most important places where this wrench is especially adapted are:

Carburetor Nut	Fan Adjusting Screw
Clutch Lever Nut	Lamp Bracket Nut
Crank Case Nuts	Manifold Clamp Stud Nut
Cylinder Front Cover Set Screw	Radiator Nuts
	Steering Post Bracket Nut
Cylinder Valve Cover Nuts	Timer Spring Nut
Frame Nuts	Universal Ball Cap Nut

No. 621—Mossberg. .. . . Each, $0.38

Single End. Opening, ⅔ in. Same style as No 625. Fits the cap screws on Ford cylinder.

No. 626—Mossberg . . . . .Each, $0.56

Double end. Opening both ends ⅔ in. Similar to No. 621, except that it has a socket on each end. Fits the cap screws on Ford cylinder.

SPEED BRACE SOCKET

No. 613—Mossberg. Speed Wrench.....Each, $0.73

Construction—Made of ⅛ in. steel rod. Length over all, 14¼ in. Finish, black rust proof. Opening, 33/64 in.

Fits lower crank case nuts, differential drive gear screws, dash bracket bolts and nuts, steering post bolts and nuts, horn bolts and nuts, coil box nuts, rear axle housing bolts and nuts on Ford cars.

No. 4116 Black Hawk or
No. 6064—Walden. Speed Wrench . . .Each, $0.88

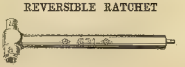
Special Short Speed Wrench, 12⅛ in. over all, ⅛ in. socket, particularly for use on crank case lower cover. Also used on axle housing, differential drive gear, front and rear fenders and muffler rods on Ford cars. This tool is generally useful for all ⅞ in. A. L. A. M. cap screws on all cars.

TRIPLE END

No. 630— Mossberg. Triple End.....Each, $0 64

Fits cylinder head nuts and the nuts on the rear axle housing of Ford cars.

REVERSIBLE RATCHET



No. 631—Mossberg. Reversible Ratchet.....Each, $3.00

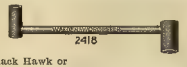
Fits cylinder head screws and rear axle housing nuts The ratchet feature makes this a very useful wrench.

No. 4320—Black Hawk or
No. 1620—Walden. Tomahawk. . . .. Each, $0 70

Triple Socket Wrench. Socket sizes ⅝ in and ½ in. This is the original triple socket wrench. Designed for use on cylinder head bolts, rear axle housing nuts, water intake and outlet cap screws, rear axle nuts, crank case lower cover, drive shaft housing stud nuts, differential drive gear cap screws and controller shaft bracket nuts.

No. 4330—Black Hawk or
No. 5660—Walden .....Each, $1.20

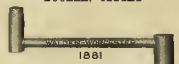
Triple Socket Offset Wrench. Sizes ⅛, ⅞ and ⅞ in. Designed for heavy duty. Used on drive shaft pinion, front spring clip, hub bolt and nut, radius rod, rear hub lock, rear spring clip spindle arm, and body bolts on Ford cars.



No. 4218—Black Hawk or
No. 2418—Walden .....Each, $0.80

Double Socket Offset Wrench Socket sizes ⅞ and ¾ in., handle 11 in. Used on brake shoe support, connecting rod clamp, crank shaft (main) bearing, fan bracket spindle, steering gear post, steering post bracket, spindle connecting rod and front radius rod of Ford cars. No. 1622 also fits main bearing bolt heads.

DOUBLE, OFFSET

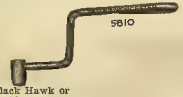


No. 1881—Walden. (Replaces old No. 1623).... . Each, $1.10

Length over all, 9 in. Socket sizes ⅞ in. hexagon and ⅞ in. square. Fits crank shaft bolt and nut, piston pin locking screw, running board bolt nut, running board to fender bolt nut.

No. 4122—Black Hawk or
No. 3822—Walden .....Each, $0.66

Socket size ½ in. hexagon. Used on Ford fly wheel cap screws, heretofore considered an impossible place for a socket wrench. An ugly place made accessible.



No. 4120—Black Hawk or
No. 5810—Walden .....Each, $0.55

Connecting Rod Wrench with ⅝ in. socket. Fits all connecting rod nuts of Ford cars, including the fourth connection. This is the original design, the first wrench made to reach the fourth connection without removing the engine from the car. Right angle bends and loop handle.

No. 623—Mossberg.....Each, $0.46

Similar in design to the Walden No. 5810, with the exception that it does not have the loop handle. Case hardened, mottled finish.

All wrenches shown on this page have openings 1/64 in. larger than indicated. See page 189 for table showing different size nuts these wrenches will fit.

ICE CREAM FREEZERS

DOUBLE ACTION

The Can and Dasher Revolve in Opposite Directions, Automatic Twin Scrapers.

ENCLOSED GEARING

Extra Heavy, XXXX Tin Can, with **Drawn Steel Bottom.** They will not Leak, and the Bottom will not Break or Fall Out of the Body of Can; Not Liable to Injury, as are Tin Plate or Cast Iron Bottoms. The Top of Can is Strongly Wired and Turned Over, while the Lower Part is Made to Fit Over and Under the Drawn Steel Bottom by Machinery The **Gears are Completely Covered,** so that Neither Ice or Salt can Get in Cogs, Nor the Fingers be Accidentally Caught in Them The **Hinged Cover** Can be Raised Out of the Way Without Removing it from the Tub. The **Locking Device** is Controlled by a Single Cam, is Simpler and Easier to Operate than Any Other, and Locks the Cover Immovably. All Inside Parts Coming in Contact with the Cream are **Heavily Tinned;** All Outside Parts are Smoothly and **Heavily Galvanized.** The Ice Space is Arranged to Use the Least Possible Amount of Ice to Freeze in the Least Possible Time Selected White Pine Tubs, with Electrically Welded Galvanized Steel Wire Hoops, which will Not Fall Off Nor Break.

PACKING CANS

"STEEL CLAD"

Are the Most Durable and Serviceable Cans Made. They are Made of Steel; the 1 to 12-quart Sizes have Bodies of No. 20 Gauge, and Bottoms and Covers of No. 18 Gauge Steel; the 16- to 40-quart Sizes Have Bodies of No. 18 Gauge, and Bottoms and Covers of No. 16 Gauge Steel. The Bottoms and Covers are Stamped Up from One Piece of Steel. The Body is Made of One Piece of Sheet Steel, which is Cut, Rolled, Riveted and the Welded Hoop Driven On. Then the Entire Can is Tinned in Molten Pure Block Tin. The Cans are Smooth and Easily Cleaned, Have No Raw Edges Exposed to Action of Salt Water Nor Crevices to Collect Dirt. They are Thoroughly Tested to Insure Being Perfectly Tight.

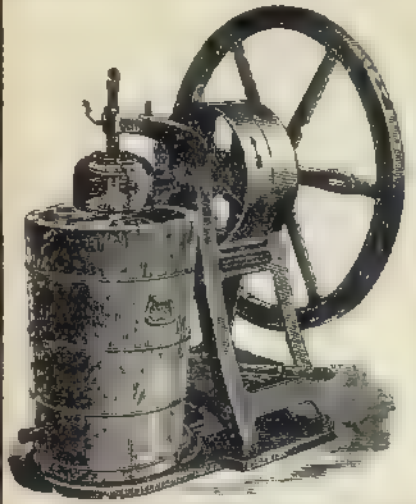
MACHINE ICE CREAM FREEZERS

NOTE.—These Machine Freezers can be Furnished with Copper Cans when Specified at an Advance in Price

"IMPROVED PHILADELPHIA" SEAMAN

40 QUART



The Frame is Made in One Casting Being in One Solid Casting, the Frame is Much Stronger and Stiffer Less Liable to Breakage or Getting Out of Order The Bearings for Shaft are Bored Out Correctly The Shafts are Steel and Accurately Fitted to Run True in Bearings The Pulleys are Placed in Middle to Relieve Undue Strain on Bearings The Teeth in Gearing are Made of Scientifically Correct Shape to Run Smoothly, of Wide Face to Secure Extra Strength Both the Pulleys and Gearing are Designed to Secure Ample Power to Drive the Machine Without Undue Strain and Avoid Any Risk of Breaking or Stoppage of Machine During Operation. The Gearing is Completely Covered to Prevent Fingers Being Caught and Crushed, and Protects the Gears from Ice, Salt and Dirt The Can is Made of No 18 Sheet Steel Riveted in Seam, with Heavy Malleable Iron Bottom, and is Heavily Coated with Pure Block Tin. The Top of Can is Reinforced with Wrought Iron Band The Tub is Made Extra Heavy, of Selected Virginia White Cedar, with 1¾-inch Thick Staves Tongued and Grooved into Each Other, and Held Together with Electric welded Wire Hoops, which are Much Stronger Than Ordinary Flat Hoops, and Guaranteed Not to Fall Off. The Tubs are Painted Both Inside and Outside. The Body of Dasher or Bearer is of Malleable Iron Heavily Coated with Pure Block Tin The Upper Part of Beater is Steel Shafting to Better Withstand the Wear and Avoid All Risk of Breakage which Occurs when Shaft is Part of Casting of Beater A Cup on This Shaft Protects the Cream from Any Dirt Passing in Around Shaft The Beater Has Two Steel Scrapers for Side of Can and Scraper for Bottom The Scrapers are Made from Rolled Steel Bars Ground Straight and True to Fit Can, and Insure Clean Scraping of Cream as Frozen. The Lid of Can is Furnished Regularly with Two Glass Openings Set Flush, so Top of Lid is Smooth and Free from Projections

STEEL CANS

Tight and Loose Pulleys are 18 x 4 Inches, and Should Run About 150 Revolutions Per Minute to Give Can 100 Revolutions. The Fly Wheel is 42 Inches Diameter, Weighing 175 Pounds. Height of Driving Shaft Above Floor, 33½ Inches Base Plate Measures 38 x 24½ Inches.

		Each
No. 401—With Pulley and Fly Wheel. Weight, 670 Lbs		$180.00
No. 402—With Fly Wheel. No Pulleys. Weight, 598 Lbs		160.00
No. 403—With Pulleys. No Fly Wheel. Weight, 474 Lbs		$147.00

MACHINE ICE CREAM FREEZERS

"IMPROVED SEAMAN" AND LIGHTNING

GENERAL DESCRIPTION

Note.—These Machine Freezers Can be Furnished with Copper Cans When Specified at an Advance in Price

The General Design and the Mechanism for Engaging Gearing with Dasher is Same as in Combination Freezer, but the Smaller Size of Machine, the Omission of Belt Shifter, and No Provision to Use Different Size Apparatus Interchangeably, Allows of a much Less Price Than the Same Sizes in Our Combination Freezer, and Puts a Substantially Built Machine Freezer of a Small Capacity Within Reach of Every Confectioner Using Power. The Coupling to Connect Gearing to Can has Clutch at Each End, One of which Engages with Clutch on Lid of Can and the Other with Clutch on Lower Bevel Gear. The Shaft of Dasher Passes Through Coupling and Engages with Upper Gear. As the Upper and Lower Bevel Gears Turn in Opposite Directions the Can and Dasher will do Likewise. The Clutches in Gearing are Operated by One Small Lever at Top of Machine. When Lever is Thrown in Opposite Position the Clutches are Separated so that Tub with Can and Dasher may be Readily Removed. The Lever Locks the Clutch in Either Position. The Arrangement of Parts is Such that the Gearing is Never Exposed at Any Time, not Even During the Change of Tubs and Cans. The Cover Prevents Any Possible Injury to Operator, or the Gearing Becoming Clogged with Dirt or Ice, and Salt. There are no Loose Pieces to be Lost or Mislaid. The Can is made of No. 18 Sheet Steel Riveted in Seam, with Heavy Malleable Iron Bottom, and Heavily Coated with Pure Block Tin. The Top of Can is Reinforced with Wrought Iron Band. The Body of Can is Very Much Thicker Than the Ordinary Can Made of Heaviest Tinplate. The Tub is made Extra Heavy of Selected Virginia White Cedar, with Staves Tongued and Grooved into Each Other, and Held Together with Electric-welded Wire Hoops, which are much Stronger Than Ordinary Flat Hoops, and Guaranteed not to Fall Off. The Tubs are Painted Both Inside and Outside. The Dasher or Beater is of Malleable Iron, Heavily Coated with Pure Block Tin. It has Two Metal Scrapers for Side of Can and One Scraper for Bottom of Can. The Scrapers are made from Rolled Steel Bars, Ground Straight and True to Fit Can and Insure Clean Scraping of Cream as Frozen.

"SEAMAN" Style Dasher in 14-, 18-, 24-, and 32-quart Sizes. In this Style Both Can and Dasher Revolve, but in Opposite Directions.

"SEAMAN" STYLE

Tight and Loose Pulleys, 16 x 3 Inches, Should Run 150 Revolutions Per Minute, to Give Can 100 Revolutions. Fly Wheel 28 Inches Diameter. Height of Driving Shaft Above Floor, 35 Inches. Base-plate Measures 29 x 19½ Inches.

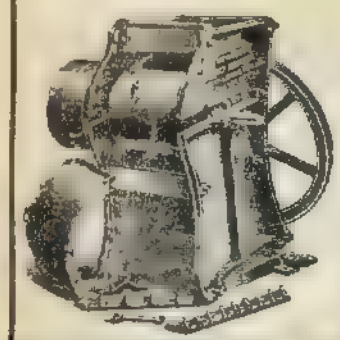
ICE BREAKERS OR ICE CUTTING MACHINES

FOR POWER OR HAND USE



For Breaking Ice in Small Pieces for Use in Freezing Ice Cream and Sherbets for Ice Cream Parlors, Confectioners, Hotels and Restaurants, and for Packing Fish, Oysters, Milk, etc., or where Loose Ice is Required in Quantity

NEW RAPID

General Description

Flanged and Ribbed Cast Iron Frame Plates Held Securely Together by Strong Bolts, Extending Across the Width of Machine, and Held Tight by Lock Nuts. The Side Frames are Closed Tight at the Bearings Preventing Ice Passing Through Into the Pulleys, an Important Feature Not Found in Other Breakers. The Lower Plate in All Except No. 12 is Fitted into Slides and can be Used Either at Front or Back of Machine as Desired. The Upper Back Plate in All Except No. 12 is Made to Adjust Toward or Away from the Cylinder, in Order to Break the Ice Finer or Coarser with the Plate in Use. The Cylinders are Heavy and Strongly Braced, Clamped and Keyed to the Steel Driving Shaft, which is Supported by Bearings of Ample Size and Well Babbitted. The Passage Bust Gear, Drop Forged Steel Made Round and Tapered at Shank to Fit Taper Hole in Cylinder and Will Interchange Without Machining or Filing. They are Readily Removable from Socket by Tapping on Back End, Yet are Driven Tightly into Socket During the Breaking of Ice and will not Loosen and Fall Out

WASHING MACHINES

"MOLA" POWER AND ELECTRIC WASHERS. WITH PERFORATED CYLINDER AND SWINGING WRINGER

The Most Compact, Efficient, Simplest, Quickest and Most Satisfactory Washing Machine Made

The MOLA is operated on the reverse cylinder principle which is conceded by experts to be the only correct method of washing clothes clean without injury. All modern laundries use cylinder machines, but heretofore they have not been available for the home on account of the high cost of manufacturing this type of machine.

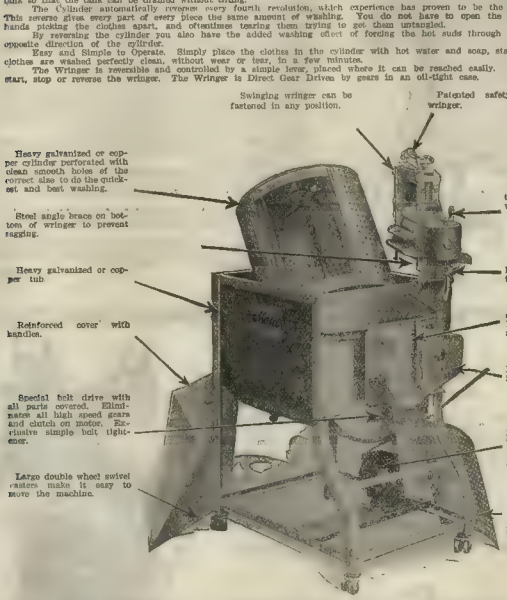
The **MOLA** Machine is made of All Metal Parts, Always Clean and Sanitary. It is made with a cock at the bottom of the tank so that the tank can be drained without tilting.

The Cylinder automatically reverses every fourth revolution, which experience has proven to be the proper number of times. This reverse gives every part of every piece the same amount of washing. You do not have to open the machine and scald your hands picking the clothes apart, and oftentimes tearing them trying to get them untangled.

By reversing the cylinder you also have the added washing effect of forcing the hot suds through the cloths, going in the opposite direction of the cylinder.

Easy and Simple to Operate. Simply place the clothes in the cylinder with hot water and soap, start the Machine, and the clothes are washed perfectly clean, without wear or tear, in a few minutes.

The Wringer is reversible and controlled by a simple lever, placed where it can be reached easily. Move this lever and you start, stop or reverse the wringer. The Wringer is Direct Gear Driven by gears in an oil-tight case.



Swinging wringer can be fastened in any position.
Patented safety release wringer.
Heavy galvanized or copper cylinder perforated with clean smooth holes of the correct size to do the quickest and best washing.
Steel angle brace on bottom of wringer to prevent sagging.
Heavy galvanized or copper tub
Reinforced cover with handles.
Special belt drive with all parts covered. Eliminates all high speed gears and clutch on motor. Excessive simple belt tightener.
Large double wheel swivel casters make it easy to move the machine.
Convenient wringer control. Starts, stops or reverses wringer.
Friction clamp which holds wringer in any position.
Neutral lever to stop cylinder. By lifting small latch cylinder is released and automatically starts.
All working parts of the Mola are enclosed and run in hard oil.
Special water splash-proof Robbins and Myers ¼ H. P. washing machine motor. Large enough to run washer and wringer at the same time.
Cylinder door which is easy to put on and locks in position with two thumb nuts.

Complete Equipped with Electric Motor for 110 Volt, 60 Cycle, Alternating Current, Electric Cord, with Plug, etc.

	Each
No. M10—With Galvanized Steel Body and Cylinder	$150.00
No. M11—With Copper Body and Galvanized Steel Cylinder	165.00
No. M12—With Copper Body and Copper Cylinder	180.00

Estimated Weight Crated, 240 Lbs.

Note—When Sending Your Order for the Electric, be Sure to Give us Full Information Regarding Your Electric Current—The Voltage, also whether Alternating or Direct Current; If Alternating Current, tell us Number of Cycles and Phase, ask your Electric Light Company.

Can also supply from Factory for 220 Volt

ENGINE POWER WASHER

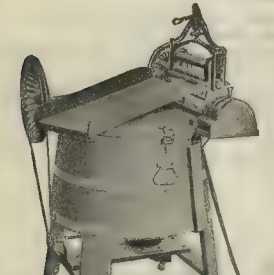
Completely Equipped with Pulleys for Belts

	Each
No. M20—With Galvanized Steel Body and Cylinder	$120.00

Estimated Weight Crated, 200 Lbs.

WASHING MACHINES

ELECTRIC MOTOR HIGH SPEED WASHER



Costs No More to Operate than an Ordinary Electric Light; Highest Type of Guaranteed Motor and Switch Furnished. Cornes Equipped with Specially Constructed Power Wringer. Both Washer and Wringer run by same Power. Nothing Complicated, Simple in Construction; a Child can Operate it. Fool and Accident Proof.

Special Designed Gears eliminate destructive clutches and unhandy shift levers that shorten motor's life. Spiral Gears give Speed, Precision, Silence. Mechanism all enclosed; absolutely safe. Ball bearings abolish friction and noise.

Four Wing Wooden Agitator forces soapy water through clothes at rate of 320 gallons a minute, and will not tear the clothes. Quick release faucet drains water quickly from tub.

Machine and Wringer driven by ¼ H. P. specially constructed washing machine motor with 100 per cent overload capacity.

Operated by modern electrical means. Equipped with heavy copper reversing fool-proof knife switch. The constant quick reverse of the switch does not injure and shock the motor like a clutch. The constant shocking by clutches reversing the heavy mechanism will, in a short time, completely destroy it. Motor and switch guaranteed under standard guarantee on electric equipment.

Simple to Operate. Motor switch-lever to right wrings clothes to the right; moving switch-lever to left wrings clothes to left. Machine stopped by placing switch-lever in upright position.

Wringer made especially for power machines. Quick release lever throws wringer out of gear when not in use, insuring safety. Two special springs lift top roller when thrown out of gear. Conveying-wringer board permits one to wring from one tub to another.

Machinery mounted on tub so that cover is free from weight when washer is open. Cover opens back so that entire opening of tub is accessible for removing clothes.

Handsome appearance. Tub and staves made of Louisiana Red Cypress, and Finished off as fine as a piece of furniture. Large, heavy handles. Easy rolling casters. Gold bronzed hoops; other metal parts aluminized.

	Each
No. 410—With Electric Motor for 110 Volt, 60 Cycle, Alternating Current	$120 00

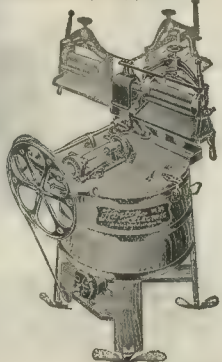
Weight, Crated, 150 Lbs.

FOR SHIPMENT FROM FACTORY

Note: When Sending your Order for Electric Motor High Speed Washer, other than No. 410 be Sure to Give us Full Information Regarding your Electric Current—the Voltage, also whether **Alternating or Direct Current**; if alternating current, tell us **Number of Cycles and Phases**; ask your Electric Light Company.

HORTON ELECTRIC WASHER

With New Three-Way Wringer



Carefully Made in Every Detail; the Tub is of Selected Louisiana Red Cypress, Fully Corrugated on the Inside by a Special Process to Avoid Splinters. All Driving Gears are Cut Instead of just cast, Reducing Friction to a Minimum and Making it Noiseless in Operation. All Exposed Gears are Covered to Prevent Accident. Hardened Dolly with Four Extra Large Pegs and Guarded Post; Clothes cannot tear. Mounted on Heavy Ball-Bearing Casters, making it extremely easy to move around.

MOTOR

A Specially Designed Fort Wayne Motor having Ample Power to Operate Washer and Wringer at the Same Time. Best Grade of Belting Used.

Should anything happen temporarily to motor or current, the Machine and Wringer can be operated by hand.

Wringer

The Wringer with which this Machine is Equipped is a Special Two-Roll Reversible Ball-Bearing Wringer and has a patented device to prevent injury.

A Simple Movement of the Hand Swings the Wringer from One Position to Another to enable wringing between tubs and basket.

Finished in the **Natural Wood Finish, with Mechanism in Gold Bronze; Fly-Wheel and Hoops, Green Enameled.**

	Each
No. 32- 32DC—For 32 Volt Direct Current, Delco Lighting System	$130 00
No. 32-110AC—For 110 Volt, 60 Cycle, Alternating Current	130 00
No. 32-110DC—For 110 Volt, Direct Current	130 00

Packed in a Substantial Crate; Weight about 200 Lbs.

WASHING MACHINES

PEERLESS WATER POWER

Runs by Water Power; Connect the Machine to the City Water Faucet, the Water Pressure Does the Rest

The Motor with which this Washer is Equipped is the Most Powerful made for the Purpose; it is a New Departure in Water Motor Construction. Its Mechanism is Very Simple; Instead of having Poppet Valves like other motors, it has **One Automatic Sliding Valve** which is not Dependent on Springs to Operate. This Does Away with All Spring and Valve Trouble which has caused so much grief to users of ordinary motors.

This motor will Work to Best Advantage with a Water Pressure of 35 Lbs., or Over, but will Operate on as Low as 20 Lbs.' Water Pressure.

Each

No. 30—Tub is Made of Selected Louisiana Red Cypress Wood, Thoroughly Seasoned. Inside Dimensions—Diameter at Bottom 22⅝ in., at Top 20¾ in., Depth 13¼ in., Height to Top of Tub 28¾ in., Height Overall 29½ in., Length of Wringer Board 15½ in.; Tub is Finished in Natural Wood; Hoops and Trimmings Enameled Green. Motor Finished in Red Enamel; Complete with Wire Bound Intake and Discharge Hose. Dolly Post is Guarded by a Galvanized Cup to Prevent Tearing Clothes . . . $36.00

One in a Crate; Shipping Weight 75 Lbs.

NATIONAL WATER POWER

Operated by Water Pressure of 20 Pounds or More

The National Motor is not an Experiment but has been in Successful use for Seven Years. It is Built like a Pump, having but few working parts, and these are very simple and do not require any nice adjustments; Has no exposed working parts to be injured or tampered with, and has only one stuffing Box, which is Easily Accessible.

No Coil Spring to cause trouble. Only four working parts in the Cylinder; Has No Dead Center, Motor will start from any position. Brass Cylinder, Encased in a Galvanized Iron Casing which Protects it from Injury.

Each

National—Tub is Made of Louisiana Gulf Cypress, finished in National Color; Galvanized Iron Castings; Dimensions: Bottom, 26½ in. in Diameter; Top, 29½ in. in Diameter; Staves, 15¾ in. $35.00
Weight, Crated, about 70 Lbs.

SUCCESS WATER POWER

Will Do a Washing Successfully on a 20 Lb. Water Pressure, and Can Be Operated on a 10 Lb. Pressure

Success Motors are Simple in Design of Working Parts, having no Complicated Parts or Mechanism, which Insures their Successful Operation on either a High or Low Water Pressure. Made from the Best Steam Brass Composition, with Valve Arrangement such that the Valves are in Perfect Alignment, which insures Perfect Valve Action at all times Motors have only Two Springs made from the Best Phosphor Bronze Spring Wire and are arranged in Spring Cups which gives the use of the whole spring in compression and practically does away with breaking of springs. All parts are Interchangeable.

Each

Success—Tub is large, substantial and symmetrically built of the very best Louisiana Gulf Cypress and with reasonably good care will last for many years $32 50
Weight Crated, about 80 Lbs.

WASHING MACHINES

MUSKEGON POWER WASHING MACHINE

Hitch Your Gasoline Engine to this Power Washer; Requires only One-Tenth Horse Power for Satisfactory Operation

The Muskegon Power Washer is Operated by a Tight and Loose Pulley which may be attached to any convenient power. All Wheels, Rods, Gears, and Other Working Parts are Enclosed; the Cut Gears give accuracy, Pressure and Speed to the Action of the Agitator in the Tub; the Four winged Wooden Dolly Agitates the Clothes and Sends 320 Gallons of Hot Suds Through them Each Minute; the Dirt Can't Remain. The Finest Linens or Heaviest Clothing Wash Equally Well.

The Bronze-bearing, Steel-frame Wringer has High Grade Chemical Proof Rubber Rolls. It is operated while the Machine is in motion or at a standstill. Can be stopped or reversed while the Machine is Operating.

Each

Muskegon—Tub is made of Louisiana Red Cypress, Beautifully Finished; the Hoops are Gold Bronze, and the Fly-wheel and Castings are Silver Gray, Equipped with a Metal Faucet for Draining off the Water; a Secure Cover Lock that Holds the Cover Tight and Prevents the Escape of Steam and Heat: Tub is Mounted on Four Casters and Guaranteed for Five Years. Dimensions—Bottom 24½ in. in Diameter; Top 21 in. in Diameter; Staves 14⅛ in.; Wringer Board 14½ in. $60.00

Weight, Crated, about 149 Lbs.

HORTON POWER WASHER

Combined Washer and Wringing Machine

All Driving Gears are Cut instead of just cast, reducing friction to a minimum and making it noiseless in operation. All Exposed Gears are Covered to prevent accident.

No Tight or Loose Pulleys required as the Pulley Wheel Stays in position when lid is opened.

By having a Fly Wheel on Hand which Interchanges with the Pulley Wheel, the Machine and Wringer Can be Operated by Hand.

Equipped with a Special Two-Roll Reversible Ball-Bearing Wringer and has a patented device to prevent injury. A simple movement of the hand swings the wringer from one position to another to enable wringing between tubs and basket.

Hardwood Dolly with Four Extra Large Pegs and Guarded Post: Clothes Cannot Tear. Brass Drain Faucet, threaded, and on bottom of tub.

Each

No. 31—Tub is Made of Selected Louisiana Red Cypress, Natural Finish. Ball-Bearing Wringer, with Rolls 10x1⅝ in., Guaranteed for Five Years..... .....$72 00

One in a Substantial Built Crate; Weight Crated, 175 Lbs.

METAL TUB STANDS

The Detached Tub Stand is a Decided Advance, appreciated alike by the dealer and the user; They are Light, Strong, Very Durable and take up but little space; Mounted on Casters and are Easily Moved about.

Each

Metal Tub Stands. $4 70

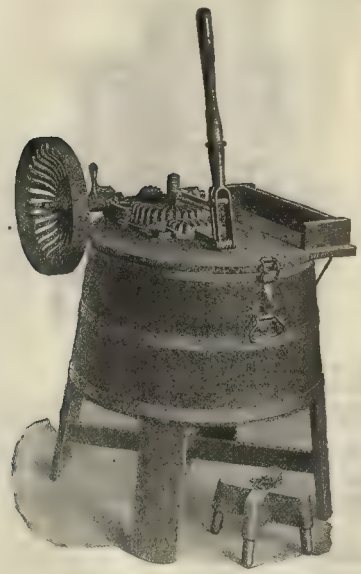
Open Stock; Weight Each about 6¼ Lbs.

WASHING MACHINES

THE MOTOR POWER

Operated by Hand or Belt

The Motor Power Washer turns Waste-power into Profit every wash-day. Saves Hours of Labor Weekly—Weeks of Time Yearly; Wear and Tear on Clothes, Steam, Slop, Drudgery



The principles involved in this Latest Power Washer have been **Proved** and **Perfected** through a generation of experience in providing mechanical washing advantages to more than 500,000 Homes.

The Motor Power Washer has Spiral Cut Gears that are as nearly frictionless as mechanical skill can make them. No loss of power—no sticking or jerking—freedom from vibration.

The Spiral Cut Gears keep the four-winged wooden dolly spinning at a rate that 320 gallons of hot suds are churned through the clothes each minute.

Nothing to Catch or Tear the Clothes. All working parts inclosed for "Safety First." No Dripping Oil—No Rust Stains.

A Metal Faucet provides a speedy means of draining off the water when the tub is to be emptied. No dipping necessary. No water left in the tub.

A Spring Cover-lift makes the Raising of the Cover Easy.

A Secure Cover-lock Holds the Cover in Place and Prevents the Escape of Steam and Heat.

Extra heavy, friction-eliminating ball bearings used to provide for radial and thrust pressure.

Wide rimmed, lathe-turned Fly Wheel makes connection with Engine Belt easy.

When running by belt, raising cover throws machine out of gear, making it unnecessary to stop engine while wringing clothes. Lowering cover and pressing lever throws machine back in gear.

So little power is required (due to its modern design and superior construction) that the cost of operation is very small—almost nothing.

The Wood is of Louisiana Red Cypress—the wood that thrives in water. It [illegible] Odorless and Sanitary. No Moldy [illegible] ing or Shrinking.

The Hoops are all Gold Bronzed—Rustless and Durable.

The Tub is beautifully finished, like a fine piece of furniture.

A Genuine Household Time, Labor and Money Saver

The Motor Power Washer takes the **Work, Worry** and Waste out of wash-day. No more long hours of tiresome drudgery—with aches and fagged body at the day's end.

All Classes of Clothes from the most delicate laces to the heaviest pieces—are washed snow-white without tear or wear.

The washing is out on the line before by the old wash-tub method you would have fairly got started.

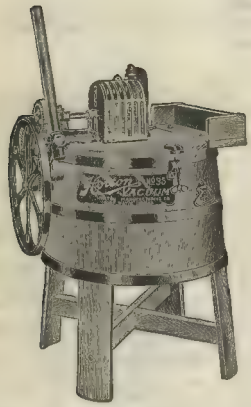
Easy to operate—nothing about it that a child could not learn quickly. No mechanical knowledge or skill required in its operation.

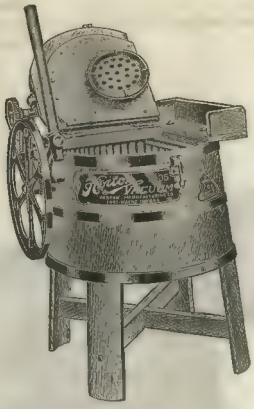
Each

No. 300—Tub is Made of Louisiana Gulf Cypress Wood; Dimensions—Bottom, 24½ in. Diameter; Top, 21 in. in Diameter; Staves, 14½ in.; 14½ in. Wringer Board.....$32.00

One in a Crate, Shipping Weight, 112 Lbs.

WASHING MACHINES





HORTON VACUUM

Can be Operated by Power of Any Kind as Well as by Hand

The Plunger or Agitator Does 50 per cent More Work with the same effort than any other machine, because it makes 2¾ Strokes to Each Stroke of the Operating Lever. This High Speed, without more power, is made possible by the Friction less, Machine-Cut Gears and the Perfectly Balanced Mechanism. The High Speed of the Plunger with its Many Perforations, or Air Valves, causes so Much Agitation that the Clothes are Thoroughly Cleaned in less time than by any other Vacuum Type Machine.

Can also be **Operated with Power** of Any Kind, by simply Exchanging the Large Fly Wheel for an 8 in. Flat Belt Wheel. This **Valuable Feature** is possible because this mechanism being discontinued when lid is opened, and thus also eliminates the need of tight or loose pulleys.

The Operating Lever can be used in either one or two positions to suit the convenience of the operator.

Extra Large Tub of Louisiana Cypress Wood, Attractively Finished in Natural Wood: Fly Wheel and Hoops Green Enameled; Balance of Mechanism in Gold Bronze. Plunger Heavily Galvanized. All Gears are Covered.

Inside Dimensions of Tub: 20⅝x22⅜x11½ in.

	Each
No. 35—Shipping Weight about 120 Lbs.	$29.00

POWER PULLEYS

To meet the demand of Farmers or Others Requiring a Washer that can be Run by a Gas Engine or Other Method of Power, the Fly Wheel can be Taken Off and a Power Pulley put in its place. The Engine need not be stopped nor the Belt Removed Each Time the Lid is Opened, nor Tight or Loose Pulleys Required.

	Each
No. 22P—Weight Each about 5 Lbs.	$2.50

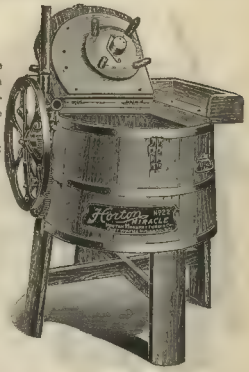
WASHING MACHINES

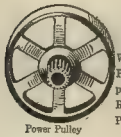
MIRACLE

For Use as Hand Power or Gasoline Engine

Equipped with the Simplest and Easiest Running Mechanism of Any Washing Machine Manufactured. The Driving Gears are Cut instead of Cast, causing the Teeth to Mesh Perfectly and Reducing Friction to a Minimum; No Lost Motion; the Momentum is Maintained by the Large Heavy Fly Wheel. The Operating Lever can be placed in either One of Two Positions, convenient for a short or tall person, adult or child.

The Dolly Post is Guarded by a Galvanized Cup, eliminating all possibility of tearing Clothes.





Power Pulley

Special Feature

To meet the demand of Farmers or Others Requiring a Washer that can be Run by a Gas Engine, or Other Method of Power, the Fly Wheel can be Taken Off and a Power Pulley put in its place. The Engine need not be stopped nor the Belt Removed Each Time the Lid is Opened, no Tight or Loose Pulleys Required.

Each

No. 22—Tub is made of Selected Louisiana Red Cypress Wood, Thoroughly Seasoned. No. 22P—Extra Power Pulley for Miracle Washing Machine; Weight 5 Lbs..... 2.50

WASHING MACHINES

MOTOR HIGH SPEED

Spiral Cut Gears; Runs Easy Loaded or Empty

A little power imparted to the lever starts the movement and the heavy fly wheel on the top does the rest and keeps the machine going with very little exertion on the part of the operator. The **Fly Wheel is on Ball Bearings** and runs about sixteen to one turn of the agitator, or pin block inside the machine; it also imparts power and momentum to the dolly post attached to the pin block, and this is why the machine runs so easily

Each

Motor High Speed Made from Louisiana Gulf Cypress wood, finished in Natural Color, with Three Malleable Iron Hoops, of Gray Iron, Malleable Iron and Steel; Such Castings that come in contact with the water are Heavily Galvanized to Prevent Rusting. Dimensions: Bottom, 24½ in. in Diameter, Top, 21 in. in Diameter; Staves, 14½ in.; with 14½ in. Wringer Board..$15.00

Weight, Crated, About 89 Lbs. Each

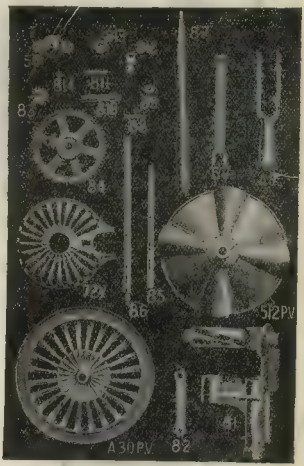
WASHING MACHINES

"PERFEX VACUUM"

The Perfex Vacuum Washer Runs Easier Loaded than others do empty; Enables the Housewife to do the week's washing in less than half the time. It washes clothes clean and white, and will make them last longer. Takes the drudgery out of washing. Saves strength and patience



FEATURES OF MECHANICAL EXCELLENCE

Spiral Cut Gears—make it run easier loaded than others do empty; easy, smooth, swift, noiseless.

Special Design Vacuum Dolly—rust proof; cannot catch or tear the clothes; a perfect agitator. 320 gallons of water sent through clothes each minute—cleansing more thoroughly than any other washer.

Automatic Cover Lift.

Steam-tight Cover Lock.

Quick-Release Metal Drain Faucet.

Roller Bearings—"runs like a sewing machine."

Gears all inclosed fool-proof; accident proof.

Louisiana Red Cypress Tub—"the wood eternal."

Finish—like a piece of fine furniture; bronzed hoops; other metal parts aluminized, very handsome.

Operation—so simple a child could run it. Full directions with each machine.

Guaranteed for one year.

Each

Perfex Vacuum Washing Machine—Dimensions: Bottom, 24½ in. diameter; Top, 21 in. diamter; Staves, 14½ in.; 14½ in. Wringer Board. $28 00

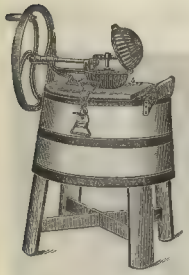
WASHING MACHINES



MICHIGAN

Two Speed, Four Stroke Rotary

The Michigan has a Combination of Vertical, Rotary and Alternate Motions, that is, the Dasher has Four Distinct Motions: Forward and Back, Lifting and Forcing, which can be Regulated by means of the Two Speed Arrangement on the Gearing of the Washer. This can be Interchanged Very Easily in a short space of time and without the use of tools. It is an excellent advantage over the One Speed Rotaries and fills the long existing demand for a machine that can be Geared up to a Higher Speed for use in Washing Heavy or Light Clothes, for instance, when the Tub is Filled with Heavy Pieces such as Quilts, Blankets and Heavy Garments, the Ordinary Speed may be used; when Washing Children's Clothes such as usually are very dirty, it can be Instantly Changed to a High Speed which will Wash them Perfectly Clean.

The Gearing is Entirely Machine Fitted and is so Proportioned in Size to Allow Excellent Leverage. It is Covered by a Hinged Basket of Cast Iron and is an Absolute Protection Against Children, who find the gearing parts quite interesting to their curiosity.

The Wringer Board is Attached by Patent Malleable Iron Fastenings and is sufficiently large to Allow the Use of a 12-inch Roll Wringer. The Lid when Turned Back Rests upon a Patent Hinge Brace.

	Each
Michigan Tub is Made of Clear White Pine, Beautifully Decorated in Lasting Colors; is Well Made and Reinforced, and is Held up by Stave Legs. The Working Parts are Attractively Finished in Aluminum Bronze.....	$18 00

One in a Crate; shipping Weight 75 Lbs.

AMERICAN

Louisiana Red Cypress Wood Tub fitted with Large Lid, allowing the Entire Top of Washer to Open Up. Legs are Securely Fastened to the Tub; Large Wringer Box held in place by bolts. Improved Mechanism. Wood Work Filled and Varnished, Castings Finished in Aluminum Bronze

	Each
No. 4 — Tub Dimensions: 23x21x11 in., with a Capacity of 22 Gallons	$13 00

Shipping Weight 50 Lbs.

RAPID

Makes Clothes Washing Easy

A Perfect Suction Washer: Washes Clothes perfectly clean without rubbing. The pounding forces a continuous volume of water through the cloth, which is the best known method of cleansing. Will not tear the clothes and does not wear them like rubbing.

	Per Dozen
Rapid—Made of Heavy, Bright Tin Plate; 3 ft.; Maple Handle. Weight per Dozen, about 25 Lbs.	$12.00

One in a box.

No. 220

ADJUSTABLE

Ground Face and Sides. Japanned Cap and Inside. Beech Knob

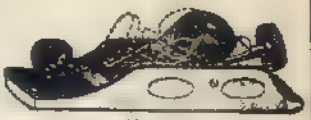
With Screw Adjustment

Each

No. 220 Lgth, 7½ Ins. Cut, 1¼ Ins. Wt, 1½ Lb.. . $2.45

One in a box.

ADJUSTABLE DOUBLE END



No. 131

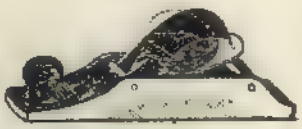
Combination Block and Bull Nose Plane Has Two Slots and Movable Cutter Seat. Use Center Cutter Seat and Slot for Ordinary Block Plane Work For Use as Bull Nose Plane Remove Cap and Cutter, Reverse Cutter Seat by Throwing Over Adjusting Wheel (see Dotted Lines in Cut) Replace the Cap and Cutter in New Position. Has "Handy" Feature, a Rosewood Knob and Cutter is Adjustable Endwise.

Each

No. 131—Length, 8 Ins. Cut, 1⅝ Ins. Wt., 1½ Lb. $4.65

One in a box.

NON ADJUSTABLE DOUBLE END



Two Slots and Two Cutter Seats. Center Seat and Slot Used for Ordinary Block Plane Work, Other Slot and Seat Used When Desired to Work Same as Bull-Nose Plane. Hardwood Knob. 8 Inches Long. 1⅝-inch Cut. Weight, 1½ Lbs.

Each

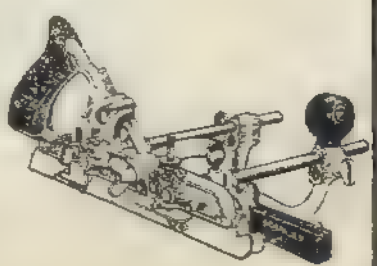
No. 130—Japanned $3.45

One in a box.

STANLEY FANCY PLANES

ADJUSTABLE BEADING, MATCHING AND RABBET

NICKEL PLATED WITH ROSEWOOD HANDLE AND KNOB



Embraces a Beading and Center Beading, Rabbet and Filletser, Dado, Plow, Matching, Superior Slitting and Sash Plane Has Seven Beading Tools ⅛, 3/16, ¼, 5/16, ⅜, 7/16 and ½ In Ten Plow and Dado Bits: ⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½, ⅝, ¾ and ⅞ In Slitting Blade, a Sash Tool and Tonguing Tool Length, 11 Ins Twenty-one Cutters

Each

No. 45—Wt., Each, About 9½ Lbs. $22.50

TRAUT'S ADJUSTABLE DADO FILLETSTER PLOW, ETC.

NICKEL PLATED FRAMES, ROSEWOOD HANDLE AND KNOBS

No. 46

Complete, with Eight Plow and Dado Bits: 3/16, ¼, 5/16, ⅜, ½, ⅝, ¾ and 1¼ In A Filletster Cutter, a Tonguing Tool and a Slitting Tool Length, 10½ Inches Eleven Cutters.

Each

No. 46—Wt., Each, About 5¼ Lbs.... $15.75

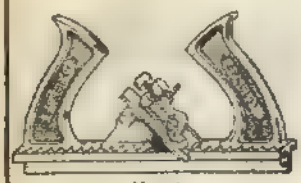
One in a box.

Note.—Nos. 45 and 46 combine main stock. Sliding sector so arranged that Cutters of Different widths can be used. Plane is fitted with adjustable fence or guide and depth gauge. Has spurs for use in working across grain. Used right or left.

STANLEY'S FANCY PLANES

DOUBLE END MATCH

NICKEL PLATED FRAME, HANDLE AND CAP



No. 148

Nickel-plated Cast Iron Frame, Handles and Caps. Tempered and Polished Tool Steel Cutters. Cuts Both Tongue and Groove. Length, 9 Inches. Size of Cutter, ¾ In. Cuts Groove ¼ Inch.

Each

No. 148—Wt., Each, Abt. 2¾ Lbs. . **$7.20**

One in a box

STANLEY RABBET AND FILLETSTER

Sides and Bottom Square with Each Other. Plane Lies Perfectly Flat on Either Side. Has Adjustable Fence which Slides Under Bottom, Regulating Width of Cut. Spur on Each Side for Working Across Grain. Also Adjustable Depth Gauge. Suitable for Right or Left-Hand Work. Front Part Easily Detached; Thus Bull-Nose Plane is Obtained. Cutter Adjustable Endwise.

Each

No. 278—6¼ Ins. Long. 1-inch Cutter . **$5.10**

ADJUSTABLE TONGUE AND GROOVE

NICKEL PLATED STOCK AND HANDLE
ROSEWOOD KNOB

Each

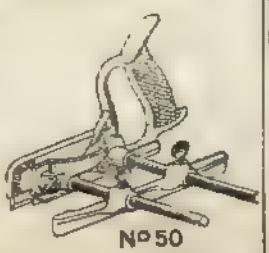
No. 48 For ¾ to 1½ In. Boards. Cuts ⅜-in Groove **$8.50**

No. 49 For ½ to ¾ In. Boards. Cuts ⅛-in. Groove **8.50**

One in a box. Wt., each, about 3½ lbs.

PLOW BEADING AND MATCHING

Used for Ordinary Beading or Center Beading. By Adjustment of Fence, Centering Can Be Done Up to 5 Inches from Edge of Board. Includes 7 Plow and Dado Bits: ⅛, 3/16, ¼, 5/16, ⅜, ½ and ¾ In. 7 Beading Cutters: ⅛, 3/16, ¼, 5/16, ⅜, 7/16 and ½ In. One ⅛-in. Matching Cutter.



No 50

Each

No. 50—Nickel Plated. Length, 9½ Ins. Wt., Each, About 3¾ Lbs. **$12.75**

One in a box.

SKEW CUTTER, FILLETSTER AND RABBET

Has Five Wide Cutter Set on a Skew. Fence and Depth Gauge can be Attached to either Side, so that Plane can be Used for Right or Left Hand Work. Under Bottom, Regulating Width of Cut. Rosewood Depth Gauge, Fence and Arm and Superior Rabbet Plane Obtained. In Cutter with Two Adjustable Spurs. Open End Side.

Each

No. 289—8½ Ins. Long. Japanned **$7.10**

One in a box

IMPROVED RABBET

JAPANNED IRON STOCK AND HANDLE. POLISHED FACE AND EDGE

Will Lie Perfectly Flat on Either Side. Can Be Used with Right or Left Hand while Planing into Corners or Up Against Perpendicular Surfaces. In Two Styles, One Fitted with Spur which Permits Them to be Used for Working Across Grain and Other Without a Spur. Fitted with Detachable Depth Gauge.

Each

No. 190—Length, 8 Ins. Width, 1¼ Ins., with Spur **$4.70**
No. 191—Length, 8 Ins. Width, 1¼ Ins., with Spur **4.45**
No. 192—Length, 8 Ins. Width, 1 Ins., with Spur **4.15**

One in a box.

RABBET AND FILLETSTER

No 78

Remove Arm to which Fence is Secured and Handled Rabbet Plane is Had and, with Two Seats for Cutter the Tool Can Be Used as Bull Nose Rabbet, if Required. Arm Can Be Screwed into Either Side of Stock, Making Superior Right or Left-hand Filletster, which, by Means of Adjustable Fence, is Adapted for Working Rabbets of Smallest Width. Fitted with a Spur. Can be Used for Working Across Grain when Necessary. Has Depth Gauge. 8¼ Ins. Long. 1¼ Inch Cutter. Iron Stock and Fence.

Each

No. 78 . **$5.30**

One in a box.

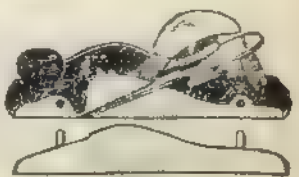
RABBET AND BLOCK

Detachable Side Changes This Tool from Block Plane to Rabbet Plane, or *vice versa*. Cutter is Set on Skew. 7 Inches Long. 1¾ In. Cutter, with Detachable Side.

Each

No. 140 . **$4.35**

One in a box.



No 140

SIDE RABBET

No 98 No 99

Convenient Tool for Side Rabetting and Trimming Dadoes, Mouldings and Grooves of All Sorts. Reversible Nose Piece Gives Tool Form by which it will Work Close Up into Corners. Each

No. 98—Right Hand. 4 Ins. Long. ½ In. Cutters. . . . **$3.15**
No. 99—Left Hand. 4 Ins. Long. ½ In. Cutters. . . . **3.15**

One in a box.

STANLEY FANCY PLANES

BULL-NOSE RABBET

Each

No. 75—4 Ins. Long, 1-in. Cutter. Wt., 1 Lb. **$1.20**

One in a box

STANLEY'S ADJUSTABLE BULL-NOSE RABBET

Is Designed for Fine Cabinet Work. Sides and Bottom Being Square with Each Other, Plane will Do Perfect Work on Either Side. Can Be Used Right or Left.

Each

No. 90—4 In. Long, 1 In. Cutter. **$6.40**

No. 90EC—Extra Cutters . . . **.75**

One in a box

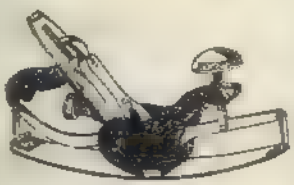
IMPROVED SCRUB

Has Single Iron with Cutting Edge Rounded. Particularly Adapted for Roughing Down Work Before Using Jack or Other Plane. 9½ Ins. Long, 1¼-in. Cut.

No. 40—Wt., 2½ Lbs. Each **$3.50**

One in a box

CIRCULAR



By Means of Graduated Scale or Gears, Iron Can Be Accurately Set to Work on Any Size Circle, Both Concave and Convex, by Turning the Knurled Nut on Front of the Plane. Case Iron Frame, Caps and Handles Tempered and Polished Steel Cutters. Polished Spring Steel Bottom. Screw and Lever Adjustments for Concave or Convex Surfaces.

Each

No. 113—Japanned, 10 Ins. Long, 1¼ In. Cut. . **$11.90**

One in a box

WOOD WORKERS' HANDY ROUTER

Nickel-plated Cast Iron Frame and Mountings. Polished Tool Steel Blade. Polished Beechwood Knobs. Smoothing Bottom and Cutting Bits can be Clamped to Back Side of Upright Post and Outside Stock for Planing into Corners or to Router Out Mortises. Length, 7½ Inches, with One Bit Each ⅜ and ½ Inch.

Open Throat. 1¼-in. Opening Clears Shavings Readily. Operator Can See Iron and Prevent Splitting or Damaging Work.

Each

No. 71—Wt., 2½ Lbs. **$6.55**

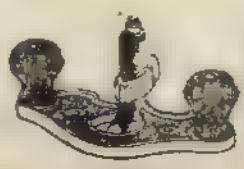
One in a box

Closed Throat. 2 x 1¼-in. Opening.

Each

No. 71½—Wt., 2 Lbs. . . . **$5.10**

One in a box.



PATENT UNIVERSAL

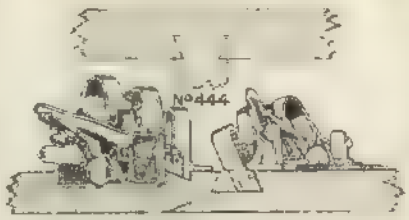
A Matching Plane, Match, Sash, Beading, Reeding, Fluting Hollow, Round, Plows, Rabbet and Filleter, Dado Slitting and Circular Plane Combined in One. Nickel plated Cast Iron Frame. Mahogany Finished Handle. Steel Adjusting Screws, with 52 Tempered, Sharpened Polished Steel Assorted Cutters. Wt., Abt. 16 Lbs.

Each

No. 55—One in a hardwood slide-cover box **$45.25**

Consists of Main Stock with Two Sets of Transverse Sliding Arms, Depth Gauge Adjusted by Screw, Slitting Cutter with Stop, Sliding Section with Vertically Adjustable Bottom, Auxiliary Center Placed in Front of Cutter, as Extra Support, or Stop, when Needed. Bottom Adjusted Both Vertically and Laterally. One Fence has Lateral Adjustment by Means of Screw for Extra Fine Work. Fences Used on Either Side of Plane. Rosewood Guides. Tilted to Any Desired Angle, Up to 45 Degrees. Other Fence Reversed for Center Beading Wide Boards. Adjustable Stop Used in Beading Edges of Matched Boards is Inserted on Left Hand Side of Sliding Section.

DOVETAIL TONGUE AND GROOVE



Dovetail Tongue and Groove Formed Where the Width of Work is More Than ¾ In. or Where Depth of the Groove is Not More Than ⅝ In. Three Sizes of Cutters Furnished for Forming Grooves. Smaller Sizes for ¾ and ⅝-in. Boards. Medium Size for ¾ and 1-in. Boards. Large Size for 1 to 2-in. Boards. One Size Cutter will Cut Any Size Tongue. Nickel-plated Frame. Length, 9½ Ins. Packed in Hardwood Box, 10½ x 5½ x 5 Ins.

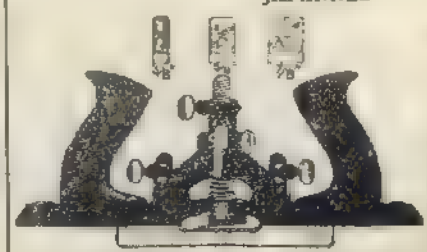
Each

No. 444—Wt., Complete, 6 Lbs. **$19.80**

One in a box. Complete directions with each plane.

DOOR TRIM

JAPANNED



Will Make Mortises for Butts, Face Plates, Strike Plates, Escutcheons, etc., up to a Depth of ⅝ and a Width of 3 Inches. Original Features—Method of Mortising. Cutter. Work Can be Instantly Set to Work from Either End of Plane or Across it. In Addition, Cutter is Cushioned by Spring Which Prevents Taking a Heavier Chip than can be Easily Carried. Fence Regulates Position of Cut and Insures Sides of Cut Being Parallel. Depth of Cut is Governed by a Positive Stop. By Removing Fence and Loosing Cutter Post with Thumb Screw Instead of Using Spring, a Very Superior Router Plane is Obtained. Bottom is Designed so that an Extra Wooden Bottom of any Size Desired can be Screwed on, Enabling User to Router on Larger Openings. Three Forged Steel Cutters, ⅛, ¼ and ⅜ Inch Wide, are Furnished with Tool.

Each

No. 171—Length, 9 Inches. Weight, 3 Lbs. **$9.50**

One in a box

COLDWELLS MOTOR LAWN MOWERS

Equipped With 4-Cylinder Continental Motor, Mayo Radiator and Hood and Coldwells Demountable Cutting Unit

COMBINATION ROLLER

MODEL J

Equipped with the latest up-to-date type of motor, transmission and cooling devices. All materials used throughout, workmanship and finish are of the best. The amount of weight on the rollers is just right, which has been determined by years of experience, and it is so simple that the ordinary laboring man can be taught to operate in a few hours.

Guaranteed to do the work of three men with three horse mowers. It is much lighter than any other "ride type" motor lawn mower ever manufactured.

LAWN MOWER AND ROLLER COMBINED

MODELS G AND H

A Lawn Mower and Roller Combined

Can be operated and cared for by ordinary laborer, and handled as easily as a hand mower. Operating handles are used for guiding the machine and raising and lowering cutter unit over obstacles. Equipped with differential gears; no brakes necessary for going down hill. Direct chain drive, friction clutch, multiple disc type. All bearings have direct lubrication from either oil or grease cups.

HORSE LAWN MOWERS

*FENDEN

Four revolving blades ⅞-inch thick, made of the best knife steel, vanadium crucible analysis, oil tempered. Drive rollers, 15 inches; reel, 8 inches diameter.

Frame construction is the strongest that is possible to build and is reinforced at each end with heavy steel bars. All parts accurately machined and fitted. Equipped with the only graduated raising and lowering device, enabling the operator to instantly adjust the cutting height from ½ to 2¼ inches, or allow the knives to pass over a stone.

The bottom knife, revolving reel, and iron roller are demountable without disturbing the frame of the mower. Reel bearings turn in adjustable split brass bushings. Double riveted malleable reel braces throughout.

Fitted with a train of three gears and durable triple pawl ratchets. Reel is quickly adjusted to bottom knife.

Can be furnished with five revolving knives and bottom knife with upturned edge or lip.

Fully equipped with drivers seat, shafts and side-draft attachments.

Finish, dark green and empire red; decorations, gold.

Width of cut, inch	30	35	40
Gross weight each, lbs	645	710	760
Each	$225 00	250.00	275 00

*CRESTLAWN PONY STYLE

Four revolving knives of finest crucible steel, oil tempered and self-sharpening. Drive wheels, 11 inches high; width of cut, 30 inches; reel, 6 inches in diameter; reel axle, ¾-inch. Double riveted malleable reel braces.

Has an automatic interlocking adjustment which cannot be jarred nor twisted out of alignment. The reel has self-adjusting ball bearings.

Patented horse attachment that can be adjusted quickly and in such a manner that in operation the mower is held to the ground. The draft of the mower is just the same as when operated with the handles.

Finish, light green and gold bronze; decorations red.

Shipping weight, lbs	150
Each	$80.00

DUNHAM LAWN ROLLERS

Drums of heavy sheet steel with seams welded. Weights keep the handle in an upright position. Rollers can be filled with water or sand; when filled with sand the roller weighs about 50 per cent more than when filled with water.

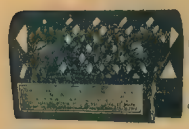
No.	WB 5
Diameter, inch	18
Length, inch	24
Sections	1
Weight, empty, lbs	85
Weight, filled with water, lbs	300
Each	$26.00

CAPITOL LAWN TRIMMER AND EDGER

Cuts every blade of grass left by the lawn mower close to the walk and fences. Cast iron wheel 8¼ inches in diameter with 1¼-inch face. Cylinder 5 inches in diameter with four crucible steel blades, hardened and tempered in oil.

Width of cut, inch	6
Extreme width, inch	13¼
Shipping weight each, lbs	20
Each	$15.00

OSBORN LAWN MOWER SHARPENER



Simple, practical and easily operated. Always ready for use. Will fit any lawn mower blade. Files made of high grade steel, with four cutting edges. Groove of sharpener follows the curve of reel blade.

To operate, place the short side of groove on the bevel side of the blade.

Tuscan bronzed cast iron holder, held together by two machine screws. ¼-inch square double cut file.

Length, inch	8¼
Width, inch	2⅛
Weight per dozen, lbs	8
Per dozen	$10.00

*For shipment from factory only.

One dozen in a display box.

LAWN MOWERS

BALL BEARING
FULLY WARRANTED

Five blades, 10½-inch drive wheels, open spokes. Finish, egg shell enamel, gold bronze and brilliant colors.

The design is the most attractive that is possible to produce and permits of the mower being so lightly constructed where strength is not needed that its weight is materially less than other high grade mowers, adding to the easy running qualities of the ball-bearing features, parts and joints carefully machined and reinforced shoulders are turned on the shrub guard forming a strong frame construction. On the ends of this heavy shaft or shrub guard, which pass through the side plates, are mounted the ball-bearing drive wheels. Hence, the strain caused by the wheels in motion falls on the shaft and not on the side plates, as in the ordinary type of mower where the wheel spindles are a part of the cast sideplates. Self adjusting. Five revolving blades of vanadium crucible steel. Oil tempered stationary blade has upturned lip or edge, cutter bar adjusted by top and bottom screws, extra wide case, hardened pawls.

Size, inch	14	16	18	20
Gross weight each, lbs.	59	63	65	68
Each	$25.50	26.50	27.50	28.50

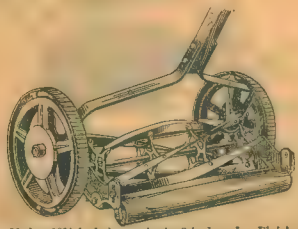
CRESTLAWN
BALL-BEARING

Five blades, 11-inch drive wheels, 6-inch reel. Finish, silver and gold bronze; decorations, empire red.

The wheels as well as the revolving knives turn on ball-bearings. Cutter bar is secured to the four-squared rigid frame by a patented interlocking adjustment that is absolutely impossible to be knocked or twisted out of alignment. Blades of razor steel, tempered in oil and self-sharpening. A ¾-inch reel shaft and double riveted end spiders prevent the reel from being sprung and adds increased momentum.

Size, inch	14	16	18	20
Gross weight each, lbs.	62	64	66	68
Each	$26.00	27.00	28.00	29.00

HERCULES
BALL BEARING



Five blades, 10½-inch drive wheels, 6-inch reels. Finish, white enamel frame and reel, gold enamel wheels with green center and green handle irons; decorations, red.

This mower is attractive and permits of being lightly constructed where strength is not needed, and its weight is materially less than that of any high-grade mower on the market. Each point of construction has been tried out individually in other styles and are combined with patented features, such as self-adjusting ball bearings and steel wheel mountings.

Blades of vanadium crucible steel, oil tempered. Stationary blade has upturned lip or edge. Cutter bar adjusted by top screws on each side of pivotal point. Extra wide case-hardened pawls, insuring a ratchet of long life and durability.

Size, inch	14	16	18
Gross weight each, lbs.	62	64	66
Each	$21.00	22.00	23.00

FENDEN
BALL-BEARING

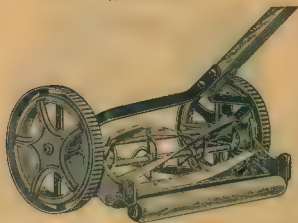
Four blades, 10½-inch drive wheels. Finish, dark green with white enamel wheels; gold trimmings.

An attractive light-weight, ball bearing mower. Shoulders are turned on the shrub guard, forming a strong frame construction. On the ends of the heavy shaft or shrub guard, which pass through the side plates are mounted the ball-bearing drive wheels. Hence, the strain caused by the wheels in motion falls on the shaft and not on the side plates, as in the ordinary type of mower where the wheel spindles are a part of the cast side plates. Blades of vanadium crucible steel, oil tempered, self-adjusting and self-sharpening. Cutter bar adjusted by top and bottom screws.

Size, inch	14	16	18
Gross weight each, lbs.	55	58	61
Each	$24 50	25.00	26.50

LAWN MOWERS

ADMIRAL
BALL-BEARING



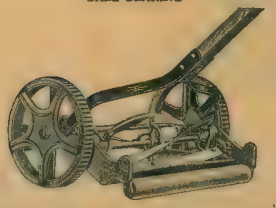
Four blades, 10½-inch wheels, 6-inch reels. Finish, gold bronze and blue; decorations, silver bronze and blue.

A strictly high grade mower, and one of the most beautiful and graceful designs ever produced. The shrub rod runs through the center of the mower, forming an axle for the wheels. All wood parts are of carefully selected stock and lacquered to protect from weather. Accurately fitted and adjusted throughout. Screw adjusting.

Blades of highest grade crucible steel, oil tempered, spirally formed and self-sharpening.

Size, inch	14	16	18
Gross weight each, lbs	48	51	54
Each	$18.00	19.00	20.00

DIRECTOR
BALL BEARING



Four blades, 9-inch wheels, 5¼-inch reels. Finish, red and gold; decorations, gold and silver.

This mower is very graceful in outline, and very easy running. Perfectly machined and fitted and parts are interchangeable. Screw adjusting cutter bar. The ball bearing cones are made of best quality tool steel and tempered glass hard. Automatically adjusted.

Blades of highest grade crucible steel, spirally formed and self-sharpening, which are attached to the reel shaft by means of malleable iron spiders. Shaft is made of cold rolled machinery steel.

Size, inch	12	14	16	18
Gross weight, lbs	40	42	45	50
Each	$15.50	16.00	16.50	17.00

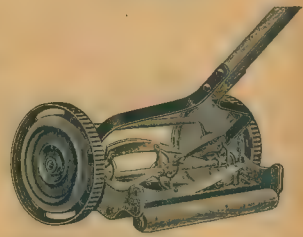
PARAGON
BALL-BEARING

Four blades, 8½-inch wheels; 5½-inch reels. Finish, gold and aluminum bronze; decorations, green.

Semi-open type, light and easy running. A smaller ball-bearing mower that would give better satisfaction could not be built. Every bearing is accurately machined and all material is carefully selected. Blades of high-grade crucible steel, oil tempered and water ground. All ball bearing parts automatically adjusted.

Size, inch	10	12	14	16
Gross weight each, lbs	38	40	42	44
Each	$14.50	15.00	15.50	16.00

BABY GRAND
BALL-BEARING



Four blades, 8-inch wheels; 5¼-inch reels. Finish, aluminum and gold; decorations, blue.

An attractive light-weight, ball-bearing mower. Suitable for owners of small lawns. Accurately fitted; strongly made and has full screw adjustment. Ball-bearing parts are automatically adjusted. All material is first-class. Cones are of tool steel, tempered glass hard. Blades of high quality knife steel ground under water.

Size, inch	10	12	14	16
Gross weight each, lbs	38	40	42	45
Each	$14.50	15.00	15.50	16.00

LAWN MOWERS

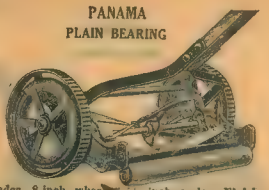
CLOVER LEAF
PLAIN BEARING

Three blades, 8-inch wheels; 5½-inch reels. Finish, apple green and gold bronze; decorations, green.

New and attractive design. All parts are machined and fitted to insure accurate construction. Screw adjustments throughout. The reel shaft is made of machinery steel and has adjustable brass bushings for taking up wear. Blades of high-grade blade steel, carefully tempered and spirally formed.

Size, inch	10	12	14	16
Gross weight each, lbs.	38	40	42	44
Each	$12.50	13.00	13.50	14.00

PANAMA
PLAIN BEARING



Three blades, 8-inch wheels; 6½-inch reels. Finish, gold bronze and green.

Guaranteed to be the best and most attractive, low-priced mower ever made. Very light in weight, yet strongly constructed. All connecting points carefully milled to exact dimensions. Shoulders are machined on each end of cross-rod to produce a rigid frame. Blades of crucible steel, thoroughly tempered. The reel is equipped with brass bushings and a locknut device for taking up wear. Screw adjusting.

Size, inch	10	12	14	16
Gross weight each, lbs.	38	40	42	44
Each	$12.50	13.00	13.50	14.00

GRASS CATCHERS

EASY EMPTYING

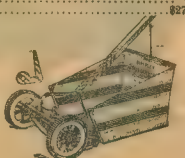
GEM
Smooth Bottom

Made similar to No. 18G, but a trifle smaller and from lighter materials. Fits any lawn mower 12 to 18 inches wide. Square back. Smooth galvanized sheet metal bottom. Duck sides, 16¼ inches deep, 17 inches wide.

No.	16 G
Weight per dozen, lbs.	40
Per dozen	$27.50

SIMPLEX

Made with canvas sides and galvanized iron bottom. Fits all makes of lawn mowers.



Nos.	1	2
For mowers, inch	12, 14, 16	16, 18, 20
Weight per dozen, lbs.	55	60
Per dozen	$24.00	26.00

FAVORITE

Galvanized steel wire frame, with white canvas body, instantly attached or detached. Will fit any mower. Galvanized iron bottom. Perforated to prevent grass from slipping.

Nos.	11	12
For mowers, inch	12 to 16	16 to 20
Length, inch	20	21
Width, inch	16	19
Depth, inch	13	13
Weight per dozen, lbs.	38	40
Per dozen	$22.00	23.00

CHIEF

A good serviceable catcher made of canvas. Fits all makes of lawn mowers.

Nos.	1	2
For mowers, inch	12, 14, 16	16, 18, 20
Gross weight per dozen, lbs.	30	30
Per dozen	$18.00	20.00

REPAIRS FOR F. & N. LAWN MOWERS

Always give number or letter with description of parts wanted, size and name of machine; if broken part is lost, give number of corresponding part and complete description. The terms "right" and "left" are used with relation to the position of the operator when using mower. Be sure and give diameter of drive wheel.

FORD SPECIALTIES

REBOUND CHECK AND SHOCK ABSORBERS

BURGESS

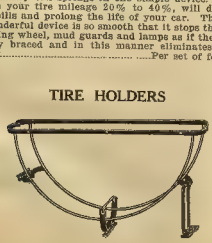
Front View

Rear View.

For Ford Cars

New Model—With all improvements. Large Coil Springs with Rubber Caps. New arrangement of shackle makes them doubly effective both as a shock absorber and as a rebound check. Quickly applied without drilling or altering car in any way. Requires only one wrench, which is furnished with each set. Absorbs vibration and makes a Ford the easiest riding car. You can ride cobbles or rough country roads in absolute comfort. This combination of Rebound Check and Shock Absorbing Auxiliary Springs merges the action of both devices. The Burgess Rebound Check and Shock Absorber combines the action of the friction, snubbing and auxiliary coil springs in one simple device. They will increase your tire mileage 20% to 40%, will decrease the repair bills and prolong the life of your car. The action of this wonderful device is so smooth that it stops the vibration of steering wheel, mud guards and lamps as if they had been specially braced and in this manner eliminates noise and rattling..... .....Per set of four, $20.00

TIRE HOLDERS



For Running Boards

No. 175—For two tires. Weight, 6¾ lbs. ...Each, $4.00

TIRE HOLDERS

M'KINNON

For Five-Passenger Fords

No. 180—For one tire. Weight, 13¾ lbs.....Each, $6.00

Made of steel, electrically welded. Light weight, yet strong and durable. For the rear of Ford cars. Quickly and easily attached. Smooth welded joints cannot cut or injure the tire. Nothing to break or get out of order. Guaranteed to give satisfactory service under all conditions.

Designed to carry tail light and license pad. Have simple locking device to prevent theft. Can be used for any 30x3½ in. tires with or without covers or demountable rims. Finished in black Japan, carefully baked on.

For Extra Wheels

No. 181—Weight, 14 lbs.. .... .Each, $7.00

Made of steel, electrically welded. Light weight, yet strong and durable. To attach to rear of Fords. Will carry extra wire or wooden wheel quite as well as an extra tire with or without demountable rim. A truly universal holder. Can be used for any Ford tire equipment excepting 31x4 in. oversize.

All welds on the outside. Cannot injure the tire, yet holds it securely. Has simple locking device to prevent theft.

Designed to carry tail light and license pad. Finished in black japan carefully baked on.

STEERING WHEELS

De Luxe—17 in Wheel, Aluminum Spider, Corrugated Walnut Rim . . . . . Each, $8 00

FORD FELT WASHERS

A complete set of all the Felt Washers in a Ford car. Best quality hard felt used in their manufacture. This lot of Washers put up in a salable package as shown. Twenty Washers in a package

Ford Felt Washers ..... Per Package, $1.00

BAILEY BALL THRUSTS

The chief cause of rear axle trouble can be attributed to the flat thrust washers used in the Ford and Chevrolet 490 differentials. These washers are the means of keeping the teeth of the pinion gear in proper mesh, but because of their flat surface they can have only a sliding contact and rapidly wear thin, according to load and road conditions imposed. When flat thrust washers have worn thin enough a break occurs. But the Bailey Ball Thrust Bearing, replacing the flat thrust washers at the left (gear) side of the differential, is the obvious remedy for the difficulties caused by flat washers.

The Bailey Bearing is an exact replacement, made to fit to the thousandth part of an inch. Is made of the finest materials, carefully heat treated and ground, has eighteen ¼-inch balls of the highest type and because it has a capacity for six times the maximum, will always keep gears in proper mesh, make them run smoothly and last indefinitely. The Bailey Ball Thrust Bearing will not wear thin, and because they render the maximum service in efficiency they promote prestige for the man who installs them and create satisfied customers, who appreciate the additional vitality to their car in having installed a bearing that remedies rear axle difficulty, even though the cost is more than usual.

Dealers, garagemen and repairmen who insist upon installing the flat thrust washers commonly used, deny themselves the opportunity to a greater source of satisfaction and profit obtainable only through installing Bailey Thrust Bearings. No car owner will complain of the higher cost of an article that eliminates the unusually expensive rear axle breakdown.

Bailey ..... Each, $3.75

FORD SPECIALTIES

K-W. AUTOLOCK SWITCHES

Prevents theft and unauthorized use of car. Locks units. Cannot be wired around or the motor started even if screws are taken out. Saves insurance, loss, inconvenience and worry.

K-W ... . Each, $4.00

K-W. FORD COIL UNITS

The reliability and efficiency of the K.-W. Coil Unit is known wherever Ford cars are used. Over 6,000,000 in use. Equipped with K.-W. Tungsten Contact Points

K-W. . . . . Each, $3.50

K-W. TUNGSTEN CONTACT POINTS

For use on K.-W. Ford Coil Units. Needs no introduction to Ford owners. Points made of new "Sparkite" metal. Better than Tungsten or Platinum. Better and hotter sparks at low or high speeds. Made of solid metal and is larger in size. More efficient and has longer life.

K-W.. .. . . Per pair, $0.50

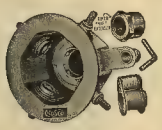
TIMERS

BEMUS



For Ford Cars

Contact is made by a hardened tool-steel brush engaging steel balls with short, glancing impacts, both the brush and the balls turning each time so that fresh contact surfaces are continually engaged.

Insulation—The shell of the Bemus is molded in one piece of an insulating material of great strength and toughness, impervious to any amount of heat, cold, moisture or grease. The handle is reinforced with a steel bushing molded into the material. Into this insulator shell the four contact sockets are threaded and held firmly in position with lock washers.

Bemus—In cartons. Weight, 10 oz. ..... Each, $3.00

MOSCO

For Ford Cars

The case is made of extra heavy pressed steel, finished in aluminum. Gray bone fibre is used for raceway, with steel inserts dovetailed in and all lathe finished to a polished surface. The threaded terminals are insulated by fibre washers all the way thorugh to contact points, thus removing cause of short circuiting common to this style of timer.

Mosco—Weight, 9 oz. ..... Each, $2.00

One in a carton.

MILWAUKEE

For Ford Cars

The Milwaukee Timer fits all Fords from late 1912 to 1920 models, inclusive. Also fits Fordson tractor.

The Milwaukee Timer case is a one-piece steel stamping, fitted with an insulating ring of high-grade Egyptian gray fibre, extra wide and deep.

The brush assembly is carefully machined and the roller is so fitted that it always bears squarely on the contacts, insuring a hot spark correctly timed. The spring used is made of high-grade piano wire. The roller is high-carbon tool steel, machined, hardened, ground and polished.

No. 18—Weight, 10 oz. ..... Each, $2 25

One in a carton.

Brush Assembly for Milwaukee

No. FT19 ..... Each, $0.85

Minute Demountable Wheel For the Ford Car

A Great Improvement over the Demountable Rim in Every Way

ONE minute is all the time a driver needs in changing a tire with a Minute Demountable Rim. The operation is so simple that he can do it in the dark. The removal of one large nut on hub is all that is required. Here are the uses of this new and practical wheel: One wheel with extra flange, fitted with strong powerful driving lugs—a set of four hubs interchangeable, to replace the Ford hubs and the minute wrench.

Extra Strong, Powerful Driving Lugs.

The present Ford Wheels are retained but new hubs and an extra flange are supplied adding greatly to the strength of the wheels. This wheel can be carried on regular tire holder. Weight no more than demountable rim.

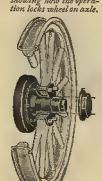
Note the strength shown in the rear hub. Ideal for Ford Trucks.

The two front hubs—interchangeable, to replace Ford hubs. Built for strength and wear.

Rear hub—note weight is here, not in run of wheel which is a decided tire and power saver.

Cross section of wheel showing how the operation locks wheel on axle.

This is the Minute wrench which is the only tool a driver needs to remove wheel.



The Demountable Wheel is the natural evolution of the demountable rim. Tire changing is so easy with it that not only does it remove all the uneasiness and annoyance of possible tire troubles but the Ford owner will get the last mile possible out of a tire.

A booklet, "The Minute Wheel," describing the advantages of this time and trouble saver, will be sent on request. Send for it. Ford owners will be glad to get it.

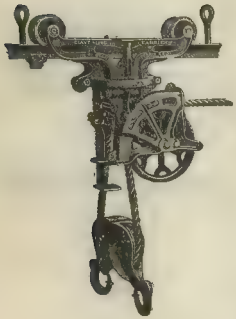
SEATTLE HARDWARE COMPANY

HAY CARRIERS

THE HARVESTER HAY CARRIER

Reversible Sling Carrier.



HARVESTER GIANT SLING CARRIER

Roller Bearing for Star Double Flange Steel Track

Extra Heavy and Extra Strong, Designed for Heavy Work; Is of Simple Design and of Few Parts. The chance of its getting out of order is very slight. It is practically trouble-proof.

It is a Reversible Carrier and will take in Hay from either End or Both Ways from the center of the barn.

It is so constructed that the load hangs directly beneath the center, and the loaded carrier is evenly balanced. This distributes the load evenly to all four tracker wheels. It gives an even bearing on both sides of the track so that the carrier operates easily and smoothly.

SPECIFICATIONS

Frame—Best grade malleable iron, fully reinforced. Extra heavy and large so as to distribute the load over a large section of the track.

Wheel Base—17½ inches from center to center of tracker wheels.

Tracker Wheels—Grey iron. 3 inches in diameter. Wide flange.

Axle—Lathe-turned steel axle, made by automatic machinery.

Sheave—9½ inches in diameter. Best grey iron.

Sheave Bearings—This Carrier is fitted with special extra long roller bearings, contained in a housing.

Sling Pulleys—The sling pulleys provided with this carrier are Harvester Long Neck Pulleys. These pulleys are made with a malleable frame of improved design, provided with automatic closing hook. The sling or fork snaps into this hook and can easily be detached, but it cannot possibly be detached by accident. The hooks are large enough to be used in connection with any style or make of rope or slings or any style of fork. A wide throat with rounded edges prevents wear on the rope.

Automatic Rope Gripping Device—This Carrier is provided with a gripping device or lock which has a long gripping surface. This gripping surface conforms to the circle of the large wheel. When the hoisting rope is slackened the gripping surface travels with the wheel and sets gradually. This does not mean that the rope slips through the grip, but the grip travels with the rope and clamps firmly at the point where it first takes hold, without chafing or wearing the rope. The extra long gripping surface naturally insures a firm and safe purchase on the rope and holds it securely without chafing.

The small rope attached to the lever as shown in the illustration releases the grip on the draft rope and allows the sling to return to the load.

Rope—¾-inch, ⅞-inch or 1-inch rope may be used. ⅞-inch pure manilla rope recommended for best results.

Directions—Directions for installing sent with each carrier.

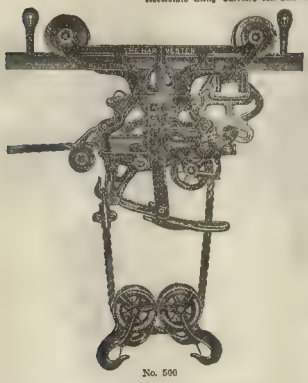
Finish—Gray enamel, trimmed in red.

	Each
No. 687—Weight Each about 57 Lbs.	$19.50

Full Set of Directions and Illustrations, Explaining the Simple Manner in which this Carrier is Roped and Operated, is Sent with Each Carrier and Mailed upon Application.

THE HARVESTER SLING HAY CARRIER

Reversible Sling Carriers for Star Double Flange Steel Hay Carrier Track



No. 500

SPECIFICATIONS FOR NO. 500

Frame—Best Grade Malleable Iron, fully reinforced, extra heavy and long wheel base so as to distribute the load over a greater portion of the track.

Wheel Base—17½ in. center to center of tracker wheels.

Tracker Wheels—Best Gray Iron, 3 in. in Diameter at the Tread, Wide Flange, Hub Drilled to take Steel Axle.

Axle—This is a Lathe-turned Steel Axle made by the most Modern Automatic Machinery.

Sheaves—Two in number, made of Best Gray Iron, Drilled to take Steel Axles. Frame of large sheave is hinged to rope gripping lever allowing sheave to adjust itself in line of draft, thus preventing rope chafing over edge of sheave.

Sling Pulleys—Malleable Frame of Improved Design. Extra Wide Flanges with Rolled Edges, preventing chafing of draft rope. Pulley hooks are large enough to be used in connection with forks. The hooks on our sling pulleys are fitted with a self-locking device, preventing slings or forks from becoming detached except at will of operator.

Lock—Five in. Malleable Iron Rope Grip so constructed that when pulleys strike tripping arm the lock slides forward and grips rope without chafing it and at the same time locks it securely. This operation automatically releases car from trip block. The heavier the load the greater the tension on the lock, with the result that it is impossible for the rope to slip through the lock. It is also arranged with a special trip rope by the use of which the load may be carried into the mow at any desired elevation.

Trip Block—Made of Best Malleable Iron, of special design, with a depression on the under side bolting over a rivet head on the track, thus making it absolutely impossible to loosen.

Rope—This Carrier is designed for use with rope only and we recommend ⅝ in. or ¾ in. Pure Manila as being the most serviceable.

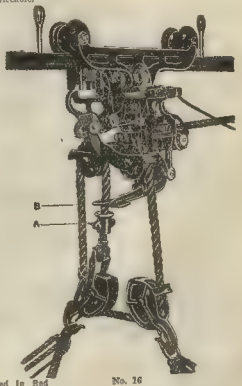
SPECIFICATIONS FOR NO. 16

Has the same Frame, Wheel Base, Tracker Wheels, Axle, Pulleys, Lock, Trip Block, etc., as shown in Specifications for the No. 500.

This Carrier was Especially Designed to be used by those wishing to operate a Sling Hay Carrier in Connection with the Triple Draft of Purchase.

With each Carrier is furnished an Adjustable Trip Casting as shown in the illustration, which is Fastened at Any Point on the Rope.

While the load is being elevated to the desired height the Carrier is held rigidly at the Trip Block. By the use of the Adjustable Trip, the Carrier is Automatically Released when the Load is at the Desired Height. Carrier is also equipped with a Special Trip Rope which may be used to Release Load at any time



No. 16

Aluminum Finish, Trimmed in Red

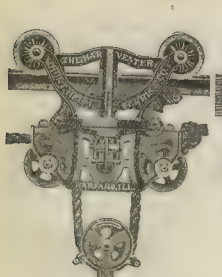
	Each
No. 500—Weight Each About 55 Lbs	$18.00
No. 16—Weight Each About 49 Lbs	14.50

Full Set of Directions and Illustrations, Explaining the Simple Manner in which this Carrier is Roped and Operated, is Sent with Each Carrier and Mailed Upon Application

HAY CARRIERS

THE HARVESTER HAY CARRIER

Reversible Fork Carrier



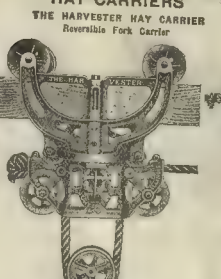
No. 502

FOR STAR DOUBLE FLANGE STEEL TRACK

This Carrier is fitted with an extra wide open mouth for engaging the fork pulley, which locks and holds the load no matter at what angle pulley enters the Carrier

Wheel Base—11½ inches, Center to Center

Tracker Wheels—Best Grey Iron, 3 inches in diameter at the tread, wide flange hub, drilled to take steel axle.



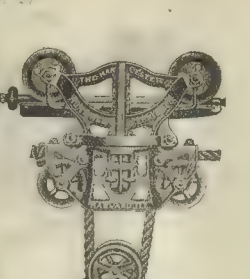
No. 503

FOR WOOD TRACK

Similar to No. 502, except that trucks and tracker wheels are especially designed for **Wood Track.**

Wheel Base—12 inches from Center to Center.

Tracker Wheels—Best Grey Iron, 3 inches in diameter at the tread, with wide flanges, and hubs drilled to take steel axle.



No. 504

FOR CABLE TRACK

Similar to No. 502, except that Carrier is fitted with trucks and trackes wheels designed for ⅞ **in. Cable.**

The Trip Block swings loose on the track and stands directly under the table under all conditions It can be located at any desired point on the cable or it can be detached from the track without taking the track down.

SPECIFICATIONS

Frame—Best Grade Malleable Iron, fully reinforced.

Finish—Aluminum, Trimmed in Red

Star Nut Lock—Special Star Feature used to prevent the frame bolts from working loose This is an exclusive feature of all Harvester Carriers and insures absolute rigidity

Wheel Base—11½ inches, Center to Center.

Tracker Wheels—Best grey iron, 3 inches in diameter at the tread, wide flange hub, drilled to take steel axle.

Axle—This is a lathe-turned axle, made by the most modern automatic machinery.

Sheaves—4 inches in diameter. Best grade grey iron, drilled to take steel axle.

Sheave Bearings—Special automatically lathe-turned steel bearing, much superior to the bushing and bolt ordinarily used.

Sling Pulleys—May be used in place of fork pulley, allowing use of slings when desired.

Fork Pulleys—Latest design, mounted in heavy frame which is reinforced at locking portion. All fork pulleys are supplied with sister hooks for holding fork, including a universal freedom of movement Fork Pulleys are furnished with rope guards, making it impossible for rope to leave the sheave.

Sister Hooks—Special feature with all Star Carriers. Constructed of two Malleable Iron Castings, swiveling on steel bolt. By the use of these Hooks a fork may be quickly detached. Clevis.

Lock—Improved type of gravity lock No springs to rust out or break This lock embodies the double grapple principle, permitting pulley to enter at any angle and holding it securely. Simple in construction and positive in action.

Trip Block—Made of best Malleable Iron of special design, with a depression on the underside bolting against the I beam on the track, thus making it absolutely immovable to locate.

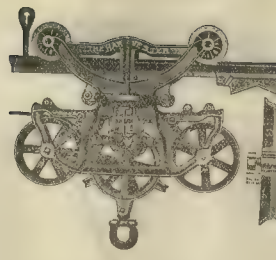
Rope—This Carrier is designed for use with rope and we recommend ¾ to ⅞ inch pure Manila as being the most serviceable.

	Each
No. 502—For **Star Double Flange Steel Track;** Weight, About, 35 Lbs.	$10.50
No. 503—For **Wood Track;** Weight, About, 35 Lbs.	10 50
No. 504—For **Cable Track;** Weight, About 35 Lbs.	10.50

Full Set of Directions and Illustrations, explaining the Simple Manner in which Carrier is Roped and Operated, is Sent with Each Carrier and Mailed Upon Application

HAY CARRIERS

THE HARVESTER HAY CARRIER
Sheaves Grooved for Either Rope or Cable



SPECIFICATIONS

Frame—Best grade Malleable Iron, fully reinforced.
Finish—Aluminum, trimmed in red.
Star Nut Lock—Special Star Feature used to prevent the frame bolts from working loose. This is an exclusive feature of all Harvester Carriers and insures absolute rigidity.
Wheel Base—15½ inches, center to center.
Tracker Wheels—Best gray iron, 3 inches in diameter at the tread, hub drilled to take special steel axle.
Axle—This is a lathe-turned steel axle made by the most modern automatic machinery.
Sheaves—7 inches in diameter, best gray iron, drilled to take steel axle. The three large sheaves on this Carrier are grooved for ⅝ inch rope or ½ inch wire cable, as desired.
Sheave Bearings—Eleven ⅝ inch steel roller bearings, revolving on ⅝ inch steel shoulder pin.
Fork Pulleys—Improved design, fitted with a ¾ inch roller bearing sheave and sister hook.
Sling Pulleys—May be used in place of fork pulley, thus allowing use of slings when desired.
Sister Hook—Special feature with all Star Carriers. [illegible] of two Malleable Iron Castings, swiveling on steel bolt [illegible] of this hook, the fork may be quickly detached. Much sup[illegible] ordinary hook and clevis
Lock—Improved type of gravity lock. No springs to rust out or break. This lock embraces the double grapple principle, permitting pulley to enter at any angle and holding it securely. Simple in construction and positive in action.
Trip-Block—Made of best Malleable Iron, of special design, with a depression on the under side bolting over a rivet head on the track, thus making it absolutely impossible to loosen.
Rope—This Carrier is fitted with sheaves so designed that it may be used with either ¾ inch or ⅝ inch Manila rope or ½ inch wire cable and without any changing of the Carrier.

No. 493—For **Star Double Flange Steel Track**; Weight, About, 48 Lbs. ..... Each $13.50
No. 494—For **Wood Track**, Otherwise same as above, excepting has Wheel Base of 15¾ in., and Tracker Wheels are 4 in. Diameter; Weight, About, 50 Lbs. $13.50
No. 496—For **⅝ in. Cable Track**, Otherwise same as No. 493; Weight, About, 54 Lbs. 13.50

STAR CROSS DRAFT SLING HAY CARRIER
Adjustable to All Standard Makes of Track

This Carrier is called "Cross Draft" from the fact that the draft rope runs from the carrier across the barn direct to the team, at a saving of considerable rope as compared with the old method, thus lessening the friction to a minimum. The Cross Draft Carrier, having so few parts, lessens to the extreme the probability of its getting out of order.

Adjustment—This Carrier is so constructed that it can be adjusted to fit other steel hay carrier tracks. This is done by turning the right and left hand tread bolt near center of carrier legs as shown. The Star Cross Draft Carrier is the only Carrier where the working parts are hinged on the adjusting bolt of the carrier in direct line with the load, thus keeping ropes perfectly straight and free, preventing binding and cutting. The legs of this Carrier oscillate on the adjusting bolt, thus allowing every wheel to carry its part of the load. The oscillating or swinging feature allows Carrier with load to pass over an obstruction or full mow without additional strain on track or Carrier.

SPECIFICATIONS

Frame—Best grade Malleable Iron, fully reinforced. Extra heavy and long so as to distribute the load over a greater portion of the track.
Finish—Royal Blue, Gold Bronze Trim
Wheel Base—16½ inches center to center of tracker wheels.
Tracker Wheels—Best gray iron, 3 inches in diameter at the tread, wide flange, hub drilled to take steel axle.
Axle—This is a lathe-turned steel axle made by the most modern automatic machinery.
Sheave—Six inches in diameter, best grade gray iron, drilled to take large steel bearing
Sheave Bearings—⅝ inch steel bearing
Sling Pulleys—Malleable frame of improved design. Extra wide flanges with rolled edges, preventing chafing of draft rope. Pulley hooks are large enough to be used in connection with any style or make of rope or chain slings, or in connection with forks. The hooks on our sling pulleys are fitted with self-locking device, preventing slings or forks from becoming detached except at will of operator.
Automatic Rope Gripping Device—This Carrier is provided with a gripping device or lock having 4 inch gripping surface and curved to conform to circle of large sheave. When hoisting rope is slackened, locking device travels with sheave thus clamping rope securely and with absolutely no chafing. The small rope attached to the lever as shown in illustration, when pulled, releases grip on draft rope and allows slings to return to load.
Trip Block—No trip block is used with this Carrier, it being unnecessary as the draft rope pulls at right angles to the track.
Rope—This Carrier is designed for use with rope only and we recommend ¾ inch or ⅝ inch pure Manila as being the most serviceable

No. 575—Cross Draft Sling Hay Carrier; Weight, About, 21 Lbs. ..... Each $19.50
Full set of directions and illustrations explaining the simple manner in which this Carrier is roped and operated, is sent with each Carrier and mailed upon application

STAR DOUBLE FLANGE STEEL HAY CARRIER TRACK AND FIXTURES

No Tools required to erect this Track in the Barn except a Wrench and Hammer. No Drilling or Punching necessary to fit the Splice; it is all done before leaving the factory

STAR DOUBLE FLANGE STEEL TRACK

Per Foot

No. 142—With Rivets 9 in. Apart, Outside Dimensions, 1⅝x 1¾ in.; Carried in 6, 8 and 10-Foot Lengths . . . $0 30

Weight, 1½ Lbs. Each

SPLICE BLOCKS

Each

No. 143 For Double Flange Steel Track. $0 60

Weight, 1½ Lbs. Each

STOP BLOCKS

To every Hay Carrier is Attached Two End Stops or Stop Blocks, same as shown above, which are furnished Gratis as it is therefore not necessary for a Dealer to handle any separately

STEEL TRACK HOOKS

For Hanging Star Double Flange Track

Per Dozen

No. 148 Malleable Iron: 5¼ in Long $2 10

Weight 4 Lbs. per Dozen

V END HANGERS

This Hanger is used to support Steel Track when hay is taken in at the end of barn.

Per Dozen

No. 88 V End Hangers $3 50

Weight 14½ Lbs. per Dozen

TRACK RODS

For Use with Combined End Hangers and Stops, to prevent the Track from working endwise, or crawling.

Per Dozen

No. 72—Rod, ½x24 in.; Bolt, ½x6 in. Long. . . . $3 40

Weight 18 Lbs. per Dozen

WOOD TRACK FIXTURES

JOINTED TRACK HANGER

For Hanging Wood Track

Per Dozen

No. 83—Wrought Iron; ½ in. Diam. 14½ in. Long.....$3.00

Weight 13 Lbs. per Dozen

TRACK HANGER HOOKS

For Hanging Wood Track

Per Dozen

No. 84—14 in Long After Bent . $1 80

Weight 12 Lbs. per Dozen

RIDGE POLE HANGERS

By driving a nail in each slot, can be made secure enough to hold any track.

Per Dozen

No. 87—Best Malleable Iron: For Bridge Poles, 2x6 or 2x8 in $2 25

Weight 6 Lbs per Dozen

RAFTER BRACKETS

For Steel or Wood Tracks, Hooks and Eyes

Per Dozen

No. 128—Malleable Iron: ⅛ in Diameter at Base of Eye; 7 in. Wide from Point to Point..... $0.90

Weight 4½ Lbs. per Dozen

HAY CARRIER FIXTURES

STEEL RAFTER GRAPPLES

For suspending pulleys from rafters or beams; Much more convenient than trying to hang a pulley with a rope in the peak of a barn.

Per Dozen

No. 89—8¼ in. Spread. Cast Steel Hooks, ¾ in. Proof Chain ...$15.00

Weight 30 Lbs. per Dozen

TRACK SUPPORTING FIXTURES

For supporting Steel Hay Carrier Track at end of barn. It is important that the track at end of barn should be well supported, because the heavy pull is at this place.

Per Set

No. 73—Consists of Two Heavy, Angle Shaped Castings with Bolts; One Bar ⅛ in. Round Iron, 8 ft. Long, with Eye and Nut; Two Malleable Hangers for 2x6 or 2x8 in. Ridge Pole.....$3.60

Weight 12 Lbs. per Set

SWIVEL ROPE HITCHES AND HOOKS

One of the handiest and most useful articles in a Hay Tool Outfit; No hard knots to untie; Twisting the rope is prevented by the swivel.

Per Dozen

No. 86—Malleable Iron; Length Overall, 3¼ in.....$4.80

Weight 16 Lbs. per Dozen

Cut showing how the **Track Supporting Fixtures** are applied

SNATCH BLOCK PULLEYS

This device shortens the travel of the horse. Tie a knot in the rope and put the washer in front of it. The rope can be thrown off the pulley and thus allow the fork to be instantly returned to the load without waiting for the horse.

Per Dozen

No. 90—Snatch Pulley Block.....$16.50

Weight 60 Lbs. per Dozen

HARVESTER SLING PULLEYS

For Carriers Nos. 502, 503, 504, 493, 494 and 496

Can be used with any make of Fork Carrier, where wagon slings are wanted to replace the Fork.

Per Set

No. 553—Peerless Sling Pulleys....$4.50

Weight 10 Lbs. Each

When ordering for any Carrier than those numbered above, give **Registering Head** wanted.

FLOOR HOOKS

Used in Anchoring Pulleys in Hay Carrier Outfits

Rough Finish, Wrought Iron; Cone Point; Lag Screw Thread

Per Dozen

No. 85—⅝x8 in.....$1.80

No. 85A—¾x12½ in.....2.10

Weight, 85, 8 Lbs.; 85A, 12½ Lbs. per Dozen

HAY CARRIER RETURNER

With the use of this Hay Carrier Returner, you will have no more trouble getting the Carrier back to the Trip Block. As soon as the Hay Rope is unhooked from the whiffletree, this machine will **Draw the Carrier Back to the Trip Block, Without Any Aid,** and the Fork can be set up the time the horse has returned and is ready to draw up another load. No farmer can afford to do without it. **It will Work with Any Make of Carrier.** No weight is furnished, as it is necessary to vary this according to the length of rope used. A bag of sand will do.

It is a great labor saver, as where a returner is not used, the operator must pull the Carrier back by main force. Can be fastened to barn with nails or bolts.

Each

No. 91—Circumference Small Drum 3¼x4 in.; Large Drum 3¼x12¾ in. ⅝ in. Holes in Brackets $3.00

Weight Each About 60 Lbs.

HAY SLINGS

For Handling Fine or Coarse Hay, Straw, Corn, Stalks, Bundles of Grain, Baled Hay, etc.; To Save Time and Work to Best Advantage, Use a Set of Three Slings for One Load; When Using Double Purchase Carriers, and Set of Two Slings in Triple Purchase Carriers.

O. K. CENTER TRIP SLINGS

½ in. Rope, Loose Twist, will not Gnarl or Twist; Adjustable Take-up at Either End so that they can be Shortened or Lengthened to suit the length of Hayrack.

With Two Ropes

	Each
No. 55 —4-Foot Hardwood Bars; Weight 13 Lbs.....	$4.50
No. 55A—5-Foot Hardwood Bars; Weight 21 Lbs	7.00

With Three Ropes

No. 58 —5-Foot Hardwood Bars; Weight 23 Lbs.....	6.00

HARVARD CENTER TRIP SLINGS

½ in. Rope; Loose Twist; Made for Heavy Work. This Sling is Specially Roped, it forms a bed or net sufficient close to carry Fine Hay or Grain satisfactorily no matter how short or dry, leaving no littering.

With Four Ropes

	Each
No. 56 —5 Foot Hardwood Bars; Weight 29 Lbs ...	$7.50
No. 56A—6-Foot Hardwood Bars; Weight 33 Lbs... ...	7.50

OLSEN'S PATTERN HAY SLINGS

Made with ½ in. Loose Twist Ropes, that will not Gnarl or Kink. They have an Adjustable Takeup at one end so they can be shortened or lengthened as desired

	Each
No. 549-2—Two Rope Sling; Weight 5½ Lbs...	$2.25
No. 549-3—Three Rope Sling; Weight 5½ Lbs...	3.00

CENTER TRIP ADJUSTABLE ROPE SLING
Adjustable to Any Width

	Each
No. 480—16-Foot; Weight 7 Lbs.....	$3.40

CHAIN HAY SLINGS

Recommended for Heavy Work; Extra Strong Non-kinking Galvanized Chain. Center Bars 14 In. Apart

	Each
No. 393—With **Three Chains**; 5-Foot Hardwood Bars.....	$10.50
No. 479 With **Four Chains**; 6-Foot Hardwood Bars .. Weight, No. 393, 80 Lbs.; No. 479, 35 Lbs. Each	13.50

SLING LOCKS

CENTER TRIP

Made of Malleable Iron, is Light, Strong and Fully Warranted. It is impossible to misplace this Lock on a Wagon; It makes no difference in what position you put it, it is operative however placed.

	Each
No. 57—Weight ⅛ Lb. Each.....	$1.50

END TRIP, SINGLE HOOK

Provided with One Large Hook only, from which Braided Loops at End of Rope Sling may be Hooked. This Style of Lock is Used with Home Made Slings.

	Each
No. 552—Weight 2 Lbs. Each	$2.25

END TRIP, DOUBLE HOOK

Provided with Two Hooks that Engage Rings on End of Sling. This Style of Lock is Used with such Slings as the Olsen Pattern.

	Each
No. 551—Weight 2 Lbs. Each.....	$2.25

Weight 50 Lbs. per Dozen

LITTER AND FEED CARRIERS

FULL ROLLER BEARING FOR USE ON STAR DOUBLE ANGLE STEEL TRACK

Construction

Made of Malleable Iron and Steel throughout, with substantial Tub of Galvanized Steel. This Carrier has two swivel trucks fitted with two tracker wheels each, provided with **Steel Roller Bearings.** The swivel trucks afford a double bearing on the track which allows the carrier to run steadily. To each of the swivel trucks is attached a supporting bracket in which revolves the roller bearing shaft on which the supporting chains wind. Tub is supported by channel steel bails which are attached to the roller bearing shaft by an electrically welded steel chain which is run under the pulley at each end of the shaft, making it possible to lift a heavy load easily and quickly.

Operation

The tub is raised by means of an endless chain that runs over the main driving wheel at the end of the shaft. It is lowered by pulling the chain which releases the ratchet allowing the tub to freely descend to any desired point. When the tub is raised up to the shaft it becomes perfectly rigid so that there is no swinging motion.

If desirable to follow the carrier out to the dumping place the tub can be tripped and dumped by a rope attached to the trip chain. However, it is not necessary to leave the barn to run this carrier out, dump it wherever desired and return it to the barn.

LITTER CARRIERS

	Each
No. 333-2—Complete with No. 2 Galvanized Tub; Capacity 6 bu.; Width 26 in., Length 41 in., Depth 14 in.; Weight 95 Lbs.	$ 6.90

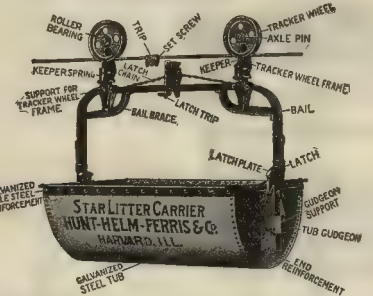
WRITE FOR SPECIAL LITTER AND FEED CARRIER CATALOG

Kelley-How-Thomson Co. of Duluth

LITTER AND FEED CARRIERS
FOR ROD TRACK



ROLLER BEARING

This Carrier combines all the desirable and essential features necessary for a perfect conveyor, the manufacturers having eliminated all the objectionable features and added improvements that place it in the front rank of Rod Track Carriers.

There is no trouble about this Carrier turning either a right hand or left hand switch curve as it is only necessary to lift the wheels one at a time from the track and swivel them around, according to whether it be desired to run the carrier on a left hand or right hand switch. The bail provides for three adjustments, thus lowering and raising the tub to the desired height.

The all steel tub dumps either way, locks at both ends, and thus holds absolutely rigid. Impossible for it to jump the track.

In operation this carrier is automatic. By putting up the rod at the proper angle the carrier when loaded, can be made to run out and dump at the desired point by simply giving it a vigorous shove. When dumped, the empty carrier returns to the barn automatically. The tub of the carrier is dumped by means of a trip block, which can be placed at any desired point on the track. This carrier can be instantly secured to the track at any point to hold it from moving along the track while loading.

Each

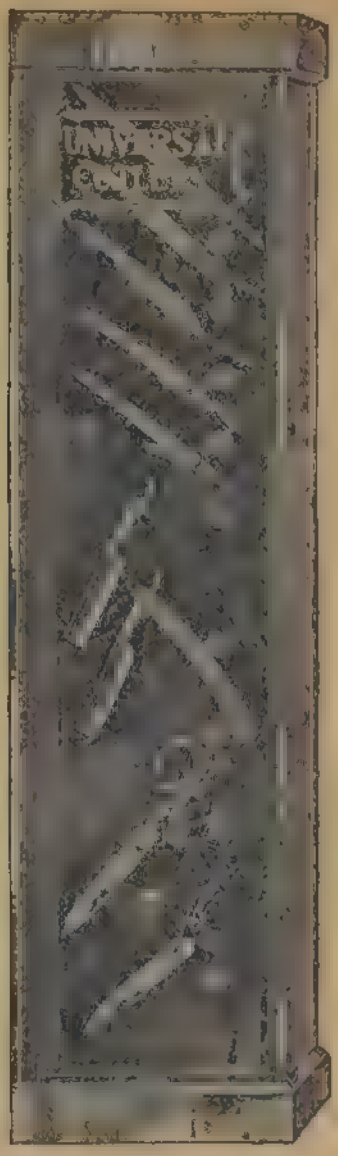
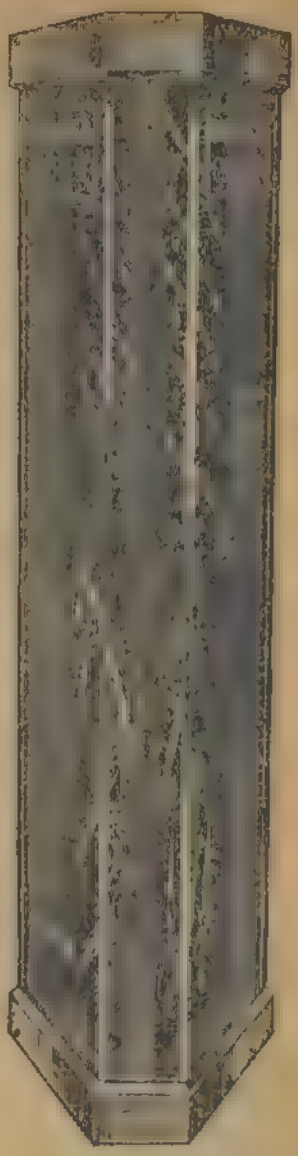
Weight per Dozen Pairs About 30 Lbs.

UNIVERSAL CUTLERY DISPLAY CASE



Side View



Front View

The sale of cutlery is perhaps more dependent upon attractive display than almost any line carried by the merchant. Attractive show cases, in turn, give the store a bright appearance which enhances the general effect and of course contributes to the sales.

The outside Universal Cutlery Case calls attention to a selected list of cutlery items in a different way from the usual display case. They stand up and intercept the eye. They cannot be overlooked.

Means are provided for securing all kinds of cutlery effectively with number and price to attract the attention of the prospective customer.

No. 1—Plate glass front and sides. Nickel plated top and base oak trimmings. Green plush removable boards. Height, 33½ inches, width of back, 8¾ inches; outside depth, 8 inches. Shipping weight, 30 lbs.

Each $15.00

—Stiletto— POCKET KNIVES

—Stiletto— Pocket Knives are manufactured in one of the oldest and largest pocket cutlery factories in the United States. From years of operation and experience they are producing a knife which shows workmanship and finish.

OUR GUARANTEE

—Stiletto— Pocket Knives are made of **Highest Grade** English crucible steel, hand forged and tempered uniform.
They are made by skilled workmen.
And for quality, style and finish are unexcelled.
We do not warrant them not to wear out or break if they are abused.
They are not made for opening cans or drawing nails.
And should not be sharpened on a dry stone or honed flat.
Use a fine oil stone and hold blade at an angle of 20 degrees in order to secure a chisel edge.
Oil the joints occasionally, as they are liable to wear rough and the blade points protrude.

WARRANTY ADOPTED BY AMERICAN POCKET CUTLERY MANUFACTURERS

We warrant our Pocket Knives only against flaws in blades and springs. Knives that are much worn, or that have been reground by dealers or consumers, or that have more than one blade broken will not be subject to return or exchange.

For the convenience of our customers, we **stamp the number of the knife on the tang of the large blade which avoids confusion of your stock.** On the tang of the smaller blade we stamp "Oil the Joints," which brings to the attention of the user the necessity of oiling the joints, thereby prolonging the life of the knife.

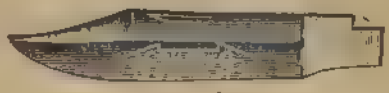
The following illustrations show the different styles of blades that are furnished in —Stiletto— brand pocket knives:

Spear

Saber

Pen

Clip



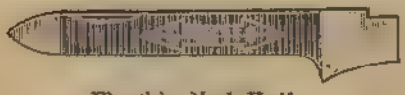
Saber Clip

Spey

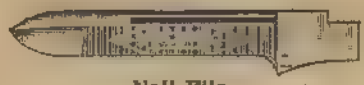
Sheep Foot

Budding

Pruning



Flexible Nail Knife



Nail File
